LIST OF THE MOST FREQUENTLY OCCURRING SYMBOLS	xi
FOREWORD TO THE ENGLISH EDITION	xii
INTRODUCTION	1
CHAPTER I LINEAR THEORY OF CYCLOTRON WAVES IN PLASMA	9
1.1 Dielectric permittivity tensor and dispersion equation	10
1.2 Dispersion equation and dielectric permittivity tensor for case of transverse propagation $\theta = \pi/2$	13
1.3 Ordinary electron and ion cyclotron waves	17
1.4 Extraordinary electron cyclotron waves	20
1.5 Extraordinary ion cyclotron waves and interaction of ion cyclotron waves with fast magnetosonic waves	22
1.6 Dielectric permittivity tensor and dispersion equation for slow ion cyclotron waves	26
1.7 Slow ion cyclotron waves in low-pressure plasma (electrostatic oscillations)	29
1.8 Slow ion cyclotron waves in finite-pressure plasma (nonelectrostatic oscillations)	34
1.9 Low frequency longitudinal electron - ion plasma oscillations in a magnetic field	38
1.10 Cerenkov and cyclotron excitation of low frequency longi- tudinal oscillations by streams of charged particles	42
(a) <i>Excitation of plasma oscillations by streams of charged particles</i>	44
(b) <i>Excitation of plasma oscillations by a beam of charged particles having an anisotropic distribution function</i>	50
1.11 Discussion of experimental results from investigations of dispersion and damping of electron cyclotron and ion waves	61
(a) <i>Electron cyclotron waves</i>	61
(b) <i>Ion cyclotron waves</i>	68
(c) <i>Electrostatic ion acoustic waves in a magnetic field</i>	79
CHAPTER II CYCLOTRON INSTABILITIES IN PLASMA WITH A TRANSVERSE CURRENT	85
2.1 Linear theory of electron cyclotron instability in plasma with a transverse current ($u \ll v_{Te}$)	87
(a) <i>Kinetic instability</i>	87
(b) <i>Hydrodynamic instability</i>	90
2.2 Dispersion equation for weakly inhomogeneous plasma with a transverse current (local approximation)	92
2.3 Ion acoustic instability in low-pressure plasma	96
2.4 Electron cyclotron wave instability when $u \sim v_{Te}$	98
2.5 Influence of loss cone on development of ion plasma and elec- tron cyclotron instability in absence of transverse current	101
(a) <i>Ion plasma instability</i>	103
(b) <i>Electron cyclotron instability</i>	105
2.6 Influence of loss cone on development of ion plasma and electron cyclotron instability for plasma carrying a transverse current	106
(a) <i>Ion plasma instability</i>	106
(b) <i>Electron cyclotron instability</i>	108

	<u>Page</u>
CHAPTER III ELECTRON CYCLOTRON INSTABILITY AND TURBULENCE IN PLASMA CARRYING A TRANSVERSE CURRENT	111
3.1 Turbulence and anomalous resistivity in a hot ion plasma (kinetic instability)	112
3.2 Turbulence and anomalous resistivity in a hot electron plasma (hydrodynamic instability)	116
(a) <i>Large drift velocity</i>	116
(b) <i>Small drift velocity</i>	117
3.3 Nonlinear theory of cyclotron instability in single-mode regime (ion trapping)	122
3.4 Nonlinear theory of cyclotron instability in single-mode regime (electron stabilization mechanism)	130
3.5 Structure of collisionless shock wave caused by electron cyclotron waves	133
3.6 Discussion of experimental results on excitation of electron cyclotron waves by a transverse beam	137
CHAPTER IV ELECTRON CYCLOTRON INSTABILITY AND TURBULENCE IN PLASMA WITH AN ALTERNATING ELECTRIC FIELD	143
4.1 Dispersion equation for longitudinal oscillations of plasma in an alternating electric field	144
4.2 Kinetic electron cyclotron parametric instability of hot ion plasma	145
4.3 Hydrodynamic electron cyclotron parametric plasma instability	149
4.4 Ion acoustic parametric plasma instability	152
4.5 Discussion of experimental results if investigations on parametric instability of electron cyclotron waves and on anomalous wave absorption in plasma	155
APPENDIX CYCLOTRON WAVES IN METALS	163
A.1 Propagation of electromagnetic waves in metals	164
A.2 Ordinary cyclotron waves in metals	166
A.3 Extraordinary cyclotron waves in metals	170
A.4 Coupled cyclotron and spin waves in magnetically ordered metals and semiconductors	177
(a) <i>Ordinary wave</i>	179
(b) <i>Extraordinary wave</i>	181
A.5 Coupled cyclotron and spin waves in nonferromagnetic metals	184
A.6 Discussion of experimental results on investigations of propagation of cyclotron waves in metals	186
