

CONTENTS

PREFACE	III
ORGANIZING COMMITTEE.....	IV
1. COLLISION PROCESSES IN SWARMS	
1.1. Recombination	
1.1.1 Helium Recombination in the Afterglow of a Positive Column	1
F. Robben and J. Stevefelt	
1.1.2 Helium Recombination in a Steady State High Density Plasma	2
J. Braun and E. Larsson	
1.1.3 Electron Density in Argon Plasma.....	3
D. Zickert and H. Schneider	
1.1.4 E-I Recombination in a Hydrogen Plasma	4
M.R. Barrault and P. Hughes	
1.1.5 The Variation of Dissociative Recombination Coefficients with Temperature...	5
J.N. Fox and R.M. Hobson	
1.1.6 Recombination in Helium Plasmas at Cryogenic Temperatures	6
J.P. Kaplafka and L. Goldstein	
1.1.7 Partition of Recombination Energy in the Decaying Rare Gas Plasmas	7
C.J. Chen	
1.1.8 Electron-Ion Recombination in a Dense Neutral Helium Plasma.....	8
R. Deloche	
1.1.9 Some Problems of the Theory of Ionization Processes in Low Temperature Plasma Streams	9
Yu.S. Sayasov	
1.2 Mobility, Diffusion and Reactions	
1.2.1 Motion of Ions in Their Own Gas in a Constant Electric Field.....	10
B.M. Smirnov	
1.2.2 Transport Properties of Doubly Charged Ions in Their Parent Gases	11
S.S. Pesić and R.K. Janev	
1.2.3 Mobilities of Mass-Identified H_1^+ and H_3^+ Ions in Hydrogen	12
D.L. Albritton, T.M. Miller, J.T. Moseley, D.W. Martin and E.W. McDaniel	
1.2.4 Drift Velocities of Positive Potassium Ions in Nitrogen and Hydrogen	13
I.A. Fleming and J.A. Rees	
1.2.5 The Determination of Townsends Energy Ratio (k_1) for Positive Potassium Ions in Hydrogen and Nitrogen	14
R.J. Tunnicliffe and J.A. Rees	
1.2.6 Study of the Decay of Helium Metastable Atoms in Afterglow.....	15
N. Sadeghi and J.C. Pebay-Peyroula	
1.2.7 Comparison of Drift and Afterglow Studies of Aeronomical Ion Atom Interchange Processes	16
D.K. Bohme, M.M. Makshbandi, P.P. Ong and J.B. Hasted	
1.2.8 Angle and Energy Distributions in the Reaction $N_2^+ + D_2 \rightarrow N_2D^+ + D$	17
C.F. Giese	
1.3. Electron Collisions and Attachment — Detachment	
1.3.1 Mean Free Path and Relaxation Length of Fast Primary Electrons in a Hg Low Pressure Plasma with Addition of Ar and Xe.....	18
H. Drost, H. Behlke and H. Stieglitz	
1.3.2 Non-Equilibrium Effects in a Townsend Discharge.....	19
R.W. Lake Thomas and W.R. Lake Thomas	
1.3.3 Radiative Attachment Coefficient of the Electrons to the $^2S_{1/2}$ Atoms.....	20
R.K. Janev and E.S. Danilović	

1.3.4	Dissociative Attachment of the Electrons to the O ₂ Molecules and Temperature Dependence of the Cross-Section	21
	R.K. Janev and S.A. Porzhetsky	
1.3.5	Comparison of Ionization and Electron Attachment Coefficients with Electron Impact Cross-Sections in O ₂ , CO and CO ₂	22
	M.V. Kurepa	
1.3.6	Measurement of Ionization and Attachment Coefficients in Carbon Dioxide ...	23
	V.J. Conti and A.W. Williams	
1.3.7	Growth of Ionization Currents in the Methyl Halides	24
	C.C. Goodyear and S. Razzak	
1.4.	Ionization and Dissociation	
1.4.1	The Mechanism of Ionization and Population of Atom's Energy Level in Cesium and Sodium Plasma Discharges at Low Pressures	25
	L.M. Volkova, A.M. Devyatov, T.N. Solov'ev and I.A. Kanavets	
1.4.2	Multiphoton Ionization of Hydrogenic Atoms in Ground State	26
	Y. Gontier and A. von Engel	
1.4.3	Associative Ionization in Hg Vapour	27
	K.L. Tan and A. von Engel	
1.4.4	Determining Townsends α in Neon by Measuring Excitation	28
	F.J. de Hoog	

2. SURFACE PHENOMENA

2.1.	Secondary Particles (Ions and Neutrals)	
2.1.1	Secondary Ion Emission from Metals Under Slow Ion Bombardment	29
	U.A. Arifov, D.D. Gruich, Kh.M. Hamidova	
2.1.2	Mass and Energy Analysis of Positive Ions Emitted from Cobalt Targets Bombarded by High Energy Ar ⁺ Ions	30
	Z. Jurela and B. Perović	
2.1.3	Energy Distribution of Neutral Particles Sputtered by Low Energy Ion Bombardment	31
	H. Oechsner	
2.1.4	Direction and Energy Distribution of Secondary Charged Particles Ejected by Ion Bombardment of Single Crystal	32
	V.E. Yurasova, V.M. Buchanov and N.N. Rimskiy	
2.1.5	The Channeling Phenomenon and Single Crystal Sputtering	33
	D. Onderdelingen and J. Kistemaker	
2.1.6	The Importance of Focusing Collisions in Sputtering	34
	R. von Jan and R.S. Nelson	
2.1.7	Temperature - Dependence of (110) Sputtering from Gold Single Crystals	35
	F. Schulz and R. Sizmann	
2.2	Secondary Particles (Electrons)	
2.2.1	Secondary Emission Characteristics of Tantalum Carbide	36
	S. Thomas and E.B. Pattinson	
2.2.2	Some Measurements of Electron Energy Distribution for Potential and Kinetic Ion-Electron Emission	37
	F. Catoni and R. Gislón	
2.2.3	Secondary Emission of Alkali - Halide Single Crystals Covered by Thin Metal Films	38
	I.A. Abroyan	
2.2.4	The Study of Secondary Ion and Electron Emission from Metals in Applying Thin Films on Their Surfaces	39
	J.A. Tashkhanova, U.A. Arifov and A.Kh. Ayukhanov	
2.2.5	The Electron Emission of Dielectrics Caused by Bombardment with Slow Positive Ions of Noble Gases	40
	A.I. Kondrashew and N.N. Petrov	

2.3.	Sputtering and Radiation Damage	
2.3.1	The Deformation of Solid Surface Under the Influence of Ion Bombardment in keV-Energy Range	41
	Koshkin V.K., J.A. Ryzhov, I.I. Shkarban and B.M. Kalmykov	
2.3.2	On the New Method of Studying Defects Annealing in Crystals	42
	E.S. Mashkova and V.A. Molchanov	
2.3.3	Changes in the Electrical Resistance of Gold Thin Films Due to Ion Bombardment	43
	B. Navinsek and G. Carter	
2.3.4.	Penetration of Medium Energy Ions into Metals	44
	V.N. Lepeshinskaya and E.M. Zarutskiy	
2.3.5	Observation of a Typical Figure on a Hemispherical Single Crystal Submitted to an A ⁺ Ion Bombardment	45
	A.Art, L. Francken and O. Goche	
2.3.6	Anisotropical Sputtering of a Hemispherical Silver Single Crystal.....	46
	L. Francken and E. Bonnyns	
2.4.	Scattering and Quantum Effects	
2.4.1	Influence of Multiple Scattering and the Thermal Vibrations upon the Reflection of Ions from Single Crystal Surface.....	47
	E.S. Parilis, N.Yu. Turaev and V.M. Kivilis	
2.4.2	Some Peculiarities of Angular and Energy Distribution of Ions Scattered by Monocrystal Surface.....	48
	U.A. Arifov and A.A. Aliev	
2.4.3	Effect of Thermal Oscillations of a Target Crystalline Lattice on the Inert Gas Fast Ion Scattering.....	49
	V.M. Chicherov	
2.4.4.	Reflection of Oblique Incident Ions from a Single Crystal	50
	V.E. Yurasova, V.I. Shulga and D.S. Karpuzov	
2.4.5	Influence of Nearest Neighbouring Atoms on Argon Ions scattered by Large-Angle Collisions in a Gold Surface	51
	P. Dahl and N. Sandager	
2.4.6	Scattering of 40 keV Ions on Polycrystalline Surfaces	52
	E. Formann, F.P. Viehböck and H. Wotke	
2.4.7	Scattering of Slow Hydrogen and Deuterium Ions in a Thin Silver Foil	53
	Yu. V. Gott and V.G. Telkoskii	
2.4.8	De-Excitation and Neutralization of Excited and Charged Particles near a Metal Surface.....	54
	W.F. v.d. Weg, D.J. Bierman and J. Kistemaker	
2.4.9	Experimental Detection of Transition Radiation in the Far Ultraviolet Region	55
	F.W. Saris, H. Roukens and J. Kistemaker	
2.4.10	Analysis of the Light Emitted from the Al Target Bombarded with High-Energy Ions.....	56
	I. Terzić and B. Perović	
2.5.	Laser Induced Emission	
2.5.1	Acceleration of Microscopic Particles by Laser-Induced Plasma Emission.....	57
	R.W. Waniek and P.J. Jarmuz	
2.5.2	Observation of Laser Induced Shocks Near the Surface of a Carbon Target....	58
	D.C. Emmony and J. Irving	
2.5.3	Laser Induced Emission of Ions from Clean Surfaces.....	59
	S. Mamba and P.H. Kim	
2.5.4	Pulsed Neutron Source Using a Laser	60
	Jl. Bobin, P. Langer and M. Rabeau	
2.6	Gas Release Phenomena	
2.6.1	Derivation of an Adsorption Isotherm for Cesium on Metals.....	61
	E. Muz and W. Kluge	

