Preface vii

To the Instructor ix

<b>1</b>	<b>A Basic Electric Circuit</b>	<b>1</b>			
1.1	Getting Started	1			
1.2	A Simple Circuit	2			
1.3	Basic Particles	3			
1.4	Atoms and Molecules	4			
1.5	Representing Fields of Force	5			
<b>2</b>	<b>Current and Voltage</b>	<b>9</b>			
2.1	Electric Current	9			
2.2	The Coulomb	12			
2.3	Velocity of Current	12			
2.4	Electric Pressure or Voltage	13			
<b>3</b>	<b>Resistance and Conductance</b>	<b>17</b>			
3.1	Electron Sources in Series	17			
3.2	Resistance Decreases Current	19			
3.3	Resistance and Wires	20			
3.4	Conductors and Ionization	21			
<b>4</b>	<b>Ohm's Law in Series Circuits</b>	<b>25</b>			
4.1	Current Form of Ohm's Law	25			
4.2	Solving for Voltage	26			
4.3	Solving for Resistance	28			
4.4	The Ohm's Law Triangle	29			
<b>5</b>	<b>Energy and Power</b>	<b>31</b>			
5.1	Electrical Energy	31			
5.2	Electrical Power	32			
5.3	Combining Power and Ohm's Law Formulas	33			
5.4	Substituting E/R in the Power Formula	34			
5.5	Practical Energy Formulas	34			
<b>6</b>	<b>Parallel Circuits</b>	<b>34</b>			
6.1	Review of Series Circuits	34			
6.2	Conductance and Resistance	38			
6.3	Parallel Circuits	39			
6.4	Leaning-ladder Graphs	41			
6.5	Kirchhoff's Current Law	41			
<b>7</b>	<b>Series-Parallel Circuits</b>	<b>44</b>			
7.1	Basic Circuit Forms	44			
7.2	Series-parallel Circuits: First Form	44			
7.3	Series-parallel Circuits: Second Form	46			
7.4	Mental Approximations	47			
<b>8</b>	<b>Magnetism</b>	<b>51</b>			
8.1	The Magnetic Field	51			
8.2	Magnetism of a Coil	52			
8.3	Permeability of Materials	54			
8.4	Temporary and Permanent Magnets	55			
8.5	Magnetic Attraction and Repulsion	56			
<b>9</b>	<b>Alternating Current</b>	<b>61</b>			
9.1	Direct Current	61			
9.2	Alternating Current	62			
9.3	Inducing Emf	63			
9.4	Generating an A-c	64			
9.5	Frequency of A-c	66			
9.6	Peak, Rms, and Average Values	67			
<b>10</b>	<b>Inductance and Transformers</b>	<b>70</b>			
10.1	Developing Counter-emf	70			
10.2	Inductance	72			
10.3	The Shorted-turn Effect	73			
10.4	Transformers	74			
10.5	Power and Current Ratios in Transformers	75			
<b>11</b>	<b>Series RL Circuits</b>	<b>80</b>			
11.1	Resistance-inductance Time Effects	80			
11.2	Current Lags Voltage	83			
11.3	Inductive Reactance	85			
11.4	Impedance	86			
<b>12</b>	<b>Capacitance</b>	<b>91</b>			
12.1	The Capacitor	91			
12.2	The Farad	91			
12.3	Types of Capacitors	93			
12.4	Dielectric Strength and Constant	96			
12.5	Capacitors in Parallel	97			
12.6	Capacitors in Series	97			

- 13 RC Circuits 101**  
 13.1 Resistance-capacitance Time Effects 101  
 13.2 Phase Angle 103  
 13.3 Capacitive Reactance 104  
 13.4 Impedance in Capacitive Circuits 105
- 14 Series LCR Circuits 109**  
 14.1 Series LC Circuits 109  
 14.2 Series Resonance 110  
 14.3 Series L, C, and R 111  
 14.4 The Q of a Series Circuit 113
- 15 Parallel LCR Circuits 117**  
