

## Oral Presentations

- O 1 Scott S.D., Isler R.C., Murakami M., Bell J.D., Bush C.E., et al.  
ORNL, Oak Ridge, Tennessee, USA  
Carnevali A., Murray L.E.  
University of Tennessee, Knoxville, Tennessee, USA  
Harding University, Searcy, Arkansas, USA  
**Neutral injection experiments on the ISX-B tokamak**
- O 2 Greenwald M., Parker J., Besen M., Fiore C.L., Foord M., et al.  
Plasma Fusion Center, MIT, Cambridge, Massachusetts, USA  
Milora S., Schuresco D.  
ORNL, Oak Ridge, Tennessee, USA  
**Hydrogen pellet injection into ALCATOR-C**
- O 3 Burrell K.H., Doublet III Physics, Operations and Neutral Beam Groups  
GA-Technologies, Inc., San Diego, Ca., USA  
**A regime of improved energy and particle confinement in neutral beam heated divertor discharges in DOUBLET III**
- O 4 Ellis J.J., Morris A.W.  
Culham Laboratory, Abingdon, Oxon, UK  
**Instability control with active saddle coils on TOSCA**
- O 5 Dobrokhotov E.J., Dremin M.M., Pavlov Yu.D., Petrov D.P., Soltsev A.M., Stefanovskij A.M., Terebkov A.L., Shcherbak A.F.  
I.V.Kurchatov Institute of Atomic Energy, Moscow, USSR  
**Bolometer measurements of the energy losses in the graphite wall tokamak**
- O 6 Fußmann G., Behringer K., Bernhardt K., Haas G., Poschenrieder W., et al.  
MPI für Plasmaphysik, Garching, FRG  
Kissel S., Szymanski Z.,  
on leave from MIT, Cambridge, Massachusetts, USA  
on leave from Institute of Fundamental Technological Research, Warsaw, Poland  
**Impurity retainment in the divertor of ASDEX**
- O 7 Meyer-ter-Vehn J., Arnold R., Metzler N., Schmalz R., Unterseer K., Witkowski S.  
MPI für Quantenoptik, Garching, FRG  
**ICF-target research at MPQ/Garching**
- O 8 Yoshida K., Miyanaga N., Kitagawa Y., Kato Y., Nishihara K., et al.  
Institute of Laser Engineering, Osaka University, Osaka, Japan  
**Efficient and uniform compression to high density with 1.052 $\mu$ m GM-II laser**
- O 9 Rockett P.D., Tarvin J.A., Busch Gar. E., Charatis G., Johnson R.R., et al.  
KMS Fusion, Inc., Ann Arbor, Michigan, USA  
**The impact of quality diagnostics on ICF research at KMS-Fusion, Inc.**
- O 10 Kaye S.M., Bell M., Bol K., Boyd D., Brau K., et al.  
PPPL, Princeton University, Princeton, NJ, USA  
**High confinement discharges in PDX with neutral beam injection**
- O 11 Degtyarev L.M., Poshekhonov Yu.Yu.  
Keldysh Institute of Applied Mathematics  
Shafranov V.D.  
I.V. Kurchatov Institute of Atomic Energy, Moscow, USSR  
**Comparative characteristics of various plasma systems**
- O 12 Chance M.S., Chen L., Furth H.P., Goldston R., Grimm R.C., et al.  
PPPL, Princeton University, Princeton, NJ, USA  
Dewar R.L.  
Research School of Physical Sciences, A.N.U., Australia  
Todd A.  
Grumman Aerospace Corporation, Princeton, New Jersey, USA  
**Bean-shaped tokamak configurations**
- O 13 Berk H.L., Rosenbluth M.N.  
Institute for Fusion Studies, University of Texas at Austin, USA  
Shohet J.L., Hitchon W.N.G.  
University of Wisconsin, Torsatron/Stellarator Laboratory, Madison, Wisconsin, USA  
**Ballooning mode calculations in stellarators**
- O 14 Rogister A., Hasselberg G., Waelbroeck F.  
IPP, KFA Jülich GmbH, Jülich, FRG  
**On the origin of sawtooth relaxations and plasma disruptions**
- O 15 Goedbloed J.P., Freidberg J.P., Rohatgi R.  
Plasma Fusion Center, MIT, Cambridge, Ma., USA  
On leave from FOM-Instituut voor Plasmafysica, Rijnhuizen, Nieuwegein, The Netherlands  
**Influence of a limiter on the stability of external kink modes**
- O 16 Faulconer D.W.  
Laboratoire de Physique des Plasmas, Ecole Royale Militaire, Brussels, Belgium  
**Electrostatic shield fringe field interaction with plasma in rf heating**
- O 17 Swain D.W., Colchin R.J., Baity F.W., Cobble J.A., Davis W.A., et al.  
ORNL, Oak Ridge, Tennessee, USA  
**The EBT experiment**
- O 18 Lyon J.F., Carreras B.A., Cooper W.A., Dory R.A., Garcia L., et al.  
ORNL, Oak Ridge, Tennessee, USA  
Charlton L.A., Fowler R.H., Hicks H.R., Holmes, J.A., Lynch V.E., Masden B.F.  
Union Carbide Corporation Nuclear Division, Computer Sciences  
**ATF-1 torsatron studies**
- O 19 Uo K., Iiyoshi A., Obiki T., Motojima O., Morimoto S., et al.  
Plasma Physics Laboratory, Kyoto University, Kyoto, Japan  
**Recent results of nbi and ecr heating experiments on HELIOTRON E**