2.6.2	The Spontaneous Sorption of Rare Gases at the Surface of Solids in the Arc Spot of a Gas Discharge	62
	M.J. Schönhuber	
2.6.3	Studies of the Nitrogen Afterglow	63
	R.E. Lund and H.J. Oskam	
2.6.4	The Interaction of Water Vapours with Tungsten	64
	Yu.K. Ustinov and N.I. Ionov	
2.6.5	Gas Release Experiments with Copper Single Crystals	65
	T. Jokić and B. Perović	
2.6.6	Low Energy Electron Reflection from Molybdenum Surface	66
	D.A. Degras and J. Lecante	
2.7	Work Function and Field Emission	
2.7.1	A Study of Basic Dependences of the Work Functions of Metals in Inert Gases	67
	R.A. Milovanova and F.N. Chistyakov	
2.7.2	The Plasma-Metal Contact — Energy Spectrum of the Emitted Secondary Electrons	68
	N.K. Martinov and G.Z. Stainov	
2.7.3	Thermionic Properties of Polycrystalline Platinum and Iridium Emitters	69
	A.Ya. Tontegode and E.Ya. Zandberg	
2.7.4	The Pre-Breakdown Current in Vacuum: Nature of the Emission Sites and the Total Voltage Effect	70
	B. Jüttner, H. Wolff and P. Pech	
2.7.5	Normal Cathode Fall in Neon and Work Function of Pure and Gas-Covered Molybdenum Surfaces	71
	P. Pech and B. Jüttner	

3. ELECTRICAL DISCHARGES

3.1. LOW PRESSURE DISCHARGES

3.1.1	Breakdown and Pulsed Discharges	
3.1.1.1	Experimental Tests of Some Theories of the Electrical Breakdown in Vacuum	72
	M. Samuelli, Ch. Maisonnier, C. Gurlan and C. Rabour	
3.1.1.2	Point-To-Plane Spark Breakdown Mechanisms Between 4 and 200 Torr	73
	L.B. Loeb	
3.1.1.3	Recovery in Hydrogen Thyratrons: The Prevention of Forward Breakdown Following Passage of Current	74
	J. Gowar	
3.1.1.4	Temporal Growth Constants of Ionisation Currents in Neon	75
	B.A. Willis and C. Grey Morgan	
3.1.1.5	Secondary Ionization Processes in Deuterium	76
	M.H. Davies, C. Grey Morgan and W.D. Powell	
3.1.1.6	High Voltage of Arcing in Violently Rarefied Gases	77
	B.N. Klarfeld and A.S. Pokrovskaya-Soboleva	
3.1.1.7	An Investigation of Pulsed Capillary Discharges in Argon Atmosphere	78
	A.P. Petkov and T. Vörös	
3.1.1.8	High-Power Xenon — "Impurities" Pulsed Discharge	79
	L.V. Babin, B.V. Skvortzov and N.N. Shvindt	
3.1.1.9	Charge per Pulse in a Neon-Brom Mixture in the Single Pulse Range	80
	V. Henc-Bartolić	
3.1.2	Glow Discharges (Cathode and Negative Glow)	
3.1.2.1	Some Dependence of Normal Cathode Fall in Inert Gases	81
	P.N. Chistyakov	

3.1.2.2	On the Emission Dependence of the Cathode Fall.....	82
	J. Bitó	
3.1.2.3	The Emission Dependence of the Length of the Cathode Space and of the Positive Column.....	83
	E. Winter and J. Bitó	
3.1.2.4	On the Glow Discharge Space and Critical Distance.....	84
	A.E. Eisenzon and N.G. Kashnikov	
3.1.2.5	Interaction Between the Regions of Cathode Potential Drop and Negative Glow in the Glow Discharge	85
	L.G. Guseva, B.N. Klarfeld and V.V. Vlasov	
3.1.2.6	The Influence of UHF Field on the Negative Glow Plasma Parameters of the Glow Discharge in Helium.....	86
	G.S. Solntzev, A.I. Orlov, N.Z. Gerasimov and P.S. Bulkin	
3.1.2.7	Probe Measurements and Electron Groups in the Negative Glow of Anomalous Glow Discharges	87
	W. Stern	
3.1.2.8	Photoeffect from the Glow Discharge Cathode in Kr and Xe	88
	B.N. Klyarfeld and B.I. Moskaljov	
3.1.3	Arcs (Cathode and Sheath Phenomena)	
3.1.3.1	Arc Initiation at Metal Surfaces.....	89
	O. Lloyd and C.F. Gozna	
3.1.3.2	Current Density of Electron Emission from Thin Mercury Films.....	90
	J. Mitterauer	
3.1.3.3	Influence of Electrostatic Forces on the Behaviour of the Low Pressure Arc Cathode Spot	91
	L.A. Sena	
3.1.3.4	Retrograde Cathode Spot Behaviour in Low Density Arcs	92
	S.F. Giannotta	
3.1.3.5	Extinction of a Cathode Spot by Positive Ion Shunting	93
	F.R. Harrison and M.B.C. Quigley	
3.1.3.6	The Investigation of the Vacuum Arc on Separating Electrodes	94
	I.A. Lukatskaya and S.M. Celikatova	
3.1.3.7	Rate of Growth of Sheaths from an Electrode in a Decaying Plasma Due to an Increasingly Negative High Potential.....	95
	R.W. Young and J.H. Holliday	
3.1.4	Hollow Cathodes	
3.1.4.1	The Investigation of the Hollow Cathode Discharge in Helium.....	96
	V.S. Borodin and Iu. M. Kagan	
3.1.4.2	Low-Pressure Hollow Cathode Arc Discharge Behaviour in a Magnetic Field..	97
	H. Minoo and A.R. Trindade	
3.1.4.3	Measurement of the Plasma Efficiency Coefficient (δ) of the Ultrahigh Density Glow Discharge with a Hollow Cathode.....	98
	L.J. Abramovich, B.N. Klarfeld and Y.M. Nastich	
3.1.4.4	On the Amplification of the Intensity of Discharge Current and Radiation in Hollow Cathode Discharges in Magnetic Field	99
	E. Badareu, C. Popovici and M. Somesan	
3.1.4.5	Concentrations of Au Atoms in Hollow Cathode Discharge by Resonance Line Absorption	100
	W.C. Kreye	
3.1.4.6	Contribution to the Study of a Low Temperature Arc Discharge	101
	R.M. Creuse	
3.1.5	Positive Columns I	
3.1.5.1	The Ionizing Processes in D.C. Discharges in the Rare Gases	102
	P. Mitchell and N.D. Twiddy	
3.1.5.2	Ionization Mechanism in the Positive Column of Low Pressure Discharges in Helium.....	103
	R. Mewe	

3.1.5.3	The Positive Column of Helium Discharges by Middle Pressures	104
	Ju. b. Golubovsky, Ju.M. Kagan and R.I. Ljagushchenko	
3.1.5.4	Diffuse Positive Columns in Rare Gas Medium Pressure Discharges	105
	A. Rutscher and S. Pfau	
3.1.5.5	Diffuse Positive Columns in Rare Gas Medium Pressure Discharges	106
	S. Pfau and A. Rutscher	
3.1.5.6	Optical and Electrical Characteristics of the Positive Column of Discharges in Mixtures of Mercury and Inert Gases.....	107
	Ju.M. Kagan and B. Kasmalijev	
3.1.5.7	The Electron Energy in the Striated Positive Column in Neon	108
	J.G.A. Hölscher	
3.1.5.8	The Langmuir Paradox.....	109
	S.W. Rayment and N.D. Twiddy	
3.1.5.9	The Hall Coefficient of a Positive Column.....	110
	J.R. Forrest and R.N. Franklin	
3.1.5.10	Population Densities of Helium and Argon Atoms in a Non-LTE Plasma.....	111
	S. Kelm	
3.1.5.11	Distribution Functions of Electrons in a Low Current Xenon Discharge	112
	K. Wiesemann	
3.1.6	Positive Columns II	
3.1.6.1	Measurements in the Positive Column of Argon-Caesium and Neon-Caesium Discharges.....	113
	J.H. Waszink and J.B. van Laren	
3.1.6.2	Electron Temperature Modulation in Helium Positive Column.....	114
	P. Davy	
3.1.6.3	Electron Temperature Measurements in a Low-Pressure Positive Column Under the Influence of a Uniform Magnetic Field.....	115
	J.R. Forrest and R.N. Franklin	
3.1.6.4	Experimental Demonstration of Magnetically Induced Arc Starvation.....	116
	D.T. Tuma and A.A. Ware	
3.1.6.5	Radial Distributions of Excited Atoms in a Hydrogen Discharge.....	117
	S.J.D. Hay and G.S. Higginson	
3.1.6.6	Column Recovery of Wall Stabilised D.C. Arcs in Argon	118
	K.R. Hearne and M. Rasul	
3.1.6.7	Ionization Equilibrium and Effective Resistance of Short Arc Plasma.....	119
	F.K. Kosyrev, N.P. Kosyeva, E.I. Lunev and A.F. Nastoyashchy	
3.1.6.8	Investigation of Non-Equilibrium Ionisation in a Short Arc.....	120
	Yu. Byrdin and A.F. Nastoyashchy	
3.1.7	Glow Discharges (Anomalous Effects)	
3.1.7.1	The Temporal Current Growth into the Anomalous Glow Discharge.....	121
	H. Schlumbohm	
3.1.7.2	Observation of Anomalous Ion Cooling in a Collisionless Discharge	122
	H. Heil and B.W. Scott	
3.1.7.3	Temperature Effects in Glow Discharge Reference Tubes.....	123
	F.A. Benson and D.J. Mellor	
3.1.7.4	The Behavior of Anode Fall in the Glow Discharge of Some Rare Gases.....	124
	G. Schaal	
3.1.7.5	A Pulsed Glow Discharge with Coplanar Electrodes.....	125
	G.E. Stewart and A.W. Cooper	
3.1.7.6	Properties of Bright Sphere in Low-Voltage Glow	126
	N.V. Volkov, Yu.K. Gus'kov, A.I. Kiruschenko, M.A. Lebedev, V.P. Paschenko and I.N. Privalov	
3.1.7.7	Sound Production in Glow Discharges.....	127
	K.J. Nygaard and G. Meltz	
3.1.8	Moving Striations and Constrictions	
3.1.8.1	Stationary and Moving Striations in Noble Gas Diffusion Columns as an Eigen Value Problem.....	128
	B. Saggau	

