

## *Contents*

CONTRIBUTORS	vii
FOREWORD AND DEDICATION	ix

### **1 The Historical Development of Auger Electron Spectroscopy**

*Dale F. Stein*

I. Introduction	1
II. The Path from Discovery to Practicality to Powerful Instrument	2
III. Summary	14

### **2 Studies of Surface Segregation Kinetics by Auger Electron Spectroscopy**

*Gregory Luckman*

I. Introduction	17
II. The Measurement of Surface Segregation Kinetics by Auger Electron Spectroscopy	20
III. Theoretical Treatments of Surface Segregation Kinetics	25
IV. Experimental Considerations in Studies of Surface Segregation Kinetics by Auger Electron Spectroscopy	48
V. Conclusion	61

### **3 Local Electronic Structure Information in Auger Electron Spectroscopy: Solid Surfaces**

*J. E. Houston and R. R. Rye*

I. Introduction	65
II. Conceptual Background	67
III. Instrumental Aspects	71
IV. Experimental Studies	76
V. Conclusions and Future Prospects	103

**4 Metallurgical Applications of Auger Electron Spectroscopy***C. L. Briant*

I. Introduction	111
II. Experimental Techniques	112
III. Temper Embrittlement	114
IV. Tempered Martensite Embrittlement	133
V. High-Temperature Embrittlement of Ferrous Alloys	138
VI. Embrittlement of Nonferrous Alloys	140
VII. Corrosion and Stress Corrosion Cracking	146
VIII. Analysis of Particle-Matrix Interfaces	154
IX. High-Resolution Scanning Auger Electron Spectroscopy	158
X. Summary	163

**5 Auger Photoelectron Coincidence Spectroscopy***G. A. Sawatzky*

I. Introduction and Principle	168
II. Theory	172
III. APECS Instrumentation	186
IV. Some Experimental Results	215
