

Contents of Volume 23

Preface	iii
Contributors to Volume 23	v
Contents of Other Volumes	ix
1 CHARACTERIZATION OF STRUCTURE AND MICROTEXTURE OF CARBON MATERIALS BY MAGNETORESISTANCE TECHNIQUE	1
<i>Yoshihiro Hishiyama, Yutaka Kaburagi, and Michio Inagaki</i>	
I. Introduction	2
II. Microtexture of Carbon Materials	4
III. Background and Experimental Procedure for Magnetoresistance Measurement	13
IV. Characterization of Carbons with Plane Orientation	20
V. Characterization of Carbons with Random Orientation	33
VI. Characterization of Carbons with Axial Orientation	33
VII. Characterization of Carbon/Carbon Composites	41
VIII. Conclusions	64
References	66
	vii

2	ELECTROCHEMICAL CARBONIZATION OF FLUOROPOLYMERS	69
	<i>Ladislav Kavan</i>	
I.	Introduction	70
II.	Reduction of Fluoropolymers to Carbons	75
III.	Properties of Electrochemical Carbon	112
IV.	Structure of Electrochemical Carbon	146
V.	Practical Applications	152
	References	163
3	OXIDATION PROTECTION OF CARBON MATERIALS	173
	<i>Douglas W. McKee</i>	
I.	Introduction	174
II.	Literature Survey	176
III.	Principles of Oxidation Protection of Carbon Materials	195
IV.	Conclusions	221
	References	222
4	NUCLEAR GRADE ACTIVATED CARBONS AND THE RADIOACTIVE IODIDE PROBLEM	233
	<i>Victor R. Deitz</i>	
I.	Introduction	234
II.	Loss of Iodide Trapping by Weathering	238
III.	Accident Scenario	274
IV.	The Regeneration Process	307
V.	Test Considerations	323
VI.	Conclusion	352
	References	358
	Index	363