 15.1 Parallel-reactance Circuits 117  
 15.2 Parallel LC Circuits 118  
 15.3 Antiresonance 119  
 15.4 The Oscillating LC Tank Circuit 120  
 15.5 Parallel R, L, and C 122  
 15.6 Current Vectoring a Parallel LCR Circuit 123
- 16 Tuning Circuits 127**  
 16.1 Tuning Circuits 127  
 16.2 Double-tuned Transformers 128  
 16.3 Low-pass Filters 130  
 16.4 High-pass Filters 131  
 16.5 Bandstop Filters 132
- 17 Vacuum Tubes and Transistors 135**  
 17.1 The Diode Vacuum Tube 135  
 17.2 The Triode 137  
 17.3 Solid-state Diodes 141  
 17.4 Transistors 142
- 18 D-c Ammeters 147**  
 18.1 Meter Accuracy 147  
 18.2 The Moving-coil Meter 148  
 18.3 Changing Ammeter Ranges 151  
 18.4 Multirange Ammeters 153  
 18.5 Meter Damping 155  
 18.6 Linear and Nonlinear Meter Scales 156
- 19 Other D-c Meters 159**  
 19.1 D-c Voltmeters 159  
 19.2 Moving-coil Voltmeters 159  
 19.3 Voltmeter Loading of a Circuit 160  
 19.4 High-voltage Voltmeters 162  
 19.5 Ohmmeters 163  
 19.6 Decade Boxes 164
- 19.7 Balanced-bridge Measuring Devices 166  
 19.8 A D-c Vacuum-tube Voltmeter Bridge 167  
 19.9 Electrostatic Voltmeters 169  
 19.10 Digital Voltmeters 170  
 19.11 D-c Wattmeters 171  
 19.12 Ampere-hour Meters 172
- 20 A-c Meters 175**  
 20.1 A-c Components with D-c Meters 175  
 20.2 Rectifier-type A-c Meters 177  
 20.3 Peak-reading and dB Meters 179  
 20.4 Electrodynamometers 181  
 20.5 Repulsion-type Meters 182  
 20.6 A-c Wattmeters 184  
 20.7 Watthour Meters 184  
 20.8 Thermocouple Ammeters 185  
 20.9 Frequency Meters 186  
 20.10 Grid-dip Meters 188
- 21 Alternators 192**  
 21.1 Rotating-coil Alternators 192  
 21.2 Rotating-field Alternators 194  
 21.3 Inductor Alternators 195  
 21.4 The Efficiency of Machines 196  
 21.5 Adding an Alternator to a Line 196  
 21.6 Polphase Alternators 198  
 21.7 Delta-connected Alternators 199  
 21.8 Y-connected Alternators 200  
 21.9 Transporting Electrical Power 202  
 21.10 3- $\phi$  Transformer Configurations 202
- 22 D-c Generators 207**  
 22.1 Externally Excited D-c Generators 207  
 22.2 Voltage Regulation 208  
 22.3 The Effect of More Commutator Segments 209  
 22.4 Commutators and Brushes 210  
 22.5 Shunt Generators 212  
 22.6 Series Generators 212  
 22.7 Compound Generators 213  
 22.8 Armature Reaction 214  
 22.9 Four-pole Generators 215  
 22.10 Machine Maintenance 215
- 23 Motors 218**  
 23.1 Electric Motors 218  
 23.2 Series Motors 219

- 23.3 *Shunt Motors* 220
- 23.4 *Exciting a D-c Motor with A-c* 222
- 23.5 *A Thyatron Motor Control* 223
- 23.6 *Reversing Motors* 224
- 23.7 *Motor Generators and Dynamotors* 225
- 23.8 *Synchronous A-c Motors* 226
- 23.9 *Squirrel-cage A-c Motors* 227
- 23.10 *Three-phase Motors* 229
- 24 Batteries 234**
  - 24.1 *Electrochemical Actions* 234
  - 24.2 *Electroplating* 235
  - 24.3 *The Development of the Cell* 236
  - 24.4 *The Leclanché Cell* 236
