

CONTENTS OF VOLUME III

DIAGNOSTIC METHODS AND APPLICATIONS

Methods of Plasma Diagnostics

V. V. AFROSIMOV, Corpuscular diagnostics of hot plasma	3
L. S. HALL and R. P. FREIS, Theory of the electrostatic probe and its improved use as a diagnostic tool ..	15
J. R. COZENS, Probes at high gas pressure	19
NGUYEN THE HUNG and G. PAQUETTE, Theory of Langmuir probes in plasmas containing negative ions. Properties of the sheath	21
D. ECKHARTT, G. GRIEGER, M. HASHMI, F. W. HOFMANN and A. J. VAN DER HOUVEN VAN OORDT, Comparison of density measurements by Langmuir probes with densities determined by resonance fluorescence in a singly ionized barium plasma	26
J. B. MOREAU, Etude d'un plasma de césium à l'aide d'une sonde de Langmuir	28
D. M. GALL and N. L. OLESON, Langmuir probe studies of a steady state argon plasma in a magnetic field	31
S. MIYOSHI, S. SHIOBARA and Y. SAKAMOTO, Probe measurement of electron density in magneto-plasma ..	35
E. GUILINO and M. HASHMI, The influence of probe losses on the ion density of a thermal cesium plasma in a magnetic field	39
G. MEDICUS, Behavior of biased guardring probes	44
J. D. LAIRD, The measurement of ion densities with a flat plate, continuum Langmuir probe in a shock tube	45
P. M. MOSTOV and F. CRISTINZIO, Physics of high speed ionized gas interaction with biased surface con- ductors	48
A. A. SONIN, K. GRAF, J. LAFRAMBOISE and J. H. DELEEUW, The ion collection of free molecular cylin- drical Langmuir probes in flowing plasmas	53
S. KLEIN, Sur la validité de la mesure de la température électronique dans une flamme à l'aide de sondes de Lang- muir au contact d'une paroi froide	57
A. KORDUS and B. ZAPOROWSKI, Scalar electrical conductivity diagnostic of low-temperature plasma	59
I. ALEXEFF, W. D. JONES, D. MONTGOMERY and M. RANKIN, Simple momentum probe for plasma stu- dies	62
J. R. GREIG and D. A. SWIFT, Measurements of electrode-fall potentials in a Z-pinch discharge	66
K. S. GOLOVANIVSKY and A. A. KUZOVNIKOV, On the probe diagnostics of ion beams	70
D. BIZE, M. CADART et T. CONSOLI, Interferometre Fabry-Perot en onde millimetrique à optique focalisante, pour la mesure de plasma en évolution, de faibles diametres, et dans un large intervalle de valeurs de densités..	74
J. H. HARRIS and D. BALFOUR, A microwave cavity method for recording rapid variations of electron density and for observing electron collision effects	79
T. J. FESSENDEN and L. D. SMULLIN, A simple technique for measuring the density of a plasma in a metal box	83
A.A. ANISSIMOV, V. N. BUDNIKOV, N. I. VINOGRADOV and V. E. GOLANT, Application of open cylin- drical cavities for plasma investigation	86
Д. К. АКУЛИНА, Определение плотности плазмы в металлической установке путем возбуждения СВЧ колебаний с высокими модами	89
F. KÜNSTLER, Determination of the electron density of argon and helium low pressure plasmas from the Faraday effect in the microwave region	93
H. SCHILLING, Investigation concerning diagnosis of a homogeneous isotropic plasma by shift of totally reflected linear or elliptically polarized beams of electromagnetic radiation	97
E. YAHAGI, Some advanced techniques for the measurement of microwave phase-shift	101
M. VADNJAL and A. BUFFA, Microwave reflectometer for plasma diagnostics	105
R. D. STEWART and P. N. ROBSON, A microwave surface wave probe for measuring electron densities in a gaseous plasma	109
M. FISCHER, Exact density profiles from microwave measurements	114
YU. N. DNESTROVSKY and D. P. KOSTOMAROV, Sounding of plasma by electromagnetic waves	116
P. E. FAUGERAS, Diffraction d'une onde électromagnétique par un cylindre de plasma inhomogène	119
A. R. JONES and E. R. WOODING, Angular distribution of radiation scattered coherently by a plasma cylinder	122
R. I. PRIMICH, D. H. AUSTON, R. A. HAYAMI, J. D. McLEOD and S. ZIVANOVIC, Two new techniques for determination of transient plasma properties	126
D. J. H. WORT, Microwave diagnostics in turbulent plasma	130
Б. М. БОЛОТОВСКИЙ и С. Н. СТОЛЯРОВ, О возможностях диагностики движущейся плазмы с по- мощью электромагнитного излучения и быстрых заряженных частиц	133

