<b>1. Introduction</b>	<b>1</b>
<b>2. The Natural Phenomena Simulated in Rotating Shallow Water Experiments</b>	<b>5</b>
2.1 Length, Rotation Velocity, and Lifetime of the Structures	5
2.2 Large-Scale, Long-Lived Rossby Vortices in the Atmospheres of Giant Planets.	
The Cyclone-Anticyclone Asymmetry	13
2.3 Rossby Vortices in the Oceans	19
2.3.1 Open Sea Vortices	20
2.3.2 Rings of the Gulf Stream and the Kuroshio Current	21
2.3.3 Internal Thermoclinic Vortices (Lenses)	24
2.4 Spiral Structures in Galaxies	26
<b>3. Common Features of the Simulated Natural Phenomena</b>	<b>31</b>
3.1 Quasi-Two-Dimensionality	31
3.2 Structure Generation by Flows with Horizontal Velocity Shear	32
3.3 Horizontal Dimensions	
Exceeding the Characteristic Rossby Radius	33
<b>4. Physical Prerequisites of the Laboratory Simulation of Large-Scale Rossby Vortices and Galactic Spiral Structures</b>	<b>35</b>
4.1 The Analogy Between Two-Dimensional Gas Dynamics and the Dynamics of Shallow Water	35
4.1.1 Theory	35
4.1.2 Experiment	37
4.2 Principal Similarity Parameters in Nature and Experiment	38
<b>5. Physical Basis for the Experimental Investigation of Rossby Solitons and Laboratory Simulation of Drift Vortices and Solitons in Magnetized Plasma</b>	<b>43</b>
5.1 Two-Dimensional Motion of Charged Particles in Magnetized Plasma and Particles in Rotating Shallow Water	43

5.2	General Nonlinear Equation for Drift Motion .....	44
5.3	Linear Rossby Waves and Plasma Drift Waves .....	48
5.4	Linear Packet of Rossby Waves and the Time of its Dispersion Decay. Definition of a Soliton .....	52
5.5	Nonlinear Rossby Waves: Vortices and Solitons .....	55
5.6	Viscous Damping of Rossby Vortices .....	65
<b>6.</b>	<b>Experimental Configurations .....</b>	<b>67</b>
6.1	Geometry and Rotation Regime of the Vessels for the Observation of Rossby Solitons .....	67
6.2	Techniques for Local Generation of Rossby Vortices .....	73
6.3	Devices for Generating Rossby Vortices by Counterflows ..	74
6.4	Devices for the Simulation of Galactic Spiral Structures ...	76
6.5	Diagnostic Techniques .....	79
<b>7.</b>	<b>Laboratory Simulation of Rossby Vortices and Solitons in Planetary Atmospheres and Oceans .....</b>	<b>81</b>
7.1	Generation of Rossby Vortex Chains by Zonal Counterflows in Rotating Shallow Water. The Cyclone-Anticyclone Asymmetry .....	81
7.2	Self-Organizing Solitary Anticyclonic Rossby Vortex in Zonal Flows as a Model of Jovian Great Red Spot .....	88
7.3	Regularity in the Generation of Chains with Different Numbers of Vortices and the Problems of Uniqueness and Stationarity of the JGRS ..	93
7.4	Two- and Three-Dimensional Models of the JGRS .....	97
7.5	Alternative JGRS Laboratory Models .....	99
7.6	Stationary Rossby Vortices in Flows and the Blocking Phenomenon .....	103
<b>8.</b>	<b>Laboratory Simulation of Galactic Spiral Structures .....</b>	<b>107</b>
8.1	Generation of Spiral Structures in Differentially Rotating Shallow Water .....	107
8.2	Spiral-Vortex Structures .....	110
