

# Contents

Preface / vii

## 1 Random Signals / 1

- 1.0 Introduction / 1
- 1.1 Characterization and Classification / 1
- 1.2 Correlation and Covariance Functions / 10
- 1.3 Gaussian Processes and Wiener Processes / 18
- 1.4 Poisson Process / 24
- 1.5 Mean Square Calculus / 34
- 1.6 Markov Process / 40
- 1.7 Renewal Process / 86
- 1.8 Bibliographical Notes / 98
- Exercises / 98

## 2 Stationary Random Signals / 109

- 2.1 Introduction / 109
- 2.2 Linear Systems with Random Signal Input / 115
- 2.3 Cross Covariance and Coherence / 126
- 2.4 Narrowband Noise Process / 137
- 2.5 Orthogonal Expansion and Sampling / 141
- 2.6 Ergodicity and Entropy / 155
- 2.7 Zero Crossing Detectors / 170
- 2.8 Nonlinear Systems / 180
- 2.9 Bibliographical Notes / 197
- Exercises / 197

## 3 Estimation, Optimization, and Detection / 212

- 3.0 Introduction / 212
- 3.1 Sampling Distribution / 212
- 3.2 Estimation of Parameter: Point Estimation / 217
- 3.3 Estimation Criteria / 223
- 3.4 Maximum Likelihood Estimation / 228
- 3.5 Linear Mean Square Estimation / 235
- 3.6 Method of Least Squares: Regression Models / 238

**xii CONTENTS**

3.7	Interval Estimation: Confidence Interval	/ 247
3.8	Cramer-Rao Inequality	/ 249
3.9	Estimation in Colored Noise	/ 259
3.10	Optimum Linear Filters	/ 266
3.11	Signal Detection	/ 292
3.12	Bibliographical Notes	/ 309
	Exercises	/ 309
<b>4</b>	<b>Spectral Analysis</b>	<b>/ 319</b>
4.0	Introduction	/ 319
4.1	The Periodogram Approach	/ 319
4.2	Spectral Windows	/ 329
4.3	Autoregressive Method	/ 337
4.4	The Maximum Entropy Method	/ 343
4.5	Maximum Likelihood Estimator	/ 354
4.6	Pisarenko and Prony Methods	/ 359
4.7	Adaptive Lattices Method	/ 369
4.8	Cross Spectral Estimation	/ 387
4.9	Bibliographical Notes	/ 395
	Exercises	/ 396
<b>5</b>	<b>Prediction, Filtering, and Identification</b>	<b>/ 412</b>
5.0	Introduction	/ 412
5.1	State Space Representation	/ 413
5.2	The Innovation Process	/ 457
5.3	Linear Prediction and Kalman Filtering	/ 476
5.4	Smoothing	/ 498
5.5	Extended Kalman Filtering	/ 504
5.6	System Identification	/ 509
5.7	Bibliographical Notes	/ 526
	Exercises	/ 527
	Appendix 1. Linear Systems Analysis	/ 549
	Appendix 2. Probability	/ 566
	Appendix 3. Stochastic Integrals	/ 589
	Appendix 4. Hilbert Space	/ 598
	Bibliography	/ 609
	Index	/ 619
