<b>1</b>	<b>INTRODUCTION</b>	<b>1</b>
	<i>by C. O. Hines, I. Paghis, T. R. Hartz &amp; J. A. Fejer</i>	
	1.1. The Earth's Upper Atmosphere	1
	1.2. Structure of the Book	2
	1.3. Structure of the Atmosphere	6
	1.4. The Geomagnetic Field	13
	1.5. Ionospheric Research	20
	1.6. Energy Propagation in a Dispersive Anisotropic Medium	24
	1.7. The Sun	27
	1.8. Related Phenomena	28
	1.9. International Cooperation	28
	Bibliography	29
<b>2</b>	<b>SOLAR OPTICAL RADIATION AND ITS ROLE IN UPPER ATMOSPHERIC PROCESSES</b>	<b>31</b>
	<i>by L. Herzberg</i>	
	2.1. Introduction	31
	2.2. The Solar Radiation Incident on the Earth's Atmosphere; the Emitting Layers of the Sun	32
	2.3. Transmission through the Atmosphere	35
	2.4. Absorption	37
	2.5. Airglow	42
		ix

<b>3</b>	<b>THE LOWER IONOSPHERIC REGIONS</b>	<b>46</b>
	<i>by J. S. Belrose</i>	
	3.1. Introduction	46
	3.2. The Formation of Ionized Layers	46
	3.3. The Ionospheric <i>D</i> Region	51
	3.4. The Ionospheric <i>E</i> Region	59
	3.5. Recombination in the <i>D</i> and <i>E</i> Regions	67
	3.6. Collisional Frequencies in the <i>D</i> and <i>E</i> Regions	69
<b>4</b>	<b>THE IONOSPHERIC <i>F</i> REGION</b>	<b>73</b>
	<i>by J. S. Belrose</i>	
	4.1. Introduction	73
	4.2. Morphology of the <i>F</i> Layer	74
	4.3. The Formation of Ionized Layers in the Quiet <i>F</i> Region	84
	4.4. Parameters of the <i>F</i> Region	88
	4.5. <i>F</i> -Region Irregularities	90
<b>5</b>	<b>THE OUTER IONOSPHERIC REGIONS</b>	<b>96</b>
	<i>by W. J. Heikkila &amp; W. I. Axford</i>	
	5.1. Introduction	96
	5.2. Neutral Particles	98
	5.3. Charged Particles of Thermal Energy	109
	5.4. The Earth's Radiation Belts: Introduction	115
	5.5. The Motion of Charged Particles in Magnetic Fields	115
	5.6. The Radiation Belts	125
	5.7. The Geomagnetic Effects of Trapped Particles	129
<b>6</b>	<b>MOTIONS OF THE NEUTRAL ATMOSPHERE</b>	<b>134</b>
	<i>by C. O. Hines</i>	
	6.1. Introduction	134
	6.2. Atmospheric Rotation	134
	6.3. Prevailing Winds	135
	6.4. Tidal Oscillations	138
	6.5. Irregular Winds and Internal Gravity Waves	145
	6.6. Turbulence	153

<b>7</b>	<b>MOTIONS OF IONIZATION</b>	157
	<i>by J. A. Fejer</i>	
	7.1. Introduction	157
	7.2. The Mean Velocity of Charged Particles in the Ionosphere; Conductivity and Diffusion	158
	7.3. The Dynamo Theory	166
	7.4. The Effect of Charged-particle Drifts on Electron Concentration	170
	7.5. Vertical Drifts due to Horizontal Winds in the Neutral Gas	172
 <b>8</b>	 <b>IONOSPHERIC NOISE AND GEOMAGNETIC MICROPULSATIONS</b>	 176
	<i>by R. E. Barrington &amp; J. A. Fejer</i>	
	8.1. Introduction	176
	8.2. Ionospheric Noise	177
	8.3. Geomagnetic Micropulsations	188
	8.4. Observational Characteristics of Micropulsations	190
	8.5. Theories of Micropulsations	194
 <b>9</b>	 <b>SOLAR ACTIVITY AND SHORT-LIVED TERRESTRIAL EFFECTS (SID)</b>	 198
	<i>by W. C. Collins &amp; L. Herzberg</i>	
	9.1. Introduction	198
	9.2. Sunspots; Spot Groups; the Sunspot Cycle	199
	9.3. Solar Flares and Related Phenomena; the Solar Disk Observed in Monochromatic Light	202
	9.4. Sudden Ionospheric Disturbances: Introduction	206
	9.5. Type of Solar Radiation Producing SID's	207
	9.6. Description of SID's	209
	9.7. Ionization During SID's	211
 <b>10</b>	 <b>PARTICLE EMISSIONS FROM THE DISTURBED SUN, AND THE SUN-EARTH ENVIRONMENT</b>	 216
	<i>by T. R. Hartz</i>	
	10.1. Introduction	216
	10.2. The Solar Corona and the Interplanetary Gas	218
	10.3. Magnetic Fields in the Extended Solar Corona	222

