

## IV

CONTENTS

## INVITED PAPERS

|  |     |
|--|-----|
| <u>V.V. Alikaev</u> , Electron-Cyclotron Plasma Heating  | 1   |
| <u>E. Bell</u> et al., Recent PDX Results  | 21  |
| <u>H.A.B. Bodin</u> , Reversed-Field Pinch Experiments   | 41  |
| <u>G.I. Dimov</u> , Production of Intense Negative Hydrogen Ion Beams  | 81  |
| <u>R.R. Borchers - T.K. Fowler</u> et al., Progress in the Tandem Mirror Program   | 107 |
| <u>G. Grieger</u> , INTOR Physics  | 131 |
| <u>A.V. Gaponov</u> et al., Achievements and Problems of Relativistic High-Frequency Electronics   | 153 |
| <u>M.S. Ioffe</u> et al., Magneto-electrostatic Plasma Confinement   | 177 |
| <u>P.L. Kapitza</u> , The Study of Thermonuclear Problems Conducted at the Institute for Physical Problems of the USSR Academy of Sciences | 197 |
| <u>L.I. Ponomarev</u> , Muon Catalysis of Nuclear Fusion in Deuterium-Tritium Mixture  | 223 |
| <u>J.P. Rager</u> , Progresses on Plasma Focus Research at Frascati  | 243 |
| <u>V.D. Shafranov</u> , Equilibrium and Stability of Toroidal Plasma   | 269 |
| <u>N. Suzuki</u> et al., JFT-2 Heating Experiments   | 307 |
| <u>V.S. Strelkov</u> , Tokamak Research in the Soviet Union  | 327 |
| <u>P. Sunka</u> , Plasma Heating by High-Power Relativistic Electron Beams   | 343 |

## V

|   |     |
|---|-----|
| <u>N.A. Uckan</u> , Status of the Elmo Bumpy Torus Research           | 363 |
| <u>E.P. Velikhov</u> , Controlled Thermonuclear Fusion in the USSR    | 383 |
| <u>H. Wolff</u> , Plasma-Wall Interaction                             | 445 |
| <u>C. Yamanaka</u> , Inertial Fusion Research at Ise Osaka            | 469 |
| <u>G. Yonas</u> , Inertial Fusion Research Using Pulsed Power Drivers | 501 |

## CONTRIBUTED PAPERS NOT INCLUDED IN VOL. I

|  |      |     |
|--|------|-----|
| <u>L.J. Pan</u> et al., The Analytical Solution and Maximum $\beta$ for the Equilibrium of a Fat Tokamak with Circular Cross-Section                                 | B-6  | 523 |
| <u>Xu Fu</u> et al., Kelvin-Helmholtz Instability in Tokamaks  | B-10 | 527 |
| <u>I.K. Konkashbayev</u> et al., Open Trap with min B and $\beta = 1$  | C-11 | 531 |
| <u>I.P. Afonin</u> et al., Current Channel Forming Processes and Energy Release in the Diode of the 'Angara-I' High-Current Accelerator                              | F-2a | 535 |
| <u>J.L. Montanes</u> et al., Light-Pressure Effects on Ion Spectra in Two-Ion Laser Plasmas  | F-8  | 539 |
| <u>W. Hintze</u> , One-Dimensional Simulation of Collective Ion Acceleration by a Relativistic Electron Beam   | F-13 | 543 |
| <u>M. Lisak</u> et al., Effects of Velocity Space Loss-Regions on the Alpha Particle Distribution Function and Collisional Alpha Particle Losses in Tokamak Reactors | G-2a | 547 |

## VI

|  |     |   |
|--|-----|---|
| <u>R.R. Bartsch</u> et al., Los Alamos Compact Toroid /CT/<br>Research on the Field-Reversed<br>Configuration /FRC/ and Spheromak-type<br>Magnetized-Gun-Generated CTs | L-4 | 5 |
| <u>J.N. Mohanty</u> , Electrostatic Waves in a Plasma<br>Stream Instability: Modified Landau<br>Damping and Streaming Ion Acoustic<br>Mode                             | M-5 | 5 |

## SUPPLEMENTS TO CONTRIBUTED PAPERS IN VOL.I

|   |     |   |
|---|-----|---|
| <u>D.G. Bulyginsky</u> et al., Electron Cyclotron Heating<br>in FT-1 Tokamak above Critical Plasma<br>Density ...belonging to             | H-8 | 5 |
| <u>S.G. Goncharov</u> et al., Post-Compression Period<br>Investigation in Tuman-2A: A Tokamak<br>with Magnetic Compression ..belonging to | A-3 | 5 |