3.1.8.2	Current-Dependence of Dispersion Relations of Moving Striations	129
	H. Yoshimoto and Y. Yamashita	
3.1.8.3	Experimental Observations of Striations in Initiation of Discharges in Air.....	130
	A. Goldman and M. Goldman	
3.1.8.4	Influence of Running Striations Upon Electron Velocities Distribution	131
	E.P. Ostaptchenko, O.N. Oreshak, L.I. Kiseleva and V.A. Stepanov	
3.1.8.5	Focussed Beam Electron Density Measurements of Moving Striations in a Large Diameter Discharge Tube	132
	R.A. Bolton and G.C. Cloutier	
3.1.8.6	Acoustic Generation of Moving Striations in Neon	133
	J.L. Crandall and A.W. Cooper	
3.1.8.7	The "Micro-Characteristics" of Discharge Caused by Acoustic Wave	134
	S. Subertová, L. Aubrecht and J. Kracik	
3.1.8.8	Neutral Particle Density Modulation in the Positive Column of a Mercury Discharge	135
	J.R. Riley and D.S. Hall	
3.1.8.9	The Positive Column Contraction	136
	V.Yu. Baranov and K.N. Ulyanov	
3.1.8.10	Probe Measurements in the Constricted Positive Column of Iodine.....	137
	G.A. Woolsey, K.G. Emeleus, E.W. Gray and J.R.M. Coulter	
3.1.8.11	High Current Discharge in Hydrogen.....	138
	S.G. Alikhanov, E.L. Boyarintsev, I.K. Konkashbaev and V.A. Kornilov	
3.1.9	Instabilities and Volume Effects	
3.1.9.1	Volume Forces in Plasmas.....	139
	C.C. Leiby, Jr. and H.J. Oskam	
3.1.9.2	Cathodic Surface-Instabilities in a Plasma.....	140
	P.H. Handel	
3.1.9.3	Collisionless Instability of a Hot Cathode Gas Discharge in a Longitudinal Magnetic Field	141
	M.V. Nezlin	
3.1.9.4	A Theory of Arc-Starvation.....	142
	J.E. Faulkner, A.A. Ware and W.L. Woodie	
3.1.9.5	Positive Discharge Column in Forced Convection Flow.....	143
	V.Yu. Baranov	
3.1.9.6	Discrete-Frequency Oscillations in Vacuum Arc Generated Plasmas.....	144
	P. Boeschoten, L.J. Demeter and C.B. Kretschmer	
3.1.9.7	Oscillation and Impedance of a Cesium Discharge	145
	J.B. Moreau	
3.1.9.8	Impedance and Noise Characteristics of Corona Discharges.....	146
	K. Barker and F.A. Benson	
3.1.10	Low Pressure Discharge Parameters	
3.1.10.1	Determination of Population Densities of Excited States in Iron Low Pressure Arcs of Low Current	147
	K.H. Krysmanski	
3.1.10.2	Metastable Neon Atoms in a Neon-Argon Discharge.....	148
	J. Freudenthal and J.M. Fluit	
3.1.10.3	On the Cesium-Noble Gas Filled Plasma Diode.....	149
	G. Musa, D. Popescu and A. Baltog	
3.1.10.4	Optical Determination of Cs Ground State Depletion in Cs-Ar Low Pressure Discharges.....	150
	R. Bleekrode	
3.1.10.5	Anaphoretically Induced Gas Flows in Helium DC Discharges	151
	C.C. Leiby Jr. and C.W. Rogers	
3.1.10.6	Changes of Plasma Parameters of a Hg Low-Pressure Discharge by Addition of Cyclohexane and Benzene	152
	H. Drost, H. Behlke and H. Stieglitz	

3.1.11	Discharges in Different Field Configurations	
3.1.11.1	The Ring Discharge Environment for Total Radiation Intensity and Thermal Conductivity Measurements.....	153
	A.D. Stokes	
3.1.11.2	Investigation of the Stable Positive Column in a Toroidal Magnetic Field.....	154
	F. Karger	
3.1.11.3	Measurement of the Electron Drift Velocity in a Toroidal Discharge.....	155
	H. Beerwald	
3.1.11.4	An Experimental Investigation of the Waves of Ionization in the Low-Temperature Plasma.....	156
	A.F. Vitshas and V.S. Golubev	
3.1.11.5	Experimental Study of a Current Sheet.....	157
	M. Alidières, R. Aymar, P. Jourdan, F. Koechlin and A. Samain	
3.1.11.6	Excitation by Revolving Magnetic Fields.....	158
	M.L. Pool, J.W. Snyder, P.E. Weiler and P. Polishuk	
3.1.11.7	Theoretical and Numerical Analysis of Physical Processes in a Stationary High Current Gas Discharge Between the Coaxial Electrodes	159
	A.I. Morozov, K.V. Brushlinski, N.I. Gerlach and A.P. Shubin	
3.1.11.8	Investigation of Electron Temperature and Plasma Radiation in a Quasi-Stationary High-Current Discharge Between Coaxial Electrodes.....	160
	V.A. Abramov, A.K. Vinogradova, Yu.P. Dontsov, Yu.A. Zavenyagin, P.E. Kovrov, V.I. Kogan and A.I. Morozov	
3.1.11.9	Experimental Study of Current and Potential Distributions Between Coaxial Electrodes in a Quasi-Steady-State High Current Gas Discharge.....	161
	A.Ya. Kislov, P.E. Kovrov, A.I. Morozov, G.N. Tilinin, L.G. Tokarev, G.Ya. Schepkin, A.K. Vinogradova and Yu.P. Donsov	
3.1.11.10	The Experimental Study of the Low Pressure Discharge in the Coaxial Plasma Gun.....	162
	A.A. Kalmykov, A.D. Timofeev, B.A. Shevchuk and V.I. Arzebashev	
3.1.11.11	An Experiment in Stochastic Heating	163
	S. Puri, D.A. Dunn and K.I. Thomassen	
3.1.11.12	Time Variation of the Temperature and Density in a Cusp Confined Non Cylindrical Z Discharge.....	164
	J.P. Baconnet, A. Bernard, G. Cesari and J.P. Watteau	
3.1.12	High Frequency Discharges	
3.1.12.1	On the Mechanism of the Direct Current in High Frequency (H.F.) Discharges.....	165
	A.F. Alexandrov, A.V. El Sammani, V.A. Godiak and A.A. Kuzovnikov	
3.1.12.2	Admittance of Low-Pressure High-Frequency Discharges	166
	A.J. Hatch, R.J. Freiberg, S.V. Paranjape and B.A. Tryba-Wolterbeeko	
3.1.12.3	Slab-Model Theory of Admittance of High-Frequency Plasmoids.....	167
	M. Hasan and A.J. Hatch	
3.1.12.4	Energy Distribution of the Electrons of a High-Frequency Discharge.....	168
	A. Airollo, Crescentini, P. Caldirola, C. Maroli and E. Sindoni	
3.1.12.5	Electron Temperature in a High Frequency Ring Discharge	169
	K. Chandrakar and S.M. Deval	
3.1.12.6	Effect of the Magnetic Field on the Unstable, Molecular Negative Hydrogen Ions Within a High Frequency Electric Field.....	170
	Th.V. Ionescu and M. Comanescu	
3.1.12.7	Conditions for Existence of Plasma Created by Microwave Radiation in the Magnetic Field.....	171
	V.N. Budnikov, N.I. Vinogradov and A.A. Obukhov	
3.1.12.8	Formation of Dense Plasma by Microwave Radiation at the Electron Cyclotron Resonance.....	172
	A.I. Anisimov, N.I. Vinogradov, V.E. Golant, S.I. Nanobashvili and L.P. Pakhomov	
3.1.12.9	The Electron Energy Characteristic in Plasma Created by MWP under the Electron Cyclotron Resonance	173
	V.N. Budnikov, B.V. Galaktionov, V.V. Djatchenko, K.M. Novik and A.A. Obukhov	

3.1.12.10	Q-Machine Plasma in a Longitudinal High-Frequency Electrical Field..... R.A. Demirkhanov, G.L. Khorasanov, I.K. Sidorova and G.I. Zverev	174
3.1.13	Crossed Field	
3.1.13.1	A Theory of the Low-Pressure Positive Column in a Transverse Magnetic Field..... B.A. Anicin	175
3.1.13.2	Ionization and Current Growth in an $E \times B$ Discharge..... E.P. Barbican, C.E. Rasmussen and J. Kistemaker	176
3.1.13.3	Formative Time of Crossed-Field Breakdown..... W.B. Kunkel and A.R. Sherwood	177
3.1.13.4	On Some Peculiarities in Electric Discharge Development in Hydrogen Across Magnetic Field..... A.N. Babenko, E.P. Kruglyakov, V.V. Kuznetsov and V.M. Fedorov	178
3.1.13.5	The Rotation of Glow Discharge Channel in the Coaxial System with Transverse Magnetic Field E.M. Drobishevsky, S.I. Rosov and A.M. Studenkov	179
3.1.13.6	The Helical Instability of the Positive Column in Crossed Fields and in Annular Plasma Configurations E.H. Holt and J.F. Reynolds	180
3.1.14	Magnetron and PIG Discharges	
3.1.14.1	Electrical Characteristics of a Cold Cathode Magnetron Discharge at Low Pressure W. Schuurman	181
3.1.14.2	Ion Currents in Hot Cathode Crossed Field Discharges M. Bacal	182
3.1.14.3	Low-Pressure Gas Discharge in the Magnetron Diode D. Tosić and V. Miljević	183
3.1.14.4	Magnetic Field Dependence of the Gas Ionization in a Magnetron Diode..... P. Cibiñ and B. Cobić	184
3.1.14.5	Influence of Magnetic Field on Ionization of N_2 in $E \times B$ Gas Discharge P. Cibiñ and B. Cobić	185
3.1.14.6	Resistance Instability of Low-Pressure Gas Discharge in Magnetic Field..... A. Raev, I. Iliev and N. Nikolov	186
3.1.14.7	Dependence of the Current on the Parameters in Discharge with Oscillating Electrons in a Magnetic Field..... E.M. Reichrudel, G.V. Smirnitskaya and Nguyen-Khiu-Tee	187
3.1.14.8	Resistive Drift Instability in a Cold Cathode Penning-Type Discharge..... L.V. Brezechko, Yu.K. Kuznetsov and O.S. Pavlichenko	188
3.1.14.9	Investigation of Turbulent Oscillations in PIG-Type Discharge Plasma A.B. Berezin, D.G. Bulyginsky, M.I. Vildjunas and V.A. Rodichkin	189
3.1.14.10	Rotational Instability and Cyclotron Harmonic Radiation of a Cold Cathode Reflex Discharge F. Klan	190

2. HIGH PRESSURE DISCHARGES

3.2.1	Sparks (Pre-breakdown and Breakdown)	
3.2.1.1	Impulse Corona and Leader Stroke in Dry and H_2O Contaminated Argon E. Kuffel and M.M. Bera	191
3.2.1.2	The Preionization to Spark Transition in a Positive Point to Plane Discharge in Air at Atmosphere Pressure Investigated by Means of a High Speed Streak Camera E.G. Marode	192
3.2.1.3	Computer Calculations of Breakdown in Very Long Gaps..... A.L. Ward	193