  - 24.5 *Other Primary Cells* 238
  - 24.6 *Lead-acid Cells* 239
  - 24.7 *Specific Gravity of a Lead-acid Cell* 241
  - 24.8 *The Capacity of a Cell* 242
  - 24.9 *Charging Batteries* 242
  - 24.10 *Maintaining Lead-acid Cells* 243
  - 24.11 *Alkaline Secondary Cells* 244
  - 24.12 *Nonchemical Cells* 245
- 25 Kirchhoff Loops in Circuits 251**
  - 25.1 *The Kirchhoff Laws* 251
  - 25.2 *Applying Direction to Current and Voltage* 251
  - 25.3 *Parallel Sources with a Common Load* 253
  - 25.4 *A Battery-charging Circuit* 254
  - 25.5 *Two-wire Distribution Systems* 255
- 26 Superposition and Thévenin Systems 259**
  - 26.1 *Solving Networks by Superimposing* 259
  - 26.2 *Superposition with More Complex Circuits* 260
  - 26.3 *The Thévenin Voltage* 262
  - 26.4 *Solving Complex Circuits by the Thévenin Method* 263
  - 26.5 *Computing an Unbalanced Bridge* 264
  - 26.6 *Thévenin's Theorem* 267
  - 26.7 *Solving a Black-box Circuit* 267
- 27 Magnetic Circuits 271**
  - 27.1 *Magnetic Circuits* 271
  - 27.2 *Magnetic Terms* 272
  - 27.3 *Ferromagnetism* 274
  - 27.4 *Permeability Curves* 275
  - 27.5 *Hysteresis Loops* 276
  - 27.6 *Magnetizing and Demagnetizing* 278
  - 27.7 *Magnetostriction* 278
  - 27.8 *Magnetic Transducers* 279
  - 27.9 *Relays* 279
  - 27.10 *Determining Polarity with a Compass* 281
  - 27.11 *English and Cgs Magnetic Units* 282
- 28 The Sine Wave 286**
  - 28.1 *Frequencies of Alternating Current* 286
  - 28.2 *Harmonics* 287
  - 28.3 *The Sine Wave* 289
  - 28.4 *Determining Instantaneous Values* 290
  - 28.5 *Adding Two Sine Waves* 292
  - 28.6 *Radians and Angular Velocity* 294
  - 28.7 *Period and Wavelength* 295
- 29 Resistors and Inductors 299**
  - 29.1 *Wire-wound Resistors* 299
  - 29.2 *Carbon Resistors* 301
  - 29.3 *Color Codes* 302
  - 29.4 *Miniature Inductors* 303
  - 29.5 *Radio-frequency Chokes* 305
  - 29.6 *Iron-core Chokes* 305
  - 29.7 *Energy in Inductors* 307
  - 29.8 *Inductance in Series* 309
  - 29.9 *Coefficient of Coupling* 311
  - 29.10 *Determining Inductance* 311
- 30 Capacitors 316**
  - 30.1 *Capacitors* 316
  - 30.2 *Energy in Capacitors* 317
  - 30.3 *Dielectric Breakdown* 317
  - 30.4 *Capacitor Specifications* 319
  - 30.5 *Solving for Transient Values* 319
  - 30.6 *Capacitor Color Codes* 321
- 31 Series A-c Circuits 325**
  - 31.1 *Series LCR Circuits* 325
  - 31.2 *The Pythagorean Theorem* 325
  - 31.3 *Series Circuits with  $X_L$  and  $X_C$*  326
  - 31.4 *The Sine Ratio* 329
  - 31.5 *The Cosine and Tangent Ratios* 330
  - 31.6 *Solving RL and RC A-c Circuits* 332

<b>32</b>	<b>Parallel and Complex A-c Circuits</b>	<b>335</b>			
	32.1 Solving Parallel A-c Circuits	335			
	32.2 The Pythagorean Theorem in Parallel Circuits	336			
	32.3 Solving for Parallel Impedances	338			
	32.4 Equivalent Circuits	338			
	32.5 Graphing Equivalent Circuits	342			
	32.6 Computing Series-parallel A-c Circuits	343			
