FOREWORD	v
OPENING SESSION	1
Un giorno tutti gli uomini saranno scienzati *(A. Zichichi)*	3
The whys of subnuclear physics *(A. Zichichi)*	8
SESSION A: THE NEW PARTICLES	13
Hadron and photon production of J particles and the origin of J particles *(S.C.C. Ting)*	15
Quantum numbers and decay modes of the resonances $\psi(3095)$ and $\psi(3684)$ *(V. Lüth)*	54
Results from experiments at Adone *(P. Monacelli)*	75
Experimental results from DORIS *(G. Wolf)*	87
New particle production by neutrinos *(C. Rubbia)*	111
Theoretical understanding of the new particles *(N. Cabibbo)*	133
Quarks, leptons and pre-quarks *(J.C. Pati)*	154
Broken colour symmetry and the new particles *(F.E. Close)*	171
A theory of ψ particles -- A case for colour *(P.T. Matthews)*	178
New particles and a colour scheme *(Y. Yamaguchi)*	186
SESSION B: LEPTON PRODUCTION BY HADRONS (EXCLUDING THE NEW PARTICLES)	199
Lepton production by hadrons *(B.G. Pope)*	201
Direct positron production at 10, 15, and 24 GeV/c *(M.L. Good)*	220
First observation of electron pair production in antiproton-proton annihilation *(P. Dalpiaz)*	225
SESSION C: $(e^+e^-) \rightarrow$ HADRONS (EXCLUDING THE NEW PARTICLES)	231
e^+e^- annihilation into hadrons at SPEAR *(G.J. Feldman)*	233
SPECIAL SESSION ON QED	245
The new muon g-2 measurement *(J.H. Field)*	247
The energy dependence of $\sigma(e^+e^- \rightarrow \mu^+\mu^-)$ *(F. Palmonari)*	261
SESSION D: NEUTRAL CURRENTS	277
Semileptonic neutral currents *(M. Rollier)*	279
Leptonic weak neutral currents *(H. Faissner)*	291
Theoretical understanding of neutral currents *(M. Gourdin)*	308
SESSION E: DEEP INELASTIC LEPTON-HADRON SCATTERING	333
Inelastic neutrino and antineutrino scattering from hadrons *(D. Cline)*	335
Deep inelastic electron and muon scattering *(R.E. Taylor)*	377
Theoretical ideas on e^+e^- annihilation and deep inelastic lepton-nucleon scattering *(G. Preparata)*	422
Searching for quarks with photons *(D.O. Caldwell)*	450
Deep inelastic muon scattering at Fermilab (experimental observation of deviations from scale-invariance *(K.W. Chen)*	458
Hadronic final states in muon-induced reactions *(C.A. Heusch)*	477

