

Table of contents

Preface	v
Scientific Committee	xiii
Local Organizing Committee	xiv
List of participants (per country)	xv
SESSION A : Large Interaction Parameter	1
Liquid metal in a strong magnetic field (<i>General Lecture</i>)	3
O. LIELAUSIS	
Numerical solutions of three-dimensional MHD flows in strong non-uniform transverse magnetic fields	13
T.Q. HUA and J.S. WALKER	
MHD-flows at high R_m, N and Ha	21
I.V. LAVRENTEV	
MHD pressure drop of liquid metal flow in circular and rectangular ducts under transverse magnetic field	29
K. MIYAZAKI, S. INOUE and N. YAMAOKA	
Linear approximation application limits in MHD-flow theory for strong magnetic fields. Experimental results	37
A.V. TANANAEV, T.N. AIKOV, A.V. CHUDOV and V.A. SHMATENKO	
SESSION B : Fusion Related Flows	45
Application of the core flow approach to MHD fluid flow in geometric elements of a fusion reactor blanket	47
M.S. TILLACK	
Experimental and theoretical work on MHD at the kernforschungszentrum Karlsruhe. The MEKKA-program	55
L. BARLEON, V. CASAL, K.J. MACK and H. KREUZINGER	
Liquid metal turbulent flow phenomena and their implications on fusion reactor blanket design	63
S. SUKORIANSKY, H. BRANOVER and E. GREENSPAN	
Experimental investigation of 3-D MHD flows at high Hartmann number and interaction parameter	71
B.F. PICOLOGLOU and C.B. REED	
Magnetohydrodynamics in nuclear energetics (<i>General lecture</i>)	79
V.A. GLUKHIKH	

POSTER SESSION 1 : DC Fields	89	SESSION D : Aluminium Reduction Cells	195
Liquid metal flows with polydispersed solid and gaseous inclusions	91	Amplitude evolution of interfacial waves in aluminium reduction cells	197
V.I. BLINOV, N. Kh. EHRKENOV, Yu. M. GORISLAVETS, A.F. KOLESNICHENKO, A.A. KUCHAEV and A.V. LJUTKEVICH		R.J. MOREAU, S. PIGNY and S.A. MASLOWE	
Dispersion of small particles in MHD flows	97	Physical and mathematical modeling of MHD-processes in aluminium reduction cells	205
G. GERBETH and D. HAMANN		V. BOJAREVICS, A.I. CHAIKOVSKY, E.V. GORBACHEV, H. KALIS, R. MILLERE and Eh. V. SHCHERBININ	
Two-phase flows studies in mercury-air liquid metal MHD generators	103	On the analysis by perturbation methods of the anodic current fluctuations in an electrolytic cell for aluminium production	213
P. SATYAMURTHY, N.S. DIKIT, T.K. THIYAGARAJAN, N. VENKATRAMANI and V.K. ROHATGI		J. DESCLOUX and M.V. ROMERIO	
Liquid metal MHD generators in two-phase flow systems	111	SESSION E : AC Stirring	221
A. EI-BOHER, S. LESIN and H. BRANOVER		Fluid flows induced by alternating magnetic (General lecture)	223
Modelling of magnetohydrodynamic two-phase flow in pipe	119	Y. FAUTRELLE	
J.P. THIBAUT and B. SECK		Fluid metal flow study in an induction furnace based on numerical simulation	233
Melt magnetohydrodynamics of single crystal growth	127	Yu. MIKELSONS, L.L. BULYGIN and A.T. JAKOVICS	
A. BOJAREVICS, Yu. M. GEL'FGAT and L.A. GORBUNOV		A high frequency induction furnace for oxide melting	241
The effect of electromagnetic field on semiconductor single crystal growth and characteristics	135	B. CAILLAULT, Y. FAUTRELLE, R. PERRIER and J.J.AUBERT	
EI. P. BOCHKAREV, V.M. FOLIFOROV, Ju. M. GEL'FGAT, L.A. GORBUNOV, V.S. GOROVIC, O.V. PELEVIN and G.N. PETROV		Directional melt-flow in channel induction furnaces	247
Gas bubbles motion during vacuum treatment of liquid aluminium in MDV-type devices	145	A. MUEHLBAUER, R. FRICKE and A. WALTHER	
Yu. GEL'FGAT, V. POLISHCHUK, L. PUZHAYLO and M. SORKIN		Characteristic properties of MHD flow in magnetodynamic pumps	255
MHD turbulence decay behind spatial grids	153	V. POLISHCHUK, R. HORN, V. DUBODELOV, V. POGORSKY, V. TREFNYAK and M. TSIN	
A.A. KLJUKIN and Ju. B. KOLESNIKOV		SESSION F : Electromagnetic Shaping	263
The effect of a uniform magnetic field on stability, transition and turbulence as a control means for liquid metal flow mixing	161	Deflection of a stream of liquid metal by means of an alternating magnetic field	265
V.M. IEVLEV, A.S. KOROTEV, and V.B. LEVIN		J. ETAY, A.J. MESTEL, and H.K. MOFFATT	
SESSION C : Current Carrying Melts	167	The shape of liquid metal jets under a uniform transverse magnetic field	273
Electrically induced vortical flows (General lecture)	169	S. OSHIMA and R. YAMANE	
Ed. V. SHCHERBININ		Electromagnetic control of liquid metal free surfaces	281
Liquid metal flow near magnetic neutral points	179	M. GARNIER, J. ETAY, A. GAGNOUD, and F. GARNIER	
R.G. KENNY		Deformation of an electrically conducting drop in a magnetic field	287
Modelling of electrically induced flows for studying current carrying melts of electrometallurgical devices	187	G. GERBETH, M. KAUDZE, and A. GAILLITIS	
A. Ju. CHUDINOVSKY, S.B. DEMENT'EV, E.V. SHCHERBININ, V. Kh. VLASJUK and L.A. VOLOKHONSKY		Controlled decomposition of liquid metal jets and films in technological and power devices	293
		V.N. DEM'JANENKO, E.V. MURAV'EV, Yu. GORISLAVETS, I.V. KAZACHKOV, A.F. KOLESNICHENKO, N.V. LYSAK and V.O. VODJANJUK	

