

**Part III**

- Edge losses during lower hybrid current drive experiments with the ergodic divertor in Tore Supra  
*Goniche, M.* Page: 1042
- Propagation and absorption of the lower hybrid wave in a non-axisymmetric tokamak  
*Peysson, Y.* Page: 1046
- Identification of suprathreshold electron relaxation processes during lower-hybrid current drive in Tore Supra  
*Dudok de Wit, T.* Page: 1050
- Current profile control experiments in Tore Supra  
*Hoang, G.T.* Page: 1054
- Flux consumption, current ramp-up and current diffusion in Tore Supra non-inductive lower hybrid scenarios  
*Litaudon, X.* Page: 1058
- Modeling of advanced and steady-state scenarios in ITER with the ASTRA code  
*Wegrowe, J.-G.* Page: 1062
- Current drive and magnetic field perturbations  
*Popel, S.I.* Page: 1066
- Quasi-optical diffraction grill for excitation of lower-hybrid waves in tokamaks  
*Suvorov, E.V.* Page: 1070
- Ponderomotive effects in a plasma in front of waveguide structure radiating the slow lower hybrid waves  
*Preinhaelter, J.* Page: 1074
- Design of the quasi-optical grill for lower hybrid current drive on the CASTOR tokamak  
*Zacek, F.* Page: 1078
- Drift-kinetic simulations of wave-particle interactions in lower hybrid current drive  
*Pättikangas, T.J.H.* Page: 1082
- First results of LHCD experiments on the TdeV tokamak  
*Demers, Y.* Page: 1086

**Part III**

- Lower hybrid current drive simulation with the TSC/LSC code for TdeV  
*Shoucri, M.* Page: 1090
- Reconstruction of equilibria modified during lower hybrid current drive in the Princeton beta experiment-modification  
*Kaita, R.* Page: 1094
- Slowing down of lower hybrid waves in discharge with runaway electrons  
*Voitsekhovitch, I.A.* Page: 1098
- Radial diffusion of fast electrons in lower hybrid current drive  
*Hatayama, A.* Page: 1102
- Long time behaviour of LH wave-plasma coupling via high energy X-ray measurement in TRIAM-1M tokamak  
*Yamagajo, T.* Page: 1106
- Predicted current drive profiles from the new JET ICRF antenna  
*Cox, M.* Page: 1110
- Alfvén resonance effects on fast wave current drive  
*Heikkinen, J.A.* Page: 1114
- Recent results from fast wave current drive experiments on DIII-D  
*Pinsker, R.I.* Page: 1118
- Analysis of JET LHCD/ICRH synergy experiments in terms of relativistic current drive theory  
*Start, D.F.H.* Page: 1122
- A stable route to high- $\beta_p$  plasmas with non-monotonic Q-profiles  
*Söldner, F.X.* Page: 1126
- Heating and current drive in tight aspect ratio tokamaks  
*Cox, M.* Page: 1130
- Current drive by the combination of lower hybrid and ICRF waves  
*Ram, A.K.* Page: 1134

**Part III**

- Current profile control by lower hybrid waves and neutral beam injection in JT-60U  
*Kondoh, T.* Page: 1138
- Bootstrap current induced by high energy particles  
*Taguchi, M.* Page: 1142
- A method for measuring the inductive electric field profile and non-inductive current profiles on DIII-D  
*Forest, C.B.* Page: 1148
- Langevin formalism for current drive in plasmas  
*Belo, J.* Page: 1150
- Numerical simulation of current drive in tokamak T-10 S by simulated Raman scattering  
*Kamelander, G.* Page: 1154
- Simulation of fusion alpha particle interaction with intense waves in a toroidal configuration  
*Sipilä, S.* Page: 1158
- Radial flux of electrons carrying driven current during ECCD  
*Liu, C.* Page: 1162
- Pulse compression radar reflectometry for density measurements on fusion plasmas  
*Laviron, C.* Page: 1168
- Electron density profile measurements by microwave reflectometry on Tore Supra  
*Clairet, F.* Page: 1172
- Dual heterodyne-AM reflectometer measurements in the TJ-1 tokamak  
*Branas, B.* Page: 1178
- Edge density profile measurements on PBX-M using an amplitude modulation reflectometer  
*de la Luna, E.* Page: 1182
- New reflectometer diagnostics for JET: a comb reflectometer for the divertor region and a broadband swept extraordinary mode reflectometer for the edge plasma  
*Cupido, L.* Page: 1188

