

CONTENTS

PREFACE	xv
SYMBOLS AND ABBREVIATIONS	xix
PHYSICAL CONSTANTS AND CONVERSION FACTORS	xxv
PRACTICAL FORMULAE	xxvi
1 INTRODUCTION	1
1.1 Materials Processing / 1	
1.2 Plasmas and Sheaths / 6	
Plasmas / 6	
Sheaths / 11	
1.3 Discharges / 16	
Rf Diodes / 16	
High-Density Sources / 19	
1.4 Symbols and Units / 23	
2 BASIC PLASMA EQUATIONS AND EQUILIBRIUM	25
2.1 Introduction / 25	
2.2 Field Equations, Current, and Voltage / 26	
Maxwell's Equations / 26	

- 2.3 The Conservation Equations / 31
 - Boltzmann's Equation / 31
 - Macroscopic Quantities / 32
 - Particle Conservation / 33
 - Momentum Conservation / 34
 - Energy Conservation / 36
 - Summary / 37
- 2.4 Equilibrium Properties / 37
 - Boltzmann's Relation / 39
 - Debye Length / 40
 - Quasineutrality / 42

3 ATOMIC COLLISIONS

45

- 3.1 Basic Concepts / 45
 - Elastic and Inelastic Collisions / 45
 - Collision Parameters / 46
 - Differential Scattering Cross Section / 48
- 3.2 Collision Dynamics / 51
 - Center-of-Mass Coordinates / 51
 - Energy Transfer / 54
 - Small-Angle Scattering / 55
- 3.3 Elastic Scattering / 57
 - Coulomb Collisions / 57
 - Polarization Scattering / 60
- 3.4 Inelastic Collisions / 64
 - Atomic Energy Levels / 64
 - Electric Dipole Radiation and Metastable Atoms / 68
 - Electron Ionization Cross Section / 71
 - Electron Excitation Cross Section / 72
 - Ion-Atom Charge Transfer / 73
 - Ion-Atom Ionization / 77
- 3.5 Averaging Over Distributions and Surface Effects / 77
 - Averaging Over a Maxwellian Distribution / 77
 - Energy Loss per Electron-Ion Pair Created / 81
 - Surface Effects / 82

4 PLASMA DYNAMICS

85

- 4.1 Basic Motions / 85
 - Motion in Constant Fields / 85

	<i>E</i> × <i>B</i> Drifts / 88	
	Energy Conservation / 89	
4.2	Nonmagnetized Plasma Dynamics / 91	
	Plasma Oscillations / 91	
	Dielectric Constant and Conductivity / 93	
	Ohmic Heating / 96	
	Electromagnetic Waves / 97	
	Electrostatic Waves / 98	
4.3	Guiding Center Motion / 100	
	Parallel Force / 101	
	Adiabatic Constancy of the Magnetic Moment / 102	
	Drift Due to Motion Along Field Lines (Curvature Drift) / 103	
	Drift Due to Gyration (Gradient Drift) / 104	
	Polarization Drift / 105	
4.4	Dynamics of Magnetized Plasmas / 107	
	Dielectric Tensor / 108	
	The Wave Dispersion / 110	
4.5	Waves in Magnetized Plasmas / 111	
	Principal Electron Waves / 112	
	Principal Waves Including Ion Dynamics / 115	
	The CMA Diagram / 117	
4.6	Wave Diagnostics / 120	
	Interferometer / 120	
	Cavity Perturbation / 122	
	Wave Propagation / 124	
5	DIFFUSION AND TRANSPORT	129
5.1	Basic Relations / 129	
	Diffusion and Mobility / 129	
	Free Diffusion / 130	
	Ambipolar Diffusion / 131	
5.2	Diffusion Solutions / 132	
	One-Dimensional Time-Dependent Solution / 132	
	One-Dimensional Steady-State Solution / 134	
5.3	Low-Pressure Solutions / 137	
	Variable Mobility Model / 137	
	Langmuir Solution / 139	
5.4	Diffusion Across a Magnetic Field / 140	
	Ambipolar Diffusion / 143	

- 5.5 Magnetic Multipole Confinement / 146
 - Magnetic Fields / 146
 - Plasma Confinement / 148
 - Leak Width w / 150

