

Contents

1. Basic Physics of the Atom and the Nucleus	
1.1. The Nuclear Atom	1
1.2. The Structure of the Atom	1
1.3. Radioactivity	4
1.3.1. α , β , and γ Emission	4
1.3.2. The Systematics of Radioactive Decay	8
1.4. Mass Defect and Binding Energy	11
1.5. Interactions of Neutrons with the Nucleus	17
1.6. Cross Sections for Neutron Reactions	20
1.7. Cross Sections of Particular Importance in Reactor Physics	29
1.8. Experimental Techniques	34
1.8.1. Neutron Sources	35
1.8.2. Detection of Charged Particles and γ Rays	37
1.8.3. Neutron Detectors	43
2. Nuclear Fission and the Nuclear Chain Reaction	
2.1. Nature of the Fission Process	51
2.2. The Products of Fission	55
2.3. Energy Release in Fission	58
2.4. The Nuclear Chain Reaction	60
2.5. The Role of Plutonium in Nuclear Reactors	68
2.6. Nuclear Cross Sections of the Fissile Isotopes	72
3. Elements of Nuclear Reactor Theory	
3.1. The Neutron Energy Spectrum in a Nuclear Reactor	77
3.2. The Spatial Dependence of the Neutron Flux in a Reactor	87
3.2.1. One-Group Method	90
3.2.2. Two-Group Method	98
3.3. The Heterogeneous Reactor	100
3.4. Reactor Kinetics and Control	102
3.4.1. Kinetics of the Reactor without Feedback	102
3.4.2. Reactivity Effects Arising from Power Operation	111
3.4.3. Fission Product Poisoning	117
4. Nuclear Fuels and Their Characteristics	
4.1. Nuclear Properties of Fissile Materials	125
4.2. Buildup of Plutonium in a Natural Uranium Reactor	129
4.3. The Th^{232} – U^{233} Fuel Cycle	138
4.4. Aspects of Fuel Management in Thermal Reactors	141

5. Materials Problems for Nuclear Reactors

5.1. Effects of Irradiation on Reactor Materials	145
5.2. Uranium—Production and Enrichment	146
5.3. Properties of Uranium Metal	153
5.4. Ceramic Uranium Fuel	155
5.5. Dispersion-Type Fuel Elements	159
5.6. Graphite	162
5.7. Stainless Steel	165
5.8. Zirconium	167
5.9. Light and Heavy Water	170

6. Heat Generation and Removal in Nuclear Reactors

6.1. Introduction	175
6.2. Maximum Heat Generation Rate in Fuel	175
6.3. Heat Conduction in Fuel Elements	180
6.3.1. The Poisson Equation	180
6.3.2. Solutions of the Poisson Equation	182
6.4. Temperature Distributions along a Coolant Channel	188
6.4.1. Heat Transfer by Convection	188
6.4.2. Axial Variation of Fuel, Clad, and Coolant Temperatures	190
6.5. Heat Transfer by Boiling Coolant	195
6.6. Nuclear Power Reactor Cooling Systems	203
6.6.1. Choice of Coolant	203
6.6.2. Water-Cooled Reactors	204
6.6.3. Gas-Cooled Reactors	213
6.6.4. Liquid Metal Cooling	215
6.6.5. Superheat and Reheat	215

7. General Survey of Reactor Types

7.1. Introduction	221
7.2. Classification of Thermal Reactors	222

8. The Gas-Cooled Graphite-Moderated Reactor

8.1. General Characteristics of the Gas-Cooled Graphite-Moderated Reactor	227
8.2. The Magnox Natural Uranium Graphite-Moderated Reactor	230
8.3. The Advanced Gas-Cooled Reactor	234
8.4. The High-Temperature Gas-Cooled Reactor	241

9. The Light-Water-Moderated Reactor

9.1. General Characteristics of the Light-Water-Moderated Reactor	249
9.2. Development of the Light Water Reactor	253
9.3. The Pressurized Water Reactor	257
9.4. The Boiling Water Reactor	263

10. The Heavy-Water-Moderated Reactor	
10.1. General Characteristics of the Heavy Water Reactor	269
10.2. The CANDU Pressure Tube Heavy Water Reactor	275
11. The Fast Reactor	
11.1. Introduction	283
11.2. The Physics and Technology of Fast Reactors	284
11.3. Dynamic Behavior and Safety Aspects of the Fast Reactor	294
11.4. The Dounreay Prototype Fast Reactor	299
12. Safety and Environmental Aspects of Nuclear Reactors	
12.1. The Biological Effects of Radiation	305
12.2. Effects of Routine Release of Radioactivity from the Nuclear Industry	312
12.2.1. Dose Limits for Radiation Exposure	312
12.2.2. Release of Radioactive Isotopes from Nuclear Power Plants	315
12.2.3. Estimated Radiation Doses Due to the Nuclear Fuel Cycle	319
12.3. Reactor Accidents: Safety Studies on Light Water Reactors	322
12.3.1. Analysis of LWR Safety	322
12.3.2. Accident Experience with Light Water Reactors	346
12.4. Reactor Accidents: Thermal Reactors Other than LWRs	352
12.4.1. The Gas-Cooled Graphite-Moderated Reactor	352
12.4.2. The Heavy Water Reactor	354
12.5. The Safety of the Fast Breeder Reactor	355
12.6. Long-term Storage and Disposal of Radioactive Wastes	360
12.7. The Thermal Effects of Nuclear Power Stations	365
Appendix	367
Bibliography	375
Index	383
