

## A6 MHD Phenomena, Sawteeth

A106	II-1
Influence of ECRH on electron temperature sawteeth oscillations on T-10 <i>Bagdasarov, A.A., Neudatchin, S.V.</i>	
A107	II-
Sawtooth oscillations in TFTR <i>Savrukhin, P., Semenov, I., McGuire, K., Fredrickson, E., et al.</i>	
A108	II-
Sawtooth stabilization studies on TFTR <i>Phillips, C.K., Hammett, G., Hosea, J.C., Marmor, E., Phillips, M., et al.</i>	
A109	II-1
The scaling of sawtooth parameter and the occurrence of single sawteeth in the start-up phase of TEXTOR <i>Graffmann, E., Fang, Z.S., Soltwisch, H., Wang, K.</i>	
A110	II-1
Sawtooth oscillations of various plasma parameters in correlation to periodic changes of the internal magnetic field structure <i>Soltwisch, H., Fuchs, G., Koslowski, H.R., Schlüter, J., Waidmann, G.</i>	
A111	II-2
1½-D simulation of the sawtooth ramp <i>Gimblett, C.G., Campbell, D.J., Fitzpatrick, R., Hastie, R.J., Martin, T.J.</i>	
A112	II-2
Latest JET experimental results on the sawtooth <i>Pearson, D., Campbell, D.J., Edwards, A.W., O'Rourke, J.</i>	
A113	II-2
Local X-ray emissivity structure in the density limit in the TJ-I tokamak <i>Vega, J., Navarro, A.P.</i>	
A114	II-3
Density limit studies on ASDEX <i>Stäbler, A., McCormick, K., Mertens, V., Müller, E.R., Neuhauser, J., et al.</i>	
A115	II-3
Density limit studies in the TCA tokamak <i>Pietrzyk Z.A., Behn, R., Bondeson, A., Duval, B., et al.</i>	

A116 (Oral)	II-41
Simulation of MHD activity during density limit disruptions in tokamaks <i>Bondeson, A., Parker, R., Hugon, M.</i>	
A117	II-45
The evolution of the density limit disruption in TEXTOR <i>Waidmann, G., Kuang, G.</i>	
A118	II-49
Spontaneous appearance of snakes in JET <i>Gill, R.D., Edwards, A.W., Pasini, D., Wolfe, S.W.</i>	
A119	II-53
MHD studies in JET <i>Smeulders, P., Edwards, A., Fishpool, G., Hender, T.C., Hugon, M., et al.</i>	
A120	II-57
MHD stability and mode locking in pre-disruptive plasmas on TORE SUPRA <i>Vallet, J.C., Ederly, D., Joffrin, E., Lecoustey, P., Mohamed-Benkadda, M.S., et al.</i>	
A121 (Oral)	II-61
Mode-locking and error field studies on COMPASS-C and DIII-D <i>Morris, A.W., Fitzpatrick, R., Hender, T.C., Todd, T.N., Bamford, R. et al.</i>	
A122	II-65
Statistical properties of intrinsic topological noise in tokamaks <i>Evans, T.E.</i>	
A123	II-69
Tokamak error fields and locked modes <i>Reiman, A., Monticello, D.</i>	
A124	II-73
The effects of MHD-activity on the density in the RTP tokamak <i>van Lammeren, A.C.A.P., Timmermans, J.C.M., Hogeweij, G.M.D., Kim, S.K., et al.</i>	
A125	II-77
Excitation of toroidal Alfvén Eigenmodes in TFTR <i>Wong, K.L., Fonck, R.J., Paul, S.F., Roberts, D.R., et al.</i>	
A126 (Oral)	II-81
Asymmetric reconnection and stochasticity induced by the m=1 island <i>Baty, H., Luciani, J.F., Bussac, M.N.</i>	
A127	II-85
Estimation of the major disruption time by energy approach <i>Astapkovich, A.M., Kokotkov, V.V., Mineev, A.B.</i>	
A128	II-89
a) Systematic investigation of periodic disruptions using a new diagnostic ... b) Diagnosis of ion energy distribution based on ejected fast-ions from ... <i>Nihar Ranjan Ray, Basu, J., Majumdar, S.K., Mukherjee, S.</i>	

