

CONTENTS

PREFACE	v
INTRODUCTION by Theodore von Kármán	ix

PART ONE: ELEMENTARY PROCESSES AND PROPERTIES IN IONIZED GASES

W. P. ALLIS AND S. J. BUCHSBAUM: <i>The Conductivity of an Ionized Gas in a Magnetic Field</i>	3
R. A. GROSS AND C. L. EISEN: <i>Some Properties of a Hydrogen Plasma</i>	15
I. PRIGOGINE: <i>The Statistical Mechanics of the Approach to Equilibrium in Gases</i>	25
RADU BALESCU: <i>Irreversible Processes in a Plasma: Effect of Long Range Forces</i>	32
H. F. CALCOTE: <i>Relaxation Processes in Plasma</i>	36

PART TWO: THEORETICAL CONSIDERATIONS ON THE INTERACTION OF MAGNETIC FIELDS AND FLOW OF IONIZED GASES

W. R. SEARS: <i>Some Solutions of the Macroscopic Equations of Magneto-hydrodynamics</i>	51
EUGENE E. COVERT: <i>A Microscopic Analysis of Magneto-Gas-Dynamics</i>	64
RUDOLF X. MEYER: <i>Magneto-hydrodynamics in the Limit of Small Inertial Forces</i>	80
F. D. HAINS, YUSUF A. YOLER, AND EDWARD EHLERS: <i>Axially Symmetric Hydromagnetic Channel Flow</i>	86

PART THREE: LABORATORY EXPERIENCE WITH FLOW OF IONIZED GASES

WINSTON H. BOSTICK, JOHN NANKIVELL, SAMUEL KOSLOV, AND GEORGE SCHMIDT: <i>Experimental Studies on Plasma Dynamics</i>	107
M. CAMAC AND G. S. JANES: <i>Applied Magneto-hydrodynamics at Avco-Everett Research Laboratory</i>	112
JAMES A. BROWNING: <i>Techniques for Producing Plasma Jets</i>	126
RICHARD W. ZIEMER: <i>Electromagnetic Shock Tubes</i>	139

PART FOUR: APPLICATIONS OF MAGNETO-GASDYNAMIC EFFECTS

JOSEPH L. NEURINGER: <i>Optimum Power Generation Using a Plasma as the Working Fluid</i>	153
M. L. GHAI: <i>Space Propulsion Engines—A Problem in Production of High Velocity Gases</i>	168

ALFRED E. KUNEN AND WILLIAM MCILROY: <i>The Electromagnetic Pinch Effect for Space Propulsion</i>	176
ROBERT V. HESS AND KARLHEINZ THOM: <i>Plasma Acceleration by Guided Microwaves</i>	190
GEORGE P. WOOD AND ARLEN F. CARTER: <i>Considerations in the Design of a Steady DC Plasma Accelerator</i>	201
