

VOLUME I

Simon, R E; Armstrong, W T; Chrien, R E; Hugrass, W N; McKenna, K F; ... Field-reversed configuration formation, translation, and confinement studies on the FRX-C/T experiment	D P No 56 1 590	590
Bobeldi, C; Hoelzema, J A; Lok, J; van der Meer, A F G; Oepts, D; ... SPICA-II: A high-beta experiment with elongated plasma cross-section	D P No 57 1 594	594
Nalesso, G F Non linear boundary equations at a thin anisotropically conducting wall (liner)	D P No 58 1 598	598
Toyama, H; Asakura, N; Hattori, K; Inoue, N; Ishida, S; ... Effects of bias toroidal field and filling pressure on the performance of the reversed field pinch device REPUTE-1	D P No 59 1 602	602
Panarella, E; Guly, V Application of the scaling laws to the REXIMPLO spherical pinch machine: experimental results	D P No 60 1 606	606
Witalis, B A Current and field self-reversals in toroidal pinches	D P No 61 1 610	610
Evans, D E; Storey, D P; Wilcock, P D Density studies in HBTX1A reversed field pinch	D P No 62 1 614	614
Eriksson, G Charged particle motion in a cylindrically symmetric z-pinch	D P No 63 1 618	618
Liberman, M A; Velikovich, A L Self-similar motions in a Z pinch dynamics	D P No 64 1 622	622
Asakura, N; Inoue, N; Miyamoto, K; Nagayama, Y; Shinohara, S; ... Equilibrium of reversed field pinch with iron core	D P No 65 1 626	626
Briguglio, S; Romanelli, F; Vlad, G Current driven drift waves in reversed field pinches	D P No 66 1 630	630
Bunting, C C A; Carolan, P G; Field, A R Ion behaviour in the HBTX1A reversed field pinch	D P No 67 1 634	634
Martini, S; Ortolani, S Soft X-ray measurements on ETA-BETA II	D P No 68 1 638	638
Sinman, S; Sinman, A A compact toroid formed by multi magnetized T-tubes	D P Tu 26 1 642	642
Hoida, H W; Barnes, C W; Henins, I; Jarboe, T R; Buchenauer, C J; ... Local drift parameter, j/ne and resistivity anomaly measurements in CTX spheromaks	D P Tu 27 1 643	643
Jones, I R; Knight, A A field reversed configuration generated by means of a rotating magnetic field	D P Tu 28 1 647	647

VOLUME I

Jones, I R; Kirolos, H Long duration rotamak experiments	D P Tu 29 1 651	651
Bruhns, H; Allgeier, C; Raupp, G; Steiger, J; Weichelt, A Generation of double toroids of the spheromak-type in the Heidelberg spheromak experiment	D P Tu 30 1 655	655
Bruhns, H; Allgeier, C; Boeckle, G; Raupp, G; Steiger, J; ... Studies of single toroids in the Heidelberg spheromak experiment	D P Tu 31 1 659	659
Ag, A; Nemeth, G Turbulent transfer rate of the magnetic field in a spheromak	D P Tu 32 1 663	663

VOLUME II

E - INERTIAL CONFINEMENT

Denus, S; Arendzikowski, R; Fiedorowicz, H; Jeziak, K; ... Experimental study of laser-driven implosion of spherical microtargets	E O Th 1450 2 2 S	2
Denus, S; Fiedorowicz, H; Kosteki, J; Nagraba, S; Pawlowicz, W; ... Spectral analysis of 2-omega-null and 3/2-omega-null harmonic emission from laser irradiated spherical microshells	E P Th 5 2 6	6
Fabbro, R; Faral, B; Vermont, J; Cottet, F; Romain, J P; ... Generation of very high pressures in planar geometry in 0.26 mikrom wavelength laser experiments	E P Th 6 2 10	10
Meyer, J; McIntosh, G; Houtman, H Experimental investigation of the two plasmon decay and stimulated Raman scattering instabilities in a CO2 laser produced plasma	E P Th 7 2 14	14
Golota, V I; Karas, V I On the high-current ion beam instability in the Z-pinch plasma channel	E P Th 8 2 18	18
Kawata, S; Niu, K Target implosion in LIB ICF	E P Th 9 2 22	22
Bakst, R B; Datsko, I M; Kovsharov, N F; Loskutov, V V; ... Study of the implosion of wire arrays at 1 MA current pulses	E P Th 10 2 26	26
Kamelander, G Effects of fusion product transport on burn characteristics of ICF-pellets	E P Th 11 2 30	30

