	Introduction	xi
PART A	AXIOMATICS	
A-1	Self-consistent kinetic equations (H. S. GREEN)	3
A-2	Renormalized kinetic equations (J. R. DORFMAN)	21
A3	Master equations for finite systems (C. J. Myerscough)	29
A4	An application of the generalized Langevin equation to the study of correlations in simple, classical fluids (A. Z. AKCASU and J. J. DUDERSTADT)	45
A–5	Kinetic equations with radiation effects (R. HAKIM and A. MANGENEY)	69
A-6	The Boltzmann-Langevin equation (abstract)(R. ZWANZIG and M. BIXON)	75
PART B	QUANTUM AND RELATIVISTICS	
B–1	The self-consistent test particle approach to relativistic kinetic theory (W. B. THOMPSON)	79
B-2	Kinetic equations in spin systems (P. Résibois)	91
B-3	The role of plasma kinetic theory in spectral line shapes	

* 1			-			-

B4	Interaction between atom and ro (F. Henin)	adiatic	on field	ł			111
B-5	Upper and lower bounds on trans to the Boltzmann equation of a (H. SMITH and J. W. WILKINS)	sport o Fermi	coeffic liquia	ients d l	as app	lied	123
B6	The Boltzmann equation and ga (R. F. SNIDER)	seous	NMR				129

Kinetic equations

PART C PROPERTIES AND SOLUTIONS

viii

C-1	Triple collision effects in the transport properties for a gasof hard spheres(J. V. SENGERS)	137
C-2	Constants of the linearized motion of Vlasov-plasmas (B. U. Felderhof)	195
C-3	A review of the unified theory of relaxations in plasmas (T. KIHARA and O. AONO)	201
C-4	Some comments on the structure of Boltzmann's H function (S. HARRIS)	225
C-5	Quantum Boltzmann equation for a laser(C. R. WILLIS)	235
C6	Kinetic theory of a weakly, unstable plasma (abstract) (C. OBERMAN)	251
C-7	Kinetic theory of zero-field gain in a gaseous laser (abstract) (T. F. MORSE and J. CIPOLLA)	253
PART D	WAVES AND FLUCTUATIONS	
D_1	Kinetic theory of waves in hot low density plasma	

D-1	(R. N. SUDAN)	w aens •	asma		257
D2	Relaxation spectrum for phonons (G. WANNIER and F. CLARO)				273

Contents		ix
D-3	Kinetic equation methods in quantum fluids: Fermi liquids (A. Ron)	277
D-4	Wave-wave interactions due to scattering by electrons (K. NISHIKAWA)	287
D-5	Test-particle method in kinetic theory of a plasma (K. MATSUDA)	299
D-6	The two-particle correlation function in nonequilibrium statistical mechanics	
	(A. H. KRITZ, G. V. RAMANATHAN, and G. SANDRI) .	307