6 DC SHEATHS

154

- 6.1 Basic Concepts and Equations / 154
 - The Collisionless Sheath / 156
- 6.2 The Bohm Sheath Criterion / 157
 - Presheath Requirements / 158
 - Sheath Potential at a Floating Wall / 160
- 6.3 The High-Voltage Sheath / 164
 - Matrix Sheath / 164
 - Child Law Sheath / 164
- 6.4 Generalized Criteria for Sheath Formation / 166
 - Electronegative Gases / 167
- 6.5 Collisional Sheaths / 170
- 6.6 Electrostatic Probe Diagnostics / 171
 - Planar Probe With Collisionless Sheath / 174
 - Non-Maxwellian Electrons / 175
 - Cylindrical Probe With a Collisionless Sheath / 178
 - Double Probes and Emissive Probes / 181
 - Probes in Time-Varying Fields / 184
 - Effect of Collisions and DC Magnetic Fields / 185
 - Probe Construction and Circuits / 186

7 CHEMICAL REACTIONS AND EQUILIBRIUM

191

- 7.1 Introduction / 191
- 7.2 Energy and Enthalpy / 192
- 7.3 Entropy and Gibbs Free Energy / 199
 - Gibbs Free Energy / 203
- 7.4 Chemical Equilibrium / 205
 - Pressure and Temperature Variations / 208
- 7.5 Heterogeneous Equilibrium / 210
 - Equilibrium Between Phases / 210
 - Equilibrium at a Surface / 213

8	MOLECULAR COLLISIONS	217
8.1	Introduction / 217	
8.2	Molecular Structure / 218	
	Vibrational and Rotational Motion / 219	
	Optical Emission / 221	
	Negative Ions / 224	
8.3	Electron Collisions With Molecules / 224	
	Dissociation / 225	
	Dissociative Ionization / 227	
	Dissociative Recombination / 227	
	Example of Hydrogen / 228	
	Dissociative Electron Attachment / 229	
	Polar Dissociation / 232	
	Metastable Negative Ions / 232	
	Electron Impact Detachment / 233	
	Vibrational and Rotational Excitations / 233	
	Elastic Scattering / 234	
8.4	Heavy-Particle Collisions / 234	
	Resonant and Nonresonant Charge Transfer / 236	
	Positive-Negative Ion Recombination / 238	
	Associative Detachment / 239	
	Transfer of Excitation / 241	
	Rearrangement of Chemical Bonds / 243	
	Ion-Neutral Elastic Scattering / 244	
	Three-Body Processes / 245	
8.5	Reaction Rates and Detailed Balancing / 246	
	Temperature Dependence / 247	
	The Principle of Detailed Balancing / 248	
	A Data Set for Oxygen / 251	
8.6	Optical Emission and Actinometry / 254	
	Optical Emission / 256	
	Optical Actinometry / 258	
	O Atom Actinometry / 259	
9	CHEMICAL KINETICS AND SURFACE PROCESSES	265
9.1	Elementary Reactions / 265	
	Relation to Equilibrium Constant / 268	

x CONTENTS

- 9.2 Gas-Phase Kinetics / 269
 - First-Order Consecutive Reactions / 270
 - Opposing Reactions / 273
 - Bimolecular Association With Photon Emission / 274
 - Three-Body Association / 275
 - Three-Body Positive–Negative Ion Recombination / 277
 - Three-Body Electron–Ion Recombination / 278
- 9.3 Surface Processes / 279
 - Positive Ion Neutralization and Secondary Electron Emission / 279
 - Adsorption and Desorption / 283
 - Fragmentation / 287
 - Sputtering / 288
- 9.4 Surface Kinetics / 288
 - Diffusion of Neutral Species / 290
 - Rate Constant for Diffusion / 290
 - Adsorption and Desorption / 292
 - Dissociative Adsorption and Associative Desorption / 293
 - Physical Adsorption / 293
 - Reaction With a Surface / 294
 - Reactions on a Surface / 295

10 PARTICLE AND ENERGY BALANCE IN DISCHARGES 301

- 10.1 Introduction / 301
- 10.2 Electropositive Plasma Equilibrium / 304
 - Basic Properties / 304
 - Uniform Density Discharge Model / 306
 - Nonuniform Discharge Model / 309
- 10.3 Electronegative Plasma Equilibrium / 312
 - Ambipolar Diffusion / 312
 - Oxygen Discharge / 314
 - Uniform Density Model / 315
 - Nonuniform Electronegative Equilibrium / 318
 - Approximate Solutions / 320
 - Simulation Results / 323

11 CAPACITIVE DISCHARGES 327

- 11.1 Homogeneous Model / 328
 - Plasma Admittance / 330
 - Sheath Admittance / 330

