

TITLE LIST OF CONTRIBUTED PAPERS

**A. TOKAMAKS**

D-D neutron production from JET plasmas. <b>First author:</b> G. Sadler et al.	Mo 1	A 1	I-1
Peaked profiles in low q high current limiter plasmas in JET. <b>First author:</b> P.J. Lomas et al.	Mo 2	A 2	I-5
The fusion performance of JET limiter plasmas using Be coated graphite and solid Be surfaces. <b>First author:</b> T.T.C. Jones et al.	Mo 3	A 3	I-9
The role of various loss channels in the ion energy balance in T-10. <b>First author:</b> E.L. Berezovskij et al.	Mo 4	A 4	I-13
First experiments and numerical simulation of a plasma column compression in high field tokamak. <b>First author:</b> E.A. Azizov et al.	Mo 5	A 5	I-14
A study of poloidal and toroidal rotation in the TJ-1 ohmically heated tokamak. <b>First author:</b> B.G. Zurro et al.	Mo 6	A 6	I-18
Runaway electron fluctuations studies in TJ-I. <b>First author:</b> L. Rodríguez et al.	Mo 7	A 7	I-22
Particle and impurity confinement in helium discharges in the Texas Experimental Tokamak (TEXT). <b>First author:</b> W.L. Rowan et al.	Mo 8	A 8	I-26
The first Mexican small tokamak. <b>First author:</b> L. Meléndez-Lugo et al.	Mo 9	A 9	I-30
The confinement improvement modes in JIPP T-11U. <b>First author:</b> Y. Hamada et al.	Mo 10	A 10	I-34
Measurements of fluctuations and space potential profiles in the Texas Experimental Tokamak (TEXT). <b>First author:</b> P.M. Schoch et al.	Mo 11	A 11	I-38

Test of ITG-mode marginal stability in TFTR. <b>First author:</b> M.C. Zarnstorff et al.	Mo 12	A 12*	I-42	Ohmic discharges in TORE SUPRA - Marfes and detached plasmas. <b>First author:</b> J.C. Vallet et al.	Tu 9	A 24	I-86
Perturbative transport studies of neutral beam heated TFTR plasmas using carbon pellet injection. <b>First author:</b> R.A. Hulse et al.	Mo 13	A 13	I-46	Toroidal plasma rotation in JET. <b>First author:</b> H.P.L. de Esch et al.	Tu 10	A 25	I-90
Measurements of radial profiles of transport parameters of HE <sup>2</sup> on TFTR. <b>First author:</b> E.J. Synakowski et al.	Mo 14	A 14	I-50	ELM-free H-mode with CO- and CTR-neutral injection in ASDEX. <b>First author:</b> F. Ryter et al.	Tu 11	A 26*	I-94
T <sub>e</sub> profile invariance under transient conditions on ASDEX. <b>First author:</b> H.D. Murmann et al.	Tu 1	A 15	I-54	A regime showing anomalous triton burnup in JET. <b>First author:</b> S. Conroy et al.	Tu 12	A 27	I-98
The isotope dependence of confinement in ASDEX: Part 2. <b>First author:</b> F. Wagner et al.	Tu 2	A 16	I-58	Scaling from JET to CIT and ITER-like devices using dimensionless parameters. <b>First author:</b> J. Sheffield	Mo 15	A 28	I-102
Demixing of impurities and hydrogen as deduced from Z <sub>eff</sub> profiles in the boronized ASDEX. <b>First author:</b> K.H. Steuer et al.	Tu 3	A 17	I-62	Extrapolation of the high performance JET plasmas to D-T operation. <b>First author:</b> J.G. Cordey et al.	Mo 16	A 29	I-106
Confinement studies in sawtooth-free ohmic discharges. <b>First author:</b> U. Stroth et al.	Tu 4	A 18	I-66	Global H-mode scalings based on JET and ASDEX data. <b>First author:</b> O. Kardaun et al.	Mo 17	A 30	I-110
Modifications of density profile and particle transport in ASDEX during lower hybrid heating and current drive. <b>First author:</b> O. Gehre et al.	Tu 5	A 19	I-70	Transport studies in high recycling neutral beam heated discharges on TFTR. <b>First author:</b> D.W. Johnson et al.	Mo 18	A 31	I-114
Particle transport studies on TCA using the dynamic response of the effective mass. <b>First author:</b> Th. Dudok de Wit et al.	Tu 6	A 21	I-74	Energy confinement scaling laws for FT ohmic plasma. <b>First author:</b> G. Bracco et al.	Mo 19	A 32	I-118
Transition to high density discharges through hard gas puffing. <b>First author:</b> Z.A. Pietrzyk et al.	Tu 7	A 22	I-78	Profile consistency coupled with MHD equilibrium extended to non stationary plasma conditions. <b>First author:</b> M. Roccella et al.	Mo 20	A 33	I-122
Current penetration measurements in TUMAN-3 by active charge exchange diagnostics. <b>First author:</b> V.I. Afanasiev et al.	Tu 8	A 23	I-82	Scaling dimensionally similar tokamak discharges to ignition. <b>First author:</b> R.E. Waltz et al.	Mo 21	A 34	I-126
				Transport code simulations of IGNITOR.. <b>First author:</b> M.F. Turner et al.	Mo 22	A 35	I-130

