

CONTENTS

<i>Foreword</i>	v
SECTION ONE: GLOBAL STRATEGIES AND CONCEPTS	
Energy strategies and nuclear power	3
<i>W. Häfele</i>	
The nuclear energy continuum and its spectrum of choices	21
<i>A.A. Harms</i>	
On the internal logic of energy islands	33
<i>C. Marchetti</i>	
SECTION TWO: FISSION AND FISSION BREEDING	
Self-sustaining systems of reactors	51
<i>B.I. Spinrad</i>	
Sustainable minireactors: a framework for decentralized nuclear energy systems . . .	67
<i>A.A. Harms and W.W. Sassin</i>	
Small reactors in a neutron-abundant world	75
<i>J.W. Hilborn</i>	
On the role and technological readiness of fast breeders and fusion–fission hybrids in the world nuclear future	87
<i>S.I. Abdel-Khalik, G.L. Kulcinski, and G. Kessler</i>	
SECTION THREE: FUSION AND DENSE PLASMA NEUTRON SOURCES	
The tokamak as a candidate for a D–T fusion reactor.	107
<i>G.H. Wolf</i>	
The fusion breeder: its potential role and prospects	121
<i>J.D. Lee</i>	
Prospects of hydrogen production through fusion	137
<i>E.E. Kintner</i>	
Modern electrolytic procedures for the production of hydrogen by splitting water. .	155
<i>H.W. Nürnberg, J. Divisek, and B.D. Struck</i>	
The dense plasma focus as a source of neutrons.	173
<i>H. Conrads</i>	
Possible applications of a hybrid thermonuclear energy source based on a DPF device in modern energy complexes	187
<i>V.A. Gribkov and M.G. Tyagunov</i>	

SECTION FOUR: ACCELERATOR BREEDING

Accelerator spallation reactors for breeding fissile fuel and transmuting fission products	203
<i>M. Steinberg</i>	
Accelerator breeder applications.	225
<i>J.S. Fraser</i>	
The FRG project for a high-power spallation neutron source for fundamental research.	237
<i>G.S. Bauer and J.E. Vetter</i>	
On the need for accelerator breeders and fission converter reactors.	265
<i>P. Jansen</i>	

SECTION FIVE: HANDLING THE WASTE

Future processing of spent reactor fuels.	271
<i>F. Culler and R.C. Vogel</i>	
A proposed concept for actinide-waste transmutation.	287
<i>H. Murata and H. Kuroi</i>	
Transmutation of radioactive wastes: an assessment	305
<i>M.C. Edlund</i>	

SECTION SIX: REFLECTIONS AND SUMMARY

Quick is beautiful	313
<i>F.J. Dyson</i>	
Panel discussion	319
<i>Including selected contributions from H. Bethe, F. Culler, W. Häfele, A.A. Harms, J.W. Hilborn, G.L. Kulcinski, and R. Schulten</i>	
<i>Author index</i>	329