**Part III**

- Density profile measurements from ultra fast broadband reflectometry on ASDEX-Upgrade  
*Silva, A.* Page: 1188
- T-10 plasma investigations with new three waves heterodyne O-mode reflectometer  
*Dreval, V.V.* Page: 1192
- Observation of the low-frequency plasma turbulence by the microwave enhanced scattering and reflectometry techniques in the LH-heating experiments on FT-2  
*Stepanov, A.Yu.* Page: 1196
- Investigation of small-scale plasma fluctuations by the radar backscattering in the vicinity of the upper hybrid resonance  
*Gusakov, E.Z.* Page: 1200
- Applications and possibilities of pulsed radar reflectometry  
*Heijnen, S. H.* Page: 1204
- Electron temperature measurements by microwave transmission in Tore Supra  
*Michelot, Y.* Page: 1208
- Radar backscattering : the feasible diagnostics of low frequency turbulence in a tokamak  
*Grésillon, D.* Page: 1212
- Ion cyclotron emission by spontaneous emission  
*Da Costa, O.* Page: 1216
- Electron temperature fluctuations in the core of the W7-AS stellarator  
*Sattler, S.* Page: 1220
- Studies of the density limit of elongated plasmas in TCV using a FIR interferometer  
*Nieswand, C.* Page: 1224
- Asymptotic theory of electron cyclotron emission at upshifted frequencies  
*Tribaldos, V.* Page: 1228
- First combined emission-absorption measurements with the heterodyne radiometer at RTP  
*Van Gelder, J.F.M.* Page: 1232

**Part III**

- Plasma diagnostic through ion Bernstein waves Page: 1236  
*Riccardi, C.*
- Frequency-tuned microwave diagnostics based on enhanced scattering Page: 1240  
*Heikinen, J.A.*
- Electromagnetic wave scattering spectra expected from an unsteady plasma Page: 1244  
*Maafa, N.*
- High spatial resolution multiposition Thomson scattering system on RTP Page: 1248  
*Chu, C.C.*
- The Thomson scattering diagnostic on the TCV tokamak Page: 1252  
*Behn, R.*
- Spatial correlation techniques using scattering of CO<sub>2</sub> laser beam Page: 1256  
*Guerra, R.*
- Local measurement of transport parameters for laser-injected trace impurities Page: 1260  
*Giannella, R. M.*
- Prospects of real-time ion temperature and rotation profiles based on neutral-network charge exchange analysis Page: 1264  
*König, R.W.T.*
- High energy lithium-beam-spectroscopy diagnostics on the Wendelstein 7-AS stellarator : first results Page: 1268  
*McCormick, K.*
- Lithium beam spectroscopy on ASDEX-Upgrade for determination of density profiles in the plasma edge Page: 1272  
*Schweitzer, J.*
- First results from the new Zeff diagnostic at W7-AS based on the measurement of bremsstrahlung in the NIR spectral region Page: 1276  
*Mandl, W.*
- Routine average effective charge calculation using visible bremsstrahlung emission and comparison with the impurity transport code in Tore Supra Page: 1280  
*Guirlet, R.*

