

CONTENTS

Preface	<u>S.Ishino</u>	... 1
Executive Summary of the Workshop	<u>S.Ishino and F.A.Garner</u>	... 3
Factors for better simulation and for better understanding of fusion neutron radiation effects using fission reactor irradiations	<u>S.Ishino</u>	... 7
Application of fission reactor irradiation data to fusion neutron radiation damage	<u>F.A.Garner</u>	...20
Current status of irradiation techniques in the JMTR	<u>Y.Ichihashi</u>	...35
FFTF operational status and plans	<u>R.J.Puigh</u>	...50
Recent radiation damage studies of fusion materials utilizing JOYO	<u>A.Kimura</u>	... 74
Present status of reactors at ORNL	<u>K.R.Thoms</u>	... 85
Impact of thermal neutrons in fast reactor irradiations	<u>F.A.Garner</u>	... 108
Improvement of fission reactor irradiation techniques	<u>M.Kiritani</u>	... 117
Effect of solid transmutants - A new area of study	<u>F.A.Garner</u>	... 128

Current effort of designing irradiation rig with temperature measurement and control	<u>M.Koyama</u>	... 144
Design of LTCLA for lower temperature irradiation in FFTF	<u>R.J.Puigh</u>	... 152
Current status of the designing of dynamic helium charging experiment in vanadium alloys	<u>K.Abe</u>	... 171
Isotopically alloyed injector foils for helium effects research in mixed-spectrum reactors	<u>K.R.Thoms</u>	... 174
Miniaturized specimen test technique development in JAERI	<u>M.Jitukawa</u>	... 197
Current progress of small bulge test	<u>A.Okada</u>	... 206
Conceptual design of MODULAB	<u>H.Sakai, A.Sakakura and T.Kondo</u>	... 228
Design considerations for post-irradiation testing in a hot-cell	<u>M.L.Hamilton</u>	... 244
Issues on hot laboratory and on transport of irradiated materials	<u>T.Shikama</u>	... 265
Current status of MOTA-2A preparation	<u>M.L.Hamilton and R.J.Puigh</u>	... 286
Issues developed during MOTA-2A preparation process	<u>T.Muroga</u>	... 292

Responsibilities for specimen preparation activities		
.....	<u>M.L.Hamilton</u> and <u>A.Kohyama</u>	... 294
Role and responsibilities of assignees to PNL		
.....	<u>S.Ishino</u>	... 308
Role of Assignee at PNL		
.....	<u>M.L.Hamilton</u>	... 309
Strategy and procedure to initiate activities beyond present annex-I framework		
.....	<u>S.Ishino</u>	... 315
Strategy and procedure for data communication		
.....	<u>Y.Kohno</u>	... 316
Transmittal of Fusion MOTA temperature data to Japan		
.....	<u>M.L.Hamilton</u>	... 324
Japanese plans for PIE at PNL and specimen transportation to Japan (for Cycle 10 and beyond)		
.....	<u>K.Abe</u>	... 325
A procedure for resolving misunderstandings mutually		
.....	<u>M.L.Hamilton</u>	... 332
Current status of escorting requirements		
.....	<u>M.L.Hamilton</u>	... 339
 GROUP DISCUSSION SUMMARY		
Group A; Improvement of reactor operation and designing of irradiation rigs		
.....	<u>M.Kiritani</u> and <u>R.J.Puigh</u>	... 348

Group B:	Improvement of post-irradiation hot-cell experimentation	
.....	<u>A.Kohyama</u> and <u>M.L.Hamilton</u>	... 352
Group C:	Simulation of helium and transmutation effects	
.....	<u>T.Muroga</u> and <u>F.A.Garner</u>	... 355

Appendix:

Agenda	... 357
--------	---------

List of Participants	... 362
