

CONTENTS

CHAPTER 1.	HISTORY AND INTRODUCTION	1
1.1	Nuclear Energy from Radioactive Decay,	1
1.2	The Discovery of the Neutron,	2
1.3	Early Experiments with Neutrons,	4
1.4	The Discovery of Fission,	8
1.5	The Chain Reaction,	12
1.6	Plutonium and the First Reactors,	16
1.7	Uranium-235 and Uranium-233,	26
1.8	The Problems of Reactor Physics,	32
CHAPTER 2.	NUCLEAR PARTICLES AND INTERACTIONS	35
2.1	Particles and Nuclei,	35
2.2	Specification of a Particle Field,	37
2.3	Yield and Cross Section,	40
2.4	Interactions of Heavy Charged Particles,	45
2.5	Interactions of Electrons,	56
2.6	Interactions of Gamma Rays,	65
2.7	Properties and Interactions of the Neutron,	77
2.8	Reaction Energetics,	99
2.9	Resonances,	107
2.10	Thermal Phenomena,	115
CHAPTER 3.	RADIOACTIVE DECAY AND STATISTICS	130
3.1	Radioactive Decay,	130
3.2	Neutron Activation,	139
3.3	Radioisotope Sources,	143
3.4	Statistics of Nuclear Processes,	149
3.5	Coincidence Corrections,	160

CHAPTER 4. NEUTRON SOURCES	168
4.1 Radioisotope Neutron Sources, 168	
4.2 Particle Accelerators, 174	
4.3 Neutron-Producing Reactions, 192	
4.4 Research Reactors, 203	
CHAPTER 5. RADIATION DETECTORS AND DOSIMETERS	229
5.1 Principles of Detection and Dosimetry, 229	
5.2 Gas Ionization Detectors, 243	
5.3 Semiconductor Detectors, 261	
5.4 Scintillation Detectors, 273	
5.5 Activation Detectors, 287	
5.6 Thermoluminescent Dosimeter, 295	
5.7 Emulsion, 297	
CHAPTER 6. NUCLEAR ELECTRONICS	303
6.1 Nuclear Electronic Systems, 303	
6.2 Pulse Counting Systems, 305	
6.3 Spectrometry Systems, 309	
6.4 Timing Systems, 320	
6.5 Pulse-Shape Discrimination Systems, 326	
6.6 Direct-Current Systems, 331	
6.7 Pulse Shaping and Transmission, 337	
6.8 Linear Pulse Amplifier, 348	
6.9 Discriminator and Time-Pickoff, 366	
6.10 Logic Circuits, 378	
CHAPTER 7. BASIC MEASUREMENTS	387
7.1 Source Strength, 388	
7.2 Flux Density by Foil Activation, 395	
7.3 Flux Density by Neutron Counting, 415	
7.4 Neutron Spectrum by Time-of-Flight, 429	
7.5 Neutron Spectrum by Reaction-Unfolding, 444	
7.6 Reaction Rate, 461	
CHAPTER 8. ACTIVITY, DOSE, AND CROSS-SECTION MEASUREMENTS	472
8.1 Measurement of Activity, 472	
8.2 Efficiency of Gamma-Ray Detectors, 480	
8.3 Dose and Shielding Experiments, 485	
8.4 Cross-Section Measurements, 494	
CHAPTER 9. MODERATOR EXPERIMENTS	506
9.1 Age Experiment, 507	

9.2	Diffusion-Length Experiment, 522	
9.3	Diffusion-Coefficient and Albedo Experiments, 538	
9.4	Modulated-Source Experiments, 557	
9.5	Moderation and Thermalization Time Experiments, 581	
CHAPTER 10.	SUBCRITICAL EXPERIMENTS	603
10.1	Subcritical Multiplication Experiment, 603	
10.2	Exponential Experiment, 611	
10.3	Alpha Dieaway Experiments, 627	
10.4	Reactor Noise, 650	
10.5	Time-Dependent Spectrum Experiment, 657	
CHAPTER 11.	CRITICAL EXPERIMENTS	665
11.1	Design of Critical Facilities, 665	
11.2	Critical Mass Experiments, 670	
11.3	Flux-Density and Importance Experiments, 686	
11.4	Kinetics Experiments, 705	
11.5	Control Rod Calibration, 722	
11.6	Reactor Dynamics, 727	
CHAPTER 12.	REACTOR EXPERIMENTS	743
12.1	Thermal-Reactor Cell Parameters, 743	
12.2	Thermal-Reactor Spectrum Experiments, 776	
12.3	Fast-Reactor Parameters, 780	
12.4	Fast-Reactor Spectrum Experiments, 788	
APPENDIX.	LABORATORY RADIATION SAFETY	801
INDEX		805
