CONTENTS

	Foreword	**iii**
	Preface	**v**
1	**Introduction**	**1**
2	**Effects of Transport on Tokamak Discharges**	**6**
3	**Drift Waves in an Inhomogeneous Plasma**	**17**
4	**Conditions for Drift-Wave Instability**	**20**
5	**Drift Wave Destabilized by a Small Population of Trapped Electrons**	**22**
6	**Shear Stabilization of Drift-Wave Instabilities**	**29**
7	**Further Discussion of Shear Stabilization**	**33**
8	**A Collection of Formulas Concerning the Magnetic Field and Particle Orbits in a Torus**	**38**
9	**Vlasov Theory of the Trapped-Electron Response**	**43**
10	**Variational Calculation of Eigenfunctions and Eigenvalues**	**50**
11	**Anomalous Transport from Trapped-Particle Instabilities**	**56**

Appendix A: Additional Properties of Drift Waves 67

Appendix B: Magnetic Surfaces 72

Appendix C: Energy and Momentum in Waves 74

Appendix D: Additional Properties of the Trapped-Electron Response 83

Appendix E: Additional Aspects of Cross-Field Energy Flux 85

Annotated Bibliography 87
