List of Contributors	ix
Preface	xiii
1 Introduction—The Pattern of 50 Years <i>G E Bacon</i>	1
2 The First Diffraction Experiments: The Three Papers of 1936	11
3 Looking Back: Early Days and Memories	19
3.1 Early neutron diffraction technology <i>C G Shull</i>	19
3.2 I remember Brookhaven <i>R J Weiss</i>	25
3.3 Early work at the Argonne <i>M H Mueller and G R Ringo</i>	31
3.4 A childhood of slow neutron spectroscopy <i>B N Brockhouse</i>	35
3.5 Neutrons re-cross the Atlantic	46
3.5.1 Reminiscences <i>G E Bacon</i>	46
3.5.2 Early days at Harwell <i>P A Egelstaff</i>	52
3.6 Recollections of a research student 1948–51 <i>G L Squires</i>	56
4 World-wide Spread of Neutron Scattering: a Miscellany of Stories	62
4.1 Neutrons in The Netherlands and Scandinavia <i>A F Andreson and J A Goedkoop</i>	62
4.2 The first experiments in France <i>B Jacrot and D Cribier</i>	71
4.3 The history of neutron scattering in West Germany <i>H Dachs</i>	74

4.4	'Start-up' in Italy <i>G Caglioti</i>	81
4.5	A dialogue from the Soviet Union <i>R P Ozerov and A Yu Rumyantsev</i>	85
4.6	Early years of neutron diffraction work in India <i>P K Iyengar</i>	93
4.7	The beginning of neutron diffraction in Poland— personal reminiscences <i>J Leciejewicz</i>	100
4.8	Neutron diffraction in Australia <i>T M Sabine</i>	104
4.9	Neutron scattering in China <i>Z Yang</i>	110
4.10	Progress in Japan <i>S Hoshino</i>	113
5	The Changing Scene: The Appearance of the High-flux Reactor	120
5.1	High flux at Brookhaven <i>L Passell</i>	120
5.2	High flux at Oak Ridge <i>J W Cable</i>	128
5.3	International Science	135
5.3.1	The birth of the Institut Max von Laue–Paul Langevin in Grenoble <i>H Maier-Leibnitz</i>	135
5.3.2	Twenty years (or so) at the ILL: a view from the Secretariat <i>G A Briggs</i>	144
5.3.3	I began as a Scientific Assistant: Harwell to Grenoble via Lucas Heights <i>D A Wheeler</i>	145
6	Some Statistics from the Neutron Diffraction Commission <i>B T M Willis</i>	156
7	Some Crucial Applications	167
7.1	Neutrons and magnetism—a brief history <i>W C Koehler</i>	167
7.2	Neutrons and chemistry <i>H Fuess</i>	177
7.3	Neutrons and lattice dynamics <i>B M Powell and A D B Woods</i>	190
7.4	Neutrons in biology <i>B Jacrot</i>	202

8	Changing Techniques	211
8.1	The time-of-flight diffraction method <i>B Buras</i>	211
8.2	From BF ₃ counter to PSD. An impressive and continuous increase of the data acquisition route <i>P Convert and P Chieux</i>	218
8.3	Neutron spin echo spectroscopy <i>F Mezei</i>	227
8.4	Neutron optics <i>H Rauch</i>	233
8.5	Neutron diffraction topography <i>J Baruchel and M Schlenker</i>	241
9	Some Views of the Future: Reactor and Accelerator	245
9.1	The future with accelerator-based sources <i>G H Lander</i>	245
9.2	ISIS—The UK pulsed spallation neutron source <i>G C Stirling</i>	252
9.3	A US proposal for the 1990s <i>R M Moon</i>	261
9.4	Neutron scattering in the future. A personal view <i>J E Enderby</i>	263
	Bibliography	266
	Subject Index	269
	Author Index	273
