## Preface

xi

## Part 1: Introductory articles

<b>Survey of Hamiltonian dynamics</b> R S MacKay and J D Meiss	3
<b>Is the Solar System stable?</b> J K Moser <i>Math. Intelligencer</i> <b>1</b> 65–71 (1978)	20
<b>Regular and irregular motion</b> M V Berry <i>Topics in Nonlinear Dynamics</i> (ed S Jorna), Am. Inst. Phys. Conf. Proc. <b>46</b> 16–120 (1978)	27
<b>The mechanisms of stochasticity in classical dynamical systems</b> A S Wightman <i>Perspectives in Statistical Physics</i> (ed H J Raveché) pp 343–63 (1981)	54

## Part 2: Equilibria and periodic orbits

<b>Lectures on Hamiltonian systems</b> J K Moser <i>Mem. Am. Math. Soc.</i> <b>81</b> 1–60 (1968)	77
<b>Stability of equilibria of Hamiltonian systems</b> R S MacKay <i>Nonlinear Phenomena and Chaos</i> (ed Sarben Sarkar) pp 254–70 (1986)	137
<b>On the periodic motions of dynamical systems</b> G D Birkhoff <i>Acta. Math.</i> <b>50</b> 359–79 (1927)	154
<b>Linear stability of periodic orbits in Lagrangian systems</b> R S MacKay and J D Meiss <i>Phys. Lett.</i> <b>98A</b> 92–4 (1983)	175

<b>Generic bifurcation of periodic points</b>	178
K R Meyer	
Trans. Am. Math. Soc. <b>149</b> 95–107 (1970)	
<b>Universal behaviour in families of area-preserving maps</b>	191
J M Greene, R S MacKay, F Vivaldi and M J Feigenbaum	
Physica <b>3D</b> 468–86 (1981)	
<b>Quasi-elliptic periodic points in conservative dynamical systems</b>	210
S E Newhouse	
Am. J. Math. <b>99</b> 1061–87 (1977)	
<b>Part 3: Quasiperiodic orbits</b>	
<b>Geodesics on a two-dimensional Riemannian manifold with periodic coefficients</b>	239
G A Hedlund	
Ann. Math. <b>33</b> 719–39 (1932)	
<b>Small denominators and problems of stability of motion in classical and celestial mechanics</b>	260
V I Arnol'd	
Russ. Math. Surveys <b>18:6</b> 85–191 (1963)	
<b>Variational principles for invariant tori and cantori</b>	367
I C Percival	
Nonlinear Dynamics and the Beam–Beam Interaction (ed M Month and J C Herrera), Am. Inst. Phys. Conf. Proc. <b>57</b> 302–10 (1979)	
<b>Periodic and quasi-periodic orbits for twist maps</b>	376
A Katok	
Dynamical Systems and Chaos (ed L Garrido), Springer Lect. Notes Phys. <b>179</b> 47–65 (1983)	
<b>Non-existence of invariant circles</b>	395
J N Mather	
Erg. Theor. Dyn. Sys. <b>4</b> 301–9 (1984)	
<b>Part 4: Breakup of invariant tori</b>	
<b>Resonance processes in magnetic traps</b>	407
B V Chirikov	
J. Nucl. Energy C <b>1</b> 253–60 (1960)	
<b>Destruction of magnetic surfaces by magnetic field irregularities</b>	415
M N Rosenbluth, R Z Sagdeev, J B Taylor and G M Zaslavski	
Nucl. Fusion <b>6</b> 297–300 (1966)	

<b>A method for determining a stochastic transition</b>	419
J M Greene	
J. Math. Phys. <b>20</b> 1183–201 (1979)	
<b>Fractal diagrams for Hamiltonian stochasticity</b>	438
G Schmidt and J Bialek	
Physica <b>5D</b> 397–404 (1982)	
<b>Large-scale stochasticity in Hamiltonian systems</b>	446
D F Escande	
Physica Scripta <b>T2/1</b> 126–41 (1982)	
<b>A renormalisation approach to invariant circles in area-preserving maps</b>	462
R S MacKay	
Physica <b>7D</b> 283–300 (1983)	