## VIII

- O 20 Andryukhina Eh.D., Agapov L.N., Batanov G.M., Berezhetskij M.S., Blokh M.A. et al.  
General Physics Institute, USSR Academy of Sciences, Moscow, USSR  
**Initial experiments on electron cyclotron plasma heating in the L-2 stellarator**
- O 21 Nedospasov A.V., Tokar M.Z.  
Institute of High Temperatures, USSR Academy of Sciences, Moscow, USSR  
**Recycling influence on plasma of a tokamak periphery**
- O 22 Bernard L.C., Bhadra D.K., Helton F.J., Lao L.L.  
GA Technologies, Inc., San Diego, California, USA  
Todd T.N.  
Culham Laboratory, Abingdon, Oxon, UK  
**Ideal MHD beta limits: scaling laws and comparison with DOUBLET III high-beta plasmas**
- O 23 Czekaj S., Denus S., Kaspercuk A., Miklaszewski R., Paduch M., et al.  
S. Kaiski Institute of Plasma Physics and Laser Microfusion, Warsaw, Poland  
**Investigation of connections between the plasma column evolution and the neutron emission in the plasma focus device**
- O 24 Yokoyama M., Yamamoto Y., Kisoda A., Yamada Y., Kitagawa Y., Yamanaka M., Yamanaka C. et al.  
Institute of Laser Engineering, Osaka University, Osaka, Japan  
**Dense plasma focus research in ILE, Osaka**
- O 25 Herold H., Bertalot L., Jäger U., Schmidt H., Schmidt R., Shakhmatre M.  
Institut für Plasmaforschung, Universität Stuttgart, FRG  
**Plasma dynamics, neutron and ion emission of the POSEIDON plasma focus**
- O 26 Brzosko<sup>1</sup> J.S., Conrads<sup>2</sup> H., Rager<sup>3</sup> J.P., Robouch B.V., Steinmetz<sup>4</sup> K.  
Association EURATOM-ENEA, Frascati (Rome), Italy  
<sup>1</sup>University of Warsaw, Bialystok Branch, Poland  
<sup>2</sup>JIPP, KFA Jülich GmbH, Jülich, FRG  
<sup>3</sup>DG- 12-Fusion (Meeus), CCE Brussels, Belgium  
<sup>4</sup>MPI für Plasmaphysik, Garching, FRG  
**Characteristics of high energy deuterons in the Frascati 1-MJ plasma focus**
- O 27 Jerzykiewicz A., Bielik M., Jankowicz Z., Kociecka K., Kocinski L., et al.  
Institute for Nuclear Studies, Swierk, Poland  
Borowiecki M., Czekaj S., Denus S., Skrzeczanowski W.  
Institute of Plasma Physics and Laser Microfusion, Warsaw, Poland  
**Preliminary investigations of 360 kJ plasma-focus device**
- O 28 Nardi V., Bostick<sup>1</sup> W.H., Powell C., Prior W.  
Stevens Institute of Technology, Hoboken, N.J., USA  
<sup>1</sup>Physics Department, University of New Mexico, Albuquerque, New Mexico, USA  
**Ion imaging and energy spectrum from the plasma-focus ion emission**
- O 29 Tuszewski M., Armstrong W.T., Barnes Cris W., Barnes D.C., Bartsch R.R., et al.  
Los Alamos Natl. Lab., Los Alamos, NM., USA  
Gladd N.T.  
Jaycor, Inc., Del Mar, California, USA  
Shestakov A.I.  
Lawrence Livermore Natl. Lab., Livermore, California, USA  
**Recent results in the Los Alamos compact torus program**
- O 30 Antoni V., Buffa A., Giudicotti L., Martini S., Ortolani S., Puiatti M.E., Scarin P.  
Istituto Gas Ionizzati del C.N.R., Padova, Italy  
**Reversed field pinch experiments at various currents in ETA-BETA II**
- O 31 Watt R.G., Jacobson A.R., Massey R.S., Mondt J.P. and the ZT-40M Team  
Los Alamos Natl. Lab., Los Alamos, New Mexico, USA  
**Recent results from the ZT-40M reversed field pinch program**
- O 32 Porkolab M., Lloyd B., Schuss J.J., Takase Y., Texter S., et al.  
Plasma Fusion Center, MIT, Cambridge, Ma., USA  
**Lower hybrid current drive and heating experiments at the 1MW rf power level on ALCATOR-C**
- O 33 Nagayama Y., Tsuji S., Miyamoto K.  
Department of Physics, University of Tokyo, Tokyo, Japan  
Kawahata K., Noda N., Tanahashi S., Fujita J.  
Institute of Plasma Physics, Nagoya University, Nagoya, Japan  
**A study of tokamak disruptions in JIPP T-II using soft X-ray imaging**