3.2.1.4	The Propagation of Cathode-Directed Streamers in Asymmetrical Field Configurations.....	194
	E. Nasser	
3.2.1.5	The Shock-Excited Discharges from a Stressed Cathode.....	195
	E. Nasser and C. Manthiram	
3.2.1.6	Influence, on the Spark Formation, of the Initiating Avalanche Electron Distribution	196
	J. Leloup	
3.2.1.7	Influence of Electrode Diameter on Corona and Breakdown in Air	197
	M.J. Mulcahy and Z. Zumich	
3.2.2	Sparks (Breakdown and Growing Phenomena I)	
3.2.2.1	Spectroscopic Measurements of the Temporal Development of the Radial Density and Temperature Distribution in a Spark Channel in Hydrogen	198
	H. Tholl	
3.2.2.2	Investigation of the Townsend Discharge in N ₂ by Fast Electronic Techniques.....	199
	A. Doran	
3.2.2.3	Determination of the Electron Drift Velocity in Hydrogen and Nitrogen at High Pressure.....	200
	R. Grünberg	
3.2.2.4	On the Axial and Radial Development of the Luminous Spark Channel	201
	J. Koppitz	
3.2.2.5	Sparkover Phenomena in Arcton 12	202
	F.M. Bruce, G.C. Crichton and D.J. Tedford	
3.2.2.6	Delayed Emission of Secondary Electrons by Non-Resonance Radiation in Krypton Discharges	203
	R. Bouciqué, W. Bruynooghe and P. Mortier	
3.2.2.7	The Problem of Anomalous Discharge Caused by Irradiating the Highly Stressed Anode.....	204
	Y. Ishiguro	
3.2.2.8	Critical Frequency of Trichel Pulses in Air at Atmospheric Pressure.....	205
	T.N. Giao and J.B. Jordan	
3.2.3	Sparks (Breakdown and Growing Phenomena II)	
3.2.3.1	The Influence of Space Charges on Spark Growth in Rod-Plane Gaps	206
	C.A. Stassinopoulos and J.M. Meek	
3.2.3.2	Space Charge Fields in Positive Point-Plane Discharges in Air.....	207
	E.D. Hamouda and J.M. Meek	
3.2.3.3	The Initiation of Multiple Arc Breakdowns in a 60 kV Low Inductance Spark Gap.....	208
	T.E. James, J.E. Gruber and K.J. Kivlin	
3.2.3.4	Fast Pulse Breakdown of Non-Uniform Field Pressurised Gaps.....	209
	J.E. Gruber and T.E. James	
3.2.3.5	On the Increase of Spark Current During Pulse Breakdown of Air Gaps in Nanosecond Time Range	210
	G.A. Mesjatz, Y.I. Bichkov and A.M. Iskol'dskij	
3.2.3.6	Breakdown in High Pressure Gases Initiated by Microdischarges	211
	G.F. Goldspink and T.J. Lewis	
3.2.3.7	Delayed Recovery of Hydrogen Sparks Between Tungsten Electrodes	212
	F.L. Curzon, N.H. Burnett and M.S. Gautam	
3.2.3.8	Factors Affecting the Initiation of TIG Welding Arcs	213
	F.W. Lunau	
3.2.4	Corona	
3.2.4.1	Some Characteristics of Flare Discharge in Atmospheric Air.....	214
	N.B. Bogdanova and V.I. Popkov	
3.2.4.2	Similarity and its Failure in Corona Discharge.....	215
	V.I. Popkov and S.I. Riabaia	

3.2.4.3	Positive Corona in Hydrogen at a Slight Field Inhomogeneity	216
	V.A. Burmakin	
3.2.4.4	About Development of High-Frequency Bursts	217
	K.F. Kudu, A.V. Berdosev and A.M. Prokofiev	
3.2.4.5	Some Features of Electrical Discharge in Moving Medium	218
	N.S. Lidorenko, A.T. Belevtcev, G.F. Muchnik and I.B. Rubashov	
3.2.5	Arcs (General Properties)	
3.2.5.1	The Behavior of Cylindrical AC Arcs with Thermal Reignition	219
	J. Uhlenbusch and L. Detloff	
3.2.5.2	Radial Convection in the Non-Stationary Arc	220
	R.L. Phillips	
3.2.5.3	The Effect of Thermal Diffusivity on Arc Column Recovery	221
	R. Holmes	
3.2.5.4	Theory for Electric Arcs of Low Power-Gradient	222
	W.T. Lord	
3.2.6	Arcs (Light Sources)	
3.2.6.1	Temperatures in a High-Pressure Mercury Discharge	223
	A.A. Kruithof and J. Riemens	
3.2.6.2	Molecular Radiation from High Pressure Discharges, the Hg-SnI ₂ Arc.....	224
	R.J. Zollweg and L.S. Frost	
3.2.6.3	Study of High-Temperature Gas Considering the Radiation	225
	G.N. Abramovich, V.A. Golubev and V.F. Klimkin	
3.2.6.4	Spectroscopic Research on a Free Burning Argon Arc with Forced Fluid Convection	226
	C.G. Stojanoff	
3.2.6.5	Processes Before the Electrodes of Alternating Current Driven Xenon High Pressure Lamps	227
	U.J. Amlong	
3.2.6.6	High Pressure Discharge in Metal Halide Vapour with High Visual Efficiency	228
	H. Grabner and W. Pilz	
3.2.6.7	Al-Cl-Discharge of High Luminance Efficiency	229
	H. Schirmer and J. Seehawer	
3.2.7	Stabilized Arcs	
3.2.7.1	Experimental Investigation of a Transpiration-Cooled, Constricted Arc.....	230
	E. Pfender, G. Gruber and E.R.G. Eckert	
3.2.7.2	Arc Source for Hydrogen Spectroscopy.....	231
	W.G. Braun	
3.2.7.3	Estimate of Radial Temperature Distribution in the Rotating Plasma Furnace.	232
	B. Grycz	
3.2.7.4	Measurements of the Electrical Conductance in an SF ₆ Cascaded Arc Using "Auxiliary Arc Discharge Probes"	233
	W. Hertz	
3.2.7.5	Boundary Conditions in Wall-Stabilized SF ₆ Arc Columns	234
	D.W. George, P.H. Richards and D.T. Swift-Hook	
3.2.7.6	Preliminary Study of Wall-Stabilised Arcs in SF ₆	235
	P.H. Richards, C.F. Gozna and J.G. Steel	
3.2.8	Torches and Welding Arcs	
3.2.8.1	Electric Field in Electrode Layer of Torch Discharge.....	236
	V. Truneczek	
3.2.8.2	Electron and Gas Temperatures at Various Power Input to the Flame of Torch Discharge.....	237
	M. El Gammal	
3.2.8.3	Electrical Conductivity of the Plasma in an H-Mode R.F. Plasma Torch.....	238
	D.W. Hughes and E.R. Wooding	

3.2.8.4	Voltage-Current Characteristics of a Plasma Arc Torch of Mean Power With an Internal Arc	239
	C. Krolikowski	
3.2.8.5	Time Resolved Measurements on Material Transport and Temperature Distribution in High Current D.C. Arc Between Melting Aluminium Electrodes.....	240
	E.A. Smars and K. Acinger	
3.2.9	High Current Arcs and Pulsed Arcs	
3.2.9.1	Arc Recovery Strength of Gases at High Current	241
	J.D. Cobine and G.A. Farrall	
3.2.9.2	Energy Loss Mechanisms in High Current A.C. Arcs	242
	G.R. Jordan and B. Bowman	
3.2.9.3	The Resistance of an Electrical Discharge of High Energy.....	243
	F. Cabannes and M. Skowronek	
3.2.9.4	Experiment Concerning the Non Equilibrium Ionization in Cs-He Plasmas at Elevated Gas Temperatures and Pressures.....	244
	A. Boschi., N. Merzagora and A. Tamburrano	
3.2.9.5	High Pressure Pulsed Arcs in Argon and Helium	245
	E.S. Borovik, R.V. Mitin, Yu. R. Knyazev, V.I. Petrenko and V.P. Kantsedal	
3.2.10	Arcs and Discharges in Magnetic Fields	
3.2.10.1	Correlation of Experimental Data for Electric Arcs in Transverse Magnetic Fields	246
	V.W. Adams, A.E. Guile, W.T. Lord and K.A. Naylor	
3.2.10.2	Interactions of Free Burning Arcs with Transverse Magnetic Fields and Gas Flows	247
	E. Fischer	
3.2.10.3	Demixing Effect in D.C. Arc Plasma in Inhomogeneous Magnetic Field	248
	D. Vukanović, V. Vukanović and V. Georgijević	
3.2.10.4	Magnetic Field Influence on High-Pressure Electrodeless Discharge Plasma....	249
	R.V. Mitin and K.K. Pryadkin	
3.2.11	Arcs (Miscellaneous)	
3.2.11.1	Experiments on A.C. Modulation of D.C. Arc Columns	250
	H. Fung and H. Edels	
3.2.11.2	Breakdown Mechanism of the Cathode Sheath During the Extinction of the A.C. Moving Arc.....	251
	Z. Tarociński	
3.2.11.3	The Duration of the Abnormal Glow Discharge at Atmospheric Pressure	252
	K. Geide	
3.2.11.4	Impeding Effect of Hot-Cathode High-Pressure Discharges in Weightless State	253
	T.Z. Szélenyi	
3.2.11.5	Flashover of Polluted Insulation.....	254
	S. Zoledziowski	
3.2.11.6	The Propagation of Arcs Over a Water Surface	255
	S. Hesketh	
3.2.11.7	A.D.C. Arc in a Nitrogen-Hydrocarbon Flow Reactor.....	256
	A.M. Howatson and W.S. Wakelin	
3.2.12	Laser and Laser-Induced Discharges	
3.2.12.1	Plasma Properties of the Discharge Used for Ion Argon Lasers.....	257
	V.F. Kitaeva, Yu.I. Osipov, L.Ya. Ostrovskaya and N.N. Sobolev	
3.2.12.2	Change of CO ₂ -Laser Discharge Current with Chopped Laser Action.....	258
	H. Kindl, W. Leeb and G. Schiffner	
3.2.12.3	Stimulated Emission in Pinch-Discharge Plasmas in Ar ⁺ and Ar ⁺⁺	259
	V.M. Likhachev, M.S. Rabinovich and V.M. Sutovskii	
3.2.12.4	Investigation of Primary Breakdown in Focused Laser Beam.....	260
	V.E. Mitsuk, V.A. Chernikov and V.I. Savoskin	

