

CONTENTS OF VOLUME II

PART III

THEORETICAL AND EXPERIMENTAL STUDIES IN PLASMA PHYSICS

IIIA. TRANSPORT PHENOMENA AND STABILITY PROBLEMS

Linearized plasma dynamics. An introduction to the study of small oscillations and the growth of instabilities in a plasma, W. B. THOMPSON	555
Test particles in a plasma, MARSHALL N. ROSENBLUTH and NORMAN ROSTOKER	566
On the phenomenological equations of fully ionized plasmas derived from a statistical description, H. J. KAEPPELER	577
Transport property equations for partially ionized gases, CHARLES W. BAULKKNIGHT	584
Transport phenomena in a fully ionized gas including wave-particle interactions, K. S. W. CHAMPION and S. P. ZIMMERMAN	589
Traitement semi-quantique des interactions dans un plasma, MARC FEIX	595
The plasma-sheath transition in the presence of a magnetic field, J. E. ALLEN and F. MAGISTRELLI	599
Experiments on diffusion in a plasma column in a longitudinal magnetic field, F. C. HOH and B. LEHNERT	604
On hydromagnetic stability of the toroidal low pressure plasma, B. B. KADOMTSEV	609
Stability of helically invariant fields, RUSSELL M. KULSRUD	611
On the stability of a linear pinch with volume-currents, KARL ULRICH VON HAGENOW	614
Stability of electromagnetic plasma confinement in spherical geometry, JAMES W. BUTLER	620

IIIB. VELOCITY DISTRIBUTION OF ELECTRONS IN A PLASMA AND INTERACTION BETWEEN A PLASMA AND A BEAM OF CHARGED PARTICLES

Velocity distribution of electrons in a strong electric field, L. M. KOVRIZHNYKH	627
The velocity distribution of plasma electrons in an external electric field, IRA B. BERNSTEIN and IRVING N. RABINOWITZ	634
Supra-thermal particles, K. J. LE COUTEUR	637
Action d'un champ électrique alternatif sur un plasma totalement ionisé, H. BAGLIN, A. BRIN, J. L. DELCROIX, Y. OZIAS et J. SALMON	640
The effect of runaway electrons on the heating of a plasma, J. A. WESSON	648
Influence of the electron velocity distribution upon the space charge wave properties of electron beams, O. E. H. RYDBECK and H. WILHELMSSON	653
Raumladungswellen in einem Elektronenstrahl veränderlicher radialer Dichte, O. E. H. RYDBECK und M. FISCHER	657
The interaction of a beam of charged particles with a plasma, R. A. DEMIRKHAPOV, A. K. GEVORKOV and A. F. POPOV	665
Experimental and theoretical investigation of the interaction of an electron beam with plasma, I. F. KHARCHENKO, YA. B. FAINBERG, P. M. NIKOLAYEV, E. A. KORNILOV, E. A. LUTSENKO and N. S. PEDENKO	671
On the interaction between space charge waves and electromagnetic waves in a cold plasma, O. E. H. RYDBECK	681
On the possibilities of oscillatory instabilities in time of a ring current, H. WILHELMSSON	687

IIIC. WAVES IN PLASMA

High-frequency waves in ionized gases, SANBORN C. BROWN	691
On electromagnetic properties of relativistic plasma, V. P. SILIN	697
Zum Problem nichtlinearer Plasmaschwingungen, HANS ROTHER	704
Low frequency waves in magneto ionic media, OLOF E. H. RYDBECK and ALF R. THOMASSON	707
Oscillatory properties of gyromagnetic electronic cold plasmas with drift motion, HANS WILHELMSSON	714
On the index of refraction of spatially periodic plasma, C. H. PAPAS	718
The radiation resistance of an elementary dipole in anisotropic plasmas, HERWIG KOGELNIK	721
Plasma resonance coupling in ionized media, O. E. H. RYDBECK	726
A method for studying the space distribution of electrons in a plasma, A. I. ANISIMOV, V. E. GOLANT, B. P. KONSTANTINOV and N. I. VINOGRADOV	729
Microwave radiation measurements of very hot plasmas, CHARLES B. WHARTON	737
Radiation patterns of the noise emission from a gaseous discharge, N. GEORGE	743
Calculation of the electronic density and collision frequency in a decaying plasma, T. L. DUTT and A. G. STAINSBY	755
A plasma parametric amplifier, G. S. KINO and B. LUDOVICI	762
On the harmonics radiating from microwave discharge in air, KINJIRO INADA, MICHIZO UENOHARA and TAKAYA MASUTANI	768
Compression of radiation fields by a magnetically driven plasma shell, J. G. LINHART and L. TH. M. ORNSTEIN	774
Plasma wave-guides and resonators for cm-waves, J. G. LINHART and W. ZYCH	778
The velocity and damping of Alfvén waves in a gas discharge, R. A. HARDCASTLE and D. F. JEPHCOTT	786