## POST-DEADLINE PAPERS

|   |      |   |
|---|------|---|
| <u>A.A. Bagdasarov</u> et al., Plasma Experiments on T-7<br>Superconducting Tokamak                 | AP-1 | 5 |
| <u>A.V. Gorshkov</u> et al., Plasma Potential and its<br>Variation with ECRH on the TM-4<br>Tokamak | AP-2 | 5 |
| <u>M.Yu. Cherkashin</u> et al., Tearing Mode Time Evolution<br>in T-7 Tokamak                       | AP-3 | 5 |

## VII

|   |      |     |
|---|------|-----|
| <u>V. Parail</u> et al., Anomalous Plasma Diffusion<br>in Tokamak   | BP-1 | 579 |
| <u>u.N. Dnestrovskii</u> , Losses of Hot Injected Ions<br>through Multiple Charge Exchange in<br>Tokamak  | BP-2 | 583 |
| <u>V. Gavrilov</u> et al., Compression of Plasma Jets<br>/ $\beta = 1$ / in a Conic Liner and their<br>Collision  | CP-2 | 587 |
| <u>I. Krauz</u> et al., Plasma Focus Studies at Energies<br>up to 250 KJ  | DP-1 | 591 |
| <u>H. Brownell</u> et al., Ultra-High Plasma Experiments:<br>MHD Simulations  | DP-5 | 595 |
| <u>A. Batyuk</u> et al., First Experiments on Ion-<br>-Cyclotron Plasma Heating on L-2<br>Stellarator   | EP-1 | 599 |
| <u>Ohkawa</u> et al., Preliminary Results from the<br>OHTE Experiment   | EP-4 | 603 |
| <u>G. Basov</u> et al., Preliminary Experiments in the<br>Heating Spherical Targets at 'Delfin-1'   | FP-1 | 607 |
| <u>N. Zakharov</u> et al., Pinching of a Laser Plasma<br>in a High-Current Accelerator Diode  | FP-3 | 611 |
| <u>B. Baksht</u> et al., Generation of a Dense Hot<br>Plasma by Fast Compression of Shells  | FP-5 | 615 |
| <u>. Andreev</u> et al., Absorption Efficiency of<br>Powerful Laser Radiation of Varied<br>Duration at Wavelengths 350 nm - 1<br>$\mu\text{m}$ in Plasma with Different z | FP-6 | 619 |

## VIII

|  |           |
|--|-----------|
| <u>G. Leira</u> et al., Analysis of Fusion Performance<br>by Inertial Confinement: Effects of<br>Pressure Ionization and Electron<br>Conduction on the Ignition of DT Fusion<br>in Hollow-Shells by Isentropic<br>Implosions | FP-15 623 |
| <u>A.A. Filyukov</u> et al., Effective Multistage Ablation   | FP-17 627 |
| <u>Yu.A. Bondarenko</u> et al., Ablative Acceleration of<br>Double-Layer Targets   | FP-19 631 |
| <u>A.I. Zaretski</u> et al., Irradiation of Microspheres<br>with the 2 Tw Iodine Laser   | FP-20 635 |
| <u>M.G. Kuznetsov</u> , Tandem Mirror Reactor Calculations<br>with Respect to Axial Nonuniformity of<br>Electron Temperature   | GP-2 639  |
| <u>M.F.A. Harrison</u> et al., Modelling of the Single-<br>-Null Divertor of INTOR: Plasma<br>Exhaust and Gas Pumping  | GP-3 643  |
| <u>O.M. Shvets</u> et al., ICRF Heating of a Two-Ion<br>Currentless Plasma in the Uragan-2<br>Stellarator  | HP-1 647  |
| <u>A.G. Elfimov</u> et al., Drag Currents Profiles<br>Formation and Diffusion Control by<br>HF Fields in a Steady-State Tokamak  | HP-2 651  |
| <u>A.V. Longinov</u> et al., Main Features of the 'Kedr'<br>RF Device and First Results on ICRF<br>Heating in T-10 Tokamak   | HP-4 655  |
| <u>A. Buffa</u> et al., Optimization of the Joule Heating<br>in RFP Plasma   | LP-1 659  |

|   |          |
|---|----------|
| <u>A. Buffa</u> et al., RFP Formation and Volt Consumption<br>with Various Current Rise Times   | LP-2 663 |
| <u>S.N. Voronkov</u> et al., Experimental Investigation<br>of Simulated Cyclotron Millimeter<br>Wavelength Emission of Relativistic<br>High-Current Electron Beam | MP-2 667 |
| <u>A.N. Didenko</u> et al., Experimental Investigation of<br>Simulated Microwave Radiation of<br>High-Power Relativistic Electron Beams                           | MP-6 671 |
