

CONTENTS

Foreword

Opening Session

- O-1 Expectation on the Role of Chemistry for the Continued
Development of Nuclear Energy 1
T. Mukaibo (Atomic Energy Commission)
- O-2 Recent Chemical Research on the Transuranium Elements 3
G.T. Seaborg (Univ. Calif., LBL)

Session I Chemistry of Accelerated Particle Beams

- I-1 Chemical Tracer Studies with Energetic Atoms from Nuclear
Reactions 13
F.S. Rowland (Univ. Calif., Irvine)
- I-2 Molecular Beam Studies of Hot Atom Chemical Reactions:
Reactive Scattering of Energetic Deuterium Atoms 14
R.E. Continetti, B.A. Balko and Y.T. Lee (Univ. Calif., Berkeley)
- I-3 State Selection and Separation of Microscopic Reaction
Mechanism in Ion-Molecule Reactions by an Ion Beam/TOF
Coincidence Technique 25
I. Koyano (Inst. for Mol. Sci.)
- I-4 Ion Beam Modification of Metal-Ceramics Interface 31
S. Noda (Toyota Cent. R & D Labs.)
- I-5 Chemical Reactions Induced on Solid Surface by Low Energy
Ions 37
T.A. Sasaki (JAERI)
- P-I-1 Kinetics of Excited State of Hg Atom Formed by Two-Photon
Excitation 42
H.-K. Cha and J.-M. Lee (KAERI)
- P-I-2 Laser Induced Photochemical Reactions and Emissions of the
Europium Compounds in the Solid State 48
Y. Yamada, K.P. Lee and S. Ohno (JAERI)

P-I-3	Uranium Isotope Separation by 16 μm Infrared-Laser Irradiation of UF_6 in a Supersonic Nozzle	53
	S. Kato, S. Satooka, T. Oyama, K. Midorikawa, H. Tashiro and K. Takeuchi (RIKEN)	
P-I-4	Evaporation of Metal Impregnated in Porous Tungsten	58
	T. Shibata, S. Yoshihara, A. Kobana, K. Ogura and T. Arisawa (JAERI)	
P-I-5	Interaction of Low Energy Ion Beams with Si Surfaces	60
	J. Murakami and I. Kusunoki (Tohoku Univ.)	
P-I-6	Change in Surface Structure of Al_2O_3 and Al Induced by Low Energy Electron and N^+ Ion Impact	65
	S. Nagai (JAERI)	
P-I-7	Metallizing of Ceramics with Ion Beam and Vapor Deposition	69
	N. Sugiyama, Y. Katoh and K. Ogata (Nissin Electr. Co., Ltd.)	
P-I-8	Ion-Beam Process for Functionally Gradient Materials Formation . . .	73
	S. Nakashima, Y. Kojima, T. Yamada and N. Ohnaka (Hitachi Ltd.)	
P-I-9	Ion Beam Analysis of Solid Materials	78
	H. Naramoto and Y. Kazumata (JAERI)	
P-I-10	Ion Irradiation Effects on Mechanical Properties of Several Polymers	85
	T. Sasuga, S. Kawanishi, M. Nishii and T. Seguchi (JAERI) I. Kohno (RIKEN)	
P-I-11	Picosecond and Nanosecond Electron, Ion and Synchrotron Radiation Pulse Radiolysis	91
	Y. Yoshida, M. Washio, H. Kobayashi, Y. Tabata, S. Tagawa, N. Kouchi and H. Shibata (Univ. Tokyo) A. Ogata (KEK)	
P-I-12	Ion-Molecule Reactions by Drift Tube Technique	96
	Y. Satoh, M. Takebe and K. Iinuma (Tohoku Univ.)	

P-I-13	Radioactive Aerosols Formed in High Energy Accelerator Tunnels ---on Their Particle Size Distributions	100
	T. Miura, Y. Oki, Y. Kanda and K. Kondo (KEK) H. Muramatsu (Shinshu Univ.)	
P-I-14	Recoil Implantation Reaction in Tris (β -Diketonato) Metal (III) – Characteristic Feature for the Substitution Reaction of the Central Metal Atom by the Recoil Atom –	108
	T. Sekine and K. Yoshihara (Tohoku Univ.)	
P-I-15	On (n, γ) Recoil Energy Spectra, Primary Retention, and Appearance Energy of Hot Atom	115
	K. Sasaki and T. Matsuura (Rikkyo Univ.)	
P-I-16	A Study of Hyperlithiated Molecules by Knudsen-Effusion Mass Spectrometry	124
	H. Kudo (JAERI)	
P-I-17	The Separation of Pd-107 Isotope by Laser	129
	H. Yamaguchi and N. Sasao (PNC)	