IIID. SPECTRA FROM PLASMAS

The structure of spectral lines from plasmas, HENRY MARGENAU	791
Formulas for estimating widths of spectral lines emitted from plasmas and their limits of validity, HENRY MARGENAU	799
Advances in the theory of stark broadening of spectral lines, H. R. GRIEM and A. C. KOLB	808
Doppler phenomenon in radiant gaseous atmospheres with velocity and density fields, LOUIS GOLD	813
Zur Temperaturmessung an Plasmaschichten mittlerer Absorption, A. BAUER	817
The measurement of electron temperature in high temperature plasmas, S. KAUFMAN and R. V. WILLIAMS	824
The spectroscopic study of electron energy in a linear pinched discharge, A. H. GABRIEL	829
The interpretation in terms of atomic collision processes of a measurement of the absolute intensities of some of the Balmer spectral lines as emitted by a deuterium discharge in ZETA, R. W. P. MC WHIRTER, W. G. GRIFFIN and T. J. L. JONES	833
Measurements of the refractive index of a plasma in the optical region, U. ASCOLI-BARTOLI and F. RASETTI	839

PART IV

PRODUCTION, CONFINEMENT AND HEATING OF PLASMAS

IVA. THE LONGITUDINAL PINCH

Calculations of the pinch in the hydromagnetic approximation, K. HAIN and G. HAIN	843
The trapping of gas in a fast-pinch discharge, N. J. PHILLIPS	849
The inverse skin effect, MALCOLM G. HAINES	853
Kinematographische und spektrale Untersuchungen an Stossentladungen in Gasen, HARTMUT ZWICKER	857

A comparative study of the fast linear Z-pinch with high and low inductance condenser banks, H. A. B. BODIN, N. J. PEACOCK and J. A. REYNOLDS	861
Measurements of conductivity on linear pinch discharges by means of magnetic probes, H. FÖRSTER and J. SCHLÜTER	867
Studies of the low pressure argon arc in a magnetic field, M. MCCHESENEY, P. C. MCNEILL and J. J. MATTHEWS	871
Some magnetohydrodynamic effects by the impulse plasma confinement, I. PH. KVARTZHAVA, K. N. Kervalidze and J. S. GVALADZE	876
Optical and electrical studies of a linear pinched discharge, R. LATHAM, F. L. CURZON and J. A. NATION	884
The hard-core pinch I, D. H. BIRDSALL, S. A. COLGATE and H. P. FURTH	888
The hard-core pinch II, D. H. BIRDSALL, S. A. COLGATE and H. P. FURTH	892
Experiments with linear pinch and inverse pinch systems, K. L. AITKEN, J. N. BURCHAM and P. REYNOLDS	896
The heat losses to electrodes, MALCOLM G. HAINES	901
Ohm'sche Aufheizung vollionisierter Plasmen hoher Dichte, K. H. HÖCKER und W. KLUGE	904
Energy losses from plasma by radiation, V. D. KIRILLOV	912
Los Alamos research on controlled thermonuclear reactions, J. L. TUCK	920
Thermonuclear work at Harwell—A brief review, GORDON FRANCIS	929
The energy loss problem with Sceptre IIIA, A. A. WARE	931
The measurement and interpretation of the magnetic fields in Sceptre IIIA, N. L. ALLEN and B. S. LILEY	937
Plasma research at A.E.I. research laboratory, Aldermaston Court, D. R. CHICK	944
Investigation of a toriodal discharge in a strong magnetic field, G. G. DOLGOV-SAVELIEV, V. S. MUKHOVATOV, V. S. STRELKOV, M. N. SHEPELEV and N. A. YAVLINSKI	947
Magnetic field configurations in toriodal discharges, D. J. LEES and M. G. RUSBRIDGE	954
A toriodal fast pinch experiment, D. E. T. F. ASHBY and J. W. M. PAUL	961
Experiments with T.A. 2000, C. ETIEVANT, P. GINOT, P. HUBERT, P. REBUT, B. TAQUET and A. TOROSSIAN	967
Spectroscopic studies on T.A. 2000, C. BRETON and L. HERMAN	972
High current toriodal discharge in He, K. YAMAMOTO, S. MIYAJIMA, K. HASEBE, K. NOBATA, T. OKUDA, S. MAEDA, S. NAGAI and K. YOSHIHARA	978
Plasma betatron, J. G. LINHART	981