## Part 5: Chaotic behaviour

<b>Roughness of geodesic flows on compact Riemannian manifolds of negative curvature</b>	483
D V Anosov	
Sov. Math.-Dokl. <b>3</b> 1068–70 (1962)	
<b>Ergodic properties of geodesic flows on closed Riemannian manifolds of negative curvature</b>	486
D V Anosov	
Sov. Math.-Dokl. <b>4</b> 1153–6 (1963)	
<b>Markov partitions and C-diffeomorphisms</b>	490
Ya G Sinai	
Funct. Anal. Appl. <b>2</b> 61–82 (1968)	
<b>Ljapunov characteristic exponents and ergodic properties of smooth dynamical systems with an invariant measure</b>	512
Ja B Pesin	
Sov. Math.-Dokl. <b>17</b> 196–9 (1976)	
<b>Ergodicity of linked twist maps</b>	516
R Burton and R W Easton	
Springer Lect. Notes Math. <b>819</b> 35–49 (1980)	
<b>Principles for the design of billiards with nonvanishing Lyapunov exponents</b>	531
M Wojtkowski	
Commun. Math. Phys. <b>105</b> 391–414 (1986)	

<b>Shift automorphisms in the Hénon mapping</b>	555
R Devaney and Z Nitecki	
Commun. Math. Phys. <b>67</b> 137–46 (1979)	

## Part 6: Mixed systems

<b>A model problem with the coexistence of stochastic and integrable behaviour</b>	569
M Wojtkowski	
Commun. Math. Phys. <b>80</b> 453–64 (1981)	
<b>Fat fractals on the energy surface</b>	581
D K Umberger and J D Farmer	
Phys. Rev. Lett. <b>55</b> 661–4 (1985)	
<b>Long-time correlations in the stochastic regime</b>	585
C F F Karney	
Physica <b>8D</b> 360–80 (1983)	
<b>Transport in Hamiltonian systems</b>	606
R S MacKay, J D Meiss and I C Percival	
Physica <b>13D</b> 55–81 (1984)	
<b>Instability of dynamical systems with several degrees of freedom</b>	633
V I Arnol'd	
Sov. Math.–Dokl. <b>5</b> 581–5 (1964)	
<b>Behavior of Hamiltonian systems close to integrable</b>	638
N N Nekhoroshev	
Funct. Anal. Appl. <b>5</b> 338–9 (1971)	
<b>Melnikov's method and Arnold diffusion for perturbations of integrable Hamiltonian systems</b>	640
P J Holmes and J E Marsden	
J. Math. Phys. <b>23</b> 669–75 (1982)	
<b>Arnold diffusion, ergodicity and intermittency in a coupled standard mapping</b>	647
K Kaneko and R J Bagley	
Phys. Lett. <b>110A</b> 435–40 (1985)	

## Part 7: Applications

<b>Nature of the Kirkwood gaps in the asteroid belt</b>	655
S F Dermott and C D Murray	
Nature <b>301</b> 201–5 (1983)	

<b>The chaotic rotation of Hyperion</b>	660
J Wisdom, S J Peale and F Mignard	
Icarus <b>58</b> 137–52 (1984)	
<b>A method for mapping a toroidal magnetic field by storage of phase stabilized electrons</b>	676
R M Sinclair, J C Hosea and G V Sheffield	
Rev. Sci. Instrum. <b>41</b> 1552–9 (1970)	
<b>Electron heat transport in a tokamak with destroyed magnetic surfaces</b>	684
A B Rechester and M N Rosenbluth	
Phys. Rev. Lett. <b>40</b> 38–41 (1978)	
<b>Elimination of stochasticity in stellarators</b>	688
J D Hanson and J R Cary	
Phys. Fluids <b>27</b> 767–9 (1984)	
<b>The dynamics of the beam-beam interaction</b>	691
A Gerasimov, F M Izrailev, J L Tennyson and A B Temnykh	
Nonlinear Dynamics Aspects of Particle Accelerators (ed J M Jowett, M Month and S Turner), Springer Lect. Notes Phys. <b>247</b> 154–75 (1986)	
<b>Intramolecular dynamics and nonlinear mechanics of model OCS</b>	710
D Carter and P Brumer	
J. Chem. Phys. <b>77</b> 4208–21 (1982)	
<b>Stirring by chaotic advection</b>	725
H Aref	
J. Fluid Mech. <b>143</b> 1–21 (1984)	
<b>The twist map, the extended Frenkel-Kontorova model and the devil's staircase</b>	746
S Aubry	
Physica <b>7D</b> 240–58 (1983)	

## Part 8: Bibliography

<b>References</b>	767