3.2.12.5	Influence of Laser Radiation Focusing on the Air Breakdown.....	261
	N.G. Basov, V.A. Boiko, O.N. Krokhin and G.V. Sklizkov	
3.2.12.6	Breakdown Mechanisms for Laser-Induced Discharges in Super-High Pressure Gases.....	262
	A.A. Dougal and D.H. Gill	
3.2.12.7	Optical Breakdown of Potassium.....	263
	R.C. Klewe and J.E. Rizzo	
3.2.12.8	Diamagnetic Moment of the "Fireball" of the Light Spark in the Laser Focus.	264
	G.A. Askarjan, M.S. Rabinovich, M.M. Savchenko, A.D. Smirnova, V.K. Stepanov and V.B. Studenov	
3.2.12.9	Ionization of Microparticles by Laser Beam.....	265
	T. Consoli, P. Grelot and L. Slama	
3.2.12.10	Multiphoton Ionization of the Noble Gas Atoms.....	266
	T.M. Barhudarova, G.S. Voronov, G.A. Delone, N.B. Delone and N.K. Martakova	

4. PLASMA PHYSICS

4.1. FUNDAMENTAL PLASMA PROPERTIES

4.1.1	Distribution Functions	
4.1.1.1	The Screened Coulomb Electronic Partition Function	267
	C.A. Rouse	
4.1.1.2	Calculation of Electron Distribution Function in Near-Cathode Region of Arc Discharge.....	268
	I.P. Stakhanov	
4.1.1.3	Distribution Function Method in the Theory of Fluctuations in Inhomogeneous Nonstationary Plasmas.....	269
	J. Weinstock	
4.1.1.4	On the General Kinetic Theory of Partially Ionized Plasmas in Time-Dependent Magnetic Fields and Additional Electromagnetic Fields	270
	W. Stiller	
4.1.1.5	Problems of the Statistical Theory of Non-equilibrium Processes in the Partially Ionized Plasma with Inelastic Processes Taken into Account	271
	Y.L. Klimontovich	
4.1.2	Microdeviation and Vlasov-Equation	
4.1.2.1	Theory of Plasma Radiation. Cooperative Effects.....	272
	D.M. Kim, H. Laue and H. Margenau	
4.1.2.2	On the Plasma Microfield and Some Related Effects	273
	V.I. Kogan, V.S. Lisitza, and A.D. Selidovkin	
4.1.2.3	A Convergent Expression for the Free Energy of Partially Ionized Plasmas....	274
	W. Ebeling	
4.1.2.4	Particle Motion in Stochastic Fields	275
	S. Puri	
4.1.2.5	Solution Method of the Vlasovequation with BGK Collision Term and External Electric Field	276
	W. Kolley and G. Vojta	
4.1.2.6	Finite Amplitude Electrostatic Waves	277
	R.W.B. Best	
4.1.2.7	The Application of the Debye Length for High Temperature Measurement.....	278
	A.P. Petkov and T. Vörös	
4.1.2.8	Debye Shielding in Stark Broadening of Isolated Helium I Lines.....	279
	G.K. Oertel	
4.1.3	Equilibrium and Nonequilibrium Effects I	
4.1.3.1	On the Theory of Nonequilibrium Partially Ionized Plasma	280
	L.M. Biberman, I.T. Iabukov and V.S. Vorobyov	

4.1.3.2	Irreversible Thermodynamics of a Non-Equilibrium Ionizing Gas.....	281
	M.G. Haines	
4.1.3.3	The Effect of Radiation and Heat Conduction on the Conditions of the Ionization Instability Development	282
	V.F. Gruzdeva and A.N. Lagar'kov	
4.1.3.4	Calculation of Nonequilibrium Ionization Rate in Low-Voltage Arc Discharge.	283
	I.P. Stakhanov	
4.1.3.5	Ionization in Plasma with Maxwellization of Free Electrons. Calculation of the Rate of Ionization in Cesium Plasma	284
	F.G.Baksht, B.Ya. Moizhes and V.A. Nemchinskii	
4.1.3.6	The Saha Equation in the Debye-Huckel Approximation	285
	L.S. Klein and J.L. Jackson	
4.1.3.7	The Effect of Heavy-Particle Collisions on Ionization Equilibrium in Optically Thin and Weakly Ionized Plasmas	286
	H. Shirrmeister	
4.1.4	Equilibrium and Nonequilibrium Effects II	
4.1.4.1	Electron Pressure and Temperature in Thermal Plasmas	287
	W. Bögershausen, R. Diermeier and H. Kremp	
4.1.4.2	Of the Possibility of Equilibrium Between Two Plasma Domains of Different Temperatures in Electric Field.....	288
	B.M. Bolatovskii, A.V. Gurevich and E.D. Mikhilchi	
4.1.4.3	On Heating of Light Gas in a Pulsed Gas Discharge After Additions of Heavy Impurity Ions	289
	A.P. Vasiljev and T.I. Filippova	
4.1.4.4	Importance of the Collisional Mechanisms in a Non-Equilibrium Cesium Plasma.....	290
	M. Cheret, M. Pimbert, B. Sayer, J. Berlande and C. Manus	
4.1.4.5	Investigation of Relaxation Properties of the Non-Isothermal Plasma	291
	D. Novichkov	
4.1.4.6	Diagnostics of Physical Properties of Plasma Generated in Combustion Process.....	292
	Z. Jasicki and B. Zaporowski	
4.1.5	Basic Hydrodynamic Phenomena	
4.1.5.1	Boundary Structure Between a High Speed Plasma Flow and a Dipole Field .	293
	L.R. Danielsson, G.H. Kasai and R.W. Waniek	
4.1.5.2	Growing Wave and Instability Criteria for Hot Plasmas.....	294
	H. Derfler	
4.1.5.3	Energy Loss of Charged Particles in a Plasma	295
	K.C. Hines and D.J. Sigmar	
4.1.5.4	Cascade Theory of Plasma Turbulence in a Strong Magnetic Field	296
	C.M. Tchen	
4.1.6	Miscellaneous	
4.1.6.1	Steady Flow Around a Thin Body in a Rarefied Plasma	297
	V.I. Karpman	
4.1.6.2	Particle Motion in a Travelling Wave Near Cyclotron Resonance	298
	D.C. Schram	
4.1.6.3	Influence of the Azimuthal Quantum Number of the Hydrogen Atom on the Lowering of its Ionization Potential.....	299
	L. Herman, A. Levy and Nguen Hoe	
4.2.	TRANSPORT PROCESSES	
4.2.1	General Transport Equations	
4.2.1.1	Transport Characteristics of Partially Ionized Gases.....	300
	D. Kelleher and W.L. Everett	

4.2.1.2	Non-Linear Theory of Moving Striations	301
	H. Bender and K.G. Müller	
4.2.1.3	Trends in Viscosity of a Gas Ionized by Radioisotope Emissions.....	302
	H. August	
4.2.1.4	Energy Distribution Function for Helium.....	303
	S.G. Elkomoss	
4.2.2	Transport Coefficients	
4.2.2.1	Convergent Transport Coefficients of Fully and Partially Ionized Gases	304
	A.R. Hochstim	
4.2.2.2	A New Approach for Partially Ionized Gases.....	305
	J.T. Yen	
4.2.2.3	Transport Properties of Thermally Ionized Air.....	306
	P.P. Kulic and V.G. Panevin	
4.2.2.4	Experimental Testing of the Electrons Transport Process of Plasma Moving in a Magnetic Field	307
	A. Kordus	
4.2.2.5	Plasma Properties and Collision Cross Sections from Arc Measurements.....	308
	W. Hermann	
4.2.3.	Electrical and Thermal Conductivity	
4.2.3.1	A New Method for Computing the Electrical Conductivity of Weakly Ionized Gases	309
	R.S. Devoto and C.P. Li	
4.2.3.2	Convergence of the Approximations to the Electrical Conductivity of Helium and Xenon.....	310
	R.S. Devoto	
4.2.3.3	Report on Ohm's Law for Partially Ionized Plasma in E, H-Fields intersected at High Diffusion Velocities.....	311
	E.P. Vulin, N.B. Starinskaya and M.F. Shirokov	
4.2.3.4	Equilibrium and Non-Equilibrium Conductivity in an Argon- Cesium Plasma with Nitrogen Impurities.....	312
	J. Bernard and E. Labois	
4.2.3.5	Magnetic Field Measurement of Electron Thermal Conductivity and Electron- Atom Cross-Section on Caesium Plasma	313
	N. Gerasimov, B. Stefanov and L. Zarkova	
4.2.3.6	Conductance of Supercritical Cesium Gas.....	314
	V.A. Alekseyev	
4.2.3.7	Properties of the H ₂ - Plasma up to 24000° K.....	315
	U. Plantikow and S. Steinberger	
4.2.3.8	Properties of the Nitrogen Plasma up to 25,000° K.....	316
	E. Schade	
4.2.3.9	Study of Turbulent Ohmic Resistance and Plasma Oscillations in a Strong Electric Field	317
	B.A. Demidov, N.I. Elagin, S.D. Fanchenko and D.D. Ryutov	
4.2.4	Normal Diffusion	
4.2.4.1	Diffusion of Charged Particles of Decay Plasma in Different Gases.....	318
	V.V. Bulanin, A. P. Zhilinsky and V.I. Smirnov	
4.2.4.2	Density Fluctuations and Diffusion in a Plasma.....	319
	C.K. McLane, G.S. Mills and T. Tsukishima	
4.2.4.3	A Diffusion Time-of-Flight Analysis of Laser Beam Produced Caesium Ions...	320
	I. Popescu and N. Niculescu	
4.2.4.4	Properties of Low Pressure Electron Drift Current Inferred from Pre-Drift Streaming Conditions.....	321
	W.A. Janos	
4.2.5.	Ambipolar and Anomalous Diffusion	
4.2.5.1.	Nonstationary Ambipolar Diffusion in Cylindrical Geometry	322
	G. Waidmann	

