

CONTENTS OF VOLUME I

ELECTRONIC AND IONIC COLLISION PHENOMENA

Single Collision Processes

G. J. SCHULZ, Recent advances in low-energy electron collisions with atoms and molecules.....	3
J. B. HASTED, Recent trends in heavy particle collision research	9

Collision Processes in Swarms

M. A. BIONDI, Electron loss processes in ionized gases	19
R. D. THOMAS, R. HACKAM and J. J. LENNON, Electron-ion recombination in helium afterglows.....	27
D. BALFOUR and J. H. HARRIS, Loss processes in caesium plasma	32
Н. Д. МОРГУЛИС и И. Н. ПОЛУШКИН, Рекомбинация зарядов при распаде плазмы в гелии и аргоне при повышенных давлениях с примесью паров цезия	35
H. H. BRÖMER, Measurements of electron density in a decaying pure nitrogen plasma.....	40
J. DUTTON and E. M. WILLIAMS, The motion of neon positive ions in neon	40
R. BOUCIQUÉ and P. MORTIER, Temperature dependence of the mobility of deuterium ions in deuterium	44
H. EIBER, M. P. FREEMAN und F. D. LANGE, Messung der Driftgeschwindigkeiten von Stickstoffionen aus dem Strahl eines Plasmabrenners	47
H. R. SKULLERUD, Measurement of positive ion diffusion in argon and hydrogen.....	50
J. FREUDENTHAL, Ion mobilities and molecular ion reactions from measurements of cataphoresis	53
J. C. INGRAHAM, Electron-atom collision cross-section measurements in the afterglow of a pulsed cesium plasma	57
S. C. HAYDON, The interpretation of effective collision frequencies in $E \times B$ investigations.....	61
A. L. WARD, Effect of ionization, diffusion and space charge upon mobility measurements.....	65
J. FISCHER, Electron drift velocity variations in neon + 10% helium + alcohol, using spark chamber efficiency as a sensitive indicator	68
R. L. TAYLOR and K. V. NARASINGA RAO, Alteration of electron loss processes in oxygen magnetoplasma by microwave absorption	74
A. N. PRASAD, Electron detachment in oxygen	79
R. W. CROMPTON, J. A. REES and R. L. JORY, The diffusion and attachment of electrons in water vapour..	83
R. W. CROMPTON, B. S. LILEY, A. I. McINTOSH and C. A. HURST, The extension of swarm techniques to the measurement of electron energy for conditions near electrical breakdown	86
D. EDELSON, S. F. BARNA and K. B. McAFEE, Townsend ionization coefficients in tritium.....	91
A. H. COOKSON and B. W. WARD, Ionization and positive ion mobility measurements in methane at pressures above atmospheric	95
H. RYŻKO, Measurements of ionization and electron-attachment coefficients in humid air.....	97
J. FLETCHER and S. C. HAYDON, Electron impact ionization of molecular gases in crossed electric and strong magnetic fields	100
H. BEERWALD, Ionization rate at higher electron densities in dc fields measured in an electrodeless discharge	104
H. WIND, Electric field dissociation of the hydrogen molecular ion.....	107

SURFACE PHENOMENA

Interaction with Solids

B. PEROVIĆ, High energy ion bombardment	113
Yu. A. FILIPPOV, Statistics of secondary electron emission	121
D. A. DEGRAS et J. LECANTE, Désorption et dissociation de l'oxide de carbone adsorbé sur le molybdène par des électrons lents	124
E. S. PARILIS, On the theory of reflection of ions from solid surfaces	129
G. M. McCracken and J. H. C. MAPLE, Reflection of hydrogen ions from metal surfaces in the energy range 5—30 keV	137
E. S. MASHKOVA and V. A. MOLCHANOV, Scattering of ions by crystals	143
C. SNOEK, W. F. v. d. WEG, R. GEBALLE and P. K. ROL, Study of collision phenomena at copper surfaces..	145

