

CONTENTS OF VOLUME I

PART I

FUNDAMENTAL PROCESSES IN GAS DISCHARGES

I A. COLLISION PROCESSES

Recent advances in the study of collision processes in gases, WADE L. FITE	3
Study of inelastic collisions of electrons with atoms and molecules using the trapped-electron method, G. J. SCHULZ	14
"Ionization" of the hydrogen negative ion, SYDNEY GELTMAN	19
Collisions of hydrogen ions with hydrogen atoms, WADE L. FITE	23
Charge transfer in atomic and molecular hydrogen, E. GERJUOY, R. H. BASSEL AND T. F. TUAN	28
Charge transfer of multiply charged ions, J. B. HASTED, J. T. SCOTT AND A. Y. J. CHONG	34
Capture of electrons by multiply charged ions, N. V. FEDORENKO, I. P. FLAKS, L. G. PHILIPPENKO AND E. S. SOLOV'EV	41
Ionization of inert gases by protons, N. V. FEDORENKO, V. V. AFROSIMOV, R. N. IL'IN AND E. S. SOLOV'EV	47
Elastic and inelastic collisions of low-energy negative ions in gases, E. E. MUSCHLITZ, JR	52
High evidence for gas ionization effects by low energy ion impact, H. FETZ	57
Interactions between 5-24 keV ions or neutrals and gas molecules, TH. J. M. SLUYTERS, E. DE HAAS AND J. KISTEMAKER	60
Ionization of high velocity alkali atoms by collisions with atoms of the inert gases, V. M. DUKELSKY, J. F. BYDIN AND A. M. BUKTEEV	65
Molecular ions, ROBERT N. VARNEY	69
Electron attachment and collision frequencies in oxygen and nitrogen, MANFRED A. BIONDI	72
Thermal electron attachment coefficient of oxygen molecules near a nuclear burst, CHARLES W. DUBS AND HARI K. SEN	79
Volume recombination and diffusion in afterglows, ERNEST P. GRAY AND DONALD E. KERR	84
Ion-ion recombination, E. R. WOODING	89
Electron removal processes in the afterglows of microwave discharges in argon and oxygen, M. C. SEXTON, M. J. MULCAHY AND J. J. LENNON	94
Microwave determinations of afterglow temperatures and electron collision frequencies in nitrogen, DOMENICO FORMATO AND ALDO GILARDINI	99

I B. IONIZATION IN AN ELECTRIC FIELD

Survey of recent work on current growth, H. RAETHER	105
A study of the electron component of electron avalanches, L. FROMMHOLD	115
Space charge distortion in the simultaneous development of electron avalanches in uniform fields, D. W. SWAN	119
Avalanches of very high amplification, H. RAETHER	124

A method for determining the ionisation coefficient α by the statistics of avalanches, HANS SCHLUMBOHM	127
Fundamental processes in the temporal growth of ionization, F. LLEWELLYN JONES AND EIFIONYDD JONES	131
Measurement of ionization and attachment coefficients in air, J. DUTTON, F. LLEWELLYN JONES AND R. W. PALMER	137
Ionization and attachment in dry air, A. N. PRASAD AND J. D. CRAGGS	142
Secondary ionization in humid air, J. M. MEEK	146
Experimental Townsend α values of molecular gases, A. E. D. HEYLEN	150
Theoretical determinations of the electron energy distributions, drift velocity and Townsend α coefficient for hydrogen, A. E. D. HEYLEN AND T. J. LEWIS	156
The effect of gas purity, tube geometry, and method of calculation on the ionization coefficients in hydrogen and in the inert gases, D. E. DAVIES, J. G. C. MILNE AND J. MYATT	161
Multiplication in non-uniform fields, R. N. FRANKLIN	164
A unified theory of breakdown and the glow discharge, A. L. WARD AND M. J. REDDAN	169
Breakdown below the Paschen minimum, HEINZ NIESTERS	175
A. C. Breakdown potentials, LAURENZ GRAF	181
The influence of metastable atoms on the stability of discharges, P. J. HUTTON	185
Some electrical characteristics of the parallel-plate Townsend discharge, R. S. SIGMOND	189