4.2.5.2.	Anomalous Diffusion of an Afterglow Plasma.....	323
	T. Dodo	
4.2.5.3.	Space Charge Buildup in Ambipolar Diffusion	324
	L.H. Holway, Jr.	
4.2.5.4	Cross-Field Diffusion of Plasma Filaments	325
	H.S. Robertson	
4.2.5.5	Enhanced Plasma Transport in Low-Pressure, High-Frequency Discharges.....	326
	E.J. Powers and P.B. Mumola	
4.2.5.6	Oscillations and Transport in the Reflex Discharge.....	327
	K.I. Thomassen	
4.3.	WAVE PLASMA INTERACTIONS	
4.3.1.	General Theory and Electrostatic Waves	
4.3.1.1	Velocities of Electromagnetic Waves in Plasma	328
	W.L. Bohn	
4.3.1.2	Quasilinear Propagation of E.M. Fields in a Warm Slightly Ionized Magneto-Plasma.....	329
	P. Caldirola, O. De Barbieri and C. Maroli	
4.3.1.3	A Numerical Method for Solving the Dispersion Relation for Drift Instabilities in a Two Component Plasma.....	330
	P. Bassanini, C. Cercignani and F. Sernagiotto	
4.3.1.4	Visco-Thermal Effects on Dispersion and Damping of Electron Waves near the Plasma Frequency.....	331
	R.L. Moore	
4.3.1.5	High Frequency Electrostatic Drift Waves in a Partially Ionized Gas	332
	C.N. Lashmore-Davies	
4.3.1.6	Dynamic Potentials in Gyrotropic Plasmas	333
	V. Bevc	
4.3.1.7	Spatial Landau Damping in Stationary and Moving Plasma Streams	334
	A. Reddish, I.A. Snowden and M. Eden	
4.3.1.8	Experimental Verification of Landau's Dispersion Relation	335
	H. Derfler and T.C. Simonen	
4.3.2	Electromagnetic Waves in Cylindrical Columns	
4.3.2.1	Excitation of Electromagnetic Waves on Plasma Columns.....	336
	K.C. Gupta and A. Singh	
4.3.2.2	Excitation of Bernstein Waves in a Homogeneous Low-Temperature Plasma Cylinder	337
	W. Schuurman and M.P.H. Weenink	
4.3.2.3	Self Excited Oscillation of a Magnetized Plasma Enclosed in a Conducting Cylinder	338
	F.R. Crownfield, Jr.	
4.3.2.4	Propagation Along a Plasma Column Cavity Resonances.....	339
	J.P. Jouineau and Ph. Leprince	
4.3.2.5	On the Experimental Investigations of the Non-Linear Effects in a Bounded Plasma.....	340
	B.I. Ivanov	
4.3.2.6	Investigation of Longitudinal Waves Near the Cyclotron Harmonics.....	341
	S. Gruber and G. Bekefi	
4.3.2.7	Anomalous Skin Depth in a Gaseous Plasma	342
	M.J. Kofoed	
4.3.2.8	An Experimental Study on the Anomalous Skin Effect.....	343
	E. Zilli	
4.3.2.9	Anomalous Attenuation of Surface Waves on Plasma Column	344
	Y. Akao, Y. Ida and T. Oike	
4.3.3	Miscellaneous Electronic Waves	
4.3.3.1	Electromagnetic Waves in Inhomogeneous Plasma Layers	345
	V.B. Gildenburg, I.G. Kondrat'ev and M.A. Miller	

4.3.3.2	Antenna Characteristics in Plasma	346
	A.A. Andronov	
4.3.3.3	Theory of Skin-Effect in Electrode-Bound Discharges	347
	D.D. Ryutov	
4.3.3.4	Variational Approach to the Plasma Capacitor Problem.....	348
	C. Cercignani, C.D. Pagani and G. Tironi	
4.3.3.5	On a Second Series of Temperature Resonances in a Plasma Slab with a Non-Symmetric Inhomogeneous Density Profile.....	349
	J.C.J. Nihoul	
4.3.3.6	Helical Instabilities in Atmospheric Magnetoplasmas	350
	K.V. Narasinga Rao and R.L. Taylor	
4.3.4	Pseudo-Acoustic Waves	
4.3.4.1	Attenuation and Dispersion of Longitudinal Waves in Viscous, Partly Ionized Gases.....	351
	D. Kahn	
4.3.4.2	Theory of Ion-Acoustic and Drift Waves on a Positive Column in a Magnetic Field.....	352
	H.N. Ewald, S.A. Self and F.W. Crawford	
4.3.4.3	Computations and Experiments for Ion Acoustic and Drift Waves on a Positive Column in a Magnetic Field.....	353
	S.A. Self, H.N. Ewald and F.W. Crawford	
4.3.4.4	Excitation of Drift Oscillation in a Slightly Ionized Gas	354
	I.S. Baikov and A.A. Rukhadze	
4.3.4.5	Ionic Sound Waves in the Positive Column of a Low-Pressure Discharge	355
	A.A. Zaitsev and B.N. Shvilkin	
4.3.4.6	Propagation of Ion Waves in a Plasma Flow Towards a Wall.....	356
	A. Cavaliere, F. Engelmann and A. Sestero	
4.3.4.7	Landau Damping of Ion-Acoustic Waves Produced by a Light Contaminant....	357
	I. Alexeff, W.D. Jones and D. Montgomery	
4.3.5	Miscellaneous Ionic Waves	
4.3.5.1	Low Frequency Wave Propagation in a D.C. Plasma Column.....	358
	J.J. Purcell and K.W.H. Foulds	
4.3.5.2	Propagation of Large Amplitude Alfvén Waves.....	359
	R.C. Cross and C.N. Watson-Munro	
4.3.5.3	Compressional and Torsional Wave Measurements in a Decaying Hydrogen Plasma.....	360
	R.C. Cross and J.A. Lehané	
4.3.5.4	Noise Emission of Electrodeless Ring Discharges with Static Magnetic Field...	361
	H. Schlüter	
4.3.5.5	Investigation of Plasma Heated by Fast Magnetoacoustic Wave with Large Amplitude	362
	M.P. Vasil'ev, L.I. Grigor'eva, A.V. Longinov. B.I. Smyrdov and V.V. Chechkin	
4.3.5.6	Ion Drift Wave Transmission in a Quadrupole	363
	H.G. Voorhies and T. Ohkawa	
4.3.6.	General Theory of Beam Plasma Waves and Synthesized Plasma	
4.3.6.1	Some Studies Concerning Synthesized Plasmas	364
	J.H. Bonnal, Y. Chavy, G. Manus and G. Spiess	
4.3.6.2	Electron Temperature Dependence of Ion Beam Interaction with a Bounded Magnetized Plasma	365
	G.J. Brakenhoff, H.J. Hopman and J. Kistemaker	
4.3.6.3	Investigation of Collective Interactions in a System of Neutralized Ion Beams Propagating Along Magnetic Field.....	366
	M.D. Gabovich, I.M. Protsenko, V.N. Tovmachenko and V.N. Kolochko	
4.3.6.4	The Thermalization of Electrons in the Short Arc Plasma in Cesium Vapour..	367
	N.D. Morgulis, Yu.P. Korchevoi and D.Ya. Dudko	

4.3.6.5	Power Dissipated — or Generated — by the Different Modes Excited in a Plasma.....	368
	P. Rolland	
4.3.6.6	A Study of Collisional Effects on Hydrodynamical Beam Instabilities	369
	B. Milic	
4.3.6.7	Experimental Research of Fast Ion Being Generated in Low Pressure Plasma-Beam Discharges.....	370
	A.K. Berezin, G.P. Berezina, L.I. Bolotin and Ya.B. Fainberg	
4.3.6.8	Electron Guns for Beam-Plasma Experiments.....	371
	J. Gowar, A. Stevens, K.G. Cook and A. Reddish	
4.3.6.9	A Dense Beam of Energetic Electrons in a Discharge.....	372
	H.M. Epstein, W.J. Gallagher, P.J. Mallozzi and M.R. Vanderlind	
4.3.6.10	Electron-Ion Oscillations and the Limiting Currents in an Electron Beam Passing Through a Rarefied Gas.....	373
	M.V. Nezlin	
4.3.7	High Frequency Fields and Nonlinear Effects in Plasma Beam Systems	
4.3.7.1	Non-Linear Theory of Beam-Plasma Amplification	374
	R. Leven	
4.3.7.2	Microstructure of High Frequency Fields in Non-Equilibrium Plasma	375
	V.A. Lavrosky, V.M. Deyev, S.A. Rogashkov, Yu.G. Yaremeno and I.F. Kharchenko	
4.3.7.3	Electron Distribution Function and Wave Transformation in Non-Equilibrium Plasma.....	376
	E.G. Shustin, V.P. Popovitch and I.F. Kharchenko	
4.3.7.4	Beam-Plasma Instabilities in a Uniform Magnetic Field.....	377
	M. Seidl and P. Sunka	
4.3.7.5	Absorption of Beam-Generated Waves in an Inhomogeneous Plasma.....	378
	M. Seidl and P. Sunka	
4.3.7.6	Correlated Microwave Radiation Along a Beam-Generated Plasma in a Magnetic Field	379
	P.V. Bradford, T.C. Marshall and S.P. Schlesinger	
4.3.7.7	Experimental Research of Excitation Processes in Plasma of Intensive Regular and Stochastic Oscillations	380
	I.A. Bezyazchny, A.K. Berezin, L.I. Bolotin and Ya.B. Fainberg	
4.3.7.8	Wave Propagation and Interaction with an Electron Beam in a Plasma Column.	381
	A. Bouchole and M. Weinfeld	
4.3.7.9	Experimental Studies of Nonlinear Phenomena in Plasma-Beam System	382
	S.M. Levitsky and I.P. Shashurin	
4.3.8	Cyclotron Oscillation in Beam Plasma Systems	
4.3.8.1	Excitation of Ion Cyclotron Oscillations and Ion Sound Waves in a Beam-Plasma System.....	383
	T. Matitti, H.J. Hopman and A. Vermeer	
4.3.8.2	Proof of Correlation Between High Frequency Ionization and the Cyclotron Instability	384
	H.J. Hopman and T. Matitti	
4.3.8.3	Excitation of Waves with Half the Ion Cyclotron Frequency in a System with a Reflected Ion Beam	385
	A. Borer	
4.3.8.4	Some Studies of Whistler Mode Amplification	386
	J.A. Tataronis and F.W. Crawford	
4.3.8.5	Investigation of Characteristics of S.H.F. Field Being Excited by an Electron Beam in Plasma.....	387
	I.E. Saharov	
4.3.8.6	Experimental Investigation of Radiation of S.H.F. Waves from Plasma Being Penetrated by a Beam of Electrons.....	388
	I.E. Saharov	
4.3.8.7	Cyclotron Interaction of Electron Beam with R.F. Plasma Oscillations	389
	A.I. Yermakov and N.I. Nazarov	