A129	II-9;
Shaping and vertical stability elongated plasmas on the TVD <i>Abramov, A.V., Bortnikov, A.V., Brevnov, N.N., Gerasimov, S.N., Polianchik, K.D.</i>	
A130	II-9;
Nonlinear mode mixing in high beta PBX-M discharges <i>Sesnic, S., Kaye, S., Okabayashi, M.</i>	
A131	II-10
Simulation study of stable high- $\beta$ tokamak plasmas with beam-driven and boots trap currents <i>Murakami, Y., Okano, K., Ogawa, Y., Takase, H., Shinya, K.</i>	
A132	II-10
Dependence of the DIII-D beta limit on the current profile <i>Strait, E.J., Chu, M.S., Ferron, J.R., Lao, L.L., Lazarus, E.A., et al.</i>	

## B STELLARATORS

B1	II-109
Mercier criterion for stellarator with planar circular axis <i>Cheremnykh, O.K., Podnebesnyj, A.V., Pustovitov, V.D.</i>	
B2	II-113
$\beta_{crit}$ in stellarators <i>Pustovitov, V.D., Pukhov, A.V.</i>	
B3	II-117
Charged particle injection and fusion product escape in separatrix stellarators <i>Alladio, F., Batistoni, P., Mancuso, S.</i>	
B4	II-121
Optimization of analytic stellarator fields by using mapping methods <i>Dommaschk, W., Herrnegger, F., Schlüter, A.</i>	
B5	II-125
Effect of the aspect ratio on the stability limits of TJ-II-like stellarators <i>Varias, A., Alvarez, A., Fraguas, A.L., Alejaldre, C. et al.</i>	
B6 (Oral)	II-129
Observation of damping of toroidal rotation due to neoclassical parallel viscosity in Heliotron/Torsatron CHS <i>Ida, K., Yamada, H., Iguchi, H., Itoh, K., Arimoto, H., Hosokawa, M., et al.</i>	
B7	II-133
Effects of externally-applied perturbation field on the confinement of CHS <i>Okamura, S., Peranich, L., Matsuoka, K., Iguchi, H., et al.</i>	
B8	II-137
Local thermal transport in the low-aspect-ratio Heliotron/Torsatron CHS <i>Yamada, H., Ida, K., Iguchi, H., Howe, H.C., Kubo, S., Ogawa, Y., et al.</i>	
B9	II-141
Magnetic stress in stellarator forced by strong plasma current <i>Perepelkin, N.F., Arsenev, A.V., Volkov, E.D., et al.</i>	
B10	II-145
Improvement of 1=2 torsatron configuration with additional toroidal field <i>Besedin, N.T., Lesnyakov, G.G., Pankratov, I.M.</i>	
B11	II-149
Plasma stability, equilibrium and transport in URAGAN-2M torsatron <i>Carreras, B.A., Dominguez, N., Lynch, V.E., Beidler, C., et al., Shishkin, A.A.</i>	
B12	II-153
Magnetic fluctuations in Heliotron E <i>Zushi, H., Harada, M., Osaki, T., Wakatani, M., Obiki, T., and Heliotron E group</i>	

