

CONTENTS OF VOL. I

IN MEMORIAM

In Memoriam: Raymond J. Ackermann	3
<i>R.J. Thorn, P.W. Gilles</i>	
In Memoriam: Oleg Sergeevich Ivanov	7
<i>A.S. Panov</i>	

Section A: VAPORIZATION THERMODYNAMICS

A re-determination and re-assessment of the thermodynamics of sublimation of uranium dioxide (IAEA-SM-236/59)	11
<i>R.J. Ackermann, E.G. Rauh, M.H. Rand</i>	
Discussion	26
High-temperature vaporization behaviour of oxygen-deficient thoria (IAEA-SM-236/57)	29
<i>R.J. Ackermann, M. Tetenbaum</i>	
Discussion	42
Thermodynamics of the vaporization of thorium and uranium halides (IAEA-SM-236/31)	45
<i>Rajendra Prasad, K. Nagarajan, Ziley Singh, M. Bhupathy, V. Venugopal, D.D. Sood</i>	
Discussion	59
Thermodynamics of cobalt-containing alloys proposed as materials for high-temperature gas-cooled reactor systems (IAEA-SM-236/27)	61
<i>K. Hilpert</i>	
Discussion	71
Thermodynamics of TiB ₂ from Ti-B-N studies (IAEA-SM-236/53)	73
<i>T.J. Yurick, K.E. Spear</i>	
Discussion	90

Section B: EQUATION-OF-STATE STUDIES

Measurement and analysis of transient vaporization in oxide fuel materials (IAEA-SM-236/60)	93
<i>D.A. Benson, E.G. Bergeron</i>	
Discussion	114

Equation of state for substoichiometric urania using significant structures theory (IAEA-SM-236/17)	115
<i>E.A. Fischer</i>	
Discussion	127
Do electronic transitions contribute to the thermodynamics of condensed UO ₂ ? A review of the arguments (IAEA-SM-236/37)	129
<i>D.A. MacInnes</i>	
High-temperature uranium dioxide, sodium and caesium vapours:	
The effect of thermal ionization and the plasma state on the heat- and radiation-transport properties of the vapour phase (IAEA-SM-236/21)	141
<i>H.U. Karow</i>	
Discussion	153
Experimental investigations into the spectral reflectivities and emissivities of liquid UO ₂ , UC, ThO ₂ and Nd ₂ O ₃ (IAEA-SM-236/22)	155
<i>H.U. Karow, M. Bober</i>	
Vapour pressure measurements of uranium carbides up to 7000 K using laser pulse heating (IAEA-SM-236/04)	171
<i>R.W. Ohse, J.F. Babelot, K.A. Long, J. Magill</i>	
Discussion	193

Section C: SPECTROSCOPY

The thermodynamic functions of gaseous actinide elements: effects of unobserved energy levels (IAEA-SM-236/39)	197
<i>M.H. Rand</i>	
Discussion	216
Photoelectron spectroscopy of 4f, 5f and 2p orbital electrons and the thermochemistry of uranium oxides (IAEA-SM-236/68)	219
<i>G.E. Murch, R.J. Thorn</i>	
Discussion	230

Section D: EMF STUDIES

Термодинамические свойства гамма-урана при образовании твердых растворов с альфа-переходными металлами (IAEA-SM-236/93)	235
<i>Ю.В. Вамберский, А.Е. Иванов, О.С. Иванов</i>	
(<i>Thermodynamic properties of gamma-uranium in the formation of solid solutions with alpha-transition metals: Yu. V. Vamberskij et al.</i>)	

Thermodynamic studies on molybdenum/noble-metal alloys (IAEA-SM-236/28)	249
<i>M. Yamawaki, Y. Nagai, T. Kogai, M. Kanno</i>	
Discussion	261
Thermodynamic studies on liquid Mg-In-Sn ternary solutions (IAEA-SM-236/35)	263
<i>Z. Moser, R. Castanet</i>	
Discussion	271
Investigation of reaction equilibrium in reactor materials by EMF methods (IAEA-SM-236/80)	273
<i>H. Ullmann, K. Teske, T. Reetz, D. Rettig, F.A. Kozlov, E.K. Kuznetsov</i>	
Discussion	286