	10.4. Observations of the Solar Particles near the Sun	227
	10.5. Observations of the Corpuscular Cloud in the Sun-Earth Space	236
	10.6. Summary	240
<b>11</b>	<b>SOLAR COSMIC RAYS AND THE IONOSPHERE</b>	<b>245</b>
	<i>by G. C. Reid</i>	
	11.1. Introduction	245
	11.2. The Measurement of Ionospheric Absorption	246
	11.3. Ionospheric Effects of Solar Cosmic Rays	248
	11.4. The Nature of Solar Cosmic Rays	255
	11.5. The Characteristic Features of Polar Cap Absorption	257
	11.6. The Use of Ionospheric Sounding to Investigate PCA	265
	11.7. Effects on Low-Frequency Radio Propagation	267
	11.8. Conclusion	268
<b>12</b>	<b>MAGNETIC AND IONOSPHERIC STORMS</b>	<b>271</b>
	<i>by I. Paghis</i>	
	12.1. Introduction	271
	12.2. Upper Atmospheric Storms and Solar Activity	275
	12.3. The Average Characteristics of Magnetic and Ionospheric Storms	282
	12.4. Magnetic Storm Classification	284
	12.5. Life History of a Storm	286
	12.6. Worldwide Storm Characteristics	292
<b>13</b>	<b>OPTICAL AURORA</b>	<b>299</b>
	<i>by R. Montalbetti</i>	
	13.1. Introduction	299
	13.2. Geographical Distribution	301
	13.3. Form and Brightness	302
	13.4. Height	304
	13.5. Orientation	305
	13.6. Luminosity	307
	13.7. Motion	307
	13.8. Solar Influence	308
	13.9. Associated Phenomena	309
	13.10. Auroral Spectrum	309
	13.11. Temperatures	312
	13.12. Hydrogen Emissions	313
	13.13. Auroral Particles	317

<b>14</b>	<b>RADIO AURORA</b>	<b>319</b>
	<i>by B. C. Blevis &amp; C. Collins</i>	
	14.1. Introduction	319
	14.2. Reflection and Scattering in Radio Aurora	320
	14.3. Auroral Absorption of Radio Waves	327
	14.4. Radio Noise Emissions from the Aurora	330
	14.5. Concluding Remarks	331
 <b>15</b>	 <b>THEORY OF GEOMAGNETIC AND AURORAL STORMS</b>	 <b>334</b>
	<i>by C. O. Hines &amp; G. C. Reid</i>	
	15.1. Introduction	334
	15.2. Geomagnetic Storms	335
	15.3. Auroral Theory	351
	15.4. Conclusion	360
 <b>16</b>	 <b>EPILOGUE</b>	 <b>363</b>
	<i>by C. O. Hines, I. Paghis, T. R. Hartz &amp; J. A. Fejer</i>	
 <b>APP. I</b>	 <b>WAVE PROPAGATION IN A HOMOGENEOUS IONIZED GAS</b>	 <b>371</b>
	<i>by R. E. Barrington</i>	
	I.1. Introduction	371
	I.2. The Hydrodynamic Approximation	372
	I.3. The Dispersion Equation of Radio Waves	375
	I.4. Graphical Representation of the Dispersion Equation	380
	I.5. Reflection Conditions	384
	I.6. QL and QT Approximations	385
	I.7. Effects of Collisions on the Refractive Indices	386
	I.8. Whistler Dispersion	390
	I.9. The Dispersion Equation of Hydromagnetic Waves	392
 <b>APP. II</b>	 <b>WAVE PROPAGATION IN AN INHOMOGENEOUS MEDIUM</b>	 <b>396</b>
	<i>by J. A. Fejer</i>	
	II.1. Introduction	396
	II.2. Propagation in a Horizontally Stratified Medium	397
	II.3. Ray Solutions	398

II.4. Limits of the Ray Approximation	403
II.5. Propagation in an Irregular Medium	407
II.6. The Phase-changing Screen	408
II.7. The Angular Power Spectrum and the Autocorrelation Function	412
II.8. Weak Scattering by Three-dimensional Irregularities	415
II.9. Multiple Scattering	418
II.10. Incoherent Scattering	418
INDEX	425