J. B. SANDERS and D. ONDERDELINDEN, Calculation of the sputtering ratio of single crystalline copper by bombardment with Ar ⁺ ions at normal incidence in the 5 keV — 20 keV energy region	149
C. H. WEIJSENFELD, Angular distribution of sputtered atoms and their average energy	151
V. E. YURASOVA, V. M. BUCHANOV and M. V. KUVAKIN, The peculiarities of atom ejection in close-packed directions under ion bombardment	155
D. ONDERDELINDEN, F. W. SARIS and P. K. ROL, Sputtering of F. C. C. single crystals as a function of the angle of incidence of 20 keV Ar ⁺ ions	157
C. GREY MORGAN and W. T. WILLIAMS, Avalanche growth in hydrogen	161
H. D. HAGSTRUM and D. D. PRETZER, Non-adiabatic energy broadening in the Auger neutralization process	164
L. DEBEVEC, E. HELDT, K. H. KREBS and J. MARSEL, Mass spectrometric investigations on the isotopic effect of secondary electron emission from metallic surfaces produced by positive ions	167
B. L. SCHRAM, A. J. H. BOERBOOM, W. KLEINE and J. KISTEMAKER, Amplification factors of a particle multiplier for multiply charged noble gas ions	170
E. S. MASHKOVA and V. A. MOLCHANOV, Ion-electron ejection from single crystals	176
U. A. ARIFOV, New method of experimental investigation of processes taking place during interaction of atoms and ions with the surface of a solid	177
R. M. CHAUDHRI and M. M. CHAUDHRI, Single bi-particle head-on elastic collisions of fast hydrogen ions with metals	181
P. DAHL, Large-angle collisions in an aluminum surface bombarded by 50 keV argon ions.....	185
R. M. CHAUDHRI, M. M. CHAUDHRI, S. M. KABIR and M. RAFIQUE, Angular distribution of the optical radiation emitted from Ag, Al, Cu and Ni by the impact of alkali positive ions.....	186
C. TCHOUBAR, M. RAUTUREAU, M. GOLDMAN et A. GOLDMAN, Effets anodiques dans les décharges prédisruptives entre pointe négative et plane	190
P. HAYMANN and C. WALDBURGER, Selective attack of a binary alloy	195
M. MEYER, P. HAYMANN and J. J. TRILLAT, Bombardment of copper single crystals with medium energy ions (10 keV)	197
W. A. GRANT and G. CARTER, The positive ion trapping efficiency at, and ion induced reemission from a glass surface	200
T. JOKIĆ and B. PEROVIĆ, Thermal release of gas deposited in metal targets by high energy ion bombardment	204
Z. ŠTERNBERG, A study of photodesorption	208

Emission from Solids

D. L. TURCOTTE and R. WOLF, Low temperature surface emission in seeded combustion products.....	211
R. A. MILOVANOVA and P. N. CHISTYAKOV, On the work functions of metals in inert gases	216
V. G. BOLSHOV, Work function of high-melting metal carbides and of graphite with cesium vapor present....	219
W. BLOSS and E. MUZ, Enhanced radiation during thermionic electron emission	223
B. JÜTNER and H. WOLFF, The nature of the current in the pre-breakdown region of the vacuum discharge	226
R. F. HALL, Field emission characteristics and surface charging of Au-Cs-O	229
L. TRILLING, The energy accommodation of a light inert gas on a cold heavy metal surface covered by a monolayer of light adsorbed gas	233
G. COMSA, S. TODIREANU and V. TREPĂDUS, The inelastic scattering of slow neutrons by methane adsorbed on activated charcoal	237
V. N. AGEEV, N. I. IONOV and Yu. K. USTINOV, A study of the interaction of some gases with the surface of polycrystalline tungsten by the flash filaments method	239
G. ARMAND et J. LAPUJOLADE, Désorption de l'azote à partir de l'acier inoxydable 18/8.....	242
E. Ya. ZANDBERG and A. Ya. TONTEGODE, Thermionic properties of rhenium and some refractory metals	247
E. Ya. ZANDBERG and V. I. PALEYEV, Surface ionization of atoms and molecules on non-metals.....	251
R. H. McFARLAND and J. D. KINNEY, Surface ionization of the alkali metals by heated tungsten.....	254
E. BIEDERMANN, W. WALCHER and W. WEIERSHAUSEN, The influence of crystal structure of W on the surface ionization on this metal	256
S. von GOELER, T. OHE and N. D'ANGELO, Production of a thermally ionized plasma with negative ions..	260

ELECTRICAL DISCHARGES

Low Pressure Discharges

W. LOCHTE-HOLTGREVEN, Pressure broadening of spectral lines	267
R. W. LAKE THOMAS, The application of least squares curve fitting techniques to Townsend spatial growth experiments	271
R. D. DAVIES and F. LLEWELLYN JONES, The role of delayed photon processes in the secondary ionisation of neon	275
H. TAGASHIRA, A consideration of the statistics of the photon secondary effect at the cathode	277
P. BLETZINGER, H. E. JOHNSON and A. GARSCADDEN, The initiation of a low pressure discharge....	283
Э. М. РЕЙХРУДЕЛЬ, Э. Х. ИСАКАЕВ, Формирование (зажигание) разряда в ячейке Пеннинга в высоком вакууме в магнитном поле	288

