LIST OF CONTRIBUTORS  
PREFACE

ix  
xi

## 1 Pitting Corrosion

*J. R. Galvele*

I.	Localized Corrosion	1
II.	Pitting Corrosion	1
	References	53

## 2 The Corrosion Resistance of Glassy Alloys

*R. B. Diegle, N. R. Sorensen, T. Tsuru  
and R. M. Latanision*

I.	Introduction	59
II.	Theoretical Aspects of the Corrosion of Glassy Alloys	60
III.	Resistance to Uniform Corrosion	66
IV.	Localized Corrosion	73
V.	Stress Corrosion Cracking and Hydrogen Embrittlement	88
VI.	Applications	95
VII.	Acknowledgements	99
	References	99

## 3 Stress Corrosion Cracking

*J. C. Scully*

I.	Introduction	103
II.	Testing for Stress Corrosion Cracking	106

III.	General Mechanistic Features	113
IV.	Alloy Systems	127
V.	Additional Mechanistic Features	153
VI.	Conclusion	169
	References	170

## **4 Repassivation Kinetics**

*J. R. Ambrose*

I.	Curve Fitting of Total Anodic Current Decay Kinetics	179
II.	Optical Methods for Determination of Coverage	184
III.	Metal Dissolution Kinetics Using Rotating Ring Disc Voltammetry	191
	References	203

## **5 Anodic Films on Aluminium**

*G. E. Thompson and G. C. Wood*

I.	Introduction	205
II.	The Nature of the Aluminium Surface	207
III.	Interaction of Aluminium and its Film with Aggressive and Inhibitor Anions	215
IV.	Anodic Film Formation on Aluminium	229
V.	Barrier-type Anodic Films	230
VI.	Porous Anodic Film Formation on Aluminium	250
VII.	Different Types of Porous Anodic Film	288
VIII.	Electrolytic Colouring of Porous Anodic Films	301
IX.	Sealing of Anodic Films	311
X.	Conclusions	317
	Acknowledgements	319
	References	320

## **6 The Corrosion of Dental Materials**

*M. Marek*

I.	Review of Materials and Applications	331
II.	The Environment	333
III.	Dental Casting and Wrought Alloys	334
IV.	Dental Amalgam	347
V.	Galvanic Interactions between Restorations	382
VI.	Summary	385
	Acknowledgement	387
	References	388

**7 The Use of a.c. Techniques in the Study of Corrosion and Passivity***C. Gabrielli, M. Keddam and H. Takenouti*

List of Symbols	395
I. Introduction	397
II. The Electrode Impedance	398
III. Experimental Devices	408
IV. The Study of Corrosion Processes	418
V. The Study of the Passivation Process	438
References	448
SUBJECT INDEX	453
CONTENTS OF PREVIOUS VOLUMES	457