POSTER SESSION 2 : AC Fields	299	The helical MHD dynamo	413
More accurate skin-depth approximation	301	A. GAILITIS, O. LIELAUSIS, B.G. KARASEV, I.R. KIRILLOV and A.P. OGOROONIKOV	
A.J. MESTEL		The Ponomarenko dynamo	421
Overall and local thickness measurement of layers with differing electrical properties	309	A.D. GILBERT	
F.R. BLOCK, W. LESCH, and P.PALM		MHD phenomena in fast neutron reactors with a liquid metal heat carrier	425
Determination of MHD machine parameters using the 1D model of a non-uniform flow	317	G.E. KIRKO	
I. GAVARE, R. KRISBERGS, O. LIELAUSIS, M. PUKIS, L. ULMANIS and R. VALDMANE		SESSION I : Turbulence	431
Experimental and theoretical studies on the stability of induction pumps at large R_m numbers	325	The effect of initial and boundary conditions upon the formation and development of MHD turbulence structure	433
J. RAPIN, Ph. VAILLANT and F. WERKOFF		I. PLATNIEKS and S.F. SELUTO	
3500 m^3/h MHD pump for fast breeder reactor	333	Two-dimensional MHD turbulence	441
B.G. KARASEV, I.R. KIRILLOV and A.P. OGORODNIKOV		J. SOMMERIA, J.M. N'GUYEN-DUC and Ph. CAPERAN	
Self-excitation of liquid metal MHD generators	339	MHD instabilities and turbulence in liquid metal shear flows	449
Ph. MARTY and A. ALEMANY		A.A. KLJUKIN and Ju. B. KOLESNIKOV	
Comprehensive study on the MHD phenomena in the metal pool with the single-phase induction coil	347	SESSION J : Stability with Uniform Field	455
E. TAKEUCHI, J. SAKANE, H. YANO, I. MIYOSHINO, T. SAEKI and H. KAJIOKA		Dispersion and chaos in linear arrays of vortices	457
Grain refinement in continously cast ingots of light metals by electromagnetic casting	355	P. TABELING and O. CARDOSO	
Ch. VIVES		Stability of magnetohydrodynamic flow over a stretching sheet	465
Liquid metal flow control using AC fields	363	H.S. TOKHAR, M. ALI and A.S. GUPTA	
D.C. LILICRAP		Stability of closed azimuthal jet of liquid metal	473
SESSION G : Measurements	371	K.A. SERGEEV and V.N. SHTERN	
Diagnostics of liquid metal flows using fibre-optic velocity sensor	373		
V.G. ZHILIN, K.V. ZYAGIN, Yu. P. IVOCHKIN, and A.A. OKSMAN			
On local measurements of the up and downstream magnetic wake of a cylinder at low magnetic Reynolds number	381		
J. LAHJOMRI, Ph. CAPERAN, and A. ALEMANY			
Metallurgical aspects of electromagnetic processing of materials	391		
(General lecture). S. ASAI			
SESSION H : Dynamo Theory	401		
Liquid metal MHD and the geodynamo (General lecture)	403		
H.K. MOFFATT