D. E. DAVIES and G. D. N. OVERTON, Secondary ionization processes in mercury vapour.....	292
B. A. БУРМАКИН, Положительная корона в водороде	295
D. SRDOČ, Breakdown of rare gases containing electronegative gas admixture.....	301
N. L. ALLEN and K. A. BUNTING, Breakdown measurements in an electric field crossed with an azimuthal magnetic field	304
A. B. PARKER and M. F. MANGAN, Instabilities in the growth of high current mercury vapour discharges..	308
H. BEERWALD, Ionization of gases in homogeneous magnetic fields increasing with time.....	311
F. DEUTSCH, On the formative time lag of the gas breakdown in the presence of a transverse magnetic field..	313
M.—J. SCHÖNHUBER, Breakdown below (<i>pd</i>) _{min}	316
W. B. HURT and C. B. COLLINS, Optical pumping of the positive column of a helium dc discharge	326
N. A. VOROBOVA, Ju. M. KAGAN, R. I. LJAGUSHCHENKO and V. M. MILENIN, Electron energy distribution in the positive discharged column	330
Б. Н. КЛЯРФЕЛЬД, Л. Г. ГУСЕВА, А. С. ПОКРОВСКАЯ - СОБОЛЕВА, Разновидности тлеющего разряда	332
E. HANTZSCHE and L. W. WIECZOREK, Energy distribution functions in anomalous glow discharges	339
Л. Ю. АБРАМОВИЧ, Б. Н. КЛЯРФЕЛЬД, Ю. Н. НАСТИЧ, Тлеющий разряд большой плотности тока	342
Ju. B. GOLUBOVSKY, Ju. M. KAGAN and R. I. LJAGUSHCHENKO, The mechanism of the contracted discharge column	346
P. J. BARRETT, Electron wakes in a positive column	349
D. A. LEE, A. GARSADDEN and P. BLETZINGER, The wave nature of moving striations.....	351
A. A. ZAITSEV and B. E. DJAKOV, Investigation of moving striations by Langmuir's probe method.....	355
K. WOJACZEK, Die Erzeugung anwachsender oder abklingender laufender Schichten.....	358
B. SAGGAU, The low pressure column and striations	364
R. A. NODWELL and A. M. ROBINSON, The measurement of line absorption of excited gases.....	368
F. A. BENSON and M. W. BRADSHAW, Impedance-frequency characteristics of glow discharges.....	372
L. W. WIECZOREK and E. HANTZSCHE, Influence of charge exchange and plasma efficiency on the cathode fall region of a normal glow discharge	377
A. HEISEN, H. WELLENHOFER, G. FRANCK, H. WIEDEMANN and U. JENTZSCH, Neue Methoden zur Bestimmung des Plasmawirkungsgrades von anomalen Glimmentladungen	380
H. RENNER, A. HEISEN and J. WITT, Zur Gültigkeit eindimensionaler Modelle für die kontrahierte anomale H ₂ Glimmentladung	384
S. PFAU and A. RUTSCHER, Untersuchung des zeitlichen Aufbaues der kontrahierten positiven Säule aus dem diffusen Zustand	388
R. M. CHAUDHRI and M. M. CHAUDHRI, Energy spectrum of cathode rays in glow discharge in gases at low pressures	392
G. AHSMANN, Measurements on the hollow cathode arc	397
C. POPOVICI and M. SOMESAN, Hollow cathode effect in magnetic field.....	397
Б. И. МОСКАЛЁВ, О природе плазмы внутри полого катода	401
G. A. FARRALL, Arc recovery in vacuum	403
C. MAHN and H. RINGLER, Measurements on a stationary dc hydrogen arc with flow in an axial magnetic field	408
И. А. ЛУКАЦКАЯ, Формы вакуумной дуги на вольфрамовых электродах	412
J. BEYNON and W. D. OWEN, Pre-breakdown currents, adsorbed gas and vacuum breakdown.....	417
M. OTSUKA, K. TAKAYAMA, S. TANAKA, J. URAMOTO, S. AIHARA, T. KODAMA, K. ISHII and Y. TANAKA, Quiescent dc discharge in cusp fields of TP-D machine	420
J. Y. WADA, R. C. KNECHTLI and H. HEIL, Electron energy distribution and thermalization measurements in plasmas	424
D. A. DUNN and A. S. HALSTED, Self-constricted beam-generated plasmas	429
M. WEINFELD, Production et étude expérimentale d'une colonne de plasma dans un champ magnétique intense	434
F. BOTTIGLIONI, J. COUTANT, E. GADDA et F. PREVOT, Propagation et diffusion d'une colonne de plasma dans un champ magnétique	438
E. M. REICHRUEDEL, G. V. SMIRNITSKAJA and R. P. BABERTSIAN, A new method for determination of the potential distribution in a Penning-type discharge.....	443