I C. RADIATION PROCESSES

A survey of radiation processes in gases, G. L. WEISSLER	195
The imprisonment of resonance radiation, P. F. LITTLE	202
Spectroscopic investigations relating to autoionization and dielectronic recombination, W. R. S. GARTON, A. PERY AND K. CODLING	206
Photon processes in the breakdown mechanism, D. K. DAVIES, J. DUTTON AND F. LLEWELLYN JONES	210
Intensity and absorption coefficients of a gas-ionizing radiation emitted by gas-discharges in O ₂ and N ₂ -O ₂ mixtures, ALFRED PRZYBYLSKI	215
Photodetachment cross section for the negative ion of atomic oxygen, STEPHEN J. SMITH	219
Air fluorescence excited by gamma rays and X-rays, D. R. WESTERVELT, E. W. BENNETT AND A. SKUMANICH	225
Etude spectrale de la luminescence due à l'excitation des gaz rares par les rayons alpha, LYDIE KOCH	230
Calculation of the 1s-2p electron excitation cross-section of atomic hydrogen by the Schwinger variational method, A. E. KINGSTON; B. L. MOISEWITSCH AND B. SKINNER	236
Messung optischer Anregungsfunktionen in Quecksilber und Helium bei Anregung durch Elektronen, H. M. JONGERIUS, C. SMIT UND J. A. SMIT	240

I D. SURFACE-GAS INTERACTION

Forces on ion bombarded surfaces, GOTTFRIED WEHNER	245
Influence of the angle of incidence on sputtering yields, GOTTFRIED WEHNER	250
Sputtering of single crystal metals bombarded with rare gas ions of low energy (50-350 eV), M. KOEDAM	252
Sur le caractère non linéaire en fonction de l'intensité de la pulvérisation cathodique à haute énergie et sa variation en fonction de la température, C. CASSIGNOL ET G. RANC	255
Sputtering of copper-monocrystals by bombardment with 20 keV Ar ⁺ , P. K. ROL, J. M. FLUIT, F. P. VIEHBÖCK AND M. DE JONG	257
Angular distribution of sputtered particles and sputtering rate for high speed ions, BRANKA COBIĆ AND BRANA PEROVIĆ	260

The effect of the previous history of the cathode on its work function, on its sparking potential in hydrogen, and on formative time lags in hydrogen, D. E. DAVIES, R. K. FITCH, B. J. HOPKINS AND C. F. GOZNA	263
The normal cathode fall on single crystal cathodes, G. J. M. AHSMANN AND Z. VAN GELDER	266

PART II

DIFFERENT TYPES OF DISCHARGES AND APPLICATIONS

II A. GLOW-DISCHARGES

A generalized theory of the positive column in mercury rare-gas discharges, M. A. CAYLESS	271
Diffusionsbestimmte Amplifikationsprozesse in Plasmen, HANS ROTHER	276
Untersuchungen über niederfrequente Schwingungen in Niederdruckentladungen, B. SAGGAU	280
A contribution to the investigation of the striated positive column, M. KLERK	283
Spektrale Untersuchung der laufenden Schichten in einer Neonglimmentladung, ALFRED RUTSCHER	286
Ionenbildung in Edelgasentladungen mit H ₂ -Zusatz, M. PAHL UND U. WEIMER	293
Noise in gas discharges, A. R. GALBRAITH AND A. VAN DER ZIEL	297
Untersuchungen über der Mechanismus an der Kathode einer Glimmentladung, E. BADARAU UND I. POPESCU	301
New method of measurement of relaxation-times in glow discharge plasma, L. PEKÁREK	306
The impedance and recovery time of glow discharges in mixtures of rare gases, G. J. M. AHSMANN	309
High frequency plasmas at low pressures, ALBERT J. HATCH	314
Equations of the electrodeless ring discharge and their solution for the breakdown criterion, HANS U. ECKERT	320
Corona discharges in explosive gas/air mixtures, D. MÜLLER-HILLEBRAND	325
The time response of the Corona discharge in shock waves, W. FUCKS AND H. GRÖNIG	330
An investigation of D. C. Corona-discharges using microwaves, J. S. T. LOOMS	333