\* This paper will also be presented orally on Friday 29 June at 9.40 hrs.

\* This paper will also be presented orally on Tuesday 26 June at 14.30 hrs.

A physics perspective on CIT. <b>First author:</b> R.J. Goldston et al.	Mo 23	A 36	I-134	Is the ion confinement improving in ASDEX H-mode discharges? <b>First author:</b> O. Gruber et al.	Th 9	A 48	I-182
Burn threshold for fusion plasmas with helium accumulation. <b>First author:</b> B.D. Fried et al.	Mo 24	A 37	I-138	Momentum transport studies on ASDEX. <b>First author:</b> A. Kallenbach et al.	Th 10	A 49	I-183
Heating profile and sawtooth effects on energy confinement in elongated tokamak plasmas. <b>First author:</b> J.D. Callen et al.	Mo 25	A 38	I-142	Dynamic response analysis as a tool for investigating transport mechanisms. <b>First author:</b> Th. Dudok de Wit et al.	Th 11	A 50	I-187
The scaling of confinement with major radius in TFTR. <b>First author:</b> L.R. Grisham et al.	Mo 26	A 39	I-146	Heat and density pulse propagation in ASDEX. <b>First author:</b> L. Giannone et al.	Th 12	A 51	I-151
Coupling of plasma particle diffusion and heat flow in TEXT. <b>First author:</b> D.L. Brower et al.	Th 1	A 40	I-150	Study of the electron heat pulse propagation from ECRH on T-10. <b>First author:</b> A.A. Bagdasarov et al.	Th 13	A 52	I-195
Sawtooth heat pulse propagation and electron heat conductivity in HL-1. <b>First author:</b> Gancheng GUO et al.	Th 2	A 41	I-154	Dimensionality analysis of chaotic density fluctuations in tokamak. <b>First author:</b> F.C. Schüller et al.	Fr 1	A 53	I-199
Evidence of coupling of thermal and particle transport from heat and density pulse measurements at JET. <b>First author:</b> G.M.D. Hogeweij et al.	Th 3	A 42	I-158	Density fluctuation measurements via reflectometry on DIII-D during L- and H-mode operation. <b>First author:</b> E.J. Doyle et al.	Fr 2	A 54	I-203
Determination of local transport coefficients by heat flux analysis and comparisons with theoretical models. <b>First author:</b> B. Balet et al.	Th 4	A 43	I-162	Investigation of density fluctuations in the ASDEX tokamak via collective laser scattering. <b>First author:</b> E. Holzhauser et al.	Fr 3	A 55	I-207
Dynamic response of plasma energy and broad-band magnetic fluctuations to additional heating in JET. <b>First author:</b> C. Nardone et al.	Th 5	A 44	I-166	Fluctuations and transport in DITE. <b>First author:</b> G. Vayakis et al.	Fr 4	A 56	I-211
Analysis of heat pulse propagation in plasmas using Fourier methods. <b>First author:</b> A. Jacchia et al.	Th 6	A 45	I-170	Online density feedback on ASDEX for pellet-refuelled discharges. <b>First author:</b> R. Loch et al.	Fr 5	A 57	I-215
Particle and thermal transport in TEXT from perturbation experiments. <b>First author:</b> K.W. Gentle et al.	Th 7	A 46	I-174	Simultaneous evolution of temperature and density perturbations following pellet injection in JET. <b>First author:</b> J.R. Martin-Solis et al.	Fr 6	A 58	I-219
Investigation of coupled energy and particle transport. <b>First author:</b> M. Cox et al.	Th 8	A 47	I-178	Impurity behavior in pellet-fuelled plasma of JT-60. <b>First author:</b> T. Sugie et al.	Fr 7	A 59	I-223

