

Contents

List of illustrations	vii
List of tables	xi
Preface	xiii
Acknowledgements	xv
1 Britain's present and future energy requirements	1
2 History of nuclear power	21
3 The meaning of radioactivity	33
4 A summary of the nuclear fuel cycle	79
5 Uranium mining and exploration	83
6 Fuel element manufacture	93
7 Uranium enrichment	107
8 The nuclear power station: thermal reactors	119
9 The nuclear power station: fast breeder reactors	171
10 Spent nuclear fuel: temporary storage and transportation	203
11 The reprocessing plant	223

12	Radioactive waste: its nature, storage, treatment and disposal	233
13	Decommissioning	277
14	Nuclear fuels and cladding materials	285
15	Neutron moderators and absorbers	299
16	Reactor coolants	317
17	Radiation detection and measuring instruments	323
18	Radiological protection	343
19	Nuclear safeguards and public concern	371
	Appendix The British nuclear power industry	393
	Further reading	399
	Index	403
