CONTRIBUTORS . . . . .	v
PREFACE . . . . .	vii
CONTENTS OF PREVIOUS VOLUMES . . . . .	xi

## THE PHYSICS OF PULSED NEUTRONS

Dimitrios Cokinos

I. Introduction . . . . .	2
II. Thermal Neutron Spectra . . . . .	6
III. The Diffusion Cooling of Neutrons . . . . .	24
IV. Measurements in Moderating Media . . . . .	53
V. Multiplying Media . . . . .	98
VI. Pulsed Neutron Sources . . . . .	112
VII. Neutron Wave Methods . . . . .	124
References . . . . .	128

## TRANSIENT RADIATION EFFECTS IN ELECTRONICS

Edward E. Conrad

I. Introduction . . . . .	144
II. Radiation Interactions of Interest . . . . .	145
III. Secondary Electrons . . . . .	149
IV. Charge Recombination Mechanisms . . . . .	151
V. Behavior of Materials in a Radiation Field . . . . .	155
VI. Typical Component Data . . . . .	179
VII. Conclusions . . . . .	198
References . . . . .	200

## RADIATION EFFECTS ON INORGANIC SOLIDS

Raymond G. Di Martini and Swei Rong Huang

I. Introduction . . . . .	205
II. Radiation Effects in Various Inorganic Solids . . . . .	206
III. Summary and Conclusions . . . . .	230
References . . . . .	231

**SYNTHESIS METHODS IN REACTOR ANALYSIS**

S. Kaplan

I. Introduction . . . . .	233
II. Survey and History of Synthesis Methods . . . . .	234
III. The Mechanics of the New Synthesis . . . . .	238
IV. Examples and Applications . . . . .	246
V. Conclusions . . . . .	263
References . . . . .	264

**RADIATION-INDUCED POLYMERIZATION AT LOW TEMPERATURE**

Keichi Oshima and Yoneho Tabata

I. Introduction . . . . .	267
II. Liquid-State Polymerization . . . . .	268
III. Solid-State Polymerization . . . . .	289
References . . . . .	324

**PULSED NEUTRON SOURCES**

R. H. Stahl, J. L. Russell, Jr., and G. R. Hopkins

I. Introduction . . . . .	329
II. Electron Linear Accelerators . . . . .	335
III. Pulsed Fast Reactors . . . . .	352
IV. Pulsed Thermal Reactors . . . . .	361
V. Accelerator-Based Pulsed Neutron Sources . . . . .	370
References . . . . .	379