Fast cooling phenomena with ice pellet injection in JIPP T-IIU tokamak. First author: K.N. Sato et al.	Fr 8	A 60	I-227	Comparison of thermal and angular momentum transport in neutral beam-heated hot-ion H- and L-mode discharges in DIII-D. First author: K.H. Burrell et al.	Tu 19	A 71	I-271
The pellet trajectory toroidal deflection in T-10. First author: A.A. Bagdasarov et al.	Fr 9	A 61	I-231	The effects of carbonization on the confinement properties of the DIII-D H-mode. First author: D.P. Schissel et al.	Tu 20	A 72	I-275
Scaling of experimentally determined pellet penetration depths on ASDEX. First author: R. Loch et al.	Fr 10	A 62	I-235	Physics of the L to H transition in DIII-D. First author: H. Matsumoto et al.	Tu 21	A 73	I-279
Repetitive pellet injection combined with ion cyclotron resonance heating in ASDEX. First author: J.-M. Noterdaeme et al.	Fr 11	A63*	I-239	Transport properties of high $\beta_{pol}$ PBX-M plasmas. First author: B. LeBlanc et al.	Tu 22	A 74	I-283
Evolution of pellet clouds and cloud structures in magnetically confined plasmas. First author: L.L. Lengyel et al.	Fr 12	A 64	I-243	H-mode behaviour induced by edge polarization in TEXTOR. First author: R.R. Weynants et al.	Tu 23	A 75	I-287
Transport of impurities during H-mode pulses in JET. First author: L. Lauro Taroni et al.	Tu 13	A 65	I-247	ELMS as triggered and as triggering relaxation phenomena in ASDEX. First author: O. Klüber et al.	Tu 24	A 76	I-291
Particle and heat deposition in the X-point region at JET. First author: D.P. O'Brien et al.	Tu 14	A66**	I-251	Long-pulse heating in ASDEX L- and H-mode discharges. First author: O. Vollmer et al.	Tu 25	A 77	I-295
ICRH produced H-modes in the JET tokamak. First author: V.P. Bhatnagar et al.	Tu 15	A67***	I-255	Ohmic H-mode in "TUMAN-3" tokamak. First author: S.V. Lebedev et al.	Tu 26	A 78	I-299
The compatibility of the JET H-mode with other regimes of improved performance. First author: A. Tanga et al.	Tu 16	A 68	I-259	Runaway electron production during major disruptions in TORE SUPRA. First author: G. Martin et al.	Th 14	A 79	I-303
Radiation asymmetries and H-modes. First author: N. Gottardi et al.	Tu 17	A 69	I-263	Runaway relaxation oscillation on HL-1 tokamak. First author: Xuantong DING et al.	Th 15	A 80	I-307
Electric field profile of plasmas with improved confinement in JFT-2M tokamak. First author: K. Ida et al.	Tu 18	A 70	I-267	Energy loss in a major disruption and MHD instabilities at low q in the HL-1 tokamak. First author: Qingdi GAO	Th 16	A 81	I-311
				MHD-Perturbations in T-10. First author: P.V. Savrukhn et al.	Th 17	A 82	I-315

\* This paper will also be presented orally on Tuesday 26 June at 14.10 hrs.

\*\* This paper will also be presented orally on Tuesday 26 June at 13.30 hrs.

\*\*\* This paper will also be presented orally on Tuesday 26 June at 13.50 hrs.