F - PLASMA HEATING AND CURRENT DRIVE

Hansen, F R; Lynov, J P; Maroli, C; Petrillo, V Full-wave calculation of the O-X mode conversion process	F P Fr 49 2 36	36
Ejima, S; Jahns, G L; Lin, S H; Moeller, C P; Prater, R; ... Heating and confinement in the DOUBLET III tokamak with electron cyclotron heating	F O Fr 900 2 40 N	40
Zhang, Z X; Jiang, H Y An ECRH ray-tracing study with multi-reflection and mode conversion	F P Fr 50 2 44	44

VOLUME II

Faulconer, D W; Eral, L Plasma-induced TM mode transparency of electrostatic shields used in RF heating	F P Fr 51 2 48	48
Bornatici, M; Ruffina, U; Westerhof, B Electron cyclotron absorption and emission in the presence of a small population of drifting superthermals	F P Fr 52 2 52	52
Heikkinen, J A; Karttunen, S J Scattering of the heating wave off ion wave in electron cyclotron resonance heating	F P Fr 53 2 56	56
FOM-BCRH Team; TFR Group First results of the electron cyclotron experiment on TFP	F O Fr 920 2 60 M	60
Litwin, C; Hershkowitz, N; Callen, J D Eigenmode structure, ICRF heating and stabilization of axially symmetric systems	F P Fr 54 2 64	64
Vasin, N L Electron density profile behaviour under ECRH on T-10	F P Fr 55 2 68	68
Fukuyama, A; Goto, A; Itoh, K; Itoh, S-I Two-dimensional kinetic analysis of ICRF waves in a tokamak	F P Fr 56 2 72	72
O'Brien, M R; Cox, M; Start, D F H Numerical studies of high power ECRH in tokamaks	F P Fr 57 2 76	76
Edlington, T; Ainsworth, N R; Alper, B; Atkinson, D; Blewett, S G F; ... Fundamental and 2nd harmonic heating at the electron cyclotron resonance on cleo tokamak	F P Fr 58 2 80	80
Airoldi, A; Cenacchi, G; Orefice, A; Ramponi, G Electron cyclotron heating simulation in tokamaks by combined codes	F P Fr 59 2 84	84
Pesic, S Wave absorption near the second harmonic of the electron cyclotron frequency	F P Fr 60 2 88	88
Consoli, T Current drive and plasma heating by longitudinal ECR waves	F P Fr 61 2 92	92
Giruzzi, G; Krivenski, V; Ziebell, L F Electron cyclotron heating of a tokamak plasma at down shifted frequencies	F P Fr 62 2 96	96
Soell, M; Noterdaeme, J-M Optimisation of ICRH antennas based on coupling and absorption	F P Tu 33 2 100	100
Itoh, S I; Itoh, K; Fukuyama, A; Nishikawa, K Control of energy exchange rate by ICRF catalyst	F P Tu 34 2 104	104
Adam, J; Equipe TFR Comparison of two Kii antenna configurations for ICRH experiments in TFR	F P Tu 35 2 108	108

