

Contents*

1. Introduction	1
2. Units of Physical Quantities	3
2.1 Systems of Units in Physics	3
2.2 Fundamental Physical Constants	5
2.3 Systems of Units Based on "Natural Standards"	10
2.4 Tables of Conversion Factors	13

Part I Atoms and Atomic Ions

3. Isotopic Composition, Atomic Mass Table and Atomic Weights of the Elements	19
3.1 Parameters of Stable and Long-Lived Isotopes	19
3.2 Atomic Weights of the Elements and Atomic Mass Table	43
4. Structure of Atomic Electron Shells	52
4.1 Electron Configurations and Ground-State Terms	52
4.2 The Periodic Table	60
4.3 Parameters of Wavefunctions for Valence Electrons in Atoms, Positive and Negative Ions	60
5. Energetics of Neutral Atoms	87
5.1 Ionization Potentials of Atoms	87
5.2 Quantum Defects of Atomic Rydberg States	94
5.3 Fine-Structure Splitting of Atomic Energy Levels	97
5.4 Hyperfine Structure of Atomic Energy Levels	99
5.5 Isotope Shifts of Low-Lying Atomic Levels	110
5.6 Atoms in Static Electric and Magnetic Fields. Atomic Polarizabilities and Magnetic Susceptibilities	117

* References are given just after the introductory text in each section

6. Energetics of Atomic Ions	121
6.1 Ionization Potentials of Atomic Ions	121
6.2 Electron Affinities of Atoms	130
6.3 Energy Levels of Multiply Charged Atomic Ions	133
7. Spectroscopic Characteristics of Neutral Atoms	147
7.1 Low-Lying Atomic Terms	147
7.2 Diagrams of Atomic Energy Levels and Grotrian Diagrams	176
7.3 Atomic Oscillator Strengths in Absorption	222
7.4 Lifetimes of Resonant Excited States in Atoms	230
7.5 Energy Levels and Lifetimes for Metastable States in Atoms	247
7.6 Lifetimes of Atomic Rydberg States	256
8. Spectroscopic Characteristics of Atomic Positive Ions	258
8.1 Low-Lying Terms of Singly Ionized Atoms	258
8.2 Lifetimes of Resonant Excited States in Atomic Ions	280
8.3 Energy Levels and Lifetimes for Metastable States in Singly Ionized Atoms	286
8.4 Optical Parameters of Multiply Charged Atomic Ions	289

Part II Molecules and Molecular Ions

9. Interaction Potentials Between Atomic and Molecular Species	307
9.1 Van der Waals Coefficients for Interatomic Multipole Interactions	307
9.2 Long-Range Exchange Interactions of Atoms	311
9.3 Short-Range Repulsive Interactions Between Atomic and Molecular Species	312
10. Diatomic Molecules	316
10.1 Electron Configurations of Diatomic Molecules	316
10.2 Asymptotic Parameters of Wavefunctions for Valence Electrons in Diatomic Molecules	321
10.3 Spectroscopic Constants of Diatomic Molecules	322
10.4 Potential Energy Curves	364
10.5 Ionization Potentials of Diatomic Molecules	375
10.6 Dissociation Energies of Diatomic Molecules	378
10.7 Lifetimes of Excited Electron States in Diatomic Molecules	382
10.8 Parameters of Excimer Molecules	388
10.9 Einstein Coefficients for Spontaneous Emission from Vibrationally Excited Diatomic Molecules	391

11. Diatomic Molecular Ions	394
11.1 Electron Configurations and Asymptotic Parameters of Wavefunctions for Valence Electrons in Diatomic Molecular Ions	394
11.2 Spectroscopic Constants of Diatomic Molecular Ions	395
11.3 Dissociation Energies of Diatomic Molecular Ions	400
11.4 Electron Affinities of Diatomic Molecules	403
11.5 Proton Affinities of Atoms	404
11.6 Lifetimes of Excited Electron States in Diatomic Molecular Ions	405
12. Van der Waals Molecules	407
12.1 Potential Well Parameters of Van der Waals Molecules	407
12.2 Potential Well Parameters of Van der Waals Molecular Ions	411
12.3 Ionization Potentials of Van der Waals Molecules	413
13. Polyatomic Molecules	415
13.1 Constants of Triatomic Molecules	415
13.2 Ionization Potentials of Polyatomic Molecules	418
13.3 Bond Dissociation Energies of Polyatomic Molecules	419
13.4 Lifetimes of Vibrationally Excited Polyatomic Molecules	422
14. Polyatomic Molecular Ions	429
14.1 Bond Dissociation Energies of Complex Positive Ions	429
14.2 Bond Dissociation Energies of Complex Negative Ions	432
14.3 Electron Affinities of Polyatomic Molecules	434
14.4 Proton Affinities of Molecules	437
15. Electrical Properties of Molecules	439
15.1 Dipole Moments of Molecules	439
15.2 Molecular Polarizabilities	443
15.3 Quadrupole Moments of Molecules	445
Mathematical Appendices	447
A. Coefficients of Fractional Parentage	447
B. Clebsch-Gordan Coefficients	449
Subject Index	461