Sawtooth modulated density fluctuations in the central plasma region of NBI-heated discharges in TEXTOR. <b>First author:</b> M. Jadoul et al.	Th 18	A 83	I-319	Measurement of ohmic tokamak momentum confinement times from controlled locking and unlocking of tearing modes. <b>First author:</b> D.E. Roberts et al.	Fr 13	A 93	I-359
High-beta regimes in JET. <b>First author:</b> P. Smeulders et al.	Th 19	A 84*	I-323	The characteristics of low-q discharges on HT-6B tokamak. <b>First author:</b> Guoxiang Li et al.	Fr 14	A 94	I-363
Sawtooth stabilisation by fast ions: comparison between theory and experiments. <b>First author:</b> F. Porcelli et al.	Th 20	A 85	I-327	Profiles and MHD activities in PBX-M tokamak. <b>First author:</b> H. Takahashi et al.	Fr 15	A 95	I-367
JET neutron emission profiles and fast ion redistribution from sawteeth. <b>First author:</b> F.B. Marcus et al.	Th 21	A 86**	I-331	The beta limit in the DIII-D tokamak. <b>First author:</b> J.R. Ferron et al.	Fr 16	A 96	I-371
The detailed topology of the m=1 instability in the JET sawtooth collapse. <b>First author:</b> S.W. Wolfe et al.	Th 22	A 87	I-335	MHD characteristics and edge plasma stability during periods of ELM activity in PBX-M. <b>First author:</b> S.M. Kaye et al.	Fr 17	A 97	I-375
Density limits in JET with beryllium. <b>First author:</b> C.G. Lowry et al.	Th 23	A 88	I-339	Resonant magnetic perturbations and disruption studies on COMPASS-C. <b>First author:</b> A.W. Morris et al.	Fr 18	A 98	I-379
Faraday rotation measurements on JET, and the change in the safety factor profile during a sawtooth collapse. <b>First author:</b> J. O'Rourke et al.	Th 24	A 89	I-343	Stabilisation of sawtooth oscillations by trapped energetic particles in TEXTOR. <b>First author:</b> J. Ongena et al.	Fr 19	A 99	I-383
Sawtooth triggered disruptions at the density limit on DITE. <b>First author:</b> G.M. Fishpool et al.	Th 25	A 90	I-347	Production of high poloidal beta equilibria limited by an inboard separatrix in TFTR. <b>First author:</b> S.A. Sabbagh et al.	Fr 20	A 100	I-387
Electromagnetic interactions between plasmas and vacuum vessel during disruptions in the Hitachi tokamak HT-2. <b>First author:</b> M. Abe et al.	Th 26	A 91	I-351	Soft-X-ray tomography of sawteeth and m=1 modes on ASDEX. <b>First author:</b> R. Büchse et al.	Fr 21	A 101	I-391
Asymmetric effects of an l-1 external helical coil on the sawtooth amplitude on Tokoloshe tokamak. <b>First author:</b> D.E. Roberts et al.	Th 27	A 92	I-355	Density limit in ASDEX under clean plasma conditions. <b>First author:</b> A. Stäbler et al.	Fr 22	A 102	I-395
				Theoretical analysis of high-beta JET shots. <b>First author:</b> T.C. Hender et al.	Fr 23	A 103	I-399
				Analysis of the energy heat quench during a disruption in TEXTOR. <b>First author:</b> K.H. Finken et al.	Fr 24	A 104	I-403

\* This paper will also be presented orally on Friday 29 June at 9.00 hrs.

\*\* This paper will also be presented orally on Friday 29 June at 9.20 hrs.

Enhanced turbulence during the energy quench of disruptions. <b>First author:</b> G.J.J. Remkes et al.	Fr 25	A 105	I-407
High density mode in "TUMAN-3" tokamak. <b>First author:</b> L.G. Askinasi et al.	Fr 26	A 106	I-411
Nonlinear vertical displacement instability of elongated plasma in tokamak and its stabilization. <b>First author:</b> Guoyang YU et al.	Th 28	A 107	I-415
Vertical instabilities in JET. <b>First author:</b> P. Noll et al.	Th 29	A 108	I-419
Scaling of poloidal currents during rapid vertical displacement events. <b>First author:</b> G.W. Pacher et al.	Th 30	A 109	I-423
Experiments at high elongations in DIII-D. <b>First author:</b> E.A. Lazarus et al.	Th 31	A 110	I-427
