

# CONTENTS

1.	INTRODUCTION .....	1
2.	SCOPE .....	1
3.	CONSIDERATIONS IMPORTANT TO DECOMMISSIONING .....	2
3.1.	The basic stages of decommissioning .....	2
3.1.1.	Stage 1 decommissioning .....	2
3.1.2.	Stage 2 decommissioning .....	3
3.1.3.	Stage 3 decommissioning .....	4
3.2.	Considerations influencing decommissioning choices .....	4
3.2.1.	National nuclear strategy including the waste handling policy .....	4
3.2.2.	Condition of the plant from the safety point of view ....	4
3.2.3.	Owner's interest, including planned use of the site .....	5
3.2.4.	Availability of decommissioning technology .....	6
3.2.5.	Post-operational cost .....	6
3.2.6.	Social considerations .....	6
3.2.7.	Availability of funding .....	6
3.2.8.	Optimization of decommissioning plans .....	7
3.3.	Preparation for decommissioning .....	8
3.4.	Protection against radiological hazards .....	8
3.5.	Management of decommissioning wastes .....	9
3.6.	Facilitation of decommissioning .....	9
4.	DECONTAMINATION METHODS .....	9
4.1.	Chemical and electrochemical decontamination .....	9
4.1.1.	Chemical decontamination .....	9
4.1.2.	Electrochemical decontamination .....	10
4.2.	Mechanical decontamination .....	10
4.2.1.	Surface cleaning methods .....	11
4.2.2.	Surface removal methods .....	12
4.3.	Soil decontamination .....	13

5.	<b>DISASSEMBLY TECHNIQUES</b>	13
5.1.	<b>Metal cutting methods</b>	13
5.1.1.	Plasma-arc torch	14
5.1.2.	Arc saw	14
5.1.3.	Linear shaped charges	14
5.1.4.	Conventional cutting methods	15
5.2.	<b>Concrete removal</b>	15
5.2.1.	Blasting	16
5.2.2.	Drilling and rock splitting	16
5.2.3.	Flame or thermic lance cutting	16
5.2.4.	Diamond sawing and coring	17
5.2.5.	High pressure water jet cutting	17
5.3.	<b>Dismantlement of large components</b>	17
5.3.1.	Segmentation	17
5.3.2.	Intact removal	18
5.4.	<b>Remotely-controlled operation</b>	18
6.	<b>WASTE MANAGEMENT</b>	19
6.1.	Treatment and conditioning of liquid wastes	19
6.2.	Treatment and conditioning of solid wastes	20
6.3.	Treatment and conditioning of gaseous and aerosol wastes	21
6.4.	Packaging of wastes	22
6.5.	Transport of wastes	23
6.6.	<b>The disposal of wastes</b>	23
6.6.1.	Shallow ground disposal	24
6.6.2.	Disposal into rock cavities and deep geological formations	24
6.6.3.	Disposal into the sea	25
6.6.4.	Disposal of large single components	25
6.6.5.	Disposal of large volumes of low-level wastes	25
6.7.	<b>Re-use of decontaminated materials</b>	26
7.	<b>DECOMMISSIONING METHODOLOGY IMPROVEMENTS</b>	26
7.1.	Methodology development for systems analysis	27
7.2.	Improvements in technology	28
7.3.	<b>Design considerations in facilitation of decommissioning</b>	29
7.3.1.	Choice of materials	29
7.3.2.	Influencing operating conditions	30

7.3.3. Access to equipment .....	30
7.3.4. Facilitation of decontamination and disassembly .....	30
7.3.5. Liquid waste treatment and packaging .....	31
8. CONCLUSIONS .....	31
References .....	32
Bibliography .....	35
Annex A: Summary of past decommissioning experience and future plans in Member States .....	56
List of participants and designating Member States and organizations .....	67
Glossary of some basic terms .....	71