IVB. MIRROR MACHINES

Some aspects of high temperature plasma research with the mirror machine, RICHARD F. POST	987
The DCX approach to the thermonuclear problem—progress since Geneva, ARTHUR H. SNELL	997
Trapping of high-energy ions within an arc wall, JOHN SIDNEY LUCE	1002
Measurement of the lifetime of a low density plasma in a magnetic mirror trap, M. S. IOFFE, R. I. SOBOLYEV, V. G. TELKOVSKY and E. E. YUSHMANOV	1009
Estimating the lifetime of ions in a mirror machine, H. N. V. TEMPERLEY	1015
Investigations of magnetic traps with space-charge, K. D. SINELNIKOV, B. G. SAFRONOV, V. D. FEDORCHENK, B. N. RUTKEVICH and B. M. CHERNY	1017

IVC. THE AZIMUTHAL PINCH

Recent progress in shock wave research, ALAN C. KOLB	1021
Recent experimental results on fast-compression plasma heating and rotating plasmas, F. L. RIBE	1032
Dense plasmas confined by external fields, A. C. KOLB, H. R. GRIEM and W. R. FAUST	1037

Electrical discharge in a magnetic mirror configuration, M. ALIDIERES, R. AYMAR, C. ETIEVANT, P. JOURDAN and A. SAMAIN	1042
Experiments on shock-compression of plasmas, HERMANN FAY, EDUARD HINTZ and HERMANN L. JORDAN	1046
Some peculiarities of induction gas discharges, E. D. ANDRUCKINA, S. E. GREBENSHIKOV, M. S. RABINOVITCH, M. D. REISER, A. JA. SAFRONOV and I. S. SHPIGEL	1050
On C.T.R. research at A.W.R.E., Aldermaston, G. B. F. NIBLETT	1057
An experimental investigation of the rapid compression of a plasma using azimuthal currents (Thetatron), H. A. B. BODIN, T. S. GREEN, G. B. F. NIBLETT and N. J. PEACOCK	1061
The formation and implosion of a cylindrical current sheath in thetatron, H. A. B. BODIN, T. S. GREEN, G. B. F. NIBLETT and N. J. PEACOCK	1065
Experiments on the orthogonal pinch effect, J. E. ALLEN and S. E. SEGRÈ	1073
Collision free compression of a plasma, J. H. ADLAM and I. C. PYLE.	1077

IVD. SHOCK-WAVES

“Shock” waves in rarefied plasma, R. Z. SAGDEYEV	1081
Collision free magnetohydrodynamic shock wave, A. KANTROWITZ, R. M. PATRICK and H. E. PETSCHKE	1086
Non-equilibrium electrical and radiative properties of high temperature air, nitrogen, and oxygen, P. HAMMERLING, J. D. TEARE and B. KIVEL	1092
Charge separation effects on shock wave structure in a plasma, O. W. GREENBERG, H. K. SEN and Y. M. TRÈVE	1098
An apparatus for the production of intense shock waves, J. K. WRIGHT	1105
Méthode d'étude des ondes de choc non ionisantes, R. DER AGOBIAN	1110
Transient high temperature gas layers in detonation, C. H. JOHANSSON and H. L. SELBERG	1114
Microwave studies of the properties of ionized air in a shock tube, D. L. SCHULTZ	1118

IVE. FURTHER METHODS OF PRODUCTION, CONFINEMENT AND HEATING

Particle loss in a stellarator during ohmic heating, R. A. ELLIS, JR., L. P. GOLDBERG and J. G. GORMAN	1129
The spectroscopy of impurities in the stellarator plasma, DIRCK DIMOCK	1136
A dynamically stable current filament, V. S. KOMELKOV, Y. V. SKVORTSOV, S. S. TSEREVITINOV and V. I. VASILIEV	1141
Acceleration of plasma, A. DATNER	1151
Electrodeless generation and acceleration of plasma rings, L. HÖGBERG, K. SIEGBAHN and K. BOCKASTEN	1156
Experiments with plasma beams, E. R. HARRISON	1160
Toroidal magnetic bottle, T. OHKAWA, G. MIYAMOTO, H. YAMATO and N. MATSUDA	1164
Viscous effects in highly ionized rotating plasmas, W. R. BAKER, A. BRATENAHL, W. A. DESILVA and W. B. KUNKEL	1171
Investigation of ion cyclotron resonance in a dense plasma, K. D. SINELNIKOV, V. T. TOLOK, N. I. NAZAROV, I. I. BAKAYEV, V. A. BONDAREV and U. P. BUGAY	1176
Thin plasmas of variable densities, LENNART SIMONS	1181
Trapped radiation in the earth's magnetic field, S. F. SINGER	1187
Observations in high density plasmas produced by exploding wires, WILLIAM G. CHACE	1191
Über pinchähnliche Erscheinungen an explodierenden Drähten, H. BARTELS, P. GANSAUGE und J. BORTFELDT	1196