Section E: DIFFUSION STUDIES

Interdiffusion of krypton and xenon in high-pressure helium (IAEA-SM-236/65)	289
<i>R.J. Campana, D.D. Jensen, B.D. Epstein, R.G. Hudson, N.L. Baldwin</i>	
Изучение закономерностей диффузии водорода в гидридах металлов IV группы (IAEA-SM-236/97)	303
<i>Е.Б. Бойко, А.М. Солодинин, Р.А. Андреевский</i>	
<i>(Study of hydrogen diffusion in group IV metal hydrides: E.B. Bojko et al.)</i>	
Actinide diffusion in waste glasses (IAEA-SM-236/05)	311
<i>Hj. Matzke</i>	
Discussion	324

Section F: OXIDE FUELS

Thermodynamic and chemical properties of thoria-urania and thoria-plutonia solid solution fast breeder reactor fuels (IAEA-SM-236/62)	333
<i>R.E. Woodley, M.G. Adamson</i>	
Discussion	354
Oxygen potentials of $U_{0.77}Pu_{0.23}O_{2+x}$ in the temperature range 1250–1550°C (IAEA-SM-236/43)	357
<i>G.R. Chilton, J. Edwards</i>	
Discussion	367

Oxygen distribution in fast reactor oxide fuels (IAEA-SM-236/07)	369
<i>F.T. Ewart, C.M. Mari, S. Fourcaudot, Hj. Matzke, L. Manes, F. Toci</i>	
Discussion	380
Mesures en continu de la redistribution de l'oxygène sous gradient thermique dans UO_{2+x} (IAEA-SM-236/89)	385
<i>R. Ducroux, M. Fromont, A. Pattoret</i>	
Discussion	403
Model of the thermodynamic properties and structure of the non- stoichiometric plutonium and cerium oxides (IAEA-SM-236/06)	405
<i>L. Manes, C.M. Mari, I. Ray, O. Toft Sørensen</i>	
Discussion	426
Oxygen transport limitations in using getters to control fuel/cladding chemical interaction (IAEA-SM-236/69)	427
<i>C.N. Wilson</i>	
Discussion	437
Seebeck effect in $(\text{U},\text{Pu})\text{O}_{2+y}$ and its influence on oxygen migration (IAEA-SM-236/25)	439
<i>F. d'Annucci, C. Sari, G. Schumacher</i>	
Discussion	450

Section G: FISSION PRODUCTS

Solid solubility of fission-product and other transition elements in carbides and nitrides of uranium and plutonium (IAEA-SM-236/09)	453
<i>U. Benedict</i>	
Discussion	468
Some phase-diagram studies of systems with fission-product elements for fast reactor fuels (IAEA-SM-236/42)	471
<i>H.R. Haines, P.E. Potter, M.H. Rand</i>	
Discussion	501
Thermochemical aspects of fuel/cladding and fuel/coolant interactions in LMFBR oxide fuel pins (IAEA-SM-236/63)	503
<i>M.G. Adamson, E.A. Aitken, R.W. Caputi, P.E. Potter, M.A. Mignanelli</i>	
Discussion	537
Etude hors-pile des réactions de UO_2 , PuO_2 et $(\text{U},\text{Pu})\text{O}_2$ avec le césum (IAEA-SM-236/87)	539
<i>R. Lorenzelli, R. Le Dugal, R. Atabeck</i>	
Discussion	563

Fission-product behaviour in irradiated HTR fissile particles at high temperatures (IAEA-SM-236/19)	565
<i>R. Benz, R. Förthmann, H. Grübmeier, A. Naoumidis</i>	
Discussion	585
Chairmen of Sessions	587
Secretariat of the Symposium	587