II B. ARC-DISCHARGES

Progress in arc research, WALTER LOCHTE-HOLTGREVEN	337
Pinching, passing and chopping of current in a neck of a discharge gap, G. G. TIMOFEYeva	343
The motion of an arc in a magnetic field, A. E. ROBSON	346
The influence of cathode surface conditions on arc movement, P. E. SECKER	350
The current continuity at the arc cathode, G. ECKER AND K. G. MÜLLER	355
New modes in low pressure cathode operation, HANS VON BERTELE	359
Some properties of the mercury vapour arc at very low pressures, MAX HOYAUX AND PAUL GANS	364
Spectroscopic study of carbon arc burning in inert gases, N. N. SOBOLEV, V. N. KOLESNIKOV AND V. F. KITAeva	370
Temperatures in the hydrogen arc plasma, W. A. GAMBLING	374
The properties of nitrogen up to 15000 °K, H. MAECKER	378
The decay of arc temperature by thermal conduction, D. WHITTAKER	381
Über den Umschlag eines Xenon-Hochdruckbogens in den brennflecklosen Bogen und dessen Kathodenmechanismus, G. LIST UND G. PARDEMANN	385
Post-zero phenomena in high-current arcs, V. K. BISHT, G. A. W. RUTGERS AND D. TH. J. TER HORST	388
Some experiments on decaying arcs, H. EDELS	393
On the reignition of A. C. arcs, WERNER RIEDER AND HELMUT SCHNEIDER	397

II C. SPARK DISCHARGES

Emission and absorption in spark plasmas, L. HERMAN	403
Time-resolved photography of arrested discharges in long gaps, R. T. WATERS AND R. E. JONES	408
Space charge phenomena in impulse sparkover, R. T. WATERS AND R. E. JONES	413
The influence of nuclei produced by sparks on the breakdown voltage of uniform field gaps in air, E. KUFFEL	418
Lightning discharges as origin of whistlers, HARALD NORINDER AND EDGAR KNUDSEN	424

II D. APPLICATIONS

Über die Ausbreitung der Zählrohrentladung in Zählrohren mit organischen Dämpfen oder Halogenen als Löschzusatz, W. MÜLLER-DUYSING, H. NEUERT UND H. J. STUCKENBERG	431
Resonance photons in Geiger discharges, P. MORTIER, O. SEGAERT AND J. DEMUYNCK	434
Some phenomena concerning the ignition of glow-discharge trigger tubes, S. M. FROUWS	438
A decade indicator glow-discharge tube operating on signals of low current and voltage, TH. P. J. BOTDEN	443
Anomalous electron emission from cold surfaces in thyratrons, R. J. ARMSTRONG	448
Kalkathoden-Schaltröhre für grosse Ströme, H. E. SEIFERT	456
Controlling the breakdown time of a cold-cathode arc, R. FEINBERG	460
The modes of operation of a cascade spark gap for precision switching, R. A. FITCH AND N. R. MC CORMICK	463
The three electrode spark gap and its application for the simultaneous switching of many parallel spark gaps, EDUARD HINTZ AND HANS BEERWALD	468
An improved technique for the measurement of voltage drop and energy dissipation in trigatrons, A. B. HILLAN	472
Experiments and interpretation on cesium diodes, J. ENOCH AND W. A. RANKEN	482
Cesium plasma diode as a heat-to-electrical-power transducer, WAYNE B. NOTTINGHAM	486
Further investigations on hash in fluorescent lamps, MAX HOYAUX AND PAUL GANS	502
La contagion isotopique dans les séparateurs électromagnétiques d'isotopes, CHARLES CASSIGNOL	507
Dosage de la quantité de vapeur d'eau dans les tubes TR et ATR par spectrographie dans l'ultra-violet, R. P. MUSSON-GENON ET E. DESCHAMPS	511
Radiation from a pulse discharge, G. PORTER AND E. R. WOODING	515
Optical and electrical characteristics of a high-brightness flash-discharge of short duration, W. R. S. GARTON, I. W. CELNICK, H. HESSBERG AND J. E. G. WHEATON	518
The sudden discharge of a circular energy storage condenser, WOLFGANG G. BRAUN	523

II E. NEW METHODES OF MEASUREMENT

Cross-section measurements with crossed beams, R. L. F. BOYD AND A. BOKSENBERG	529
Magnetic field probes with high frequency response, KARL HEINZ DIPPPEL AND WOLFGANG TECKENBURG	533
Détermination du temps de désionisation des tubes de commutation par la mesure de la lumière émise par la décharge, J. BRICON ET B. FLEURY	537
Massenspektrometrische Untersuchungen der Ionenemission und Ionenverteilung von Gasentladungsplasmen, O. REIFENSCHWEILER	541
Use of the Corona discharge for measurements of turbulence, B. FRANZEN AND W. FUCKS	549