Session II Chemistry of Artificially Produced Elements

II-1	Status and Prospects for the Production and Investigation of Heavy Elements	135
	G. Münzenberg (GSI)	
II-2	Electronic Structure of Actinide Elements	148
	S. Imoto (Fukui Inst. Tech.)	
II-3	Aqueous Chemistry of Np(V)	158
	Y. Inoue and O. Tochiyama (Tohoku Univ.)	
II-4	A Study of Transuranium Elements Produced by JAERI Tandem Accelerator	168
	I. Fujiwara (Otemon Gakuin Univ.) N. Shinohara, S. Usuda, S. Ichikawa, T. Suzuki, M. Magara, H. Okashita, T. Sekine, K. Hata, Y. Nagame, Y. Kobayashi and H. Iimura (JAERI) S. Shibata (Univ. Tokyo) T. Horiguchi and Y. Iwata (Hiroshima Univ.) H. Yoshikawa (Tokyo Metrop. Univ.)	

II-5	Thermodynamics of Actinide Solid Oxides	173
	A. Nakamura (JAERI)	
P-II-1	Primordial Heavy-Element Nucleosynthesis in Inhomogeneous Big-Bang Universe	181
	T. Kajino (Tokyo Metrop. Univ.)	
P-II-2	A Systematic Study of Mass Yield Curves in Proton-Induced Fission of Actinides	189
	T. Ohtsuki, K. Sueki, Y. Hamajima, Y. Hatsukawa, K. Tsukada, T. Kobayashi and H. Nakahara (Tokyo Metrop. Univ.) Y. Nagame and N. Shinohara (JAERI)	
P-II-3	Alpha Decay Properties of Light Einsteinium Isotopes	194
	Y. Hatsukawa, T. Ohtsuki, K. Sueki and H. Nakahara (Tokyo Metrop. Univ.) I. Kohno (RIKEN) M. Magara and N. Shinohara (JAERI) H.L. Hall, R.A. Henderson, C.M. Gannet, J.A. Leyba, R.B. Chadwick, K.E. Gregorich, D. Lee, M.J. Nurmi and D.C. Hoffman (LBL)	
P-II-4	A Study of Short-Lived Ruthenium Isotopes Produced in the Spontaneous Fission of ²⁵² Cf Using SISAK	204
	N. Shinohara, J. Alstad, S. Baba, S. Ichikawa and H. Iimura, T. Ohtsuki, K. Tsukada and H. Umezawa (JAERI) I. Fujiwara (Otemon Gakuin Univ.)	
P-II-5	Study of Decay Properties of Neutron-Deficient La Isotopes by Means of Element-Selective Mass Separation	206
	H. Iimura, S. Ichikawa, M. Oshima, T. Sekine and N. Shinohara (JAERI) M. Miyachi, A. Osa, M. Shibata, H. Yamamoto and K. Kawade (Nagoya Univ.)	
P-II-6	High Temperature Electrical Conductivities of UO ₂ -PuO ₂ Solid Solutions	208
	T. Yamashita, K. Ohuchi and T. Fujino (JAERI) K. Naito, T. Tsuji, M. Abe, T. Yamamoto, M. Sato and K. Ando (Nagoya Univ.)	

P-II-7	Structural Configuration of Uranium Tetrahalide Complexes by Magnetic Susceptibility. II The Structural Configuration of $UBr_n(hmpa)_{6-n}(\phi_4B)_{4-n}$ ($n = 2, 3$)	213
	M. Hirose and C. Miyake (Osaka Univ.)	
P-II-8	Chemistry of Tris (β -Diketonato) Technetium(III)	218
	K. Hashimoto (JAERI) T. Omori and K. Yoshihara (Tohoku Univ.)	
P-II-9	Interaction of Americium(III) with Humic Acids and Two Synthetic Analogues	224
	Y. Minai (Univ. Tokyo) G.R. Choppin (Florida State Univ.)	
P-II-10	Effective Method of Extracting Neptunium from Highly Radioactive Liquid Waste	234
	Y. Morita, S. Tani and M. Kubota (JAERI)	
P-II-11	Chemical Behavior of TRU Elements in Underground Environments	243
	S. Tanaka, H. Itagaki, S. Nagasaki and M. Yamawaki (Univ. Tokyo)	
P-II-12	Development of a Transuranic Isotopes Assay System Using an Active Neutron Technique	253
	H. Yokobori, Y. Endo, H. Suwa, S. Iwai and S. Ohta (Mitsubishi At. Power Ind., Inc.) Y. Nishihara (Mitsubishi Heavy Ind., Ltd.)	
P-II-13	Recovery and Utilization of Valuable Metals from Spent Nuclear Fuel	254
	Y. Wada, K. Kirisima, K. Wada, K. Kawase and N. Sasao (PNC)	

