KEYNOTE ADDRESS

A General Introduction to Aeroacoustics and Atmospheric Sound

James Lighthill 3

CLASSICAL THEORETICAL APPROACHES

Classical Theoretical Approaches to Computational Aeroacoustics

William E. Zorumski 41

Computational Aeroacoustics for Low Mach Number Flows

D. G. Crighton 50

A Multiple Scales Approach to Sound Generation by Vibrating Bodies

James F. Geer and Dennis S. Pope 69

On the Noise Radiated from a Turbulent High Speed Jet

Geoffrey M. Lilley 85

A Study of the Short Wave Components in Computational Acoustics

Christopher K.W. Tam, Jay C. Webb and Zhong Dong 116

MATHEMATICAL ASPECTS OF ACOUSTICS

The Acoustic Analogy as a Tool of Computational Aeroacoustics	
<i>F. Farassat</i>	133

Problems with Different Time Scales and Acoustics	
<i>Heinz-Otto Kreiss</i>	156

VALIDATION METHODOLOGY

Validation Methodology: Review and Comments	
<i>Allan D. Pierce</i>	169

Wall Pressure and Radiated Noise Generated by 3 Line Vortices in Chaotic Motion Close to a Solid Surface	
<i>Luc Collorec, Daniel Juve and Geneviève Comte-Bellot</i>	174

Acoustic Scattering by an Elastic Window in a Rigid Duct: Numerical Approaches	
<i>S. Courtier-Arnoux</i>	190

Calculation of Noise Produced by High Mach Number Jets	
<i>M.E. Goldstein and R.R. Mankbadi</i>	206

Regarding Numerical Considerations for Computational Aeroacoustics	
<i>Jay C. Hardin</i>	216

Observed and Computed Waves of Aerodynamic Sound	
<i>T. Kambe</i>	229

Validation of Computational Aeroacoustics Algorithms	
<i>Phillip J. Morris</i>	245

Model Problems Associated with the Prediction of Noise by High Speed Shear Layers	
<i>John M. Seiner and T.R.S. Bhat</i>	260

DIRECT SIMULATION**Direct Simulation: Review and Comments***M.K. Myers* 285**Time-Dependent Jet Noise Computation****Techniques***Charles H. Berman, Gary Gordon, Eric Jackson,
George E. Karniadakis and Steven A. Orszag* 294**A Consideration of Energy from the Viewpoint
of Computational Aeroacoustics***Kenneth S. Brentner* 307**Direct Computation of Aerodynamic Noise***Sanjiva K. Lele, Parviz Moin, Tim Colonius
and Brian Mitchell* 325**Computation of the Acoustic Radiation
from Bounded Homogeneous Flows***Sutanu Sarkar and M. Yousuff Hussaini* 335**On the Development of a Time Domain Method
for CAA “The Successes and Failures”***Willie R. Watson* 356**UNSTEADY COMPRESSIBLE FLOW
COMPUTATIONAL METHODS****CFD Methods Development Considerations for
Unsteady Aerodynamic Analysis***John T. Batina* 373**Numerical Study of Flow/Structure Interaction
over a Flexible Plate***A. Frendi, L. Maestrello and A. Bayliss* 404**Navier-Stokes Simulations of Blade-Vortex Interaction
using High-Order-Accurate Upwind Schemes***Man Mohan Rai* 417

CONTRIBUTED PAPERS

**Scattering of Sound by Rigid Bodies
in Arbitrary Flows**

K.S. Huh, S.E. Widnall and R.K. Agarwal 433

**Application of Geometrical Acoustics to Propagation
of High Frequency Jet Noise**

Abbas Khavaran 456

**Application of a CFD Code for Unsteady Transonic
Aerodynamics to Problems in Aeroacoustics**

Gautam SenGupta 481

REPORT ON FINAL PANEL DISCUSSION

The Final Panel Discussion

James Lighthill 499