B13	II-15
Ion confinement and radiation losses in the advanced toroidal facility <i>Isler, R.C., Colchin, R.J., Wade, M.R., Lyon, J.F., Fowler, R.H., et al.</i>	
B14	II-16
Heavy ion beam probe measurements of ECH heated plasma in the advanced toroidal facility <i>Aceto, S.C., Schwelberger, J.G., Zielinski, J.J., Connor, K.A., Crowley, T.P., et al.</i>	
B15	II-16
Biasing experiments on the ATF torsatron <i>Uckan, T., Aceto, S.C., Baylor, L.R., Bell, J.D., Bigelow, T., et al.</i>	
B16 (Oral)	II-16
Configuration control, fluctuations, and transport in low-collisionality plasmas in the ATF torsatron <i>Harris, J.H., Murakami, M., Aceto, S., Branas, B., ... Lyon, J.F., et al.</i>	
B17	II-17
Structure of the magnetic field line diversion in Helias configurations <i>Strumberger, E.</i>	
B18	II-17
Neoclassical transport in stellarators - a comparison of conventional stellarator/torsatrons with the advanced stellarator Wendelstein 7X <i>Beidler, C.D.</i>	
B19	II-18
On natural islands and the edge structure of the Wendelstein 7-X stellarator <i>Beidler, C., Harmeyer, E., Herrnegger, F., Kiblinger, J., Rau, F., et al.</i>	
B20	II-18
Optimization of coils for divertor experimentation in W7-X <i>Merkel, P.</i>	
B21	II-18
Impurity behaviour in W7-AS plasmas under different wall conditions <i>Brakel, R., Burhenn, R., Elsner, A., et al., W7-AS Team, ECRH Group, NI Group</i>	
B22	II-18
Particle transport and plasma edge behaviour in the W7-AS stellarator <i>Sardei, F., Ringle, H., Grigull, P., Dodhy, A., et al.</i>	
B23	II-18
MHD activity driven by NBI in the W7-AS stellarator <i>Lazaros, A., Jaenicke, R., Weller, A.</i>	
B24	II-21
Neutral injection experiments on W7-AS stellarator <i>Penningsfeld, F.-P., Ott, W., W7-AS Team, ECRH Group, NI Group, Pellet Inj. Gro</i>	

B25	II-205
Simulation of the influence of coherent and random density fluctuations on the propagation of ECRH-beams in the W7-AS stellarator <i>Tutter, M., Erckmann, V., Gasparino, U., W7-AS Team</i>	
B26	II-209
Ion heat conductivity, radial electric fields and CX-losses in the W7-AS stellarator <i>Afanasjev, V.I., Izvozchikov, A.B., Junker, J., Kick, M., et al., W7-AS Team &amp; NBI</i>	
B27	II-213
Thermal diffusivity from heat wave propagation in Wendelstein 7-AS <i>Hartfuß, H.J., Erckmann, V., Giannone, L., Maaßberg, H., Tutter, M.</i>	