H. PRINZLER, Microwave noise from electron-avalanches and its relation to the mechanism of cold-cathode-arcs	140
B. A. ANIČIN, Very high frequency resonances of the mercury vapour arc	143
A. M. MESSIAEN et P. E. VANDENPLAS, Un nouveau moyen de diagnostic pour les plasmas: la sonde à resonance bifilaire dielectrique	147
F. DUBUS, Le condensateur à plasma en basse fréquence: mise en évidence d'un effet Maxwell-Wagner	151
E. A. BAKULIN, E. V. STEPIN and V. V. SHCHERBININA, Investigation of double electric layer in a plasma	155
D. D. BURGESS and J. COOPER, A method of measuring electron temperatures using the Stark effect	158
H. SCHLÜTER, C. AVILA and J. DURHAM, Studies in the quasi-static regime of Stark broadening of electrons	160
J. M. BRIDGES and W. L. WIESE, Comparison of the Stark widths of the Balmer Lines H_{β} and H_{α}	165
C. R. VIDAL, Stark broadening of the Paschen lines	168
R. F. DE VRIES, Unfolding Stark and Doppler profiles to obtain electron densities and ion temperatures	173
И. М. ПОДГОРНЫЙ и Г. В. ШОЛИН, Измерение электронной температуры плазмы низкой концентрации по относительной интенсивности спектральных линий	178
L. B. BEIJER, The temperature determination in high pressure mercury and metal-iodide gas discharges by measurement of the intensity of copper lines	182
A. Н. ЗАЙДЕЛЬ, Некоторые вопросы спектральной диагностики плазмы	185
H. NIEWODNICZANSKI, K. MELZACKI, J. PIETRUSZKA and J. PILAWA, A photoelectric double-beam spectrometer	187
R. C. ELTON, E. HINTZ and M. SWARTZ, Vacuum ultraviolet and soft X-ray spectroscopic measurements in a magnetic compression experiment	190
E. GLOCK, A monochromator of great flexibility for laser light scattered by high temperature plasmas	194
D. E. EVANS, M. J. FORREST, G. I. KACHEN, J. KATZENSTEIN and J. A. REYNOLDS, The co-operative scattering of laser light in a thetatron plasma: a progress report	196
D. J. BRADLEY, G. MAGYAR and M. C. RICHARDSON, Resonance scattering due to laser light mixing in a plasma	199
A. N. DELLIS, W. H. F. EARL, A. MALEIN and S. WARD, Far infrared Faraday rotation in a plasma	202
A. A. DOUGAL, R. F. GRIBBLE, J. P. CRAIG and O. M. FRIEDRICH, Infrared maser coupled resonator and Faraday rotation techniques for experimental ionized gas diagnostics	205
E. B. HOOPER and G. BEKEFI, Electron density measurements with a laser interferometer	209
T. CONSOLI, C. GORMEZANO et L. SLAMA, Mesure des caracteristiques d'un plasma très dense	213
W. M. DEUCHARS, D. E. KIDD, J. IRVING and A. C. C. WARNOCK, Time-dependent electron density measurements in a fast theta pinch discharge	218
W. B. JOHNSON, A. B. LARSEN and T. P. SOSNOWSKI, Two wavelength laser interferometer for plasma diagnostics	220
A. J. ALCOCK, E. PANARELLA and S. A. RAMSDEN, An interferometric study of laser induced breakdown in air	224
K. H. DIPPEL, Line densities, loss rates and density profiles of a high density plasma column obtained by side-on interferometry	228
W. OTT, Potential distribution near the surface of a cesium plasma emitter and of probes	232
B. V. GALAKTIONOV and K. A. PODUSHNIKOVA, Investigation of the energy distribution of charged particles in a plasma by means of a three-grid electrostatic analyzer	237
J. FRANZEN and K. D. SCHUY, Mass spectroscopic plasma diagnostics	242
J. Y. WADA and H. HEIL, Observation of ion energy spectra in the positive column	247
B. ČOBIĆ, P. CIBIN and D. TOŠIĆ, Mass and energy spectra of the ions emitted from the inhibited magnetron gas discharge	251
H. HARTNAGEL, A new mass spectrometer for the analysis of plasma densities	256
R. L. HICKOK, F. C. JOBES and J. F. MARSHALL, Determination of deuterium density profile in a deuterium plasma using an energetic D^+ beam	259
W. ULMER, Measurement of density and temperature of a plasma jet by means of an automatic recording schlieren method	263
K. SELIGER and A. HERMEL, Schall-störungen in einer quasi-stationären Impulsentladung	266
M. S. GAUTAM, F. L. CURZON and A. R. L. SPRAY, Pressure probe measurements on spark channels	270
K. S. GOVOVANIVSKY and V. A. POGOSIAN, On the theory of relaxation method of the diagnostics of weakly ionized non-homogeneous plasma	272
A. К. МУСИН, Процессы установления и распределения электрических полей и токов в движущейся плазме при наличии эмиссии электронов	278
C. RENAUD, Detection et analyse entre 0,5 keV particules neutres émises par un plasma	283

Ion and Plasma Sources
