

TABLE OF CONTENTS

PREFACE		v
LIST OF FIGURES		xi
GLOSSARY		xv
1.0	INTRODUCTION	1
1.1	Suggested Readings	10
2.0	FUNDAMENTAL CONCEPTS	11
2.1	Basic Concepts of Reliability	11
2.2	References	21
3.0	ASSESSMENT OF RELIABILITY FUNCTION	23
3.1	Non-parametric Reliability Function Assessment	23
3.2	Parametric Reliability Function Assessment	27
3.3	Exercises	30
3.4	References	31
4.0	RELIABILITY OF SERIES AND PARALLEL SYSTEMS	33
4.1	Simple Series Systems	33
4.1.1	Application to Components with Exponential Failure Densities	35
4.2	Simple Parallel Systems	36
4.2.1	Relation Between MTBF and $R(t)$ in Simple Exponential Redundant System	38
4.3	Variations of Simple Redundant Systems	42
4.4	Analysis of Complex Series Redundant System	48
4.5	Off-Line Redundant Systems	58
4.6	Exercises	61
4.7	References	63
5.0	FAILURE MODE AND EFFECTS ANALYSIS - FAULT TREE ANALYSIS	64
5.1	Common Cause Failure	65
5.2	Complex System Reliability Networks	66
5.3	Fault Tree Analysis	69
5.3.1	Min Cut Sets of Fault Trees	74
5.4	Exercises	75
5.5	References	76
Appendix 5A	Performance of a Failure Mode and Effects Analysis	78
Appendix 5B	Performance of a Maintainability Engineering Analysis (MEA)	81
6.0	MULTIVARIABLE PROBABILITY DISTRIBUTIONS AND STOCHASTIC PROCESSES	83
6.1	Multivariable Probability Distributions	83
6.2	Stochastic Processes	88
6.3	Markov Processes	94
6.4	Exercises	111
6.5	References	113

VIII

7.0	THE GENERALIZED FAILURE PROCESS FOR NON-MAINTAINED SYSTEMS	114
7.1	Solution Using Laplace Transforms	120
7.2	Stand-by (Off Line) Redundant System	122
7.3	Series Systems	127
7.4	Redundant (On-Line) Parallel Systems	129
7.5	State-Dependent Reliability Models	131
7.6	Linear Stress Model	132
7.7	The Effect of Switching	134
7.8	Exercises	140
7.9	References	140
8.0	ANALYSIS OF MAINTAINED SYSTEMS	141
8.1	Systems Availability	142
8.2	Markov Models for Maintained Systems	148
8.2	Maintained Series Systems	151
8.2	Maintained Parallel Systems	153
8.3	Development of the General Expression for the Mean Time to Failure of a Markov Chain	167
8.3.1	Mean Time to Failure and Variance of Time to Failure of Non-Maintained and Maintained Systems	170
8.4	Models of Maintained Systems with Redundant Off-Line Components	179
8.5	Exercises	197
8.6	References	200
9.0	STRATEGIES FOR REPAIR POLICIES	202
9.0.1	General Repair Strategy Determination	204
9.0.2	Cost of Scheduled Overhauls and Inspections	205
9.0.3	Spare Part Inventory Provisioning	207
9.1	Use of Dynamic Programming in Systems Reliability	210
9.1.1	Complex system Reliability Analysis Under Constraints	214
9.1.2	Optimization of Multistage Decision Processes	215
9.1.3	Complex System with Component Stand-by	218
9.1.4	Complex System with Switching	218
9.1.5	Reliability of Complex System with Component Maintenance	221
9.1.6	Analysis of Component Failure	223
9.1.7	Conclusions	226
9.2	The Use of the Lagrange Multiplier Method	227
9.2.1	System Involving Two Types of Constraints	229
9.3	Optimum Maintenance Policies by Dynamic Programming	232
9.4	Spare Part Provisioning Models	236
9.5	System Performance Evaluation	243
9.6	Exercises	249
9.7	References	251
10.0	EFFECTS OF COMPONENT INTERACTION	253

10.1	Effect of Interaction of Component Reliability	254
10.2	Analysis of "Wear" Rates	256
10.3	Component Reliability	263
10.4	System Reliability	265
10.5	Use of Networks in the analysis of Interactive Systems Reliability, Maintainability, and Availability	266
10.6	Exercises	269
10.7	References	269
11.0	APPLICATION OF FAULT TREE AND OTHER NETWORK TECHNIQUES	271
11.1	Implementation of Fault Tree Analysis	274
11.1.1	Representing Fault Trees by Networks	275
11.2	Uncertainty in Reliability Analysis	277
11.2.1	GERT Reliability Networks with Uncertainty	278
11.3	References	282
12.0	RELIABILITY AND RISK IN PERSPECTIVE	284
12.1	General Considerations	284
12.1	Risk Attitudes	285
12.2	Analysis of Risk	286
12.2.1	Reliability and Risk Assessment	287
12.3	Issues and Concerns	288
Appendix A	BASIC CONCEPTS OF PROBABILITY AND STATISTICS	291
Appendix B	MATRIX ALGEBRA AND TRANSFORMATIONS	327
Appendix C	TESTING FOR MARKOV PROPERTIES	346
Appendix D	NON-MARKOVIAN SYSTEMS	372
Appendix E	INTRODUCTION TO FLOW GRAPHS AND GERT	376
Appendix F	STATISTICAL TABLES	390
	INDEX	423