**Part III**

- Comparison between different methods of magnetic field diagnostics in beam emission spectroscopy Page: 1284  
*Voslamber, D.*
- Two-photon induced Ly-alpha-fluorescence as a means for isotope-selective hydrogen density determination in tokamak plasmas Page: 1288  
*Grützmacher, K.*
- Relaxation effects of X-ray line emission from highly ionized ions : extreme transient and non-Maxwellian conditions Page: 1292  
*Rosmej, F.B.*
- A spectroscopic method to directly measure nonthermal velocity fluctuations Page: 1296  
*Zurro, B.*
- Determination of Ion temperatures from Zeeman broadened spectral lines in the edge of Tore Supra Page: 1300  
*Klepper, C.*
- The JET multi-camera soft X-ray diagnostic Page: 1304  
*Alper, B.*
- Two dimensional reconstruction of the radiation power density in ASDEX-Upgrade Page: 1308  
*Fuchs, J. C.*
- Sawtooth filtering by singular value decomposition Page: 1312  
*Bessenrodt-Weberpals, M.*
- Observation of MHD phenomena with the visible light tomography system on RTP Page: 1316  
*Ingesson, L.C.*
- Diagnostics of X-ray emission from PF-type facilities and its time correlation with particles pulses Page: 1320  
*Sadowski, M.*
- Imaging of the electron distribution by measuring the angular distribution of bremsstrahlung Page: 1324  
*Krivenski, V.*
- Development and test of edge plasma diagnostics at the PSI1 - plasma generator Page: 1328  
*Bohmeyer, W.*

**Part III**

- Determination of the local ion temperature from the current-voltage characteristic of a planar Langmuir probe in strongly magnetized DC discharge Argon plasma  
*Stanojevic, M.* Page: 1332
- Measurement of the spatial distribution of non-intrinsic impurities on tokamak deposition probes by LIMS  
*Bakos, J. S.* Page: 1336
- Development of thin foil Faraday collector as a lost alpha particle diagnostic for high-yield D-T tokamak fusion plasmas  
*Cecil, F.E.* Page: 1340
- Monte Carlo simulation of neutron diagnostics by indium activation and nuclear emulsions at TEXTOR  
*Robouch, B.V.* Page: 1344
- Diagnostics of ions within high intensity plasma streams  
*Baranowski, J.* Page: 1348
- Hydrogen flux measurements with Pd-MOS capacitors in RFX and T1  
*Möller, A.* Page: 1352
- On the use of toroidal harmonics in the design of magnetic diagnostics  
*van Milligen, B.Ph.* Page: 1356
- Slow-surface-wave discharge tube as a plasma diagnostic probe (surfaprobe). Some experimental results  
*Cicconi, G.* Page: 1360
- Plasma diagnostics on ASDEX-Upgrade by means of carbon pellet injection  
*Sergeev, V.Yu.* Page: 1364
- Observation of Heliotron-E whisker magnetic flux surfaces and of divertor field lines structure by the diode method  
*Sano, F.* Page: 1368
- Ponderomotive effects in the lower hybrid regime  
*Riccardi, C.* Page: 1374
- Launching and propagation of drift waves in "GOLUX"  
*Elliott, J.A.* Page: 1378

**Part III**

- Experimental study of ion phase space in the approach to large scale chaos in wave-particle interaction  
*Fasoli, A.F.* Page: 1382
- Physics and effects of grid-electric field perturbation on spherical electrostatic-inertial confinement fusion  
*Gu, Y.B.* Page: 1386
- Negative-energy perturbations in circular cylindrical equilibria within the framework of Maxwell-drift kinetic theory  
*Throumoulopoulos, G.N.* Page: 1390
- An energy principle for guiding centre equilibria with flow  
*De Blank, H. J.* Page: 1394
- Negative-energy perturbations in symmetric Maxwell-Vlasov  $\beta_p=1$  equilibria  
*Correa-Restrepo, D.* Page: 1398
- Physical aspects of nonlinear interactions in plasmas  
*Popel, S.I.* Page: 1402
- Strongly nonlinear waves in ion-beam plasma systems  
*Popel, S.I.* Page: 1406
- Analytical method of solving explicitly nonlinear Vlasov equation and comparison with numerical simulations  
*Skarka, V.* Page: 1410
- Analysis of electrostatic wave coupling in a magnetized plasma  
*Riccardi, C.* Page: 1414
- Self-excitation of magnetic islands  
*Minardi, E.* Page: 1418
- Electron-cyclotron radiation in terms of the Fokker-Planck equation : slowing-down equations, highly relativistic equilibria  
*Bornatici, M.* Page: 1422
- Energy principle including boundary conditions as constraints  
*Lehnert, B.* Page: 1426