- E 44 Wooding E.R., Brown D.A., Marchington P.S.,  
Sayed N., Sudera Y.  
Royal Holloway College, University of London, UK  
**Density profiles and fluctuations in CO<sub>2</sub> laser  
produced plasmas**
- E 45 Murusidze I.G., Tsintsadze N.L., Tskhakaya D.D.,  
Institute of Physics, Academy of Sciences of the  
Georgian SSR, Tbilisi, USSR  
**Radiation of Alfvén waves by the accelerating  
Langmuir soliton**

### Diagnostics

Part II, p. 51 - 100

### Laser-Plasma Interaction, Inertial Confinement Part II, p. 1 - 50

- E 37 Atzeni S., Caruso A.  
CRE, Frascati, Italy  
**Ignition criterion for dense, isobaric D-T  
plasmas and consequences on ICF target design**
- E 38 Heikkinen J.A., Karttunen S.J., Salomaa<sup>1</sup> R.R.E.,  
Technical Research Centre of Finland,  
Nuclear Engineering Laboratory, Helsinki, Finland  
<sup>1</sup>Helsinki University of Technology, Espoo, Finland  
**Nonlinear ion waves in absolute Brillouin scattering**
- E 39 Yoshida K., Kato Y., Nakatsuka M.,  
Jitsuno T., Nowada S. et al.  
Institute of Laser Engineering, Osaka University, Suita,  
Osaka, Japan.  
**GEKKO XII glass laser system for laser fusion research**
- E 40 Hora H., Lalouis P., Ghatak A.K., Jones<sup>1</sup> D.A.  
Talapaga-Rosenberger S.  
Department of Theoretical Physics, University of New  
South Wales, Kensington, Australia  
<sup>1</sup>Materials Research Labs., Ascot Vale, Victoria  
**High electrostatic fields and oscillations in  
expanding inhomogeneous plasmas without  
external fields or with laser irradiation**
- E 41 Sternlieb A.  
Soreq Nuclear Research Centre, Yavne, Israel  
**Scaling laws for the resistive longitudinal  
instability in finite charged beams**
- E 42 Nicolas J.A., Sanmartin J.R.  
ETSI Aeronáuticos, Universidad Politécnica de Madrid,  
Spain  
**Inverse Bremsstrahlung effects on the coronae  
of laser-irradiated pellets and slabs**
- E 43 Barrero A., Rosety L., Sanz<sup>1</sup> J.  
ETSI Industriales, Universidad de Sevilla, Spain  
ETSI Aeronáuticos, Universidad de Politécnica de Madrid,  
Spain  
**Spherical expansion plasmas in ion beam  
impinged pellets**
- E 14 Mori I.  
Technical College of Tokushima University,  
Tokushima, Japan  
**Ion temperature measurement with neutral beams**
- E 15 Alladio F., Crisanti F.  
CRE, Frascati, Italy  
**Equilibrium magnetic measurements by toroidal  
multipolar method for FTU tokamak**
- E 16 Lehner Th.  
Laboratoire de Physique des Milieux Ionisés, Ecole  
Polytechnique, Palaiseau, France  
**Ion Bernstein modes fluctuations as a measure of  
the magnetic field orientation**
