

Table of Contents

Part 1 Introduction

Introduction

- J.B. Kadtko and Yu.A. Kravtsov 3

Part 2 Time Series Analysis: The Search for Determinism

Method to Discriminate Against Determinism in Time Series Data

- R. Cawley, G.-H. Hsu and L.W. Salvino 23

Observing and Predicting Chaotic Signals: Is 2% Noise Too Much?

- T. Schreiber and H. Kantz 43

A Discriminant Procedure for the Solution of Inverse Problems for Non-stationary Systems

- O.L. Anosov and O.Ya. Butkovskii 67

Classifying Complex, Deterministic Signals

- J.B. Kadtko and M. Kremliovsky 79

Part 3 Dynamical Modeling and Forecasting Algorithms

Strategy and Algorithms of Dynamical Forecasting

- O.L. Anosov, O.Ya. Butkovskii and Yu.A. Kravtsov 105

Parsimony in Dynamical Modeling

- A.I. Mees and K. Judd 123

The Bifurcation Paradox: The Final State Is Predictable If the Transition Is Fast Enough

- O.Ya. Butkovskii, Yu.A. Kravtsov and J.S. Brush 143

Part 4 Prediction of Biological Systems

Models and Predictability of Biological Systems

M.P. Paulus 153

Limits of Predictability for Biospheric Processes

N.N. Moiseev 169

Part 5 Analysis and Forecasting of Financial Data

**The Application of Wave Form Dictionaries
to Stock Market Index Data**

J.B. Ramsey and Z. Zhang 189

Part 6 Socio-Political and Global Problems

Messy Futures and Global Brains

G. Mayer-Kress 209

Index 233