## C ALTERNATIVE CONFINEMENT SCHEMES

C1	II-217	II-265
Experiment on ion beam collider for advanced fuel fusion <i>Tanaka, H., Yuyama, T., Mitchishita, T., Mohri, A.</i>		
C2	II-221	II-269
Hot spot formation and emission characteristics of the plasma focus <i>Antsiferov, P., Franz, D., Herold, H., Jakubowski, L., Jonas, A., ...Schmidt, H</i>		
C3	II-223	II-273
Rundown phase of plasma focus in multicharged gas <i>Gerusov, A.V.</i>		
C4	II-224	II-277
Interaction of plasma with magnetic fields in coaxial discharge <i>Soliman, H.M., Masoud, M.M.</i>		
C5	II-23	II-281
Studies of high energy electron beams emitted from PF-type discharges <i>Sadowski, M., Jakubowski, L., Zebrowski, J.</i>		
C6	II-23	II-285
X-ray radiation and electron beams in a plasma focus <i>Khautiev, E.Yu., Krauz, V.I., Kuznetsov, P.I., Batenyuk, A.A., et al.</i>		
C7	II-24	II-289
Interpretation of self sustained wave coupling and microturbulence in SK/CG-1 machine <i>Sinman, S., Sinman, A.</i>		
C8	II-24	II-293
Toroidal discharges in an octupole field <i>Hellblom, G., Brunsell, P., Drake, J.R.</i>		
C9	II-24	II-297
Experimental detection of locking of vacuum electron drift in curvilinear element of drakon system <i>Perehygin, S.F., Smirnov, V.M.</i>		
C10	II-25	II-301
Ion energy measurements in the SPHEX Spheromak <i>Gibson, K.J., Gee, S.J., Cunningham, G., Rusbridge, M.G., Carolan, P.G.</i>		
C11	II-25	II-305
Magnetic equilibria in spheromaks and low aspect ratio tokamaks <i>Browning, P.K., Duck, R., Martin, R., Rusbridge, M.G.</i>		
C12	II-26	II-309
Straight axisymmetric trap with average minimum-B <i>Arsenin, V.V., Sergeev, E.B.</i>		
C13		II-265
Detrapping of hot electrons from magnetic well under ECR heating with parallel HF power launching <i>Zhil'tsov, V.A., Skovoroda, A.A., Timofeev, A.V., Scherbakov, A.G.</i>		
C14 (Oral)		II-269
Recent upgraded tandem mirror experiments in GAMMA 10 <i>Miyoshi, S., Cho, T., Hojo, H., Ichimura, M., Inutake, M., Ishii, K., et al.</i>		
C15		II-273
Observation of various electron velocity distribution shapes using X-ray diagnostics in GAMMA 10 <i>Cho, T., Hirata, M., Takahashi, E., Yamaguchi, N., Ogura, K., Masai, K., et al.</i>		
C16		II-277
An approach to the fusion neutron source concept based on a mirror with ICRF heating <i>Zukakishvili, G.G., Borozenets, A.M., Lebed, S.A., Moiseenko, V.E.</i>		
C17		II-281
Electron temperature-gradient instability caused by conducting end-plates in mirror devices <i>Ryutov, D.D., Tsidulko, Yu.A., Berk, H.L.</i>		
C18		II-285
On the role of slow compression in self-organization of the reversed field pinch plasma <i>Sorokin, A.V.</i>		
C19 (Oral)		II-289
Edge fluctuations and transport in the MST reversed field pinch <i>Sarff, J., Almagri, A., Assadi, S., Beckstead, J., Chartas, G., et al.</i>		
C20		II-293
Ion and electron temperature measurements on Repute-1 reversed field pinch <i>Ejiri, A., Ohdachi, S., Shnohara, S., Shimazu, Y., Asakura, N., et al.</i>		
C21		II-297
Formation, confinement, and stability of compact toroids in LSX <i>Slough, J.T., Hoffman, A.L., Milroy, R.D., Crawford, E.A., Ito, Y., Wurden, G.A.</i>		
C22		II-301
Initial experimental results in the LSX field reversed configuration <i>Wurden, G.A., Maqueda, R.J., Painter, C.L., Crawford, E.A., Hoffman, A.L., et al.</i>		
C23		II-305
Density regimes and dynamo processes in RFP plasmas <i>Ferrer Roca, Ch., Innocente, P., Martini, S., Paccagnella, R.</i>		
C24		II-309
Electron and ion temperature studies on ETA-BETA II reversed field pinch <i>Carraro, L., Costa, S., Martin, P., Puiatti, M.E., Scarin, P., Valisa, M.</i>		

- 
- C25 II-31  
Resistive MHD analysis of rotational instabilities in FRC  
*Santiago, M.A.M., Tsui, K.H., Azevedo, M.T., Sakanaka, P.H.*
- 
- C26 (Oral) II-31  
Particle transport investigation in the HBTX1C reversed field pinch  
*Walsh, M.J., Carolan, P.G.*
- 
- C27 II-32  
Tight neck in quick dense hydrocarbonic Z-pinch at MA current  
*Aranchuk, L.E., Chuvatin, A.S., Danko, S.A., Kopchikov, A.V., et al.*
- 
- C28 II-32  
Modelling of short wavelength  $m = 0$  instabilities in the compressional Z-pinch  
*Bayley, J.M., Coppins, M., Jaitly, P.*
- 
- C29 II-32  
A universal diagram for regimes of Z-pinch stability  
*Haines, M.G., Coppins, M.*
- 
- C30 II-33  
Characteristics of the neutron emission in different plasma focus configuration  
*Mandache, N., Tiseanu, I., Zambreanu, V., Zoita, V., et al.*
-
