

# CONTENTS

<b>Foreword</b>	<b>vii</b>
<b>Preface</b>	<b>ix</b>
<b>Chapter 1 Properties of Negative Ions</b>	<b>1</b>
1.1 Methods of Determining the Electron-Binding Energy of a Negative Ion	1
1.2 Electron Affinities of Atoms	17
1.3 The Electron Affinity of Molecules and Radicals	21
1.4 Behavior of a Weakly Bound Electron in a Negative Ion	26
References	42
<b>Chapter 2 Complex and Unstable Negative Ions</b>	<b>48</b>
2.1 Dissociation Energy of Complex Negative Ions	48
2.2 Production of Complex Negative Ions in Ternary Collisions	51
2.3 Formation of a Complex Negative Ion During Electron Attachment to a Polyatomic Molecule	56
2.4 Autodetaching States of Negative Ions	59
References	61
<b>Chapter 3 Collisions between Negative Ions and Atoms</b>	<b>63</b>
3.1 Interaction between a Negative Ion and an Atom	63
3.2 Detachment by Collision with an Atom	71
3.3 Electron Detachment during Collisions of a Negative Ion in a Gas	78
3.4 Resonance Charge Transfer Involving Negative Ions	83
3.5 Mobility of Negative Ions in Gases	87
References	92

<b>Chapter 4</b>	<b>Production of Negative Ions in Gases</b>	<b>96</b>
4.1	Dissociative Attachment of Electrons to Molecules	96
4.2	Energy and Angular Distribution of the Products of Dissociative Attachment of an Electron to a Molecule	107
4.3	Attachment of the Electron to Complex Molecules	111
4.4	Production of Negative Ions in Ternary Collisions between Electrons and Molecules	117
	References	122
<b>Chapter 5</b>	<b>Negative-Ion Detachment during Collisions with Charged Particles</b>	<b>125</b>
5.1	Binary Recombination of Positive and Negative Ions	125
5.2	Ternary Recombination of Positive and Negative Ions in a Gas	134
5.3	Detachment from a Negative Ion by Electron Impact	143
	References	146
<b>Chapter 6</b>	<b>Interaction of Negative Ions with Radiation</b>	<b>148</b>
6.1	Photodetachment from an Atomic Negative Ion	148
6.2	Radiative Attachment of an Electron to an Atom or Molecule	161
6.3	Photodissociation of Negative Ions	164
	References	166
<b>Index</b>		<b>169</b>
