

Part I

- The density limit in JET diverted plasmas
Campbell, D. J.
- Influence of the carbon and the oxygen concentration on the density limit in ASDEX-Upgrade
Neu, R.
- Advanced fusion in ICRF injected plasmas
Detragiache, P.
- Plasma shape experiments for an optimized tokamak
Hyatt, A. W.
- A tritium vessel cleanup experiment in TFTR
Caorlin, M.
- Plasma formation & operational regimes in START
Sykes, A.
- Resilience of the current density distribution with respect to changes of the electron density profile in tokamak discharges
Soltwisch, H.
- Current density profile inside the Q=1 on Tore Supra
Joffrin, E.
- Fast determination of plasma parameters
Wijnands, T.J.
- Biased divertor performance under auxiliary heating conditions on the TdeV tokamak
Décoste, R.
- Impurity behaviour during ion-Bernstein wave heating in PBX-M
Isler, R. C.
- Fuelling of TdeV by injection of an accelerated CT-spheromak
Raman, R.

Part I

- Toroidal global eigenmodes in ion-ion hybrid range of frequencies
Moiseenko, V.E.
- VH mode accessibility and global H-mode properties in previous and present JET configurations
Jones, T. T.C.
- Fusion performances and alpha heating in future JET D-T plasmas
Balet, B.
- Particle balance in Tore Supra for ohmic discharges
Capes, H.
- Scaling of incremental heat diffusivity with input power, T_e and $\text{grad}(T_e)$
Hogewei, G.M.D.
- Energy confinement in FTU ohmic plasma : BT, AI scalings
Bracco, G.
- Scaling of confinement with aspect ratio on TEXTOR
Dumortier, P.
- Particle and energy balance in diverted plasmas in TEXT-U
Rowan, W.L.
- Isotopic mass and alpha heating effects in TFTR DT plasmas
Budny, R. V.
- The effect of the edge current density on confinement and kink mode stability in H-mode and VH-mode discharges
Ferron, J. R.
- Offset-linear scalings based on the ITER H-mode confinement database
Kardaun, O.
- Empirical scaling laws of the neutron emission in the JT-60U NBI experiments
Nishitani, T.

Part I

- Confinement and beta limit in JT-60U high- β_p regime
Ishida, S.
- Impurity transport of high performance discharges in JET
Lauro-Taroni, L.
- Plasma transport properties at the L-H transition and high performance phase of JET discharges
Parail, V. V.
- Internal magnetic turbulence in Tore Supra and its correlation with energy confinement
Zou, X.L.
- Link between magnetic shear and energy confinement on Tore Supra
Guiziou, L.
- Turbulent transport coefficient in Tore Supra : instant measurements by collective light scattering
Hennequin, P.
- Investigation of the radial electron heat diffusivity during neutral beam injection heating at TEXTOR
Krämer-Flecken, A.
- Ion temperatures in the boundary layer of the TEXTOR plasma under various discharge conditions and radiative edge cooling
Lie, Y.T.
- Helium removal studies in I-mode discharges of TEXTOR
Mank, G.
- X-ray spectroscopic studies of particle transport in the Compass-D tokamak
Peacock, N.J.
- Transport and plasma exhaust in START
Sykes, A.
- Transport studies in FTU with decoupled temperature and current density profiles
Buratti, P.

Part I

- On- and Off-axis ECH modulation experiments on RTP
Jacchia, A.
- Transport analysis in helium-neon plasmas in RTP and comparison with transport models
Konings, J.A.
- Observations of plasma filamentation in the RTP tokamak using multi-position Thomson scattering
Pijper, F.J.
- A comparative heat pulse propagation study on RTP and W7-AS
Peters, M.
- Is the isotope effect a consequence of magnetic transport ?
Zurro, B.
- Characterization of magnetic turbulence through HXR spectra
Rodriguez-Rodrigo, L.
- Asymmetry of edge plasma turbulence in biasing experiments on tokamak TF-2
Budaev, V.P.
- Edge diagnostics and feedback control using an active probe on TEXT
Richards, B.
- Observation of non-standard propagation of temperature perturbations in a tokamak
Gentle, K. W.
- Tritium transport studies on TFTR
Johnson, L. C.
- Core profile and transport improvement during IBWH in PBX-M
LeBlanc, B.
- Fluctuations in high β_p plasmas in DIII-D
Casper, T.A.

