

TABLE OF CONTENTS

| | |
|---|-----------|
| Foreword | v |
| J. V. Baptista, J. M. Tribolet | |
| Introduction | vii |
| O. Færgemand, M. M. Marques | |
| Keynote address: SDL Keynotes | ix |
| J. R. W. Smith | |
| I SESSION Language | 1 |
| Putting Extended Sequence Charts to Practice | 3 |
| <i>J. Grabowski, E. Rudolph</i> | |
| Upgrading SDL | 11 |
| <i>P. Ostrowski, J. Lubacz, M. Sredniawa</i> | |
| II SESSION Methodology | 21 |
| The BEST Method for Requirements Capture and Functional Specification | 23 |
| <i>M. Martin, G. Oswald, P. Lau, M. Campolargo</i> | |
| Presenting a Model of a Layered System in SDL | 33 |
| <i>L. Månsson</i> | |
| III SESSION Training | 43 |
| An Educational Development System Employing SDL Design and Automatic Code Generation | 45 |
| <i>C. Yeh, L. Reneby, B. Lennselius, A. Sixtensson</i> | |
| SDL On-Line Help | 53 |
| <i>M. M. Marques, N. Serra</i> | |
| Experience on Teaching SDL and Using the Language as a Didactic Tool | 65 |
| <i>G. Ciccarella, R. Pignatelli</i> | |
| IV SESSION Support Environments | 75 |
| Tool Set Development and the Use of SDL | 77 |
| <i>M. Zorić , Z. Galović , G. Stantić</i> | |

| | | |
|-----------|--|------------|
| | SDL Toolbox to Support Different SDL Environments | 87 |
| | <i>G. Nilsson, I. Ljungdahl, P. Madsen</i> | |
| | MELBA+: An SDL Software Engineering Environment | 95 |
| | <i>K. E. Cheng, L. N. Jackson</i> | |
| | GEODE: An Industrial Environment for Designing Real Time Distributed Systems in SDL | 105 |
| | <i>V. Encontre</i> | |
| | Integrated SDL Environment | 117 |
| | <i>J. P. Hong, W. Choi, Y. S. Shin, H. C. Kim, J. H. Choi</i> | |
| | SDL Tools for Rapid Prototyping and Testing | 127 |
| | <i>J. M. Barzdin, A. A. Kalnins, M. I. Auguston</i> | |
| | An Integrated System Development Method and Support System Based on SDL and C + + | 135 |
| | <i>N. Kikuchi, Y. Shigeta, K. Miyake, W. Tanaka, M. Nabeta</i> | |
| | The SDL Environment - SPRITE: Experiences and Plans | 145 |
| | <i>B. Kąkol, P. Ostrowski, M. Sredniawa</i> | |
| | The SPECS SDL Tower Tools | 155 |
| | <i>A. Olsen</i> | |
| | ELVIS, An Integrated SDL Environment | 165 |
| | <i>J. Camacho, C. Langlois, E. Paul</i> | |
| V | SESSION Document Handling | 177 |
| | OST - An Object Oriented SDL Tool | 179 |
| | <i>T. Hauge, Ø. Haugen</i> | |
| | Simplification of Requirements Specification in SDL | 189 |
| | <i>Y. Wakahara, A. Ito, E. Utsunomiya, F. Nitta</i> | |
| | Integration of an SDL Document Generator in a Software Development Environment | 199 |
| | <i>G. Comparin, L. Giannasi, F. Serio</i> | |
| VI | SESSION Dynamic Analysis | 209 |
| | SSI - An SDL Simulation Tool | 211 |
| | <i>J. Karlsson, A. Ek</i> | |

| | | |
|-------------|--|------------|
| | Reachability Graph Generator for SDL | 219 |
| | <i>H. T. Nguyen, L. N. Jackson, K. R. Parker</i> | |
| | Exhaustive Validation and Test Generation in ELVIS | 231 |
| | <i>A. Bourguet - Rouger P. Combes</i> | |
| | The Automated Checking of Specifications Written in SDL | 247 |
| | <i>E. H. Magill, D. G. Smith</i> | |
| | Conformance Testing Based on SDL Specifications | 257 |
| | <i>F. Kristoffersen</i> | |
| | TESDL: Experience with Generating Test Cases from SDL Specifications | 267 |
| | <i>L. Brömstrup, D. Hogrefe</i> | |
| VII | SESSION Executing SDL | 281 |
| | Transformational Program Development - An Approach for Translating SDL to CHILL | 283 |
| | <i>S. O. Hallsteinsen, A. Venstad, A. Nyeng, H. Martinsen</i> | |
| | A Definition and Description Technique for Translating SDL Specifications to Implementation | 293 |
| | <i>K. E. Cheng, L. N. Jackson</i> | |
| | Software Automation System Evolution | 303 |
| | <i>J. Batista Junior</i> | |
| | OS51 - A Successful SDL Run Time Environment for 8051 Series Microcontrollers | 309 |
| | <i>E. Panten</i> | |
| | An Experiment With Algebraic Reduction | 325 |
| | <i>P. H. A. Venemans, R. A. Beukers</i> | |
| VIII | SESSION Applications | 335 |
| | Introducing SDL-88 into CCITT WP XI/5 | 337 |
| | <i>O. Færgemand</i> | |
| | Using SDL to Define and Simulate a Telecommunication Protocol | 347 |
| | <i>N. Viklund, J. Karlsson</i> | |

| | | |
|-----------|---|------------|
| | A Skeleton for the Specification of OSI Protocols in SDL | 355 |
| | <i>B. A. N. Aulia, P. H. A. Venemans</i> | |
| | The Use of SDL in an ISDN Terminal Design | 367 |
| | <i>D. Carl</i> | |
| | Using SDL in Switching System Development | 377 |
| | <i>C. J. Chung, J. P. Hong, W. Choi, H. K. Kim, Y. K. Lee</i> | |
| | SDL and Object Oriented Design: A Way for Producing Quality Software | 387 |
| | <i>R. Moretti</i> | |
| | Experiences in Applying SDL | 395 |
| | <i>Z. Koono, Y. Yonezu, Y. Iwata, M. Hosoda</i> | |
| IX | PANEL Making SDL Work | 405 |
| | Network Operator View | 407 |
| | Industrial View | 407 |
| | ISO and other Standardization Bodies View | 408 |
| | CCITT View | 410 |
| | University View | 410 |
| X | DEMONSTRATIONS | 413 |
| | AT&T SDL Development System | 415 |
| | ATC-SEN | 415 |
| | ELVIS, SDL Environment | 416 |
| | ESCORT | 417 |
| | FRED | 418 |
| | GEODE | 418 |
| | GSS, Graphical SDL System | 419 |
| | ISET, Integrated SDL Environment | 420 |
| | OST, An Object Oriented SDL Tool | 421 |
| | PC MELBA | 421 |
| | SDL On-line Reference Manual | 422 |
| | SDL Tool from Academy of Sciences of the GDR | 423 |
| | SDL Tool Set | 424 |
| | SDT, SDL Design Tool | 424 |
| | SPIC, SDL Toolset | 425 |
| | Telecommunication Software Development Support System | 426 |
| | The Danish SDL-Tool | 427 |
| | YAST, Yet Another SDL Tool | 427 |
| | Author Index | 429 |
