VOLUME II
CONTENTS

TWO-LEVEL INTERFERENCE EFFECTS IN NEUTRON CROSS SECTIONS
J. D. Garrison 3
Introduction 3
Cross-Section and Resonance-Parameter Equations 7
Cross-Section Calculations 18
Distributions of the Kapur-Peierls Parameters 29
Discussion 33
References 34

INTERMEDIATE RESONANCE ABSORPTION
Rubin Goldstein 37
Introduction 37
The IR Approximation 38
Nonhomogeneous Systems 42
References 46

CALCULATION OF RESONANCE INTEGRALS FOR FISSILE MATERIALS
F. T. Adler and D. B. Adler 47
Introduction 47
Cross Sections 48
Resonance Integrals: Remarks on Analytical Approaches 53
Numerical Method and Results 57
Appendix A: Calculation of Background Cross Section 67
Appendix B: Exact Doppler Broadening 71
Appendix C: Preliminary Values of Multilevel Resonance Parameters for the Energy Integral from 0.02 to 37 eV for U^{235} 81
References 82

MONTE CARLO METHODS IN RESONANCE ABSORPTION
Melvin M. Levine 85
Introduction 85
The Method 86
Sampling from Distributions 91
Cross Sections 92
Some Specific Codes 93
Some Results of Monte Carlo Calculations 96
Doppler Calculations 98
Other Monte Carlo Codes 98
Acknowledgments 99
References 99

THE MEASUREMENT OF NEUTRON TOTAL CROSS SECTIONS IN THE RESONANCE-ENERGY REGION AND THE DETERMINATION OF RESONANCE ABSORPTION
J. A. Harvey 103
Introduction 103
Measurement of Total Cross Sections as a Function of Neutron Energy 104
Determination of the Total Width and the Neutron Width of a Resonance from Total-Cross-Section Measurements 107
Determination of Γ_γ from Γ and Γ_n 116
Determination of Resonance Absorption from Γ and Γ_n 120
Conclusions 123
References 123

NEUTRON CAPTURE CROSS SECTION MEASUREMENTS AND RESONANCE PARAMETERS
E. Haddad, F. H. Fröhner, W. M. Lopez, and S. J. Friesenhahn 125
Introduction 125
Experimental Techniques 126
Resonance Parameters from Capture Data 137
Analysis of Combined Data 143
Conclusions 148
References 149

MEASUREMENT OF RESONANCE INTEGRALS
Eric Hellstrand 151
Introduction 151
Experimental Techniques 152
Special Comments 158
Experimental Results for Fertile Materials 162
Conclusions 171
References 172

MEASUREMENT OF INFINITE DILUTION CAPTURE RESONANCE INTEGRALS WITH A MOXON-RAE DETECTOR
L. LeSage and R. Sher 175
Introduction 175
Comparison with Other Methods 175
Description of Counter 177
Experimental Method 177
Formulas for Data Reduction 178
Scattering Correction 179

Self-Shielding Correction 181
Results and Discussion 183
Epicadmium Spectrum 185
Appendix A 187
Appendix B 190
References 192

MEASUREMENTS OF ALPHA AND ETA IN THE INTERMEDIATE ENERGY RANGE
F. D. Brooks 193
Introduction 193
Measurement of Eta and Alpha: General Considerations 194
Direct Measurement of $\eta(E)$ 196
Direct Measurement of $\alpha(E)$ 202
Results of Eta and Alpha Measurements 207
Cross-Section Data Obtained in Conjunction with Eta and Alpha Measurements 216
Conclusions 220
References 221

RESONANCE PROPERTIES OF THE MAIN FERTILE AND FISSIONABLE NUCLEI
J. J. Schmidt 223
Introduction 223
Resolved-Resonance Parameters of U^{235}, U^{238}, and Pu^{239} 223
Statistical Distribution of $\Gamma_n^{(o)}$ and the Average Level Spacing (D) 241
Average Fission Widths and Fission-Width Distributions 244
Statistical Resonance Parameter Sets for U^{235}, U^{238}, and Pu^{239} 253
Conclusion 256
References 256

MEASUREMENT AND ANALYSIS OF CROSS SECTIONS OF FISSILE NUCLIDES
M. S. Moore and O. D. Simpson 261
Introduction 261
Review of the Experimental Measurements 263
Review of Fission Theory and Recent Experiments 272
Selection of Resonance Parameters According to Fission Theory 277
Comparison of the Cross Sections Computed from Monte Carlo Parameters with Measured Cross Sections 281
References 291

SURVEY OF CAPTURE AND FISSION INTEGRALS OF FISSILE MATERIALS
F. Feiner and L. J. Esch 299
Introduction 299
Basic Principles of Methods of Measurement 300
Corrections to the Measurements 303
Summary of Data 308
Conclusions 314
Acknowledgments 317
References 317

EFFECT OF RESONANCE INTERFERENCE DOPPLER-EFFECT CALCULATIONS
R. N. Hwang 319
Introduction 319
Nature of the Problem 320
Characteristics of Resonance Interactions Under Constant-Collision-Density Assumption 323
Interpretations and Results 330
Additional Topic--Effect of the Fluctuations in Collision Density When Resonance Interactions Are Considered 334
Conclusions 339
References 341

DOPPLER AND SODIUM VOID REACTIVITY EFFECTS IN FAST REACTORS
P. Greebler and G. R. Pflasterer 343
Introduction 343
Status of Methods for Calculating Doppler Effect 346
Status of Doppler Experiments 349
Coolant-Void Reactivity Effect 355
References 364

RESONANCE CAPTURE CALCULATIONS FOR GAS-COOLED REACTORS
J. G. Tyror, A. Hart, J. E. Beardwood, and J. D. MacDougall 371
The ARGOSY Method 371
Basic Accuracy of ARGOSY Method 379
The Analysis of Oxide Lattice Experiments 385
References 391

SOME PROBLEMS IN THE CALCULATION OF RESONANCE CAPTURE IN LATTICES
J. R. Askew 395
Introduction 395
Nuclear Data 396
The WIMS Code 398
Comparisons with Monte Carlo Results 402
Comparisons with Calculations of Levine 404
Comparison with Results of Hellstrand 405
Experimental Results from Graphite-Moderated Systems 406
Experiments in Light Water with Metal Fuel 409
Experiments in Light Water with Oxide Fuel 412
Discussion of Results 414
Conclusions 417
References 417

RESONANCE ABSORPTION IN HEAVY-WATER LATTICES, DEVELOPMENT WORK AT ISPRA
L. Amyot, F. Beonio-Brocchieri, A. Boeuf, G. Casini, W. De Haan, E. Diana, and S. Tassan 421
Introduction 421
U^{238} Resonance Absorption 422
Pu^{240} Resonance Absorption 440
References 449
