

Contents

1. Introduction	1
1.1 Substitutional Defects in Alkali Halide Crystals	3
1.2 Tunneling Systems in Amorphous Solids	6
2. Tunneling of a Single Defect	9
2.1 Energy Spectrum and Tunneling States	9
2.2 Dielectric Response Function	14
2.3 Elastic Response Function	16
2.4 Thermal Conductivity	25
2.5 Summary	26
3. Tunneling of a Coupled Defect Pair	27
3.1 Perturbation Theory	27
3.2 Configuration NN2	31
3.3 Configuration NN1	37
3.4 Configuration NN3	39
3.5 Rotary Echoes	40
3.6 Discussion	46
4. A Pair of Two-Level Systems	51
4.1 Two-State Approximation	51
4.2 The Pair Model	53
4.3 The Statistical Operator	54
4.4 Density of States	57
4.5 Specific Heat	58
4.6 Dynamic Susceptibility	61
5. Cross-Over to Relaxation: Mori Theory	67
5.1 Continued Fraction Expansion	69
5.2 Mode-Coupling Approximation	77
5.3 Markov Approximation	80
5.4 Mean-Field Approximation for κ^2	82
5.5 Density of States	84
5.6 Specific Heat	87

5.7	Resonant Susceptibility	92
5.8	Relaxational Susceptibility	96
5.9	Discussion	107
5.10	Summary and Outlook	112
6.	The Tunneling Model	115
6.1	Low-Temperature Properties of Glasses	115
6.2	The Tunneling Model	118
6.3	Distribution of the Parameters Δ_0 and Δ	121
6.4	The Heat Bath	122
7.	Tunneling Systems in Amorphous Solids	125
7.1	Coherent Tunneling: Perturbation Theory	126
7.2	Incoherent Tunneling: Mode-Coupling Theory	129
7.3	Dynamics Beyond the Two-Level Approximation	135
7.4	Sound Propagation	136
7.5	Comparison with Experimental Results	142
7.6	Summary	149
8.	Small-Polaron Approach	153
8.1	Break-Down of Perturbation Theory	153
8.2	Small-Polaron Representation	154
8.3	Limit of Zero Damping	157
8.4	Approximation Scheme	158
8.5	The Damping Rate Γ_1	163
8.6	Cross-Over to Incoherent Motion	168
8.7	The Correction Term Σ_2	170
8.8	Discussion	177
8.9	Summary and Conclusion	183
A.	Spectral Representation	185
Appendices		185
B.	Mori's Reduction Method	187
B.1	Scalar Product	187
B.2	Correlation Matrix of Relevant Operators	188
B.3	Continued Fraction Expansion	189
B.4	Approximations	190
C.	Average over Disorder	193
C.1	Distribution of Dipolar Couplings J_{ij}	193
C.2	The Distribution Function $Q(I)$	195
C.3	Distribution of τ_i	197
D.	The Zero-Frequency Limit of $K_i^I(z)$	199

E. Small-Polaron Approach	203
E.1 Time Correlation Functions of Polaron Operators	203
E.2 Upper and Lower Bounds for Γ_1	204
References	207