	Page
Electroproduction of neutral pions at energies above the resonance region *(U. Kötz)*	490
Neutrino interactions on protons at Fermilab energies *(B.P. Roe)*	497
SESSION F: HADRON SPECTROSCOPY	509
Mesons - 1975 *(B. French)*	511
New results on $\pi\pi$ partial waves *(A.D. Martin)*	545
New results on meson diffraction dissociation *(P. Schmid)*	553
High statistics Ξ^* production and other new results in 4.2 GeV/c K^-p interactions *(R.J. Hemingway)*	568
Elastic πN phase shift analysis *(E. Pietarinen)*	585
New results on strangeness ±1 baryons *(R.T. Ross)*	592
Spectroscopy after the new particles *(H.J. Lipkin)*	609
SESSION G: HIGH-ENERGY HADRON COLLISIONS	637
Elastic and total cross-sections and implications *(A.M. Wetherell)*	639
Quasi two-body reactions *(F. Schrempp)*	682
Diffractive processes and the triple-Pomeron *(H.I. Miettinen)*	731
Single particle and multiplicity distribution *(K. Böckmann)*	794
"Leading clusters" in 200 GeV/c π^-p inclusive reactions *(V.P. Kenney)*	815
Correlations in multi-particle final states *(N.A. McCubbin)*	821
Hadronic collisions with a large transverse momentum product *(P. Darriulat)*	840
Theoretical understanding of high-energy hadronic collisions with low-p_T final states *(A. Schwimmer)*	863
Novel application of the triple Regge technique *(P. Antich)*	880
Search for structures in $\bar{p}p$ cross-sections in the 1910-1944 MeV mass region *(A. Bettini)*	891
New results on K^+p and K^-p reactions at Serpukhov *(P.V. Chliapnikov)*	897
Studies of neutron dissociation at Fermilab energies *(T. Ferbel)*	921
New aspects of hypercharge annihilation, and comparison between strangeness and baryon number annihilation *(J.R. Fry)*	949
Double diffraction dissociation at ISR energies *(G.C. Mantovani)*	961
Observation of a spin 4 neutral meson with 2 GeV mass decaying in $\pi^0\pi^0$ *(W.D. Apel)*	971
Breakdown of Feynman scaling in the central region at high energies *(B.G. Duff)*	976
Charged multiplicity distribution in π^-d collisions at 21 GeV/c *(A. Eskreys)*	982
High energy $pd \to Xd$ and $pp \to Xp$ diffraction dissociation *(K. Goulianos)*	988
A search for double Pomeron exchange interactions at the CERN ISR *(J. Layter)*	993
What are total cross-section data trying to tell us *(H.J. Lipkin)*	1000
Analysis of antiproton reactions at 100 GeV/c *(W.W. Neale)*	1007
Observation of relative scaling in $\pi^-p(d)$ collisions with high momentum transfer to the target particle *(I.A. Radkevich)*	1019
Semi-inclusive correlations at the Intersecting Storage Rings *(L. Ristori)*	1025
New data on pd and π^+d interactions at 200 GeV/c *(E.E. Ronat)*	1035
Recent results on inclusive analyses of mesons and baryons produced in K^-p interactions *(R.A. Salmeron)*	1047
Experimental results on large angle elastic pp scattering at the CERN ISR *(K.R. Schubert)*	1066

Page

Measurement of elastic scattering of hadrons on protons from 50 to 175 GeV/c *(C. De Marzo)* 1070

Short range correlations and cluster production *(R. Baier)* 1078

Tensor dominated Pomeron *(T. Inami)* 1088

Joint rapidity azimuthal correlations and the Bose effect in cluster models *(G. Ranft)* 1096

Building up Reggeons and the Pomeron from duality and unitarity *(N. Sakai)* 1101

Progress in understanding the origin of the small Pomeron slope *(B.R. Webber)* 1111

The physical basis of the Reggeon calculus and its s channel structure *(M. Baker)* 1118

Reggeon calculus at finite energies *(A. Capella)* 1145

The topological expansion as a crossing symmetric Gribov calculus *(M. Ciafaloni)* 1152

The Reggeon calculus as a critical phenomenon; calculations of the critical indices *(R. Jengo)* 1166

Structure and shielding of the Pomeron *(R. Oehme)* 1175

SESSION H: STANDARD ELECTROMAGNETIC INTERACTIONS OF HADRONS 1181

Some recent results on photoproduction and electro production of hadrons *(G. Weber)* 1183

Theoretical understanding of standard electromagnetic interactions with hadrons *(R.G. Moorhouse)* 1203

SESSION I: THEORETICAL TOPICS 1223

Gauge theories with unified weak, electromagnetic and strong interactions *(G. 't Hooft)* 1225

Dual models and strings *(P.H. Frampton)* 1250

Quark confinement theories *(A. Neveu)* 1273

SESSION J: NEW PROJECTS 1277

Some ideas on possible future storage rings at CERN *(K. Johnsen)* 1279

EPIC *(G. Manning)* 1280

SESSION K: HIGHLIGHTS IN TECHNICAL DEVELOPMENTS 1289

Progress in some particle detectors *(G. Charpak)* 1291

Recent progress in transition radiation detectors and hadron calorimeters *(C.W. Fabjan)* 1303

CLOSING SESSION 1317

Status of subnuclear physics *(A. Zichichi)* 1319

LIST OF ABSTRACTS 1355

LIST OF PARTICIPANTS 1377