4.3.8.8	Excitation of Harmonics $n \omega_e/2$ in a Counter-Streaming Electron Beam System.....	390
	G. Müller and G. Landauer	
4.3.9	Acceleration and Heating of Plasmas by Progressive Waves	
4.3.9.1	Shock Waves and Particle Acceleration in a Stationary Plasma Flow.....	391
	E. Canobbio and U. Finzi	
4.3.9.2	Space Charge Effects on Particle Motion in A.H.F. Plasma Device	392
	A. Buffa	
4.3.9.3	Doppler Shift of a Ar Ion Line in a Plasma Beam Accelerated by Circularly Polarized Travelling Wave.....	393
	P. Bouchardy, A. Buffa, M. Clement, L. Dupas and J. Leroy	
4.3.9.4	Instability of Plasma Stream in the Field of an H_{01} Travelling Wave.....	394
	K.F. Sergeichev and I.R. Gekker	
4.3.9.5	Interaction of H_{11} Wave with a Plasma Stream Close to Critical Density.....	395
	I.R. Gekker, K.F. Sergeichev and V.E. Trophimov	
4.3.10	Transformation of Waves I	
4.3.10.1	Particle Collisions and Nonlinear Interactions of Waves in a Plasma	396
	V.G. Machan'kov and W.N. Tsytovich	
4.3.10.2	Nonlinear Interaction of Waves in Plasmas.....	397
	K. Sauer and G. Wallis	
4.3.10.3	Linear Propagation and Non Linear Processes in a Cylindrical Plasma Column in a Strong Magnetic Field.....	398
	J. Olivain and M. Perulli	
4.3.10.4	Brillouin Scattering of Waves in an Isotropic Weakly Ionized Plasma	399
	Ts.D. Loladze	
4.3.10.5	Microwave Scattering on Plasma Waves	400
	B. O'Brien	
4.3.10.6	Wave Interactions in a P.I.G. Discharge Plasma	401
	S. Bliman, A. Bouchoule and M. Martinez	
4.3.10.7	Non Linear Interaction of Electromagnetic Waves in a Gaseous Plasma	402
	E. Leiba	
4.3.11	Transformation of Waves II	
4.3.11.1	The Anomalous Radiation with the Current Instability Development in a Partly Ionized Plasma.....	403
	M.A. Livshitz and W.N. Tsytovich	
4.3.11.2	Quasilinear Transformation of Waves in an Inhomogeneous Plasma and the Role of Nonlinear Effects.....	404
	K. Jungwirth, A.B. Mikhailovsky and J. Václavík	
4.3.11.3	Nonlinear Collective Model for Plasma Echoes.....	405
	R.W. Gould and F.A. Blum	
4.3.11.4	Excitation of Longitudinal Plasma Resonances in Magnetized Nonuniform Plasma Slabs	406
	H.H. Kuehl	
4.3.11.5	Theory and Experiments of Weak Nonlinear Interactions at Resonance in a Cylindrical Cold Plasma	407
	A.M. Messiaen and P.E. Vandenplas	
4.3.12	Instabilities, Turbulence and Miscellaneous Nonlinear Effects	
4.3.12.1	The Electromagnetic Properties of the Plasma in the Intensive Radiation.....	408
	W.N. Tsytovich	
4.3.12.2	Self-Focusing of Electromagnetic Waves in a Partially Ionized Plasma.....	409
	A.G. Litvak	
4.3.12.3	Relaxation Processes in Turbulent Plasma	410
	L.I. Rudakov	
4.3.12.4	Charged Particle Energy Loss in a Weakly Nonlinear Plasma	411
	N.P. Giorgadze and D.G. Lominadze	

4.3.12.5	Spectra of Ion-Sound Waves at the Current Instability in the Partially Ionized Plasma.....	412
	V.A. Liperowsky	
4.3.12.6	Quasi-Linear Theory in a Magnetoactive Vlasov Plasma.....	413
	T.H. Nguyen and G. Paquette	
4.3.12.7	Some Experimental Results on Non Linear Wave Plasma Interaction	414
	R. Frank	
4.3.13	Q-Machines	
4.3.13.1	Study of Electrostatic Models in Alkali Metal Plasma	415
	A.A. Ivanov, Ya.R. Rakhimbabayev, V.D. Rusanov and S.S. Sobolev	
4.3.13.2	Investigation of Interaction of Electron-Ion Beam with Potassium Plasma.....	416
	A.M. Kudryavtsev and N.S. Buchelnikova	
4.3.13.3	Investigation of Ion-Cyclotron Instability in Potassium Plasma	417
	N.S. Buchelnikova, R.A. Salimov and Ju,I. Eidelman	
4.3.14	Ionization Waves	
4.3.14.1	General Linearized Magnetohydrodynamic Theory of Wave Propagation in Plasmas with Time-Dependent and Relaxing Degree of Ionization.....	418
	E. Kirsten and G. Vojta	
4.3.14.2	A New Mechanism for Low-Frequency Oscillations in Partially Ionized Gases..	419
	J. Roth	
4.3.14.3	General Dispersion Curve for Different Types of Ionization Waves	420
	L. Pekárek	
4.3.14.4	The Influence of HF Field on Ionization Waves in Low Temperature Plasma.	421
	J.P. Novák, M. Sicha and V. Veselý	
4.3.14.5	Positive Forward-Wave Moving Striations in the Diffuse Mode Discharge Plasma	422
	O. Stirand and L. Láska	
4.4.	PLASMA RADIATION	
4.4.1	Microwave Emission	
4.4.1.1	Cyclotron Echoes with Arbitrary Pulse Shape	423
	R.S. Harp, R.L. Bruce and F.W. Crawford	
4.4.1.2	Cyclotron Echoes.....	424
	D.E. Kaplan, R.M. Hill and G.F. Herrmann	
4.4.1.3	Electron Cyclotron Harmonic Radiation from the Cathode Region of a Glow Discharge	425
	F. Leuterer	
4.4.1.4	Influence of the Kadomtsev Instability on the Cyclotron Harmonic Radiation from a Plasma.....	426
	G. Janzen	
4.4.1.5	Microwave Emission from Plasma in an Inhomogeneous Magnetic Field	427
	L.A. Dushin, Yu.K. Kuznetsov and O.S. Pavlichenko	
4.4.1.6	Microwave Emission from Hot Electron Plasma.....	428
	H. Ikegami, H. Ikezi, K. Takayama, S. Tanaka and M. Hosokawa	
4.4.1.7	Microwave Noise from Nonisothermal, Collision-Free Laboratory Plasmas	429
	H. Prinzler	
4.4.1.8	Spectral Peculiarities of Low Temperature Plasma Microwave Radiation.....	430
	A.E. Basharinov, V.M. Polyakov and V.G. Testov	
4.4.1.9	The Effect in the Microwave Regime of Inelastic Collisions on the Absorption Emission and Conductivity of Slightly Ionized Plasmas	431
	P.J. Mallozzi and R.T. Castle	
4.4.1.10	Negative Absorption of Cyclotron and Gyromagnetic Radiation in a Plasma Without Collective Effects	432
	J. Heyvaerts	

4.4.2	Broadening and Shift of Spectral Lines	
4.4.2.1	Semi-Empirical Formulas for the Electron Impact Broadening of Isolated Spectral Lines in Plasmas.....	433
	H.R. Griem	
4.4.2.2	Stark Broadening Theory in the Transition Region Between the Quasistatic and the Collision Dominated Part of the Line Wing.....	434
	D. Voslamber	
4.4.2.3	On the Asymmetry of the Hydrogen Lyman- α Line Profile in a Dense Plasma	435
	G.V. Sholin	
4.4.2.4	Combined Stark and Zeeman Effect of Hydrogenic Transitions in Neutral Helium	436
	C. Deutsch, H.W. Drawin, L. Herman and Hoe-Ngyuen	
4.4.2.5	Stark-Broadening of Hydrogen Balmer Lines H_{α} , H_{β} and H_{γ} in the Presence of Strong Magnetic Fields in Plasmas.....	437
	H.-W. Drawin, H. Henning, L. Herman and Hoe-Ngyuen	
4.4.2.6	A Comparison of Stark Broadened H_{α} and H_{β} Half-Widths	438
	J.W. Birkeland, J.P. Oss and W.G. Braun	
4.4.2.7	Experimental Stark-Widths of NII-Lines	439
	H.F. Berg, W. Ervens and B. Furch	
4.4.2.8	Broadening and Shift of Spectral Lines of ArI and ArII in Electric Spark Plasma Under Pressures Higher than 1 atm.	440
	I. Iova	
4.4.2.9	Spectroscopic Investigation of the Energy Distribution of Hydrogen Atoms in a Glow Discharge.....	441
	Z. Sternberg and M. Kajzer	
4.4.3	Miscellaneous Studies of Spectra and Radiation	
4.4.3.1	On Optimum Parameters of an Arc as a Source of Ionizing Radiation.....	442
	V.A. Abramov and V.I. Kogan	
4.4.3.2	On the Relation Between Different Types of Radiative Transfer in Plasmas....	443

4.5.2.5	Experiments for Investigating the Interaction Between Shock Waves and Stationary Magnetic Fields.....	471
	H. Klingenberg	
4.5.2.6	Electron Precursors of Strong Shocks in Argon and Helium Observed by Optical Interferometry.....	472
	W. Böttcher, H. Dammann, G. Kleist and U. Kogelschatz	
4.5.2.7	Experiment on Shock Wave Plasmas by Laser Light Scattering and Microwave Techniques.....	473
	C. Yamanaka, M. Yokoyama, S. Nakai and Y. Izawa	
4.5.2.8	Blast Waves Originating in the Ionized Core of a Laser Spark in Air.....	474
	E. Panarella and P. Savić	
4.5.2.9	On the Interaction Between a Plasma Stream and a Neutral Gas.....	475
	L.R. Danielsson and G.H. Kasai	
4.5.2.10	Characterization of Re-Entry Plasmas in Hypersonic Hot-Shot Wind Tunnels ..	476
	D. Compard and J. Dorey	

5. DIAGNOSTIC TECHNIQUES

5.1. Probe Techniques

5.1.1.	Investigation of Non-Isothermal Plasma Flows by Electronic Probes.....	477
	M.F. Shirokov, V.A. Kotelnikov and J.V. Kubarek	
5.1.2	Plasma Parameter Measurements by Means of Multi-Electrode Probes.....	478
	E.A. Bakulin, M.M. Bredov, E.V. Stepin and V.V. Shcherbinina	
5.1.3	Continuous Determination of Electron Temperature by Use of Double Probe Method and Analog Computing Technique	479
	J. Pahor and A. Moljk	
5.1.4	Comparison of Three Devices for Measuring the Second Derivative of a Langmuir Probe Curve.....	480
	S.C.M. Luijendijk and J. van Eck	
5.1.5	Comparison of Microwave- and Probe Methods in Measuring Electron Densities in the Positive Column of a Helium Discharge.....	481
	H.M.J. Kinderdijk and J. van Eck	