Part I

- Correlations between locked modes and impurity influxes
Lawson, K. D.
- Negative snakes in JET : evidence for negative shear ?
Gill, R.D.
- Sawtooth crashes at high beta on JET
Alper, B.
- Beta limits in H-modes and VH-modes in JET
Smeulders, P.
- Snake studies on Tore Supra
Pecquet, A.-L.
- Correction of error field locked modes in Compass-D
Hender, T. C.
- Observation of resistive wall induced "forbidden" bands of mode rotation frequency on the Compass-D tokamak
Gates, D.
- A study toward self-consistent modelling of current quench
Pautasso, G.
- New method to analyse internal disruptions with five-camera soft x-ray tomography on RTP
Tanzi, C.P.
- Causes for the two stages of the disruption energy quench
Schüller, F. C.
- MHD stability of advanced tokamak scenarios
Holties, H.
- Magnetic field structure of resonant, three phase conductor configurations in TEXTOR
Nicolai A.

Part I

- Wall stabilization effects in DIII-D high beta discharges
Strait, E. J.
- Coherent fluctuations in the initial TFTR DT experiments
Fredrickson, E.
- Self-organization of a high β very low q tokamak plasma
Kiyama, H.
- Ion temperature anisotropy in high power helium neutral beam fuelling experiments in JET
Maas, A.C.
- Simulation of triton burn-up in JET plasmas
Loughlin, M. L.
- Gamma-ray emission profile measurements during JET ICRH discharges
Howarth, P.J.A.
- Impurity induced Neutralization of MeV energy protons in JET plasmas
Gondhalekar, A.
- 15-MeV proton emission from ICRF-heated plasmas
Jarvis, O. N.
- Effects of sawtooth crashes on beam ions and fusion product tritons in JET
Marcus, F.B.
- Fast electron ripple losses during LHCD on Tore Supra : model and experiments
Basiuk, V.
- Measurement of neutron emission profiles and neutron spectra by means of nuclear emulsions
Wolle, B.
- Characterization of the RTP slideaway regime and its fast electron population
Schokker, B.C.

Part I

- Measurements of escaping alphas in TFTR DT experiments
Zweben, S. J.
- Detection of alpha particles via observation of He II line emission in the lithium pellet cloud during DT operation in TFTR
Wurden, G.A.
- Pellet injection in the 2-3 km/s range on Tore Supra
Geraud, A.
- 2D simulation of pellet plasma cloud evolution and stratification
Rozhansky, V.
- Influence on the plasma performance by multipellet injection into ASDEX-Upgrade
Lang, P.T.
- Pellet ablation and cloud flow characteristics in the JIPP T-IIU plasma with the injection-angle controllable system
Sato, K.N.
- The H-mode power threshold in JET
Start, D.F.H.
- L-H transitions and ELMs on Compass-D
Hugill, J.
- H-mode operation in deuterium and helium on Compass-D
Fielding, S. J.
- Divertor performance of high density H-mode discharges in ASDEX-Upgrade
Mertens, V.
- Condition of the L-H and H-L transitions and operating regimes in ASDEX-Upgrade
Ryter, F.
- The H-mode operational window as determined from the ITER H-mode database
Ryter, F.

