GENERATION OF NONINDUCTIVE CURRENT IN A TOKAMAK

Ya. I. Kolesnichenko, V. V. Parail, and G. V. Pereverzev

Introduction	1
1. Qualitative Analysis of Noninductive Methods of Generating a Stationary Current in a Tokamak	7
1.1. Main Mechanisms of Current Generation	7
1.2. Methods Based on Introducing a Longitudinal Pulse into a Plasma	12
1.3. Methods Not Involving an External Pulse	24
2. Maintenance of a Stationary Current in a Tokamak	39
2.1. Tokamak Reactor with Self-Maintaining Current (Boot Strap Tokamak)	39
2.2. Maintaining a Current in a Tokamak by Neutral-Atom Injection	51
2.3. HF-Dragging Currents in a Plasma	66
2.4. Plasma Production by Cyclotron Waves	98
3. Dynamics of Current Production in a Tokamak	111
3.1. Kinetics of Current Generation in a Plasma with an Electric Field	111
3.2. Dynamics of Total Current in a Tokamak	129
3.3. Distribution of Noninductive Current in a Tokamak	150
3.4. Dynamics of Current Density in a Tokamak	164
4. Conclusion	178

**RESONANCE EFFECTS IN OSCILLATIONS
OF UNEVEN FLOWS OF CONTINUOUS MEDIA**

A. V. Timofeev

Introduction	193
1. Oscillations of Plane-Parallel Liquid Flows	196
1.1. Rayleigh's Theorem	196
1.2. Allowance for Viscosity. Landau's Circuited Theorem	199
1.3. Rayleigh's Equation as a Schrödinger Equation with a Singular Potential	205
1.4. Analog of Rayleigh's Theorem for Singular Equations with Pole of Arbitrary Order	211
1.5. Rayleigh Instability	213
1.6. Analysis of Resonant Interaction in Flows of an Ideal Liquid.	216
1.7. Influence of Viscosity on Flow Stability	226
1.8. Instability of Flows as a Result of the Action of a Reynolds Stress	235
1.9. Evolution of Initial Perturbation in Liquid Flows ..	237
1.10. Resonant Buildup of Gravitation Waves	244
1.11. Resonant Interaction in Flows of a Compressible Liquid	249
2. Flute Oscillations of a Charged-Particle Gas and of an Inhomogeneously Rotating Plasma in a Magnetic Field ..	255
2.1. Charged-Particle Gas in a Magnetic Field	255
2.2. Rarefied Uncompensated Plasma	265
2.3. Dense Rotating Plasma	271
3. Oscillations of Inhomogeneous Electron Streams in a Longitudinal Magnetic Field	279
3.1. Flow with Linear Velocity Profile	279
3.2. Adjacent Flows	284
4. Alfvén Oscillations of an Inhomogeneous Plasma	286
Appendices	293
A.1. Rayleigh's Theorem and Damped Oscillations ...	293
A.2. Fourth-Order Equations with Small Parameter of the Highest Derivative	294
References	298