5.2. Probe Characteristics

5.2.1	Collision Dominated Probe Theory.....	482
	K.G. Müller and P. Wahle	
5.2.2	Calculation of the Electron Current to a Positive Spherical Probe.....	483
	J. van Eck and H.M.J. Kinderdijk	
5.2.3	The Interpretation of Electrostatic Probe Responses in Shock Tubes	484
	S.W. Radcliffe and R.M. Hobson	
5.2.4	A Probe Characteristic Taken in a Plasma Formed by Fast Ion Injection	485
	B. Brandt, H.M.J. Kinderdijk and A. Vis	
5.2.5	Electron Energy Distributions in Radio Frequency Discharges	486
	R.S. Hemsworth and N.D. Twiddy	
5.2.6	Ion Study in a Caesium Plasma by a Grid Probe.....	487
	R. Haug, M. Felden and D. Schirmann	
5.2.7	The Plane Resonance Probe at Ionic Plasma Frequencies	488
	A. Royer and G. Paquette	
5.2.8	A Simplified Theoretical Model for the Ion Resonance Probe.....	489
	J. Virmont	

5.3 Microwave and Radio Frequency Propagation Techniques

5.3.1	Diagnosis of a Homogeneous Magnetoactive Plasma by Shift of Totally Reflected Beams	490
	H. Schilling	
5.3.2	A Plasma Density Measurement Method Employing Extraordinary Wave Propagation.....	491
	G. Ichtchenko	
5.3.3	Whistler Mode Measurements of the Electron Energy Distribution.....	492
	M. Fischer	
5.3.4	Dielectric Properties of a Plasma in Magnetic Field and Electron Density Determination.....	493
	V. Agnello, N. Barassi and P. Caldirola	
5.3.5	Interaction of the Electromagnetic Waves with the Restricted Flows of Plasma	494
	S.N. Stolyarov	
5.3.6	A New Method for Measuring Electron Densities in Plasma and Shock Waves	495
	J. Shtricker and W. Low	

5.4. Microwave and Radio Frequency Probe Techniques

5.4.1	Microwave Methods for Space Distribution of Electron Temperature in Plasma.....	496
	Yu.N. Dnestrovsky	
5.4.2	A Single-Sideband Microwave Interferometer	497
	J.D.E. Beynon and J.R. Wallington	

5.4.3	Diagnostics of Low-Density Plasmas by Means of a 4-mm Lecher Wire Micro wave Interferometer.....	498
	J. Polman, T.J. Philippo and J.E. van der Werf	
5.4.4	A Note to the Electron Density Measurement by Means of Cylindrical Cavity TM ₀₁₀ at cm Wavelengths.....	499
	P. Lukác	
5.4.5	On the Effect of a Finite Electron Temperature and of a Magnetic Field on the Resonance of Some Types of R.F. Probes.....	500
	D. Lepechinsky	
5.4.6	A Study of the Influence of Boundary Conditions on the Impedance of a Plasma Sheath.....	501
	A.F. Alexandrov and A.A. Kuzovnikov	
5.4.7	The Characteristics of Probe Noise in a Quiescent Plasma	502
	H. Ikezi, K. Takayama and M. Fujiwara	
5.4.8	Demodulation of Amplitude Modulated RF Waves in Plasma at Resonance	503
	N. Kawashima	
5.5.	Spectral Line Techniques	
5.5.1	A Method for the Rapid Determination of Electron Density and Temperature	504
	R. Vanhauwermeiren	
5.5.2	Determination of Electron Density in Nonthermal Plasmas from the Intensity Ratio of Two Spectral Lines of Ion NV.....	505
	S. Suckewer	
5.5.3	Absolute Radiation Intensity Measurements in the Vacuum UV by a Special Absorption Method	506
	M. Kaufmann	
5.5.4	Curves of Growth for Lines with Hyperfine Structure	507
	C. v. Trigt	
5.6	Laser Techniques	
5.6.1	Holographic Investigation of Plasma.....	508
	A.N. Zaidel and Yu.I. Ostrovskii	
5.6.2	Diagnostic Methods Using Holography.....	509
	F.C. Jahoda	
5.6.3	Measurements of Electron Density in Plasmas Produced by Shock Waves with a Small Laser	510
	E. Jannitti and G. Tondello	
5.6.4	Optical Interferometry.....	511
	C.D. David and P.V. Avizonis	
5.6.5	A Sealed-off Michelson Type CO ₂ Laser for Diagnostic Studies of Gaseous Plasmas	512
	W.J. Witteman	
5.6.6	A New Approach to Localized Diagnostics	513
	R.M. Measures	
5.7	Beam Probing	
5.7.1	Application of Active Corpuscular Diagnostics in the Study of Plasma Compression	514
	V.V. Afrosimov, I.P. Gladkovski and A.I. Kislyakov	
5.7.2	Hydrogen Plasma Diagnostics by a Three-Component Fast Neutral Particle Beam (H [°] , H ₂ [°] and He [°])	515
	N.I. Alinovskiy, Ju.E. Nesterikhin and B.K. Paktusov	
5.7.3	The Use of the Interferometric Method in the Active Corpuscular Plasma Diagnostics	516
	L.I. Krupnik and N.G. Shulika	
5.7.4	Measurement of Plasma Density Fluctuations Using an Energetic H ⁺ ₂ Beam .	517
	R.L. Hickock and F.C. Jobses	
	Electron Beam	518
	S.V. Yadavalli	

5.7.5	A Method of Estimating the Conductivity of a Dense Plasma, Employing an Electron Beam	518
	S.V. Yadavalli	
5.8	Electromagnetic Wave Scattering	
5.8.1	On the Scattering of Light by Plasma in the Presence of Collisions	519
	A.F. Alexandrov, V.E. Mitsuk and J.B. Timofeev	
5.8.2	Brownian Motion of Electrons in a Plasma	520
	J.H. Williamson	
5.8.3	Relativistic Corrections to the Light Scattering Spectrum of a Plasma.....	521
	O. Theimer and J.E. Sollid	
5.8.4	Computed Profiles for Electromagnetic Radiation Scattered from Nonuniform Cylindrical Plasma Column	522
	B.V. Stanić and E.R. Wooding	
5.8.5	Limits of Validity of the Born Approximation in Microwave Scattering from Turbulent Plasmas	523
	V.L. Granatstein and S.J. Buchsbaum	
5.8.6	Cooperative Scattering in a Laser Produced Plasma	524
	H. Weichel and P.V. Avizonis	
5.8.7	Microwave Scattering by Turbulence in a Laboratory Plasma	525
	P.E. Stott	
5.8.8	Electromagnetic Waves Scattering by an Arc Discharge	526
	Nguyen Trong Khoi	
5.8.9	Two Microwave Cavity Devices for the Study of Wave Scattering.....	527
	D. Bize, T. Consoli, L. Slama and M. Zymanski	
5.9	Other Diagnostic Methods	
5.9.1	Experimental Investigation of Errors in Magnetic Probe Measurements.....	528
	W. Böttcher, H. Dammann, G. Kleist and U. Kogelschatz	
5.9.2	Transmission Measurements of Electrostatic Waves in the GHz-Frequency Range Along an Electron Density Gradient	529
	M. Tutter	
5.9.3	To the Relaxation Method of Diagnostics of Weakly Ionized Plasma	530
	K.S. Golovanivsky	
5.9.4	On the Diagnostics of the Dense Plasma by Means of the Gamma-Ray Resonance Scattering.....	531
	I.F. Isaev and L.P. Kudrin	
5.9.5	Stripping Analyzer-Secondary Emitter for 50-300 eV Neutral Hydrogen Detection	532
	R.G. Tuckfield, Jr. and H.H. Fleischmann	
5.9.6	Gasdynamic Method of the Temperature Measurement Behind the Shock Wave.	533
	Z.A. Pietrzyk	
5.9.7	A Method for Direct Measurement of the Heat Transferred to the Neutral Gas in Weakly Ionized Gases.....	534
	K. Eidmann	

6. ION AND PLASMA SOURCES

6.1	Ion Sources	
6.1.1	Relations Between the Properties of Ion Beam and Parameters of Emissive Plasma, in a Duoplasmatron with Expansion-Cup	535
	G. Gautherin	
6.1.2	Multimomentum Focused 650-mA Molecular Ion Source	536
	G.W. Hamilton, J.L. Hilton and J.S. Luce	
6.1.3	Crossed Fields and High Anode Voltage Ion Source	537
	A. Bariaud, J. Druaux and F. Prévot	
6.1.4	Discharge in Gas Desorbed from the Anode in a Crossed Field Annular Ion Source	538
	R. Becherer, A. Bariaud and F. Prévot	

6.1.5	Ion Extraction at Low Voltage.....	539
	B.D. Nagchaudhuri, D.K. Bose and S.N. Sengupta	
6.1.6	Plasma Sheath at Ion Extraction in the Presence of Secondary Electrons	540
	B.S. Marsićanin	
6.1.7	A Collisionless Ion Beam Plasma	541
	I.L. Freeston and A.M. Zvody	
6.2	Plasma Jets	
6.2.1	Heat-Transfer in a Nitrogen Plasma Jet	542
	W. Rother	
6.2.2	Self-Magnetic Acceleration in Arc-Jet Engines	543
	H. Hügel	
6.2.3	Experimental Study of a Plasma Jet in an Axisymmetric Magnetic Field	544
	K. Ragaller	
6.2.4	Angular Velocity Profiles of a Rotating Argon Plasma-Jet	545
	M. -U. Beth, M.G. Kling, G. Nedder and W.L. Bohn	
6.2.5	The Determination of the Electron Density and Electron Temperature by Means of Microwaves on a MPD-Thruster	546
	J. Artmann, D. Goll and F. Künstler	
6.2.6	Measurement of Swirl in the Exhaust Jet of a Hall Current (MPD) Accelerator	547
	S. Krause	
6.2.7	Investigation of Stabilized Arc in the Gas Flow Channel.....	548
	G. Yu. Dautov, Yu.S. Dudnikov, M.F. Zhukov and G.M. Mustafin	
6.2.8	Investigation of Potential Gradients in Stabilized Arcs	549
	G.Yu. Dautov and M.I. Sazonov	
6.3	Various Plasma Sources	
6.3.1	Pig Plasma Source with Divertor Type Magnetic Field Configuration	550
	G. Horikoshi, T. Kuroda, K. Matsuura, A. Miyahara, M. Masuzaki and S. Nagao	
6.3.2	A Fully Ionized High Density Plasma Source of the TP-D	551
	K. Takayama, M. Otsuka, Y. Tanaka, K. Ishii and Y. Kubota	
6.3.3	Back Diffusion Plasma Source.....	552
	K. Takayama, H. Ikegami and S. Aihara	
6.3.4	A Discharge Tube Having Quiescent Positive Column	553
	K. Takayama, H. Ikezi and S. Miyake	
6.3.5	Electron Emission from the Low Pressure Discharge Plasma	554
	L.N. Vagin and L.G. Ivleva