**Part III**

- Numerical solution of the Vlasov equation in the presence of a large amplitude wave  
*Shoucri, M.* Page: 1430
- Numerical simulation of the collisionless diffusion of particles and current across a magnetic field  
*Shoucri, M.* Page: 1430
- Arbitrary amplitude electrostatic self-similar structures in a plasma  
*Strasser, V.O.* Page: 1430
- Electrons correlations within the average atom model for swift heavy ions in dense plasmas  
*Maynard, G.* Page: 1440
- High pressure shock generation and propagation in optically smoothed laser-plasmas  
*Bossi, S.* Page: 1440
- Superthermal electrons near the cut-off layer of intense electron plasma waves  
*Pättikangas, T.J.H.* Page: 1450
- Acceleration of charged particles and photons in the wake of a short laser pulse in a thin channel  
*Bulanov, S.V.* Page: 1450
- Saturation of SRS by spatiotemporal chaos in coupled Langmuir decay  
*Bers, A.* Page: 1460
- Fast efficient plasma pushing by nonlinear laser forces and volume ignition for D-T fusion energy  
*Hora, H.* Page: 1460
- Nonlinear propagation of intense electromagnetic waves in two-electron temperature collisional plasmas  
*Shukla, P.K.* Page: 1470
- Exact analytical computation of relativistic solitary electron-positron structures in plasma with arbitrary strong magnetic field  
*Skarka, V.* Page: 1470
- Field aligned flow evolution in magnetofluids  
*Ireland, J.* Page: 1470

**Part III**

- Wave propagation in relativistic electron-positron plasmas  
*Rooney, C.E.* Page: 1482
- Sources of outer space gamma bursts (radiation/particle spectra)  
*Trubnikov, B.A.* Page: 1486
- Evolution of expanding plasma in magnetized background  
*Dudnikova, G. I.* Page: 1490
- Propagation of waves in dusty plasmas with variable charges on the dust particles  
*Vladimirov, S.V.* Page: 1494
- Helicon wave coupling to a finite plasma column  
*Krämer, M.* Page: 1500
- Coupled Langmuir and ion acoustic waves in collisional plasmas  
*Vladimirov, S.V.* Page: 1504
- Ion-atom collisions study of interest to magnetic fusion  
*Katsonis, K.* Page: 1510
- n-resolved partial charge transfer cross sections for  $A[q+] + (He[+], Li[++] )$  collisions using CTMC method.  
*Maynard, G.* Page: 1514
- The scaling of required preionization rate for homogeneous formation of avalanche discharges in high pressure discharges  
*Axnäs, I.* Page: 1520
- Elementary reactions at carbon surfaces under impact of H  
*Küppers, J.* Page: 1524
- Vacuum ultraviolet spectroscopy on electron cyclotron resonance multicharged ion source  
*Kato, Y.* Page: 1528
- Characteristics of a DC glow discharge plasma with YBaCuO cathode : theory and simulation  
*Cramer, N.F.* Page: 1532

**Part III**

- Ablative discharge capillaries with a non-constant cross-section Page: 1538  
*Ashkenazy, J.*
- ICRF and Ohmic H-modes in Alcator C-Mod Page: 1542  
*Snipes, J. A.*
- Pellet ablation study on currentless heliotron-E NBI and ECH plasmas Page: 1548  
*Sudo, Shigeru*
- First measurements of tritium recycling in TFTR Page: 1550  
*Skinner, C.H.*
- MHD-activity in ohmic, diverted and limited H-mode plasmas in TCV Page: 1554  
*Pochelon, Antoine*
- The dynamics of shaping control in TCV Page: 1558  
*Moret, J.M.*
