

Part II High-Energy Hadron-Nucleus Reactions

II.1	A.S. Goldhaber*	1
	Theory of High Energy Hadron-Nucleus Collisions	
II.2	T. Yamazaki	19
	A Short Comment: Importance of Heavy Polarized Nuclei	
II.3	W. Busza	20
	High Energy Collisions with Nuclei: An Introspection	
II.4	B. Povh	34
	Hadron-Nucleus Interaction - Results from SPS Experiments at CERN	
II.5	H.J. Frisch*	49
	The Production of Systems with Large Momentum Transfer in Hadron-Nucleus Collisions	
II.6	A. Kusumegi, S. Mikamo, J. Kishiro and M. Ono	88
	Invariant Cross Sections of Inclusive Pion Production by Pions and Protons at 4.3 GeV/c	
II.7	M. Wakamatsu	100
	Large p_T π^- Production in High Energy Proton-Deuteron Collisions	
II.8	F. Takagi	117
	Collective Quark Tubes in Hadron-Nucleus and Nucleus-Nucleus Collisions at High Energies	
II.9	T. Shibata	132
	A Brief Review of Studies of Heavy Mass Target Fragments Produced by High-Energy Projectiles	
II.10	K. Nakai, O. Terasaki, T.-A. Shibata and H. En'yo	143
	Composite Particle Production at 90 Degree from 12-GeV Protons on Nuclei	
II.11	S. Fukui, T. Hasegawa and S. Sasaki	150
	Proton-Nucleus (Be, Cu, Ta) Interactions at 2 GeV/c	

* Lectures given at the INS-Kikuchi Summer School.