	Particle and Energy Balance / 334	
	Discharge Parameters / 337	
11.2	Inhomogeneous Model / 339	
	Collisionless Sheath Dynamics / 340	
	Child Law / 342	
	Sheath Capacitance / 343	
	Ohmic Heating / 344	
	Stochastic Heating / 345	
	Self-consistent Model Equations / 346	
	Scaling / 349	
	Collisional Sheaths / 350	
	Low and Moderate Voltages / 352	
	Ohmic Heating in the Sheath / 353	
	Fast Sheath Heating / 353	
11.3	Experiments and Simulations / 354	
	Experimental Results / 354	
	Particle-in-Cell Simulations / 358	
	Role of Secondaries / 367	
	Implications for Modeling / 368	
11.4	Asymmetric Discharges / 368	
	Capacitive Voltage Divider / 368	
	Spherical Shell Model / 370	
11.5	Magnetically Enhanced Discharges / 373	
	Theory / 374	
	Experimental Results / 377	
11.6	Matching Networks and Power Measurements / 378	
	Power Measurements / 382	
12	INDUCTIVE DISCHARGES	387
12.1	High-Density, Low-Pressure Discharges / 388	
	Inductive Source Configurations / 388	
	Power Absorption and Operating Regimes / 390	
	Discharge Operation and Coupling / 392	
	Capacitive Coupling / 394	
	Matching Network / 395	
12.2	Other Operating Regimes / 396	
	Low-Density Operation / 396	
	Power Transfer Efficiency / 397	
	High-Pressure Discharges / 398	

- 12.3 Planar Coil Configuration / 399
- 12.4 Helical Resonator Discharges / 404

13 WAVE-HEATED DISCHARGES 412

- 13.1 Electron Cyclotron Resonance Discharges / 413
 - Characteristics and Configurations / 413
 - Electron Heating / 418
 - Resonant Wave Absorption / 422
 - Model and Simulations / 428
 - Plasma Expansion / 429
 - Measurements / 433
- 13.2 Helicon Discharges / 434
 - Helicon Modes / 435
 - Antenna Coupling / 438
 - Helicon Mode Absorption / 441
- 13.3 Surface Wave Discharges / 443
 - Planar Surface Waves / 443
 - Cylindrical Surface Waves / 445
 - Power Balance / 446

14 DC DISCHARGES 450

- 14.1 Qualitative Characteristics of Glow Discharges / 450
 - Positive Column / 451
 - Cathode Sheath / 452
 - Negative Glow and Faraday Dark Space / 452
 - Anode Fall / 452
- 14.2 Analysis of the Positive Column / 454
 - Calculation of T_e / 454
 - Calculation of E and n_0 / 455
- 14.3 Analysis of the Cathode Sheath / 457
 - Vacuum Breakdown / 457
 - Cathode Sheath / 461
- 14.4 The Negative Glow and Faraday Dark Space / 464
- 14.5 Planar Magnetron Discharges / 465
 - Limitations of Glow Discharge Sputtering Source / 465
 - Magnetron Configuration / 466
 - Discharge Model / 467

15	ETCHING	472
15.1	Etch Requirements and Processes / 472	
	Plasma Etch Requirements / 473	
	Etch Processes / 477	
15.2	Etching Kinetics / 480	
	Surface Kinetics / 481	
	Discharge Kinetics / 485	
	Chemical Framework / 489	
15.3	Halogen-Atom Etching of Silicon / 490	
	Pure Chemical F-Atom Etching / 490	
	Ion Energy-Driven F-Atom Etching / 494	
	CF ₄ Discharges / 497	
	O ₂ and H ₂ Feedstock Additions / 501	
	Cl-Atom Etching / 503	
15.4	Other Etch Systems / 504	
	F and CF _x Etching of SiO ₂ / 505	
	Si ₃ N ₄ Etching / 506	
	Aluminum Etching / 507	
	Resist Etching / 508	
16	DEPOSITION AND IMPLANTATION	512
16.1	Introduction / 512	
16.2	Plasma-Enhanced Chemical Vapor Deposition / 514	
	Amorphous Silicon / 515	
	Silicon Dioxide / 518	
	Silicon Nitride / 522	
16.3	Sputter Deposition / 522	
	Physical Sputtering / 522	
	Reactive Sputtering / 525	
16.4	Plasma-Immersion Ion Implantation / 526	
	Collisionless Sheath Model / 528	
	Collisional Sheath Model / 533	
	Applications of PIII to Materials Processing / 536	
A	COLLISION DYNAMICS	541
	Coulomb Cross Section / 543	

B THE COLLISION INTEGRAL AND KINETIC THEORY	547
Boltzmann Collision Integral / 547	
Maxwellian Distribution / 548	
The Krook Collision Operator / 549	
Kinetic Equations for Electrons / 550	
Diffusion and Mobility / 551	
Druyvesteyn Distribution / 552	
Electron Distribution in an Rf Field / 553	
C STOCHASTIC HEATING IN AN INDUCTIVE DISCHARGE	555
REFERENCES	559
INDEX	565