Session III Chemical Applications of Fusion Energy

III-1	Muon Catalyzed Fusion: Basic Understandings and Application	265
	K. Nagamine (Univ. Tokyo)	
III-2	Interaction of Energetic Neutrons and Charged Particles with Solids	276
	T. Iwata and A. Iwase (JAERI)	

III-3	Chemistry in and from Nuclear Fusion	286
	M. Okamoto (Tokyo Inst. Tech.)	
III-4	Chemical Reactions Induced by Fast Neutron Irradiation	293
	Y. Katsumura (Univ. Tokyo)	
P-III-1	Muon Catalyzed Fusion: Fusion Rates in Muonic Molecules	300
	M. Kamimura (Kyushu Univ.)	
P-III-2	The Fate of Negative Muons Injected into the $D_2 + T_2$ System as Studied by the Classical Collision Theory	308
	K.P. Lee, Y. Yamada and S. Ohno (JAERI)	
P-III-3	Review of Fusion Energy Application to Synthetic Fuel Production and Blanket Design Study	314
	S. Okazaki, T. Kobayashi and Y. Tanaka (Kawasaki Heavy Ind., Ltd.) Y. Seki (JAERI) K. Yamamoto (JAIF)	
P-III-4	Advanced Methods for Hydrogen Production as a Fusion Nuclear Application System	324
	S. Shimizu (JAERI)	
P-III-5	Chemical Reactions of Energetic Hydrogen Isotopes with Some Materials and Possibility of Chemical Energy Formation Applying Hot Zone Formed by Energetic Atoms	332
	Y. Aratono, M. Nakashima, M. Saeki and E. Tachikawa (JAERI) T. Miyazaki (Nagoya Univ.)	
P-III-6	Direct Evidence for Reaction of Hydrogen Atoms Caused by Quantum-Tunneling-Effect at Ultralow Temperature and Possibility of Hydrogen (Tritium) Separation by This Effect	341
	T. Miyazaki (Nagoya Univ.)	
P-III-7	Irradiation Effects of Organic Composite Materials for Super- conductor Magnet of Fusion Reactor	346
	T. Seguchi (JAERI)	

P-III-8	ESR and NMR Studies on Cross-Links Produced in γ and Neutron n-Eicosane as a Model Compound of Polyethylene	347
	M. Tabata and K. Yokota (Hokkaido Univ.) J. Sohma (Hokkaido Inst. Tech.) H. Yamaoka and T. Matsuyama (Kyoto Univ.)	
P-III-9	In situ Observation of Ion Irradiation Damage in Metal and Ceramics	353
	K. Hojou, S. Furuno, H. Maeta, H. Otsu and T. Soga (JAERI)	
P-III-10	Compatibility Experiment between Blanket Component and Sintered Li ₂ O Pellets	362
	H. Akiyama, N. Suemori, H. Imaizumi, T. Yano and M. Nagakura (Mitsubishi At. Power Ind., Inc.)	
P-III-11	Tritium - Breeder Chemical Interaction	363
	S. Tanaka, M. Yamawaki, T. Terai and Y. Takahashi (Univ. Tokyo)	
P-III-12	Thorium Molten-Salt Nuclear Energy Synergetics [THORIMS-NES] .	373
	K. Furukawa (Tokai Univ.)	