	32.7 Solving for Individual Circuit Parameters	345			
<b>33</b>	<b>The j-Operator</b>	<b>352</b>			
	33.1 Real and Imaginary Numbers	352			
	33.2 The j-Operator	353			
	33.3 Adding Real and Imaginary Numbers	354			
	33.4 Real and Imaginary Voltage Values	355			
	33.5 Rectangular and Polar Forms	357			
	33.6 Converting from Polar to Rectangular Form	358			
	33.7 The j-Operator in a Parallel Circuit	359			
	33.8 The j-Operator in Series-parallel Circuits	360			
<b>34</b>	<b>Power Transformers</b>	<b>365</b>			
	34.1 The Basic Transformer	365			
	34.2 Loading the Secondary	366			
	34.3 Effect of Resistance in the Windings	368			
	34.4 Transformer Losses	369			
	34.5 Phase Relationships	370			
	34.6 Transformer Cores	372			
	34.7 Transformer Ratings	374			
	34.8 Cooling Transformers	375			
	34.9 Transformer Windings	376			
	34.10 Efficiency and Regulation	377			
	34.11 Impedance Matching	378			
	34.12 Autotransformers	380			
<b>35</b>	<b>Resonant Circuits</b>	<b>385</b>			
	35.1 Resonance	385			
	35.2 The Resonance Curve	387			
	35.3 Bandwidth	389			
	35.4 Reactance Curves Near Resonance	390			
	35.5 The L/C Ratio	391			
	35.6 Logarithms and Decibels	393			
<b>36</b>	<b>Antiresonant Circuits</b>	<b>398</b>			
	36.1 The Antiresonant Circuit	398			
	36.2 Loaded Antiresonant Circuits	400			
	36.3 Bandwidth and Q	402			
	36.4 Coupled and Tuned Circuits	405			
	36.5 The Four Conditions of Coupling	407			
	36.6 LC Oscillators	409			
	36.7 Wavetraps	410			
<b>37</b>	<b>Filters</b>	<b>414</b>			
	37.1 A Basic RC Low-pass Filter	414			
	37.2 A Basic RL High-pass Filter	415			
	37.3 Series Reactive Elements	416			
	37.4 Low-pass and High-pass Constant-k	417			
	37.5 Two-section Filters	420			
	37.6 Bandpass and Bandstop Constant-k Filters	420			
	37.7 m-Derived Filters	424			
	37.8 Low-pass and High-pass m-Derived Filters	424			
	37.9 Bandpass m-Derived Filters	426			
	37.10 Coupling Filter Sections Together	427			
	37.11 Balanced Filters	428			
	37.12 Crystal Filters	429			
	37.13 Mechanical Filters	430			
	37.14 Crossover Networks	430			
	37.15 Power-supply Filters	431			
	<b>Appendixes</b>	<b>437</b>			
	<b>A Electrical Symbols</b>	<b>438</b>			
	<b>B Standard American Wire Gage in Metric and U.S. Customary Values</b>	<b>439</b>			
	<b>C Powers of Ten</b>	<b>441</b>			
	<b>D Table of Squares and Square Roots</b>	<b>443</b>			
	<b>E Table of Natural Trigonometric Functions</b>	<b>448</b>			
	<b>F Table of Common Logarithms (Four-place Mantissas)</b>	<b>452</b>			
	<b>G Table of Natural Logarithms, 0.01 to 1.0</b>	<b>454</b>			
	<b>H Greek Alphabet</b>	<b>454</b>			
	<b>I Multiples, Prefixes, and Symbols Adopted by the International Committee on Weights and Measures</b>	<b>455</b>			
	<b>J Units and Equivalents</b>	<b>456</b>			
	<b>K LCXf Nomograph</b>	<b>457</b>			
	<b>Index</b>	<b>461</b>			
	<b>Answers to Tests</b>	<b>473</b>
