

VOLUME I
CONTENTS

ATOMIC MOTION IN MODERATORS

James A. Young	3
Introduction	3
The Neutron-Phonon Interaction	4
Beryllium	7
Graphite	14
Lattice Dynamics of Beryllium Oxide	18
References	24

NEUTRON SCATTERING BY HYDROGENOUS
MODERATORS

Juan U. Koppel	27
Introduction	27
Water	30
Polyethylene	48
Zirconium Hydride	58
Liquid Hydrogen	59
References	71

INCOHERENT SCATTERING OF SLOW NEUTRONS BY
A LIQUID: A HINDERED-TRANSLATOR MODEL

V. Ardente, G. F. Nardelli, and L. Reatto	73
Introduction	73
The Model	75
Comparison With Experiment	79
Concluding Remarks	85
References	89

INTERPRETATION OF SCATTERING-LAW DATA

R. M. Brugger	91
Introduction	91
Gases	98
Solids	104
Liquids	111
Conclusions	120
References	120

THE VELOCITY AUTOCORRELATION FUNCTION IN
LIQUIDS FROM A NEW POINT OF VIEW

Aneesur Rahman	123
Introduction	123
$\langle \tilde{r}^2(t) \rangle$ and $\langle \tilde{v}(0) \cdot \tilde{v}(t) \rangle$	124
Dead (τ), The Direction of Eventual Atomic Displacement in Time τ	126

$S_T(t)$ and $R_T(t)$	127
$S_T^+(t)$ and $S_T^-(t)$	130
Discussion	131
References	133
 THE INTERPRETATION OF PULSED-NEUTRON EXPERIMENTS	
Noel Corngold	135
Introduction	135
The Eigenvalue Problem	136
The Calculation of Discrete Eigenvalues	143
Theory and Experiment	146
References	148
 RECENT DEVELOPMENTS IN INTEGRAL NEUTRON THERMALIZATION	
J. R. Beyster, J. M. Neill, and J. C. Young	151
Introduction	151
Status of Spectral Measurements	152
Status of Single Differential Scattering Investigations	172
Status of Total Cross Section Measurements	182
Conclusions	190
References	191
 THERMALIZATION PROGRAM AT RENSSELAER POLYTECHNIC INSTITUTE	
P. B. Daitch	195
Introduction	195
Low-Energy-Neutron Inelastic Scattering	196
Reactor Parameter and Spectra Measurements	198
Thermalization Theory	203
References	206
 TRANSPORT METHODS FOR THE CALCULATION OF SPATIALLY DEPENDENT THERMAL SPECTRA	
G. C. Pomraning	207
Introduction	207
Gross Leakage Effects	210
Collision-Probability Method	215
Detailed Space-Energy Calculational Methods	218
Anisotropic Scattering	224
Multigroup Constants	234
Cylindrical Cell Approximation	243
Comparison of Theory and Experiment	244
Bibliography	247

VARIATIONAL METHODS IN THE CALCULATION OF SPATIALLY DEPENDENT THERMAL SPECTRA

N. C. Francis	259
Introduction	259
General Method	260
Spectrum Averaging	263
Space-Energy Theory	266
Discussion	274
References	276

MONTE CARLO METHODS FOR THE CALCULATION OF THERMAL-NEUTRON FLUXES

E. M. Gelbard	279
References	291

AN ENERGY-DEPENDENT CALCULATION OF THE DISADVANTAGE FACTOR

Alan H. Robinson and Joel H. Ferziger	293
Introduction	293
Formulation of the Problem	293
The Eigenfunction Expansions	294
The Disadvantage Factor	297
Reduction of the Singular Integral Equations	298
Numerical Results for the Heavy-Gas Model	303
References	308

A SIMPLE MODEL FOR THE CALCULATION OF NEUTRON SPECTRA IN THERMAL REACTORS

M. Cadilhac, M. Livolant, J. L. Soule', and O. Tretiakoff	311
Space-Independent Problems: The Secondary Model	312
The Secondary Model: Choice of the Functions $j(y)$ and $K(y)$	315
Space-Dependent Problems	319
Conclusions	328
References	330

APPROXIMATE TREATMENT OF NEUTRON THERMALIZATION IN HETEROGENEOUS SYSTEMS

P. R. Haubert and N. R. Meyvaert	331
Introduction	331
Thermalization Treatment	333
Heterogeneity	335
Conclusions	346
References	347

**APPLICATION OF A PHENOMENOLOGICAL
THERMALIZATION MODEL TO IRRADIATED
HEAVY-WATER LATTICES**

A. Kind and G. Rossi	349
Introduction	349
Spectrum Incident on the Fuel Element	350
Fuel Element Spectrum	352
Application of the Method	354
References	357

**DETERMINATION OF THE NEUTRON SPECTRUM IN
A THERMAL REACTOR BY A FLUX SYNTHESIS
METHOD**

H. Hembd	359
Introduction	359
The Method	360
Numerical Solution	365
References	366

**MULTI-GROUP COLLISION PROBABILITY THEORY
IN CLUSTER GEOMETRY. COMPARISON WITH
EXPERIMENTS**

A. Jonsson and H. Pekarek	367
Introduction	367
Theoretical Methods	368
Data Used in the Calculations	370
Comparison of Theory and Experiment	374
Conclusion	388
Appendix A. Description of Fuel Assemblies and Lattice Arrangements	390
References	391

**OPERATING EXPERIENCE WITH UNC-THERMOPILE,
AN ADVANCED MONTE CARLO PROGRAM FOR THE
EVALUATION OF THERMAL ASSEMBLIES**

F. R. Nakache and S. Kellman	395
Introduction	395
General Program Description	396
Specific Program Features for Improvement of Thermalization Calculations	399
Applications	406
Conclusion	415
References	416