Session IV Advanced Analytical Chemistry

IV-1	Modern Chemical Analysis of Nuclear Materials	381
	M.C. Edelson and E.L. DeKalb (Iowa State Univ., Ames Lab.)	
IV-2	Recent Advances in Nuclear Analytical Techniques	391
	T. Tominaga (Univ. Tokyo)	
IV-3	Improvement of the Separation Efficiency in Solvent Extraction . . .	392
	N. Suzuki (Tohoku Univ.)	
IV-4	Chemical Analysis with Synchrotron Radiation	397
	Y. Gohshi (Univ. Tokyo)	
IV-5	State Analysis of Ions in Solutions	398
	Z. Yoshida and H. Aoyagi (JAERI) S. Kihara (Kyoto Univ.)	

P-IV-1	Mössbauer and Tracer Studies of Metal Oxide/Aqueous Solution Interface	407
	S. Ambe, T. Okada and F. Ambe (RIKEN)	
P-IV-2	Mössbauer Studies on Heusler Alloys	412
	Y. Kobayashi, M. Katada and H. Sano (Tokyo Metrop. Univ.) T. Okada, K. Asai, M. Iwamoto and F. Ambe (RIKEN)	
P-IV-3	Photoelectron Spectroscopic Analysis of Rare-Gas Atoms Implanted in Metals	414
	Y. Baba, H. Yamamoto and T.A. Sasaki (JAERI)	
P-IV-4	Highly Selective Separation of Rare Metal with Long Chain Alkylated 8-Quinolinol by Solvent Extraction	420
	K. Ohashi and K. Yamamoto (Ibaraki Univ.)	
P-IV-5	Voltammetry for the Charge Transfer at Two Immiscible Electrolyte Solutions Interface –A New Branch of Electro-analytical Chemistry	428
	S. Kihara, M. Suzuki, K. Maeda, K. Ogura and M. Matsui (Kyoto Univ.) Z. Yoshida (JAERI)	
P-IV-6	Determination of Trace Amounts of Uranium and Thorium in Materials by Electrothermal Vaporization/ICPMS	437
	H. Matsunaga (Toshiba R&D Center)	
P-IV-7	Ultratrace Gases in the Atmosphere	438
	Y. Makide and T. Tominaga (Univ. Tokyo)	
P-IV-8	Behavior of Trace Element in Natural Separation Processes	439
	H. Nakamura (JAERI)	
P-IV-9	Sub- and Super-Equivalence Method of Isotope Dilution Analysis in the Determination of DNA	445
	K. Hasegawa and H. Yoshioka (Shizuoka Univ.)	
P-IV-10	Accumulators of Rare Earths, Actinium and Several Other Trace Elements as Studies by Neutron Activation Analysis	450
	M. Koyama and J. Takada (Kyoto Univ.)	

P-IV-11	Charged Particle Activation Analysis with Cyclotron	451
	(Light Element Analysis of III-V Semiconductors and Aluminum)	
	S. Tazawa and S. Kataoka (Sumitomo Heavy Ind.)	
	K. Sasaki and E. Toda (Sumitomo Metal Min.)	
	T. Nozaki (Kitasato Univ.)	
P-IV-12	Accurate Determination of Light Elements by Charged Particle Activation Analysis	457
	K. Shikano and T. Shigematsu (NTT)	
P-IV-13	Application of High-Resolution PIXE to Reactor Materials	464
	S. Ozaki (Toshiba Corp.)	
	M. Terasawa (Himeji Inst. Tech.)	
P-IV-14	Development of Analytical Technique for Neptunium in the PUREX Process by Photoacoustic Spectroscopy	473
	T. Kihara, S. Fujine and M. Maeda (JAERI)	
	T. Matsui, T. Kitamori and M. Sakagami (Hitachi Ltd.)	
P-IV-15	Impurity-Dependence of Thermoluminescence Spectra from Natural Quartzes	478
	T. Hashimoto, T. Sakai, S. Takahashi and H. Habuki (Niigata Univ.)	
P-IV-16	Analysis of Trace Elements in Solution by Photothermal Deflection Spectroscopy	483
	T. Matsui, T. Kitamori and M. Sakagami (Hitachi Ltd.)	
P-IV-17	A New Method for Ultrafine Particle Counting in Liquid by Laser- Induced Breakdown Acoustic Spectroscopy	487
	K. Yokose, T. Kitamori and M. Sakagami (Hitachi Ltd.)	
	T. Sawada and Y. Gohshi (Univ. Tokyo)	
P-IV-18	JAERI Certified Reference Materials – Twenty-Five Years’ Activities –	491
	A. Hoshino, K. Takashima and S. Tamura (JAERI)	
Index of Authors	493
