

CONTENTS

I. Introduction: Basic Concepts

A Glimpse into the World of Random Walks	
C. Van den Broek	3
Stochastic Bifurcations in a Generic Dynamical System: A Qualitative Analysis	
F. J. de la Rubia and W. Kliemann	19
Unified Theory of Fluctuations and Parametric Noise	
M. San Miguel and M. A. Rodriguez	29
An Influence Functional Approach for the Elimination of Variables in Stochastic Processes	
Horacio S. Wio	41
Mixing Properties and Resonances in Chaotic Dynamical Systems	
Stefano Isola	53

II. Stochastic Processes in Linear Nuclear Systems: Theory

Application of Stochastic Transport Theory to the Determination of the Statistical Descriptors Used in Noise Analysis.	
J. L. Muñoz-Cobo and G. Verdú	59
Determination of Kinetics Parameters Using Stochastic Methods in a ^{252}Cf Driven System	
Felix C. Difilippo	99

Solving Low Power Stochastic Equations: Nonlinear Studies	
Jeffery D. Lewins	107
Contribution to the Discussion	
Jeffery D. Lewins	119
Exact and Inexact, Explicit and Implicit Solution Techniques for the Forward and Backward Kolgomorow Equations	
Geoffrey T. Parks	121
III: Stochastic Processes in Linear Nuclear Systems: Applications	
Some Applications of Stochastic Processes in Neutron Coincidence: Measurements Used in Nuclear Safeguards	
W. Matthes	131
Application of Statistical Correlation Techniques for Measurement of the Keff of Highly Subcritical Systems	
S. B. Degweker, M. Srinivasan, K. K. Rasheed and C. S. Pasupathy	143
Stochastic Aspects of Neutron Multiplication in Fusion Blanket Materials and Spallation Targets	
S. B. Degweker, Amar Sinha and M. Srinivasan	159
Stochastic Calculations of the Effective Density Factor	
M. Enosh, U. Salmi, D. Shalitin, J. J. Wagschal and Y. Yeivin	167

Statistical Correlation Calculation of the Time Constant Alpha in Monte Carlo Simulation of Subcritical Assemblies	
U. Salmi and Y. Yeivin	171

IV. Stochastic Processes in Nonlinear Nuclear System: Theory

Nonlinear Stochastic Theory and Identification of Nonlinearity in Nuclear Reactors	
H. Konno	179
Stochastic Nonlinear Dynamics of Nuclear Power Plants: Noise Effects on Nonlinear Stability	
J. L. Muñoz-Cobo and J. Sancho García	193
The Role of Fluctuations in Nuclear Reactor Transients	
M. A. Rodríguez and A. Diaz-Guilera	211
The Effect of Fuel Depletion on Stochastic Behaviour in Supercritical Systems	
M. M. R. Williams	227
Contribution to the Discussion: Backward Kolgomorov Equations with Feedback	
Jeffery D. Lewins	241
Steady State Dynamics of Nonlinear Nuclear Reactor Systems	
A. Hernández-Machado and J. Casademunt	247
Nonlinear Effects in Structural Vibration Induced Fluctuations	
L. Pesquera and M. A. Rodríguez	261

V. Stochastic Processes in Nonlinear Nuclear Systems:
Applications

Bispectrum Estimation Using Overlapped Segments J. Piñeyro and K. Behringer	275
Nonlinear AR-Noise Investigated Via a Kalman Filter G. Cojazzi, M. Marseguerra and C. M. Porceddu	287
Characteristics of Adaptiveness and Self-Organizing as Applied to the Nonlinear Nuclear Systems Kohyu Fukunishi	297
The Monte Carlo Simulation of Thermal Noise in Fast Reactors G. Hughes and R. S. Overton	313
Pump Induced Linear and Nonlinear Vibrations at PWR R. Sanchis Arnal, G. Verdú Martín and J. L. Muñoz-Cobo	339
VI. Nonlinear Dynamics and Transition to Chaos in Nuclear Systems. Part I	
Variational Methods for Analyzing Limit Cycles in BWR G. Verdú Martín, P. Jimenez and J. Peña	351
Nonlinear Dynamics and Chaos in Boiling Water Reactors José March-Leuba	371
Nonlinear Dynamics of Three-Dimensional Point Fission Reactors A. A. Harms Z. Bilanovic	387
Phase Plane Analysis of Nuclear-Coupled Density-Wave Oscillations John C. Lee and Anozie Onyemaechi	399

VII. Nonlinear Dynamics and Transition to Chaos in
Nuclear Systems. Part II

Nonlinear Dynamics of the Nuclear Breeding Process V. C. Boffi, G. Spiga and P. Vestrucci	417
Nonlinear Xenon Oscillations David L. Hetrick	431
Nonlinear Reactor Stability Analysis with Arbitrary Feedback Turan B. Enginol	439
A Stochastic Method for Nuclear Power Plant Diagnosis R. B. Perez and R. T. Wood	451
Stochastic Nuclear Reactor Theory: Breit-Wigner Nuclear Noise G. de Saussure and R. B. Perez	457
Index	463
