

Table of Contents

Preface	ix
Editorial Committee	xiii
Chapter I. Flowfield Analysis	1
Basic Governing Equations for the Flight Regimes of Aeroassisted Orbital Transfer Vehicles	3
J.-H. Lee, <i>NASA Ames Research Center, Moffett Field, California</i>	
Complete Flowfields Over Low- and Wide- Angle AOTV Conceptual Configurations	54
P.A. Gnoffo, <i>NASA Langley Research Center, Hampton, Virginia</i>	
AOTV Bluff Body Flow—Relaxation Algorithm	85
C.K. Lombard, J. Bardina, and E. Venkatapathy, <i>PEDA Corporation, Palo Alto, California</i>	
Direct Simulation of Transitional Flow for Hypersonic Re-entry Conditions	113
J.N. Moss, <i>NASA Langley Research Center, Hampton, Virginia,</i> and G.A. Bird, <i>University of Sydney, New South Wales, Australia</i>	
Chapter II. Trajectories	141
Performance Evaluation of the Atmospheric Phase of Two Aeromaneuvering Orbital Transfer Vehicles	143
R.W. Powell, H.W. Stone, and J.C. Naftel, <i>NASA Langley Research Center, Hampton, Virginia</i>	
Performance Aerodynamics of Aeroassisted Orbital Transfer Vehicles	165
A.W. Wilhite, J.P. Arrington, and R.S. McCandless, <i>NASA Langley Research Center, Hampton, Virginia</i>	

Multiple Pass Trajectories for an Aeroassisted Orbital Transfer Vehicle.....	186
<i>J.J. Rehder, NASA Langley Research Center, Hampton, Virginia</i>	
Impact of Atmospheric Uncertainties and Viscous Interaction Effects on the Performance of Aeroassisted Orbital Transfer Vehicles.....	198
<i>T.A. Talay, N.H. White, and J.C. Naftel, NASA Langley Research Center, Hampton, Virginia</i>	
Analytical Characterization of AOTV Perigee Aerothermodynamic Regime.....	230
<i>D. Desautel, San Jose State University, San Jose, California</i>	
Chapter III. Thermal Protection.....	255
Thermal Protection Requirements for Near-Earth Aeroassisted Orbital Transfer Vehicle Missions.....	257
<i>G.P. Menees, NASA Ames Research Center, Moffett Field, California</i>	
Design and Performance Analysis of a Conical Aerobrake Orbital Transfer Vehicle Concept.....	286
<i>G.P. Menees and C. Park, NASA Ames Research Center, Moffett Field, California, and J.F. Wilson, Informatics General Corporation, Palo Alto, California</i>	
An AOTV Aeroheating and Thermal Protection Study.....	309
<i>C.D. Scott, R.C. Ried, R.J. Maraia, C.-P. Li, and S.M. Derry, NASA Johnson Space Center, Houston, Texas</i>	
Aerothermodynamic Heating Analysis of Aerobraking and Aeromaneuvering Orbital Transfer Vehicles.....	338
<i>G.P. Menees, NASA Ames Research Center, Moffett Field, California, C.B. Davies and J.F. Wilson, Informatics General Corporation, Palo Alto, California, and K.G. Brown, NASA Ames Research Center, Moffett Field, California</i>	
Thermal Response of an Aeroassisted Orbital Transfer Vehicle with a Conical Drag Brake.....	361
<i>W.C. Pitts, NASA Ames Research Center, Moffett Field, California, and M.S. Murbach, Informatics General Corporation, Palo Alto, California</i>	

Low Lift-to-Drag Aerobrake Heat-Transfer Test at Mach 10.....	378
<i>P. K.-T. Shih and A. Gay, General Dynamics Convair Division, San Diego, California</i>	
Calculation of Nonequilibrium Radiation in the Flight Regimes of Aeroassisted Orbital Transfer Vehicles.....	395
<i>C. Park, NASA Ames Research Center, Moffett Field, California</i>	
Air Radiation Revisited.....	419
<i>K. Sutton, NASA Langley Research Center, Hampton, Virginia</i>	
Chapter IV. Surface Effects.....	443
Temperature-Dependent Reaction Rate Expressions for Oxygen Recombination.....	445
<i>E.V. Zoby, R.N. Gupta, and A.L. Simmonds, NASA Langley Research Center, Hampton, Virginia</i>	
Surface-Slip Equations for Low Reynolds Number Multicomponent Air Flow.....	465
<i>R.N. Gupta, Old Dominion University, Norfolk, Virginia, C.D. Scott, NASA Johnson Space Center, Houston, Texas, and J.N. Moss, NASA Langley Research Center, Hampton, Virginia</i>	
Comparison of Viscous Shock-Layer Heating Analysis with Shuttle Flight Data in Slip Flow Regime.....	491
<i>J.L. Shinn and A.L. Simmonds, NASA Langley Research Center, Hampton, Virginia</i>	
Problems of Rate Chemistry in the Flight Regimes of Aeroassisted Orbital Transfer Vehicles.....	511
<i>C. Park, NASA Ames Research Center, Moffett Field, California</i>	
Progress in Noncatalytic Surfaces for Metallic Heat Shields.....	538
<i>R.T. Swann, G.M. Wood Jr., and R.D. Brown, NASA Langley Research Center, Hampton, Virginia, B.T. Upchurch and G.J. Allen, Old Dominion University, Norfolk, Virginia</i>	
Author Index for Volume 96.....	559
List of Series Volumes.....	561