VOLUME II

Sautic, B; TFR Group Influence of laser blow-off injected vanadium ions on the deuteron heating during ICRH in TFR	F P Tu 36 2 112	112
Milovich, J L; Morales, G J; Fried, Burton Effect of current drive in ICRF heating	F P Tu 37 2 116	116
Hosea, J C; Bell, R; Bitter, M; Cavallo, A; Cohen, S; ... Heating, confinement, and stability during high power ICRF experiments on PLT	F O Tu 1450 2 120 M	120
Hellsten, T; Core, W; Hamnen, H; Appert, K; Succi, S Effect of particle trapping in ICRF-Beam heated tokamak plasmas	F P Tu 38 2 124	124
Grigor'eva, L I; Pashchenko, A V; Smerdov, B I; Checkin, V V Simulation of plasma potential induction and particle transport during ICRF heating	F P Tu 39 2 128	128
Longinov, A V; Pavlov, S S; Stepanov, K N The use of heavy admixture ions for enhancing the ICRF plasma heating efficiency	F P Tu 40 2 132	
Shurygin, R V; Yushmanov, P N Ion heat transfer under cyclotron heating in tokamak	F P Tu 41 2 136	136
Cox, M; Dendy, R; Hamnen, H; Jacquinet, J; Lallia, P; ... Fokker-Planck calculations of ICRF current drive on JET	F P Tu 42 2 140	140
Scharer, J; Jacquinet, J; Lallia, P; Sand, F Fokker-Planck calculations for JET ICRF heating scenarios	F P Tu 43 2 144	144
Bures, M; Evrard, M P; Jacquinet, J; Lallia, P P; Sand, F Plasma-antenna coupling and the related scrape-off layer studies on JET	F P Tu 44 2 148	148
Gambier, D J; Bartlett, D V; Bures, M; Campbell, D J; Cottrell, G A; ... Electron power deposition profile during ICRF heating on JET	F P Tu 45 2 152	152
Alikae, V V; Berezovskij, E L; Vasin, N A; Vdovin, V L; ... ICRH experiments in T-10 tokamak	F O Tu 1430 2 156 M	156
Alikae, V V; Bagdasarov, A A; Berezovsky, E L; Buzankin, V V; ... ICRF heating experiments on T-10 tokamak at the ion-ion hybrid resonance conditions	F P Tu 46 2 160	160
Hoang, G T; Bottollier, H; Briand, P; Briffod, G; Chabert, P; ... Bulk plasma heating with lower hybrid waves in the PETULA-B tokamak	F P Tu 12 2 164	164
Girard, A; Melin, G; Agarici, G; Blanc, P; Bottollier, H; ... Hot electron studies in PETULA-B discharges during LH wave application	F P Tu 13 2 168	168
Parlange, F; Agarici, G; Blanc, P; Bottollier-Curtet, H; Briand, P; ... Lower hybrid ion heating and current drive with one and two grills in PETULA B	F O Tu 1430 2 172 M	172
Wegrowe, J-G On the RF current and the RF power absorption at finite levels of injected power in lower-hybrid current drive	F P Tu 14 2 176	176

VOLUME II

Nocentini, A		
Comparison between theory and experiments on lower hybrid current drive	F P Th 15 2 180	180
Hoshino, K; Yamamoto, T; Suzuki, N; Uesugi, Y; Kawashima, H;...		
RF current drive (LHH+ECH) and electron heating experiments on JFT-2M tokamak	F P Th 16 2 184	184
Pavlo, P; Klima, R		
Computer simulation of lower hybrid current drive in T-7 tokamak	F P Th 17 2 188	188
Stevens, J E; Bell, R; Bernabei, S; Cavallo, A; Chu, T K;...		
Lower hybrid experiments at 2.45 GHz on PLT	F O Th 1450 2 192 M	192
Barbato, E; Bracco, G; Podda, S; Zanza, V		
Simulation of neutral emission in the ion interaction regime during LH experiment in FT	F P Th 18 2 196	196
Dnestrovskij, Yu N; Parail, V V; Kostomarov, D P; Luk'yanitsa, A A;...		
Toroidal and electrical field effects on current drive in tokamak by LH-waves and by ECR-waves	F P Th 19 2 200	200
Stepanov, K N; Yegorenkov, V D		
Current drive by nonuniform external forces	F P Th 20 2 204	204
Belikov, V S; Kolesnichenko, Ya I; Plotnik, I S		
Effect of the toroidal magnetic field on the current drive in tokamaks with travelling waves	F P Th 21 2 208	208
Neudachin, S V; Parail, V V; Pereverzev, G V; Shurygin, R V		
Influence of toroidal effects on the propagation of lower hybrid waves in plasma	F P Th 22 2 212	212
Krasherinnikov, S I; Soboleva, T K		
Current drive in tokamak-reactor due to RF-heating of alpha-particles	F P Th 23 2 216	216
Cesario, R; Pericoli-Ridolfini, V		
Parametric instabilities during the lower hybrid power injection in the high density regime of the FT tokamak	F P Th 24 2 220	220
Yang, W H; Li, D F; Huo, Y P		
Large angle scattering and LH current drive	F P Th 25 2 224	224
Cardinali, A; Romanelli, F		
Asymptotic analysis of lower hybrid waves propagation in tokamaks in the cold electrostatic approximation	F P Th 26 2 228	228