- E 17 von Hellermann M., Güler H.J., Hasse O.R.,  
FB Physik, Universität Essen, FRG  
**Observation of plasma turbulence by coherent  
far forward scattering using a multi channel  
detector array at 10 microns**
- E 18 Airoldi A.C., Orefice A., Ramponi G.  
Istituto di Fisica del Plasma, CNR Milano, Italy  
**Ece simulation for a toroidal plasma and its  
applications to JET**
- E 19 Hallock G.A., Hickok R.L., Jennings W.C.,  
Connor K.A., Forester J.C. et al.  
Rensselaer Polytechnic Institute, Troy, NY., USA  
Haste G.R., Wootton A.J.  
ORNL, Oak Ridge, Tennessee, USA  
**Space potential measurements on EBT-S and ISX-B**
- E 20 Tonetti G.  
CRPP-EPFL, Lausanne, Switzerland  
**Measurement of the plasma magnetic field with an  
ion beam probe**
- E 21 Woskoboinikow P., Mulligan W.J., Machuzak J.,  
Cohn D.R., Temkin R.J. et al.  
Plasma Fusion Center, MIT, Cambridge, USA  
**385µm D<sub>2</sub>O Laser collective Thomson scattering  
ion temperature diagnostic**
- E 22 Gimzewski J.K., Veprek S.  
Institute of Inorganic Chemistry, University of  
Zürich, Zürich, Switzerland  
**A new method for the determination of impurity  
ion energies and their implantation depths in  
collection probes exposed to the scrape-off layer**

- E 23 Lisitano G., Baretich<sup>1</sup> F., Gammino<sup>1</sup> G.,  
Bazzo I., Cassamagnaghi C. et al.  
MPI für Plasmaphysik, Garching, FRG  
<sup>1</sup>Cise, Department of Acoustical Diagnostics, Milano,  
Italy  
**Millimeter wave Schlieren diagnostics for fusion plasma**
- E 24 W VII-A Team: Tutter M., Cattanei G., Dorst D., Elsner A.  
Erckmann V. et al.  
NI-Group: Freudenberger K., Lister G.G., Ott W.,  
Penningsfeld F.-P., Speth E.  
MPI für Plasmaphysik, Garching, FRG  
**Effect of suprathermal electrons on Ece-spectra  
in W VII-A**
- E 25 Filippov V.N., Komissarova I.I., Ostrovskaya G.V.,  
Shedova E.N.  
A.F. Ioffe Physico-Technical Institute, Leningrad,  
Academy of Sciences, USSR  
**The prospects to enhance the sensitivity of  
holographic interferometry plasma diagnostics  
in IR-region**
- Magnetic Confinement Theory**  
Part II, p. 101 - 288
- B 41 Ming-Lun Xue  
Institute of Mechanics, Chinese Academy of  
Sciences, Beijing, People's Republic of China  
**Advanced concept of adiabatic compression of  
tokamak and self-compression of compact torus**
- B 42 Khait V.D., Kolesnikov V.K.  
Institute of High Temperatures, USSR Academy of  
Sciences, Moscow, USSR  
**Solution of the tokamak plasma equilibrium at  
high betas by the variational method**
- B 43 Casci F., Kaleck<sup>1</sup> A., Zehrfeld H.P.