Part I

- Page: 290 • Polarization induced H-modes on TEXTOR : confinement improvement close to the critical point and obtention of H-modes without bifurcation
Van Nieuwenhove, R.
- Page: 294 • Studies of isotope effect of bias L-H transition on HL-1
Ran, L.B.
- Page: 298 • Effect of shear in the radial electric field on confinement in JET
O'Brien, D. P.
- Page: 302 • The comparative analysis of the different mechanisms of toroidal rotation in tokamaks
Sabot, R.
- Page: 306 • Initial H-mode experiments in DT plasmas on TFTR
Bush, C. E.
- Page: 310 • Optimized advanced stellarators of linked mirror type
Herrnegger, F.
- Page: 314 • W7-X vacuum and finite- β magnetic field structure resolved with the HINT 3D equilibrium code
Schwenn, U.
- Page: 318 • Island divertor for the stellarator Wendelstein 7-X
KiBlinger, J.
- Page: 322 • Stability analysis of pressure driven modes in Wendelstein 7 - AS
Geiger, J.
- Page: 326 • Ballooning stability limits in heliac-type stellarators
Jiménez, J. A.
- Page: 330 • Stellarator transport optimization with self-consistent electric fields
Lyon, J.F.
- Page: 334 • A comparison of improved confinement regimes in W7-AS
Baldzuhn, J.
- Page: 338
- Page: 342
- Page: 346

- Page: 380
- Page: 384

Part I

- Recycling and particle control studies in the W7-AS stellarator
Brakel, R.
- Toroidal and poloidal rotation in the W7-AS stellarator
Hofmann, J.V.
- Confinement and fluctuations at rotational transform $\approx 1/2$ for discharges with and without net toroidal currents in the Wendelstein 7-AS stellarator
Jaenicke, R.
- Extended parameter range in W7-AS experiments at various values of the mirror ratio
Rau, F.
- Reflectometry measurements during L- to H-transition in the W7-AS stellarator
Estrada, T.
- Energetic particle destabilized global Alfvén Eigenmodes in the stellarator W7-AS
Weller, A.
- Drift-wave-like density fluctuations in the Advanced Toroidal Facility (ATF) torsatron
Shats, M.G.
- Confinement studies of plasmas in boronized Heliotron E
Kondo, K.
- Detection of free boundary plasma shift in a toroidal helical plasma on the Heliotron - E
Besshou, S.
- Effects of the local pressure gradient and the resistivity on interchange instabilities and high frequency fluctuations in Heliotron E plasmas
Suzuki, Y.
- Study of fast ion confinement at the low magnetic field in heliotron-E
Kurimoto, Y.
- Temporal evolutions of electron density profiles in H-mode plasmas of CHS
Tanaka, K.

Part I

- Experimental study of magnetic islands on the H-1 heliac
Shats, M.G.
- Stability of the neutral beam heated plasma in the cusp-anchored gas-dynamic trap
Ivanov, A.A.
- First stage experiments at the end system of axisymmetric tandem mirror AMBAL-M
Davidenko, V.I.
- Electron acceleration using helicon waves in the linear mirror machine Lisa
Rapozo, C.da C.
- Behaviour of electron density profiles on RFX
Innocente, P.
- Magnetic field configuration and locked modes in RFX
Buffa, A.
- Power balance in RFX
Buffa, A.
- Radiation studies on RFX
Valisa, M.
- Global confinement in the extrap T1 reversed-field pinch
Brzozowski, J.H.
- Measurements of the impurity ion temperatures from the EXTRAP-T1 RFP plasma
Hörning, P.
- Toroidal phase locking phenomena and modal interactions with the mean fields in the EXTRAP T1 reversed-field pinch
Mazur, S.
- Measurement and controlled reduction of magnetic fluctuation induced transport in the MST reversed field pinch
Cekic, M.

Part I

- Spectroscopy and titanium gettering in SPHEX Page: 486
Cunningham, G.
- The central column structure in SPHEX Page: 490
Duck, R.C.
- Operation of "SPHEX" in helium and deuterium Page: 494
Gee, S.J.
- Dynamics of a dense cloud at a two-stage plasma heating in the Gol-3 device Page: 498
Postupaev, V.V.
- Plasma flow in the edge region of Heliotron-E Page: 502
Mizuuchi, T.
